HANKOW.—Our advices reach to the 1st June. The market was opened on the 23rd May, by Messrs. Overweg and Co., who settled 4 chops for Russian account at tls. 31.5 to 32.2.5 per picul. Of these two chops only were generally considered fine, and much astonishment at the rates paid was manifested both by natives and foreigners. Business was suspended until the 25th, when 12 chops were settled at prices ranging from tls. 29 5 to 31.5, showing a fall of more than one tael from the prices paid two days previously. At this reduction a large business resulted, and with few exceptions the buying had become general at the date the steamer left, all the finest teas having been cleared off the market. Medium teas were in good supply, and teamen were anxious to quit these on somewhat easier rates. The quality of the crop was universally regarded as inferior to that of the past two seasons, the teas though flavoury being wanting in body and style. The necessary distinction in value between fine and fair Teas appeared to have been again neglected, but it was expected that on the subsidence of the opening excitement a considerable drop in the prices of these latter would take place. Arrivals to date were more than double those of last year, and settlements, in all 55,000 chests, had been proportionately large. 59,000 chests remained in stock, the bulk of the chops being only of medium quality. Supplies were coming down freely, and a large yield was expected. Quotations were:—Oopacks, finest, 30.0.0 to 31.5.0. equal 2s. 0½d. to 2s. 1½d. per lb. Ditto medium to fine, 26.0.0. to 29.5.0 equal 1s. 10d. to 2s. 0d. Oonams, fine to finest Oonfa, 25.0.0. to 28.0.0 equal 1s. 9d. to 1s. 11d.

KIUKIANG.—We have dates to June 2nd. The market for New Teas had been opened by the purchase of 513 half-chests Ningchow at Tls. 28½ (= 1s. 11½d.), leaving only about 400 chests tea on the market. Chest musters of Ningchow were daily expected, and the full chops would arrive in about ten days' time.

SILK.

SHANGHAI.—The warlike news to the 28th April, received by telegrams via Kiachta early in the fortnight, had some effect upon our market, but the arrival of the French mail with telegrams via Galle to the 9th May, announcing an adjustment of the political difficulties, caused a very active demand, and prices have since been forced up, hour by hour, until we close at the quotations given below. This excitement may be attributed to the many orders at high limits received from home, all of which it is to be hoped have been executed, and if so, we may shortly see lower prices ruling. Of true Classic Chop Silks, the arrivals have been very limited, say—150 bales of which 110 bales have found buyers, leaving 30 bales still on offer. The Silk market was opened on the 30th May, when about 100 bales of Chops Nos. 1, 2, and 3 Tsatlee were purchased at taels 525, 505 and 485 respectively. On the following day 50 bales of "Mai-foong" and "Hwa-foong" Tls. 500 to 480 per picul. Operations were not general until the 3rd inst., when about 60 bales of No. 1 Tsallee at 447½ per picul; and 20 bales of Karshing Taysaam at tls. 435 per picul for "Gnarling," and tls. 415 per picul for "Kinling" were sold; and since then the market has been very active and excited. The anxiety shown by foreigners to secure good parcels enabled the Chinamen to obtain extreme prices, and at the close of the mail, the advance upon opening rates is fully tls. 40 per picul. The transactions are estimated at 1,700 bales, 500 bales of which are going forward on native account. The arrivals from the interior amount to 2,200 bales and from Ningpo 20 bales have been received, and the unsold stock is said to be 500

Digitized by Google

bales, which will be added to daily, several parcels of Silk being close at hand. The new Silk is much superior to last season in every respect, with the exception of the size, which is decidedly full and coarse. Quotations: Tsatlee, Chops, No. I, tls. 555 to 565; do. do. No. 2, tls. 535 to 545; do. do. No. 3, tls. 515 to 525.

SILK.

YOKOHAMA.—The market for this staple may be considered as almost closed; arrivals have fallen to a minimum, and quality deteriorates daily. We have no No. 1 whatever, of any description, and have to give our quotations for "best on offer." For the best parcels of what silk is on sale, dealers are apparently firm, but the display of a real desire to do business quickly induces a reduction in their demands. A marked difference will be noticed in our quotations as compared with those of last mail; but at every rate which we quote business has been done. The prospects of the new crop, as far as we can judge at present, are very satisfactory. The weather has been most favourable for both eggs and leaf, and we expect to have musters of new silk before next mail.

CANTON.—The intelligence received, to the effect that political difficulties in Europe had been satisfactorily settled for the present, has caused a more cheerful feeling to prevail in our markets, and silk dealers have become very firm in their demands. A rumour has gained ground among them that the European crop is likely to be a very small one, and it is feared that a combination will be entered into to sustain present high rates. Soon after the departure of the last mail it became generally known that but little silk was to be expected from the first crop, prices in consequence advanced $20 per picul, and holders became very firm in their demands; the few parcels arriving from the country were taken at current rates, and our market is now cleared of all desirable kinds of silk. In re-reels a fair amount of business has been transacted during the fortnight at gradually increasing rates; we hear of settlements having taken place at $555 to 560 for second crop silk, and very large contracts are reported. The produce of the second crop will be placed in bulk on this market about the middle of this month; the yield is said to be a large one, but from the unfavourable weather recently experienced, we fancy that much injury has been done to it. Present stocks consist of 25 bales Tsaltees, 15 do. Loongkongs, and 40 do. Kowkongs, which are held for the extreme prices noted below. Quotations: Tsaltee No. 1, $540 to 545; laid down in London at 4s. 6d. exchange, equal 21s. to 21s. 4d; Loongkong No. 1, $525 to 530, equal 20s. 5d. to 20s. 9d.; Lacklow, $500 to 505, equal 19s. 7d. to 19s. 9d.; Re-reeled Cumchook, $555 to 560, equal 21s. 7d. to 21s. 10d.; Kowkong, $450 to 460, equal 17s. 7d. to 18s. 1d.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Newcastle, May 25, Wilhelmina Elise.

At SHANGHAI.—From Shields, May 24, Caller Ou; from London, 27, Sir Lancelot, Gossamer, Hoang Ho, Coulnakyle, Laurel; from New York, 28, Mary Whitridge; from Liverpool, 28, Maiden Queen; from Cardiff, 30, Anna Dorathea; from Liverpool, June 4, Ajax (str.)

At HONG KONG.—From London, May 30, Dora; from New York, 30, N. B. Palmer; from Cardiff, 30, Boanerges and Fair Leader; from Bremen, June 4, Lesmona; from Plymouth, 8, Falcon.

At MANILA.—May 23, from Hamburg, Voldadora; 23, from Glasgow, Ordalia; 25, from Liverpool, Trinidad; 27, from London, Ogono.

At SINGAPORE.—June 13, from Glasgow, Huntley Castle; 16, from Rotterdam, Johanna Antonia; 19, from Swansea, William Chandler; 19, from Glasgow, Edinburgh Castle; 20, from Liverpool, Lanercost.

At PENANG.—June 15, from London, Zingra; 15, from Boston, Borneo.

At BATAVIA.—June 10, from Glasgow, Priam and Annie Story.

DEPARTURES.

From YOKOHAMA.—May 17, for London, Lord Collingwood.

From SHANGHAI.—None.

From FOOCHOW.—For London, May 31, Maitland; June 1, Serica; 2, Taeping; 4, Fiery Cross; 5, Whiteadder; 8, Ziba; 9, Taitsing.

From HONG KONG and CANTON.—For London, June 7 Min; 2, Belted Will (from Macao); 4, Deerfoot (from Whampoa).

From MANILA.—June 1, for Cork via Zebu, Esmerald.

From SINGAPORE.—None.

VESSELS LOADING.

At YOKOHAMA.—For London, none; for New York, Havelock, Benefactress.

At SHANGHAI.—For London, Anglo-Saxon, City of Aberdeen, Elmstone Coulnakyle, Worcester, Gossamer, Isles of South, Peter Denny, Silver Eagle, Sir Lancelot, Minfell, Agamemnon, and Ajax (strs.).

At HANKOW.—Ada, Eliza Shaw, Challenger.

At FOOCHOW.—For London, Black Prince, Flying Spur, Ariel, Taewan (since reported as lost in the river), Yangtzee, all to sail in a few days.

At CANTON.—For London, Fakuan, Alma, Wemyss Castle, Niphon, Passe Partout.

At MANILA.—For London, Monarch; for Cadiz, Elena; for New York, Wild Rover, Daniel Marcy; for Boston, Pocahontas; for Liverpool, Hunilia, Mitchell.

At SINGAPORE.—For London, Thusnedda, Jean Meyer; for Liverpool and Glasgow, Edinburgh Castle.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and tea, £3 to £3 10s.; silk, £4 10s. To New York: £2 10s. to £3.

At SHANGHAI.—For London: For clippers the rate has declined from £5 to £4, owing to several arrivals. The vessels at Hankow get £6 10s. to £7.

At FOOCHOW.—For London: The rate for clippers £4, and the Oriel fills up at £4 10s. For Australia: £3 10s. to £3 15s.

At HONG KONG and CANTON.—For London: £3 10s., and following the Shumlee is reported chartered at £3. For New York: Nominal. Rice and coast charters are active.

At MANILA.—Tonnage is scarce, there being no vessel without employment, and the demand being good, £3 to £3 5s. per ton would be paid to load dry sugar for London or Liverpool. The Emerald has been taking up during the fortnight at £3 15s. per ton for 800 tons sugar, and 100 tons hemp to load at Cebu for Cork or Falmouth for orders, to discharge in United States.

At SINGAPORE.—Freights continue very firm for all voyages. The vessels on the London berth are fully engaged at £3 per ton all round, and it is probable next ship will demand a higher rate. The Edinburgh Castle has just taken the berth for Liverpool at £3 10s., and for the Clyde at £3 15s. per ton. Tonnage in the harbour is exceedingly scarce, and, with some demand for vessels, we are likely to see a continuance of high rates for some time to come.

At BATAVIA.—Tonnage continues most exceptionally scarce, in fact there are only one or two vessels, just arrived, and still discharging inward cargoes, that are open for charter. There are but few vessels expected from Holland, and we look for extreme rates all through this year. The Kosmopoliet II. has been fixed at f.82.50 per last, equal to fully £4 per ton E.I. Company's conditions, for Sugar and Coffee to Holland.

SHIPS' REPORTS.

HONG KONG.

The P. and O. Companys' steamer Sunda reports having left Shanghai on Friday, June 7th. Off the Light Ship exchanged colours with the British ships Lauderdale and John Banks, both vessels wished to be reported. Between Gutzluff and the Light Ship, passed the British steamer Cadiz bound up the river. Off the Namki Islands passed the British steamer Shaftesbury and H.M. S.S. Pearl steering to the Northward and Eastward. Experienced light N.E. winds and fine weather throughout the first part of the passage, latterly variable winds and hazy weather with passing showers.

The British ship Falcon reports having left Plymouth on February 18th, was 40 days to the equator, which was crossed in 22.30, after 15 days calms and light winds. Passed the meridian of the Cape 65 days out. Thence to Anjer 26 days, and 14 days up the China Sea, making in all 106 days. Off Anjer Point was boarded from the British ship Wild Deer, from London, bound to Shanghai, chief officer reported captain sick and had been sent on shore there, being unable to proceed in the ship, and she was to be sent on to her destination in charge of a pilot from Singapore.

The British ship Boanerges reports having left Cardiff, Nov. 30th. Experienced a succession of south and south-westerly gales for an entire month. No N.E. trades to speak of. Crossed the equator Jan. 19th in 25.48 W., thence moderate breezes and fine weather to the Cape, which was passed on Feb. 19th in 39.12 S. Strong south westerly gales and a continual succession of gales and calms. Tried the eastern passage, and managed to get as far as Timor Straits, where, although the wind was fair, the current was so strong that she could not stem it, and after trying for fourteen days had to bear up. Anchored on May 4 in the Straits of Allass, off Bally Island for water, and suceeeded in getting a supply with the ship's boats, and left again on the 8th. Crossed the line this side, on the 17th, and came through the Java Sea and Caramatta Passage.

SHANGHAI.

British steamer Ajax—March 9, left Liverpool; June 4, arrived at Shanghai. Experienced strong S.W. winds up to Madeira. Crossed the Equator March 25. Had moderate S.E. monsoons. Passed the meridian of the Cape of Good Hope April 7. Arrived at Mauritius April 19; left April 23. Put into Penang May 7; left May 10. Arrived at Singapore May 12; left May 17. Arrived at Hong Kong May 23, and left 29. The first part of the passage strong N.E. winds, with fine weather; the latter part of the passage light winds with thick weather and fog. Anchored at Woosung June 3, 5 p.m.; arrived at Shanghai June 4, 3 p.m.

SINGAPORE.

The Dutch steamer M. S. Van Rochussen, reports that the French ship Pampelmousse, had run on the Karang Hadjee Shoal on the night of the 15 June, W.S.W. from the lighthouse off the point.

By private advices from Penang, per steamer Pluto, we learn that the Prussian brig Tamerlan, Captain Alexanderson, which left that port for London on the 13 May, was totally wrecked off Acheen Head. The crew and part of the cargo saved.

Othello, Manila to Sydney with sugar and hemp, abandoned; was picked up at sea by the British barque Zoe, and brought into Singapore.

COMMERCIAL POSTSCRIPT.

ARRIVAL NOT IN THE TABLES.—At Queenstown, from Rangoon, Belpore; July 25, at Cowes, from Singapore, William; at Glasgow, from Singapore, Roslin Castle; 24, at Brouwershaven, from Java, Helvoetsluis; 24, Off Dungeness, from Batavia, Ida Gertrude.

DEPARTURES.—July 25, from London, for Hong Kong and Canton Charlotte; 24, from Cardiff, for Singapore, Nouveau Nomade; 25, from Newport, for Singapore, Schelde.

LAID-ON.—At London, for Hong Kong and Canton, Albert Victor; at Liverpool, for Galle, Alaric.

SPOKEN.—Saladin, London to Colombo, June 12, 3 N., 27 W.; Antje, Newcastle to Singapore, June 12, 3 N., 24 W.; Ocean, Cardiff to Singapore, June 19, 10 N., 26 W.

MISCELLANEOUS.—At Ancona, July 14, Elizabeth Johanna, Schenk, from Amsterdam, and left 15 for Singapore.

ROTTERDAM, JULY 25.—The Trading Company's sugar auction, held to-day, 38,924 mats offered, gave the following results:—No. 11, 30½f.; No. 12. 31½f.; No. 18, 32¼f.; No. 14, 33½f.; No. 15, 32¾f.; No. 16, 33½f.; No. 17, 34f.; Nos. 18 and 19, 34¾f.; No. 20, 35¼f. Shipping Arrivals: Brouwershaven, July 24, Hellevoetsluis, from Java.

TURKEY AND INDIA.—The *Daily News* remarks that when the immense political and commercial interests we have in India are considered, a remembrance of what has been done, with the friendly aid of Turkey and Egypt, to bring India and England nearer together will be mingled with surprise that more has not been accomplished. While we are all anxious to give the Ottoman Government full credit for the facilities it has accorded or is ready to accord us, there can be no impropriety in pointing out that the Turkish Government can only benefit by every measure which makes its territory a better frequented road to India. At present, however, we are not making the best of the advantages which lie before us. Our passenger traffic, with the mails and the more precious articles of merchandise, follow the route through Egypt, whereas the valleys of Antioch and the Euphrates offer a road which seems to have been marked out by nature for our purpose. A railway of nine hundred miles from sea to sea would give us the best access to India, saving a thousand miles in distance, and shortening the period of transit by ten days. The introduction of so great an undertaking, and its maintenance and working, in the most valuable part of the Sultan's dominions, could not fail to be followed by immense advantage to the Turkish Government and the people.

ENGLISH ENGINEERS IN EGYPT.—The following letter has appeared in *The Times*:—"Sir,—While the Viceroy has been entertained in England we have had a somewhat serious complication with his Government here which may be of interest to your readers. Among the engine-drivers on the Alexandria, Cairo, and Suez line of railway a very large proportion are Englishmen. These men, who took service under the Egyptian Government, deceived by the promise of wages higher than those in England, not taking into calculation the more than proportionate expenditure, have found that not only are these wages small, but that they are seldom, if ever, paid, while the other conditions of their contract are deliberately neglected. Dissatisfied with this state of things, they were suddenly, without any pretext whatever, dismissed from their posts, their salaries in arrear and pay for extra work plainly refused. They applied to their consulate, but British interests in Egypt are a byeword, and the importunities of our consul met with either contemptuous silence or determined refusal. An examination was at last agreed to. The Commissioners, including our consul at Cairo, Mr. Reade, Bett Bey, and Mr. Phillips, of the railway, and others, were in favour of the engine-drivers; another appeal was made to the Government, and met with the same result. Now, as a last resource, Mr. Reade, as acting consul-general, has deducted from the annual subsidy the amount due; the cheque for the balance has been offered to Cheriff Pasha, who, however, refuses it, and has entered a formal protest.—I remain, Sir, yours truly, MOBERLY BELL.—Alexandria, July 12."

PAIGE V. SHEPHERD AND OTHERS.—Mr. Coleridge, Q.C., Mr. H. T. Cole, Q.C., and Mr. Pinder were counsel for the plaintiff; Mr. Kingdon, Q.C., and Mr. Lopes for the defendants. This was an action brought by Captain Paige, late master of the *Solent*, against the owners, Messrs. Shepherd, for wrongful dismissal from the command while at Hong Kong, on a charge of drunkenness, &c. Captain Heaton, Mr. Douglas Lapraik, and others, lately returned from Hong Kong, were called as witnesses. The evidence on both sides chiefly consisted of the depositions of persons who were abroad, and which occupied an immense time in reading. Of course, the evidence was completely contradictory—that on the part of the plaintiff being given with a view to rebut the allegation of intemperance, and on the part of the defendants to prove continual acts of drunkenness. The case lasted nearly two days. It was arranged that, as the action was not brought for damages, but for character, if the jury found for the plaintiff the judge should award the amount to be given to him. The jury retired for a short time, and then returned a verdict for the plaintiff, and the judge awarded him £50.

The German residents in China have sent Count Bismarck a testimonial in the shape of a silver goblet, five pounds in weight, and thickly gilt on the inside. On the cover is a bust of the Minister, and on the foot of the goblet are the arms of Generals von Roon, Moltke, Herwarth von Bittenfeld, Vogel von Falkenstein, and Steinmetz.

The case of the captain of H.M.S. *Perseus*, proceeding to the Pelleu Islands to demand satisfaction for the murder of Captain Cheyne, and the retaibution demanded, viz., the execution of the King, is undergoing official investigation, and will be noticed in our next.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, July 24.

The chief item of news is that our official paper, the *Staats Courant*, has published at last the name of the new Minister of the Colonial Department. The Cabinet, after having negotiated during some weeks with the principal members of the Conservative party without the least success, found a successor for Mr. Trakranen in Mr. J. J. Hasselman, formerly a resident of Djocdjocarta, and lately a burgomaster of Tiel. This appointment has caused a good deal of sensation here. None of the parties are satisfied. Up to the present he has been quite unknown as a statesman. Thus the Cabinet is patched up, and our political horizon has cleared up totally; Mr. Heemskerk having decided to hold his portfolio even without dissolving the First Chamber, which, as I told you in my last, outvoted the Bill to reorganise the National Guards.

The last Rio mail brought bad news about the clipper frigate *s'Gravenhage*. A great interest was felt here about the fate of this vessel. She was provided with auxiliary steam-engines, and was built for the transport of passengers. Not only a great many persons took passage, but also a transport of 300 soldiers were shipped. The vessel, we now learn, put into Rio Janeiro on the 13th June leaky, and is recommended to be partially discharged. On the 10th of July it was going into the dock. It is said that the ship will remain at least two months in that harbour. The troops passed over on a Portuguese man-of-war, and the passengers are obliged to live on their own account in the town. So runs the story, which I think is well founded.

The Prince of Orange returned some days ago from Paris, and the King still remains at his seat, "het Loo."

IT is now decided that the Commander-in-Chief of the military forces in Schleswig-Holstein shall have his seat at Altona, and Mr. W. Pustau's house on the Palmaille has been taken for three years certain for his Excellency's accommodation.

SHIPPING INTELLIGENCE.

ARRIVALS.—July 15, at Brouwershaven, from Banjoewangie, Gebroeders van der Beek; 17, from Banjoewangie, Ternate and Bezokie; at Texel, from Tjilatjap, Jacob; from Banjoewangie, Maassluis.

DEPARTURE.—July 15, from Texel for Singapore (*via* Sunderland), Vice-Admiral May.

PASSENGERS INWARD.—From Java, per Ida Elizabeth: Mr. J. van Toorn and family, Mr. J. Salen and child; per Kanagawa: Mr. Verberne and family; per Louise: Mr. G. Eslirger; per Sumatra: Mr. Julius Rademacher; per Ternate: Mr. Carstens and family, Mr. B. Burg, Mrs. van der Bent and children; per Bezoekie: Mr. Van Delden and family, Mr. Overbeek and one child, Miss Bouricius, Mr. Ham, Miss Roessanaer; per Maassluis: Mr. Vriesman, Mr. Bruins, Mr. Anten, and Mr. Langenberg.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, July 23.

The *Journal de Geneve* publishes the following private letter from Japan, dated Yokohama, May 9:—"The local news of the day turns on a dispute that has broken out here between Prussia and Switzerland, concerning a piece of land that the Japanese Government ceded to the former Swiss Consul here—Dr. Lindau—and which the latter (who is a native of Prussia) caused to be entered in the Register of the Prussian Consulate General as his private property, but which has lately been claimed and taken possession of by the new Swiss Consul-General, Mr. Brennwald. In consequence of this the Prussian Consul-General, who is at the same time the diplomatic Chargé d'Affaires, gave his Swiss colleague friendly notice that he had received instructions from his Government to have the Swiss Federal flag removed from the piece of land in question. In order to avoid a conflict with the Germans, who are more numerous here than the Swiss, and as there is, moreover, a Prussian corvette in the vicinity, Switzerland was obliged to give way and have the flag hauled down, which has since been hoisted on an adjoining spot appropriated for the locality of the French Consulate, where the representative of France has granted it his hospitality till the question is finally settled between the respective Governments in Europe, either by a court of arbitration or the usual diplomatic intervention."

Austria has for some time past had it in contemplation to change her silver currency and introduce the system adopted by France, Switzerland, Italy, and Belgium, with a gold coinage. To this will be added the decimal metrical system of weights and measures. As far back as the beginning of last year an Imperial scientific Commission was appointed, the chairman of which was Admiral Wullerstorff, at that time Minister for Commerce, for the purpose of examining the question in all its bearings and the expediency of introducing so great an alteration, together with proposals for the easiest mode of effecting it and drawing up tables for the reduction from the old currency to the new, and *vice versa*. The Commission did not hesitate to report so favourably on the subject that the Emperor has now resolved that the alteration shall take place as soon as possible, and the first step has already been taken by Baron von Beust, now promoted to the dignity of Chancellor of the Empire—an appointment that has been lying dormant since the death of the first Prince Metternich—who has given Prussia formal notice of the Emperor's intention to dissolve the monetary treaty now in force with Prussia, for the purpose of being at liberty on the 1st of January next to join the treaty between the above-named four States.

LONDON, SATURDAY, JULY 27, 1867.

THE BRITISH MINISTER IN CHINA AND THE TREATY PORTS.

OUR last advices from China convey the intelligence that Sir RUTHERFORD ALCOCK, after a prolonged period of apparent inactivity at Peking, had started on a tour among the Treaty Ports, a duty which, we fear, has been too long neglected. So little has been heard of his Excellency since the commencement of the present year, that it is quite refreshing to be able to chronicle some movement on the part of the British Minister; or, to give him for once his full style and title—"Her MAJESTY'S Envoy Extraordinary, Minister Plenipotentiary, and *Chief Superintendent of British Trade* in China." Surely the last-named of these three distinctions has of late lost something of its significance. Shall we be considered impertinent if we venture to ask in what the duties of a "Chief Superintendent of Trade" consist? In a close supervision of the movements of all British subjects, with the view of enforcing every possible restriction on their freedom of action, with a rigid determination to interpret every doubtful point in the treaty in the manner most adverse to their interests? Or in keeping a careful watch over those interests, protecting them, as far as may be, from the obstructions or extortions of ignorant and corrupt local Governments? Or in both of these—say a good deal of the first, and a very little of the last? It is in real earnest, and with no simulated anxiety, that we ask these questions, for the course of events under the present *regime* has been such as to excite some apprehension that the tide of our prestige in China is once more on the ebb, and that our representative is somewhat lax in his exertions to stem the adverse current. It cannot be done by inditing lengthy despatches or official essays, the meaning of which is obscured amid a cloud of redundant verbiage and stilted phraseology; the writer meanwhile enjoying a life of dignified repose at Peking. There are apparently two causes that militate against the practical efficiency of our diplomatic and consular services in China. The first is an unfortunate effect that the study of the language generally has upon our sinologues, whereby they become imbued with an unreasoning admiration for the forms, ceremonies, and points of etiquette peculiar to the natives, the result of this being that they eventually come to regard all questions under discussion rather from a Chinese than an English point of view, their national sympathies as well as their faculty of perception being held in abeyance by the narrow-minded prejudices thus imbibed. Of this we have of late years had but too many instances. The second cause of this inefficiency is to be found in a sense of uneasy self-importance that pervades the entire service, though more frequently manifested in its lower ranks. An apt illustration of this is afforded by a Consular officer, of whom it is told—with what truth we know not—that, being once remonstrated with by a merchant for failing to give due consideration to a complaint laid before him, he said, with much *hauteur*, "I am here, Sir, *not* to be bothered "with your petty grievances, BUT TO REPRESENT HER "MAJESTY!" which he doubtless held to be conclusive. These remarks must not be understood as a sweeping condemnation of the service, which numbers many gentlemen conspicuous for their high attainments and conscientious endeavours to discharge their duties with fidelity. We only wish to point out, that were it not for our vast mercantile interests in China, no Superintendent of Trade, no Consular officials, would be necessary; and therefore, that as they are necessary, and do actually exist, their first duty is the careful protection of the interests that have called them into being. The duties of an Envoy or Minister may doubtless be best performed at the Court to which he is accredited. Those of a Superintendent of Trade as clearly require that he should pay frequent visits to the ports at which the trade is carried on; that he should exhibit an active personal interest in it; and that above all, he should never cease his endeavours to procure the fulfilment of each clause in the treaty, not so much to the letter as in a broad and generous spirit.

If carried out with a due sense of its importance, Sir RUTHERFORD'S tour will not be barren of results. Work has been accumulating, and awaits him probably at every port. The merchants at Chefoo have eagerly seized the opportunity of laying before his Excellency a statement of the condition of trade at their port, and urging the necessity of removing certain vexatious obstacles that at present impede its development. They are subjected, it appears, to perpetual annoyances and illegal exactions by the Mandarins, and can obtain no redress for injuries constantly inflicted on their property. Repeated appeals to the Consul have produced no effect, and they very naturally feel that the presence of the Minister, and a strong representation made by him on the spot, would show the local Government that British interests are not left entirely unprotected, and would at least afford them some chance of being more equitably treated. They also make an effort to enlist Sir RUTHERFORD'S sympathy with the project for connecting Chefoo with Tsinanfoo by railway, and even hint at the possibility of obtaining permission to work certain coal mines in the neighbourhood, and to make some twenty miles of tramway to bring the coal down to the sea. Surely, our Chefoo friends have been reckoning without their host. They should have reflected a little, and called to mind the action of Sir RUTHERFORD ALCOCK on this very question of railway construction last year. The feeble nature of his representation to Prince KUNG; the apathy with which he waited six months for a reply; and the calmness and apparent gratification with which he received a contemptuous refusal, and coolly recommended the "China Railways Company" to give up their project, can hardly be considered favourable omens for the development of English enterprise in China, either in the construction of railways, the working of mines, or in any way at all. Still, we may reasonably hope that *some* benefit will accrue to Chefoo from his Excellency's visit.

Shanghai, in virtue of its Supreme Court, its large consular establishment, and its "Mixed Court," can dispense with much attention from the Superintendent of Trade, better, probably, than any other port. Of the rest, Amoy seems to be the place where his presence is most urgently required. Here, again, we find a trade, once brisk and lucrative, being gradually extinguished by the imposition of an outrageous tariff of illegal duties, against which repeated remonstrances have, as usual, been quite unavailing. These exactions were commenced, we find, in 1860, and were increased to a serious extent in 1865. Appeals through the Consul to the Superintendent of Trade having been found useless, efforts were made to defeat the thieves of the local government by sending goods up the country under a "transit-dues certificate," as provided for by Article XXIII. of the Treaty. But so complete a reign of terror was established by the mandarins that no natives could be found to take charge of such goods, and this course had to be abandoned; since which the "squeeze" has been remorselessly enforced, to the almost total destruction of the import trade. By the article above alluded to, the privilege is accorded of conveying goods to any part of the interior, on payment of a transit duty of 2½ per cent. A memorandum now before us, from a thoroughly reliable source, comprises a list of twenty-eight articles of import, with the amount of the "mandarin tax" levied on each; and from this it appears that the lowest "squeeze" exacted by these cormorants is five per cent., or exactly double the authorised transit duty, while the highest actually rises to *ninety* per cent.! Here is work for the Superintendent of British Trade. Let him take this matter up in earnest, and not rest until the whole villanous system is swept away, and our trade freed from the harpies that now hold it in their felon grip. Or, if Sir RUTHERFORD cannot be bothered with such petty grievances, let the Amoy merchants resolve to make their demands heard through another channel, and unite to bring the matter under the direct notice of the Home Government. A

Digitized by Google

more flagrant breach of the Treaty and of good faith, or one more disgraceful alike to the Chinese Government and to British representatives, has never come under our notice.

THE IMPROVEMENT OF YOKOHAMA.

WHEN we last alluded to this subject we indulged in what may perhaps have appeared unnecessarily gloomy forebodings regarding the future unhealthiness of the settlement of Yokohama—such remarks being suggested by the letter of "M.D., M.R.C.S.E.," which, unhappily, has already proved to be prophetic. Our correspondent, it will be remembered, pointed out that the method adopted of filling in the new portion of the settlement, coupled with the absence of any efficient system of drainage, would certainly engender fevers of a typhoid type, resulting in an increase of sickness and death; and the correctness of his inference is amply verified by the following statement, quoted from the *Japan Herald*:—"The weather is charming and the country looking perfectly lovely. Unhappily, the streets of Yokohama, completely without drainage, are in a most noisome state, and typhoid fevers are becoming epidemic, as a natural consequence. Many Japanese servants are down with them. When too late we shall perhaps manage to get some protection from such and other evils, by means of effective municipal government, but at present we see not the slightest chance of such a boon." Why is it, we would ask, that there is no present prospect of the organisation of an effective municipal government? Want of pecuniary means cannot be the obstacle, for Yokohama, with its large and growing silk trade, must be, in proportion to its size, almost as wealthy a settlement as Shanghai. Is it then owing to the absence of administrative talent? Every Eastern settlement, however small, boasts of at least a few men sufficiently public-spirited and energetic to undertake the duties of municipal government, and in most cases to carry them on satisfactorily; surely such a community as that of Yokohama should be no exception to the rule. Whatever may be the cause of this unfortunate state of affairs, there can be no doubt as to its ultimate results. If the land-renters do not promptly put their shoulders to the wheel, and make a vigorous effort to remove the stigma that now attaches to their settlement, it will not only lose its character as a sanitarium for the China ports, but will cease to be a pleasant and healthful place of residence for themselves. The work of reconstruction now going on offers a golden opportunity of effecting a permanent improvement not only in the outward aspect, but in the sanitary condition of the place, and thus preserving it from becoming a mere "whited sepulchre"—fair to look upon but deadly to enter into.

RUSSIAN TRADE WITH CHINA.

A VOLUMINOUS Blue-book just published contains the reports of Her MAJESTY'S Secretaries of Legation in Belgium, Spain, Holland, and Russia on the trade of those countries; and a space of no less than 213 pages is occupied by a minutely circumstantial account of the trade between Russia and China, compiled by Mr. J. SAVILE LUMLEY. So bulky and diffuse is the report that no process of condensation would suffice to bring all the subjects it includes within the limits of our space; we must therefore be content to extract some of the interesting information it conveys relative to one important branch of the trade, namely, the importation of tea into Russia by the overland route *via* Kiachta.

It appears that tea is the only article of any real importance now conveyed from China into Russia across the Mongolian frontier. Silk and cotton piece goods were formerly imported, chiefly for the Siberian market; but the demand for these is now so amply supplied by home manufactures that this branch of trade can scarcely be said to exist. Sundry articles of Chinese lacquer-work, blinds, and baskets of split bamboo, vases, cups, &c., of nephrite, agate, and cornelian, tobacco, dried fruits and sweetmeats, as well as a few shawls and dressing gowns of rich silk embroidery find their way to Moscow and St. Petersburg, but their amount is too trifling to be taken into consideration. It was formerly supposed that the caravan tea was of a better description than the tea which reaches Europe from Canton, and this was thought to be the chief reason of its high price, but such was not the case; the tea imported into Russia by Kiachta and that exported from China by Canton comes from the same plant and from the same plantations; the black teas chiefly from the province of Fukien, the flower and coloured teas principally from that of Nganhwui. The trade is carried on in China by merchants resorting to Kekow in Kiangsi, the great emporium for the tea from Fukien and Nganhwui. The purchases for Russia are generally made by merchants from the province of Shansee, who buy tea of the first growth and pay 15 or 20 copecks (5d. to 6¼d.) per pound dearer for it; but this is a small item of the charges that weigh on the article before it reaches the Russian consumer. The Kiachta merchants assert that the collection and drying of the first crop is carried on with more care than those of the ensuing crops, and give this as the reason for the superiority attributed to the caravan tea over that of Canton. For a long time it was also supposed that the sea voyage spoilt the flavour of the tea, but this has been disproved by persons qualified to pronounce judgment on the relative flavour of the tea brought by land or by sea.

Everything connected with this trade is so exceptional that some account of the extraordinary route by which the tea is conveyed to Russia may be interesting. A considerable proportion of the tea destined for the Kiachta overland market is sent direct from Hankow down the Yangtsi-kiang to Shanghai, some is also sent from Foochow and Canton to Shanghai; but most of it is collected in the province of Fukien to the north-east of Canton, from whence it is despatched by land or water to Chuh-chan. Thence it is conveyed by coolies, in the manner described by Fortune, over the mountains to Kin-chan. Here the tea is loaded into small boats, taking about 200 chests each. It is then conveyed 40 versts down a stream falling into the Chen-tang, where it is reloaded into boats carrying 500 chests. Passing the town of Hankow, the boats emerge into the Eastern Sea, and coasting along reach the river Kising, up which they proceed to the town of Shanghai. Here the tea is reloaded into larger vessels, carrying as much as 1,500 chests, besides other goods. These vessels, after leaving Shanghai, proceed along the coast to Tientsin, which place they reach, if the weather is favourable, in about fifteen days. The tea is once more reloaded at Tientsin into small boats, taking about 200 chests, which follow the windings of the stream Barkoe and reach Tienshae, about 22 versts from Peking, in the space of ten days. From this point the tea is transported by land on camels and in bullock carts to the frontier fortress Chang-kea-kow or Kalgan, at the great wall, a distance of about 252 versts, and thence across the steppe or desert of Gobi, 1,282 versts, to Kiachta. The transport from Fukien to Kiachta occupies two or three months, according to circumstances. The towns of Kiachta and Maimatchin, situated on opposite sides of the frontier line, form together the seat of the caravan trade. The two towns are separated merely by a barrier, and free access between them is allowed during the day, but rigidly prohibited at night. The traders in Maimatchin number about 1,500 persons, belonging chiefly to the northern provinces, and continue in the trade for a series of years, going and returning with their goods, and never being allowed to take with them their wives and families. The arrival of the Chinese dealers with their teas at Maimatchin is the signal for the commencement of the annual trade. From Kiachta the winter route is by Selenginsk and Verkne-Udinsk, and across Lake Baikal, over the ice to Irkutsk, a journey of from seven to eight days. This route is generally available from the middle of January to the middle of April. Lake Baikal is 350 miles long and 40 miles broad. There is occasionally great difficulty in crossing it in consequence of its surface being free from snow; in some instances, with a fair wind, a sail is hoisted and horses are dispensed with. This would seem to point to a practical adaptation, for purposes of transport across Lake Baikal, of ice-boats, such as are used for pleasure on the Neva, in the winter, at St. Petersburg. The transit from Kiachta to Nijni-Novgorod often occupies six months, owing to the delays occasioned by the ice in the rivers, but it is sometimes performed in half the time. The distance from Kiachta to Moscow is 5,936 versts, and from the tea growing districts to Kiachta 5,000 versts, making a total of 10,936 versts (7,291 miles), which the caravan tea has to traverse before it reaches the Moscow market.

Mr. LUMLEY terminates this part of his subject with a series of tables filled with elaborate calculations to show the relative cost of conveying tea to Moscow by every possible land and sea route, the chief results of which may be summed up as follows:—A pound of the cheapest description of tea of the third growth costs in the tea districts of China 5d.; by the time it reaches Kiachta 11d.; and on reaching Moscow 2s. 2d. One pound of the same description of tea conveyed from London by sea to St. Petersburg and thence by rail to Moscow, costs 1s. 10d.; and when conveyed by sea to Konigsberg and

Digitized by Google

thence by rail to Moscow 1s. 9½d.; while tea from Hamburgh can be conveyed to St. Petersburg and Moscow for 1s. 6¾d. It is therefore evident that although the Kiachta trade may still be able to meet with profit the demand for tea in Siberia and the northern provinces of Russia, it cannot compete with the European trade, by which the southern and western provinces of Russia are now supplied.

WE understand that the newly constituted "GERMANIC LLOYDS," having now completed its organisation, has appointed the following firms to act as its Agents in the East Indies and China:—At Hong Kong, Foochow, and Shanghai, Messrs. SIEMSSEN and Co.; at Amoy, Messrs. PASEDAG and Co.; at Saigon, Messrs. BEHRE and Co.; at Bangkok, Messrs. MARCKWALDS and Co.; at Batavia, Messrs. BUSING, SCHRODER and Co. at Singapore, Messrs. BEHN, MEYER, and Co.; at Penang, Messrs. FRIEDRICHS and Co.; and at Calcutta, Messrs. CAUSTHAUSEN, OESTERLEY and Co. The Articles of the Association are now being translated into English for publication.

PLANTS FOR THE EAST.

Letters have been received from Dr. G. Henderson, secretary to the Agricultural and Horticultural Society of India, dated Lahore, June 7, 1867, accompanied by a copy of the minutes of the society, and containing some information for the benefit of residents in India and China and their friends in England. Hitherto it has been a great difficulty to get plants —vines and stone fruit-trees—to succeed when sent out to the East, and the great expense attending such shipments has prevented their being sent as much as they otherwise would. By means of the case invented by Mr. Christy success is insured at a very low cost, as will be seen by the following extracts. The case is constructed like an ordinary packing-case, with divisions, zinc lined, and it is shipped as ordinary merchandise, thus entirely obviating the necessity of the old-fashioned glass cases, which at all times require the greatest care on board ship as well as in land transit.

Extract from a letter dated Feb., 1867.

(From Dr. George Henderson, Honorary Secretary of the Punjab Agricultural and Horticultural Society, intimating the receipt, in excellent condition, of a collection of plants from Mr. John Waterer, jun., Bagshot, Surrey.)

"I yesterday opened two cases of plants sent out from England by Mr. Waterer, and packed according to the plan invented by Mr. Thomas Christy. These plants left England on November 20, and reached Lahore January 20. Each box weighed a little over a maund, and contained 50 plants. With four exceptions, every plant was as fresh as the day it was packed. If any of the subscribers to the Calcutta Society ask your advice about getting plants from England, you should advise them to order the plants from Mr. John Waterer, jun., of Bagshot, Surrey.

"It is a great point to have the plants landed in India early in the season, say not later than the end of January, and earlier if they have to go up the country."

Extract from a letter dated Lahore, April 7th, 1867.

"Very few of the plants sent out to me in December have died; both boxes seem to have been opened at the Calcutta Custom-house. The vine cuttings were planted as 'eyes,' and I don't think a single one has failed to strike. Vines will probably degenerate here very quickly, as the heat in May, June, and July is much too great for them, and if we are to grow first rate grapes on the plains it will be necessary to import cuttings every four or five years. 'Eyes' will fruit here the third summer; the rate of growth is quite wonderful. A peach bud put in in March will in November be six feet high, and the stem an inch in diameter, and will be covered with flowers in March. Forest trees will grow sixteen feet from seed in nine months.—(Signed) GEORGE HENDERSON."

MANDARIN SQUEEZES AT AMOY.

(To the Editor of the *London and China Telegraph.*)

Sir,—In view of the near approach of the time when a revision of the Treaty of Tientsin may take place, a few remarks on the working of that treaty at present may not be uninteresting to you or your readers.

Doubtless you have heard, but probably in a vague and general way, of mandarin "squeezes" upon British imports and exports. Our object at present is to bring this particular subject before you in order that it may be ventilated in the columns of your valuable paper in time to allow of redress being obtained when the treaty is revised. We accordingly hand you herewith a statement of these taxes on some of the principal articles of import and export, showing what the per centage is according to present values. You will observe that they are sufficiently heavy, though calculated on a high range of prices; but it must be borne in mind that these per centages will be materially increased when, as we must expect at no very distant day, the values of cotton goods decline to what they were before the American war.

We also hand you copy of a letter which we have lately written to H.B.M.'s consul here on the subject, which throws some light upon the way in which these taxes have affected the trade of this port, and which you are at liberty to make use of in any way you think fit.

You will see from the latter document that all legitimate trade here is rapidly decreasing, and that it is likely to be almost entirely extinguished, unless redress be speedily obtained. You will also see that though remonstrances have at various times been made to H.B.M.'s consuls, no results have followed.

In making these remonstrances it has been assumed that Article xxviii., Rule 7 of the Treaty of Tientsin was wisely framed by the late Lord Elgin specially to prevent any arbitrary imposition of taxes, either at treaty ports or in the interior; but in the face of the stipulations contained therein it is an undoubted fact that the taxes we complain of are exacted under the very noses of our consuls. If we are right in our interpretation of the above article, it follows that a grievous wrong has been suffered by British merchants here for the last two years in the diminution of their business; and if we are wrong, the sooner the treaty is altered the better; for under it, as it now stands, it would be competent for any mandarin to put a stop to all trade in imports by simply placing prohibitory taxes upon the consumers of our goods.

The article in question is certainly very loosely worded, for the only safeguard we have against taxes is our privilege of conveying our goods up country upon payment of 2½ per cent. ad valorem as transit dues. This, however, is in reality no safeguard at all, for even could we send every parcel of goods to the confines of China under charge of our servants it would be quite as practicable for the mandarins to levy their taxes there as here at a treaty port.

In any case, whether we are right or wrong, the matter is one of great importance to all who have vested interests in treaty ports, or are in any way interested in the China trade, and it is in such a position that redress must in justice be obtained.

We shall probably address you again on this subject, as well as on others connected with the treaty. Meantime may we beg the favour of your inserting the foregoing in an early issue of your valuable paper.—

Yours truly,
BOYD AND Co.

Amoy, May 27, 1867.

Memo. of Mandarin Taxes at Amoy levied on the undermentioned British goods, over and above the tariff duties and transit dues.

THE NEW SEASON'S TEA.

(To the Editor of the *London and China Telegraph.*)

SIR,—There has been a good deal of loose, and in some instances perhaps exaggerated talk about the recklessness of China tea shippers; but in order to realise how entirely the sound principles of trade can be disregarded by many of them, it is necessary that one should actually witness the "opening of the market" at one of the great ports. Such has been my privilege at Foochow this season.

After the repeated severe lessons of recent years, the destruction of so many houses, and, above all, the paralysed condition of the tea trade at home at the present time, it was naturally expected that a little less eagerness than usual would be manifested to crowd the whole season's supply into the first few months. Every circumstance was calculated to favour caution and moderation in early shipments. Foreigners were, to a very small extent, only committed to investments in the country; there were no tonnage engagements to compel reluctant shippers, and the teamen had so little command of foreign capital to enable them to hold their stocks, that for once they were completely at the mercy of shippers. The teas instead of, as in former years, being bought with foreign money advanced at the beginning of the picking to be repaid at convenience, were largely bought on credit and paid for by drafts on Foochow, to meet which drafts the teas *must* be sold. They were, however, laid down at so moderate a cost, that the teamen incurred little risk of being forced to sell at a loss. It was generally understood that the Chinese engagements had to be met in the first week in June, and the teas did not arrive in any practicable quantity till the last week in May. Every day's delay, therefore, must materially strengthen the position of intending buyers. It was but one short week, and surely there was no such dearth of tea in England as to cause alarm at such a trifling delay! Was it too much, then, to expect that, with every circumstance so plainly on their side, foreign tea buyers should for once have used their advantage for their own benefit? Such a hope has certainly proved delusive. Foreigners could by no means restrain themselves, and somewhere between the 25th and 27th of May the teamen, to their delight and astonishment, were offered a profit of 20 per cent. on their teas, the money being paid in good time to meet their bills! So the "market was opened," and in the first five days it was cleared of every package of tea, viz., 70,000 chests.

Whether these investments will pay a profit or not is a question which time will solve. But, whatever the result may be, there is something so essentially vicious in the principles and the maxims which appear to regulate the tea trade in China that, unless some change takes place, the worst

Digitized by Google

results must continue to follow. The late buyers of tea in Foochow scarcely pretend that they have bought because they think tea sufficiently cheap or affords a reasonable hope of profit, but simply out of jealousy of others. To such an extreme was this feeling carried that the most unseemly expedients were resorted to by eminently respectable houses to prevent others from buying—such as seizing the teamen and shutting them up for days together. And I have heard that while one foreigner was bargaining for a parcel of tea the native broker received ten messages from other foreign firms beseeching him to go and settle it with them. In short, if tea purchases were as certain to prove a mine of wealth as they have too often proved the contrary they could not excite hotter competition. And when such irrational eagerness is exhibited is it wonderful that the Chinese exact high prices? and that with their cool heads they are able to deal with great foreign merchants as with little children? And is it likely that business done under such pressure, and in defiance of the dictates of sober judgment, can ever result otherwise than it has done, that is in the destruction of many and the ruin of more of the firms who engage in this branch of trade?

Some of the causes of this unsatisfactory state of affairs are not far to seek. The first is clipper ships, their number and the perfection to which they have been brought. So evenly do they run that the first arrival at home can only be secured by the first sailing from China. Certain firms who have to do with clippers seem still to consider it a point of honour to get their ship away before the others, which is only done by offering such temptation to the teamen as induces them to surrender the control of their first teas to the foreign firm, to be shipped in the first clipper. In making these arrangements, contracts, or bargains with the teamen, quality and price are but secondary considerations; priority of arrival and *quantity* being the main points insisted on. Were it possible for one or two firms to get their ships home in such time as to give them the command of the market for a week or two, there might be reason in paying so dear for the monopoly. But when a dozen or so contend for it, with equal success, each pays the price of a full and effective monopoly while no one of them secures it. The combination in one individual of the functions of merchant and shipbroker has also greatly favoured this infatuation about ships.

Something must also be put down to the fact that the actual buyers have in many instances no personal interest in the result of shipments. They are either employés of firms acting under orders, discretionary and otherwise, from a distance, or commission agents. There is no doubt that in the executions of orders prices are paid which the buyers would not touch for their own account; but orders are sometimes so worded that the agent fancies himself obliged to act even when he knows that his constituent, if on the spot, would modify his views. One man the other day was asked why he had offered such a high price for a particular parcel of tea, and he naively answered, "That is my limit," as if a limit meant the *minimum* price that was to be given! Others jocosely defend high prices on the ground that they yield more commission! Amongst so much chaff there may or may not be a grain of truth, though the evil results of the system are quite compatible with good faith on the part of agents. The impossibility of providing for every contingency renders it necessary that orders from England should be flexible in their interpretation, and the alternative of not acting at all is not one which readily commends itself to an agent.

At Hankow a much worse account could be given were it of any use.

The only conclusion one can arrive at is that, although tea shipments may pay, and pay well, now and again, the chances are decidedly against the average result being profitable.—Yours, &c., ALPHA.

Foo-chow, June 8th, 1867.

Naval and Military.

The Scylla, screw corvette, Captain Courtenay, arrived at Spithead from China on the 21st, and awaits orders. She was expected to have been in time to take part in the late review.

An order has been received at Chatham Garrison directing a detachment of 38 non-commissioned officers and men of the Royal Artillery, from the head-quarters of the 1st division of the depôt brigade, to be placed under orders to embark in the Indian steam transport Malabar, 3, 4,173 tons, 700-horse power, Capt. F. D. Rich, for service at the Straits Settlement of Malacca, with the other troops about to be despatched to that station. The detachments will embark as soon as the Malabar is ready to receive them.

Her Majesty's troopship Himalaya, Captain Piers, arrived at Queenstown from the Cape on the 22nd with the 2nd battalion 13th Light Infantry, Lieutenant-Colonel Macdonald, Commander Menzies, officers, and crew of the late Osprey, and a few naval and military invalids and time-expired men. She left Mauritius on the 8th of June, Algoa Bay the 17th of June, Simon's Bay the 22nd of June, St. Vincent the 10th of July, and Madeira the 16th of July, making the voyage from Mauritius, including seven days' stoppage, in little more than forty-three days.

The contract for the new fort which is about to be erected upon St. Catherine's Rock, Tenby, has just been let, and the first expenditure upon it will be about £20,000. The fort will altogether mount 11 guns, five of which will be in casemates below the rock.

The *Lancet* comments upon the insufficient number of naval surgeons now in the service. In a fleet of thirty-one men-of-war assembled for review last week at Portsmouth, there were but forty-two medical officers, their regular complement being seventy-six; and in sixteen gunboats, each of which ought on active service to carry an assistant-surgeon, only two had such officers on board, the Admiralty not being in a position to afford a fuller supply of medical assistance at present.

An order has been received at Chatham, authorising an additional 1d. per day, besides the 2d. already granted, to be paid to those non-commissioned officers and men who enlisted prior to the passing of the Limited Enlistment Act, 1847. The whole of the troops at the garrison have been paid the additional 2d. per day, and the non-commissioned officers and men who have re-enlisted 3d. per day. The troops have at the same time received a portion of the arrears of their pay from the 1st of April last.

The Duke of Cambridge has given important evidence before the Select Committee of the House of Commons appointed to consider the system of retirement at present existing in the army. The report, which will be presented in the course of the next few days, is likely to suggest some material modifications of the plan now sanctioned.

Rear-Admiral Warden's squadron of ironclads, comprising the Minotaur, the Achilles, the Lord Clyde, the Bellerophon, and the Pallas, have anchored at Spithead on return from detached duty in escorting his Imperial Majesty the Sultan across the Channel.

The naval pension of £80 a year, vacant by the promotion of Captain George Davies, has been awarded to Captain R. B. Beechy, on the retired list.

TRIAL TRIP OF THE "SOMERSETSHIRE."

An interesting "trial trip" was performed on Thursday. At the invitation of Messrs. Money Wigram and Sons, shipowners and builders, and Messrs. Humphreys, Tennant and Co., engineers, a party of 300 ladies and gentlemen proceeded on board the screw steamer *Somersetshire*, Captain Attwood, lying off Gravesend, and at two P.M. the vessel left her moorings and steamed down nearly to Southend against the flood tide. The distance between the measured miles was performed in exactly five minutes, being at the rate of twelve miles per hour, which must be considered a very satisfactory result with engines of only 300-horse power nominal. The *Somersetshire* is an iron built ship, rigged, round stern, and sits splendidly on the water. Her dimensions are 285 ft. length over all, 41 ft. beam, 28 ft. depth of hold, and the builders' measurement 2303 tons. The engines, by Humphreys, Tennant, and Co., are on the direct acting horizontal principle, the diameter of cylinder 64 in., and stroke 2 ft. 8 in. The maximum revolutions were 69, with a pressure of 18 lb., and vacuum 24. The screw is two-bladed, and the pitch 16 ft. They worked very smoothly yesterday, only one stoppage occurring for a few minutes, owing to heated bearings. On deck the vessel has a superb poop, and in order to lessen the influence of the iron on the compass, the wheel has been placed about the centre instead of right aft. She can accommodate about 150 passengers, and the cabins are nicely fitted and commodious. Her bunkers hold about 600 tons coals, and she will carry about 2,000 tons general cargo. The vibration yesterday while under full steam was remarkably small, and the absence of the well-known "thump, thump" in most screw steamers is a great desideratum. At 3.30 the guests sat down to four tables covered with an excellent luncheon, the viands and champagne being unexceptionable. Every one appeared to enjoy the repast. Mr. Charles Wigram, in a neat speech, proposed success to the *Somersetshire*. Mr. James Mac Ewan proposed, in a complimentary speech, the health of the owners, and Mr. Welch that of Captain Attwood and his officers, Mr. Taylor and Mr. Hoskins. Captain Attwood, formerly of the *Essex*, was highly complimented. On the various responses to these toasts the company adjourned to the decks, and at 6.30 the noble ship entered the East India Docks. The weather was all that could be desired, and the ladies' toilettes quite in harmony with it. Indeed, we doubt if any trial trip has been better attended or more enjoyed. One oversight there was, certainly, and that an important one, no band had been provided. An affair of this sort is never complete without one, especially with so many ladies as honoured Messrs. Wigram on this occasion. The vessel will proceed to Melbourne next month, and will no doubt accomplish the passage in 60 days. She is a fine opportunity for passengers, but this is not the season, and she will probably not have 50. The brokers are Messrs. Allport and Morgan.

Monetary and Commercial.

Notwithstanding the steady accumulation of money, there is no rally either in general business or in Government and private stocks and shares, but on the contrary, in most cases, a fall. There is one notable exception, and that is, the shares of the P. and O. Company, which at one time were pressed down as low as £40 (for the £50 share), have now risen to £50. It appears that some of the shareholders have been alarmed at the rumour that Government would not renew the present subsidies except at very reduced terms; and these alarms have as usual been "used" by the Bears on the Stock Exchange.

The circular of Messrs. T. H. Littledale and Co. has the following remarks on the four months usance. Messrs. Littledale ignore the good which was intended to be wrought out by the measure, viz., to drive out persons who had got into the India and China Trade with no capital, and who relied on the arrival of the produce before the maturity of the bills. The Banks adopted this alteration for the general good of the trade as well as to save themselves from holding the paper of such speculators. It may not suit brokers that the trade should be restricted to firms of sufficient strength to trade on their own capital, but it is the way to avoid a repetition of the reckless shipments of 1865-66:—

What is weighing upon the cotton market is the stock belonging

Digitized by Google

suspended firms, and the apprehended effect of the large quantity of East India cotton to arrive in the next three months, the chief part of which has been drawn against at four months' sight instead of the old usance of six months—the question being, how can these bills be met whilst a large portion of the cotton is still at sea? This difficulty and its suicidal effect, both upon the acceptor of the bill and the banks holding the exchange, was as clearly to be seen when this change of usance was determined upon by the banks connected with India as it is to-day—but it was passed at a moment when alarm and present losses were in the ascendant over common sense and commercial logic—it violates the fundamental principle that bills of exchange should be liquidated by the proceeds of the produce they were drawn against, which becomes an impossibility if the usance is reduced below the average term of the voyage, and hence it jeopardises the position of the importer by compelling him to seek advances from his banker or broker at a moment of difficulty like the present, and damages the security of the bill by unduly depressing its value. We have from the first expressed the opinion that six months' date was the only sound compromise between the shipper at Bombay and the banks, and we feel confident that it would be the most judicious term.

The liquidators of the Bank of Hindustan, China, and Japan (Limited), which stopped on the 15th of November last, have issued a report, in which they state that they have examined all the items of which the present assets are composed, and that, after the most careful consideration, they value the total now to be collected (amounting to £1,596,004) to be worth, exclusive of interest, £595,284; while the ascertained liabilities of the bank, exclusive of interest and liquidation expenses, are £572,127; leaving an estimated balance of assets over liabilities of £23,157. In this estimate of assets now remaining is included the sum of £15,529 as the amount which will probably be collected from arrears of calls made before the liquidation commenced. The estimated loss in the value of the assets "is chiefly attributable to exceptional circumstances which have prevailed both at home and in the East during the past twelve months, causing not only a very large deficiency in the realisable value of the securities hypothecated to the bank, but also considerable loss in consequence of the failure and insolvency of so large a number of the debtors of the bank, on open accounts or on bills without security, and from the heavy expenses of the bank at the different branches." The list of contributories has been settled, and 1,052 persons, holding 36,404 shares, have been placed hereon:—

"The arrears of calls from which the above-mentioned estimate of £15,529 4s. 3d. is expected to be realised, have been placed in the hands of our solicitors, Messrs. Ashurst, Morris, and Co., who are taking the necessary proceedings to obtain payment, and as the bank is obliged to pay interest on its debts, it is only just to those members who have paid their calls that interest should be charged on all arrears. These proceedings will be continued, and the payment thereof enforced in all practicable cases, as we have not felt justified in the interest of shareholders who have paid their calls, and are still liable to further demands, to exercise that leniency and consideration which under other circumstances would have afforded us so much satisfaction. The principal losses sustained by the bank were incurred through the branches at Bombay and Calcutta. We have made every effort to reduce expenses and to close the branches without prejudice to the assets of the bank, which, from the fact of their being chiefly represented by amounts to be collected from persons and estates at different places in the East where the bank carried on business, require the most judicious management to realise anything like their fair value. At present we have only been able to arrange for closing the branches at Hong Kong and Yokohama, which we have placed in charge of one manager, resident at Shanghai. Arrangements are in progress for placing the branches in Ceylon also under one manager, but the branches at Calcutta and Bombay must necessarily be kept up for some time further. At Shanghai and Hong Kong leases of premises had been taken for long dates at high rents, and as property is so much depreciated there, a considerable sum has had to be allowed to relinquish these leases. The premises at the other branches we hope to get more favourably settled. The liabilities of the bank have been considerably increased by the claims under the leases of branch premises. Having ascertained that the head-office premises were held upon such terms as would have enabled the superior landlords (the Bank of England) to put an end to the tenancy on the 23rd December, 1873, leaving only a secured term of seven years, which, in our opinion, rendered the premises unsaleable, we opened negotiations with the Bank of England, who have granted to us a secured term of fourteen years, from Christmas, 1866. The lease has been offered for sale, both by private negotiation and public auction, but the amounts offered have been hitherto so much under the cost standing in the books, that we have not felt ourselves justified in accepting any of them, but are holding the premises with the expectation of obtaining a better price. As to the claim for about £16,600 mentioned in the auditor's report of 16th November, 1866, as then having been agreed to be referred to arbitration, we have to report that the course then proposed was found to be impracticable, and therefore proceedings in Chancery have been instituted and are still pending against some of the first directors and others to enforce payment. We beg to assure the shareholders that no efforts on our part shall be wanting to secure the utmost possible value for the remaining assets, and in the shortest practicable period."

It will be seen by this that the shareholders will lose the entire amount called up, £28 per share. The liquidators and their solicitors, Messrs. Ashurst, Morris, and Co., have worked hard to save another call, and exercised ability in realising the assets. Notice has been given that a meeting of the shareholders of this bank will be held at the London Tavern, Bishopsgate-street, on Friday, the 2nd of August, at two o'clock, P.M., to receive the present report of the liquidators.

At a meeting of the shareholders in the City Bank, held on the 16th instant, the secretary read the report, which shows the gross profits for the six months ended 30th ult. to be £48,789. The usual dividend of 6 per cent. was declared, with a bonus of 4s. per share, together equal to 10 per cent. The report and balance-sheet will be found in full in another column.

In consequence of the reported rise in the China exchanges there has been a sudden and rather extensive demand for Mexican dollars, and the price has advanced from 59¼ to 59⅝ to ¾. At these rates several large parcels, which have been reserved for some time past, both here and in Paris, have been disposed of, and the China mail leaving Marseilles on the 28th inst. will probably take out nearly £250,000. There has been no alteration in the rate for bar silver.

Another meeting of the committee appointed to effect the resuscitation of the Commercial Bank has been held without arriving at a result. An application has been made to the Court by the official liquidator for power to make a call (probably £10 per share), and a delay has been granted until the arrival of the next mail.

The amount of bullion by the P. and O. Company's steamer *Bangalore*, from Southampton on the 20th inst., was, in silver, to Hong Kong, £18,000, to Shanghai, £1,350; total in silver, £19,350.

At the Rolls' Chambers on the 24th, before the Chief Clerk, an application was made in reference to the reconstruction of the Commercial Bank of India. A gentleman named Chauntler, who had been sent out to India and had just returned, reported favourably of the undertaking. The creditors have been paid 10s. in the pound, and he considered that if the bank was reconstructed, or a new bank formed, all parties would be paid in full. He deprecated a call being made, as such was the state of affairs at Bombay at the present time that it would seriously affect the proposal under consideration. Creditors to upwards of £300,000 were represented, and urged that notice of a call payable in November would facilitate the proceedings. The Chief Clerk granted an adjournment until after the arrival of the next mail from India.

A telegram from Point de Galle announces the total loss of the ship *Tae Wan*, laden with new teas, from Foo-choo-foo for London, in the river Min. The loss is about £60,000, which will chiefly fall on the China insurance companies. She was a ship built of iron, framed with wood, in 1865, and was owned by Messrs. Davidson and Co., of Sunderland.

The report of the Consolidated Bank (Limited) shows an available total of £40,346, including a previous balance of £9,107, and recommends a distribution at the rate of 5 per cent. per annum, absorbing £18,95 The sum of £3,000 is to be carried to reserve, which will then amount to £95,000. A special appropriation of £10,000 is to be made as the commencement of a fund to meet any loss that may possibly arise from a liability of £233,691 incurred by the bank two or three years back in connection with the Atlantic and Great Western Railway, and a balance of £8,188 will remain to be carried forward. The paid-up capital of the bank is £800,000, and the deposits held are £2,159,710, being an increase of £571,335.

The report of the Fore-street Warehouse Company (Limited) shows an available total of £27,166, including a previous balance of £5,573, and recommends a dividend at the rate of 10 per cent. per annum, which will leave £9,117 to be carried forward. It is proposed to issue £120,000 in debentures to Mr. Morrison, in lieu of the two instalments payable to him of £60,000 each.

Senhor Casal Ribeiro, the Portuguese Minister for Foreign Affairs, is stated to have arrived in Paris. The object of his mission is understood to be to endeavour to obtain a loan. It is believed, however, he will find both on this market and in Paris a fixed determination to resist any further advances to the Portuguese Government until justice shall have been done to the claims of the South-Eastern of Portugal Railway Company, an undertaking the treatment of which called forth the active intervention of the British Foreign-office.

At the meeting for the appointment of assignees of the estate of Messrs. Peto, Betts, and Co., the parties who have thus far acted as inspectors—Messrs. Richard Fothergill, Peter Rolt, and Thomas Fenn—were chosen, with the addition of Mr. J. Pickersgill Cunliffe. Mr. Bishop, of Messrs. Coleman, Turquand, and Co., was appointed manager.

The report of the Merchant Shipping Company (Limited) (formerly Somes and Co.) recommends a dividend of £1 per share on the paid-up shares, and a proportionate rate on the others.

At the meeting of the London Financial Association (Limited), on the motion for the adoption of the report of the directors, an amendment was moved and carried by a large majority to the effect that the accounts be received and adopted and entered on the minutes, and that a committee of seven shareholders be appointed, with full power to examine and report upon the present position of the association.

A prospectus has been issued of the South Hayling Bay Land Investment Company, with a capital of £300,000, in shares of £10, for the purchase of the south coast of Hayling Island, and the conversion of Hayling

Digitized by Google

Bay into a metropolitan watering-place. The island is near Portsmouth, and within two hours of London, and the price to be paid for 700 acres, comprising nearly four miles of southern sea frontage commanding views of the Isle of Wight, is about £98 per acre.

The report of the East London Bank, to be presented on Tuesday, shows an available total of £2,701, and recommends a dividend at the rate of 5 per cent. The paid-up capital is £100,000, the deposits held are £382,604 and the reserve fund is £12,000.

The report of the Provincial Banking Corporation (Limited), to be presented on the 2nd of August, shows an available total of £7,912, including a previous balance of £1,090, and recommends a dividend at the rate of 7½ per cent. per annum, which will leave £2,035 to be carried forward. The paid-up capital is £157,503, the deposits, &c., held are £540,119, and the reserve is £5,000.

The following is from Reuter's Telegram Company :—

Direct telegraphic communication is now established between London and Hamburg and London and Bremen by the completion of the land lines of Reuter's Company in connection with their cable to Norderney. Hitherto the communication with the places named has been carried on by the Government wires, which are also used for the local traffic; but the new land lines of this company are *exclusively* for through traffic, and communication will be constant and instantaneous. The lines will be worked by the Electric and International Telegraph Company, at whose offices all messages are to be delivered. The construction of Reuter's direct line to Berlin is being pushed forward with all possible speed, and will be completed in about two months.

MANCHESTER MARKETS.

Mr. Sam Mendell's report says :—There is little alteration to report in the position of this Market. Qualities suitable for India are offered freely and pressed for sale at rather easier prices. In good qualities adapted for the China Market there is more doing. Manufacturers are now placed under contract for some weeks to come, and show firmness at an advance of 8d. on the rates accepted last week. Quotations are :—Grey Shirtings: 7 lbs., 8s. 9d. to 9s.; 8¼ lbs., 11s. 3d.; Cotton Yarn: Nos. 16-24, 1s. 2½d. to 1s 3½d.; Nos. 28-32, 1s. 3d. to 1s. 4½d.; Madapollams, 3s. 10½d.; Long Cloths, 10s. 3d.; T-Cloths, 6s. 9d.; White Spot Shirtings, 12s. 3d.; Damasks, 21s. 6d.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

*** *Companies omitted in the above list will be included if the particulars are forwarded.*

EXPORTS TO THE FAR EAST.

Mr. Sam Mendel's tables give the following returns of the Export of Cotton Goods from the ports of London, Liverpool, Southampton and the Clyde, to China, Japan, Manila, Batavia, Ceylon, and the Straits Settlements, during the month ended 16th July, 1867, and during the seven months ended 16th July of the present and two previous years :—

To HONG KONG.—For the month ended 16th July, 1867: Plain Cottons, 4,912,023; Coloured Cottons, 469,015; Printed Cottons, 127,325 yards; Cotton Yarn, 1,131,900 lbs.; total value of Cotton Goods, £188,563. For the seven months ended 16th July, 1865: Plain Cottons, 15,992,013; Coloured Cottons, 1,666,776; Printed Cottons, 217,336 yards; Cotton Yarn, 1,090,555 lbs.; total value of Cotton Goods, £500,316. For the seven months ended 16th July, 1866: Plain Cottons, 24,881,361; Coloured Cottons, 2,689,388; Printed Cottons, 376,410 yards; Cotton Yarn, 2,959,528 lbs.; total value of Cotton Goods, £987,707. For the seven months ended 16th July, 1867: Plain Cottons, 20,812,834; Coloured Cottons, 1,293,897; Printed Cottons, 388,547 yards; Cotton Yarn, 3,231,376 lbs.; total value of Cotton Goods, £802,733. Decrease in value for 1867 against 1866, £184,974.

To SHANGHAI.—For the month ended 16th July, 1867: Plain Cottons, 7,694,793; Coloured Cottons, 663,971; Printed Cottons, 446,755 yards; Cotton Yarn, 8,060 lbs.; total value of Cotton Goods, £170,188. For the seven months ended 16th July, 1865: Plain Cottons, 37,586,363; Coloured Cottons, 3,023,768; Printed Cottons, 999,571 yards; Cotton Yarn, 69,580 lbs.; total value of Cotton Goods, £938,982. For the seven months ended 16th July, 1866: Plain Cottons, 63,548,990; Coloured Cottons, 8,039,379; Printed Cottons, 2,705,731 yards; Cotton Yarn, 48,800 lbs.; total value of Cotton Goods, £1,823,862. For the seven months ended 16th July, 1867: Plain Cottons, 53,236,403; Coloured Cottons, 7,068,515; Printed Cottons, 3,048,114 yards; Cotton Yarn, 151,132 lbs.; total value of Cotton Goods, £1,298,243. Decrease in value for 1867 against 1866, £525,619.

To JAPAN.—For the month ended 16th July, 1867: Plain Cottons, 3,592,880; Coloured Cottons, 430,522; Printed Cottons, 65,712 yards; Cotton Yarn, 459,453 lbs.; total value of Cotton Goods, £114,303. For the seven months ended 16th July, 1865: Plain Cottons, 7,624,084; Coloured Cottons, 739,253; Printed Cottons, 738,008 yards; Cotton Yarn, 192,100 lbs.; total value of Cotton Goods, £231,935. For the seven months ended 16th July, 1866: Plain Cottons, 18,356,784; Coloured Cottons, 1,861,896; Printed Cottons, 2,012,431 yards; Cotton Yarn, 1,149,410 lbs.; total value of Cotton Goods, £668,810. For the seven months ended 16th July, 1867: Plain Cottons, 10,970,395; Coloured Cottons, 2,516,107; Printed Cottons, 532,302 yards; Cotton Yarn, 1,426,353 lbs.; total value of Cotton Goods, £416,594. Decrease in value for 1867 against 1866, £252,216.

To SINGAPORE AND PENANG.—For the month ended 16th July, 1867: Plain Cottons, 4,178,773; Coloured Cottons, 413,805; Printed Cottons, 708,790 yards; Cotton Yarn, 97,866 lbs.; total value of Cotton Goods, £118,574. For the seven months ended 16th July, 1865: Plain Cottons, 22,642,113; Coloured Cottons, 2,967,877; Printed Cottons, 1,204,847 yards; Cotton Yarn, 897,681 lbs.; total value of Cotton Goods, £632,249. For the month ended 16th July, 1866: Plain Cottons, 32,966,866; Coloured Cottons, 4,693,238; Printed Cottons, 2,798,331 yards; Cotton Yarn, 1,071,118 lbs.; total value of Cotton Goods, £1,077,665. For the seven months ended 16th July, 1867: Plain Cottons, 33.094,350; Coloured Cottons, 5,695,411; Printed Cottons, 2,737,612 yards; Cotton Yarn, 1,192,617 lbs.; total value of Cotton Goods, £965,496. Decrease in value for 1867 against 1866, £112,169.

To BATAVIA.—For the month ended 16th July, 1867: Plain Cottons, 1,153,206; Coloured Cottons, 842,192; Printed Cottons, 843,122 yards; Cotton Yarn, 26,000 lbs.; total value of Cotton Goods, £65,646. For the seven months ended 16th July, 1865: Plain Cottons, 8,447,560; Coloured Cottons, 3,011,653; Printed Cottons, 4,902,650 yards; Cotton Yarn, 293,570 lbs.; total value of Cotton Goods, £391,243. For the seven months ended 16th July, 1866: Plain Cottons, 19,283,417; Coloured Cottons, 6,382,737; Printed Cottons, 5,148,302 yards; Cotton Yarn, 349,230 lbs.; total value of Cotton Goods, £796,358. For the seven months ended 16th July, 1867: Plain Cottons, 10,967,839; Coloured Cottons, 9,342,364; Printed Cottons, 9,568,955 yards; Cotton Yarn, 390,955 lbs., total value of Cotton Goods, £724,666. Decrease in value for 1867 against 1866, £71,692.

To MANILA.—For the month ended 16th July, 1867: Plain Cottons, 359,006; Coloured Cottons, 1,449,591 yards; Cotton Yarn, 14,600 lbs.;

Digitized by Google

total value of Cotton Goods, £47,151. For the seven months ended 16th July, 1865: Plain Cottons, 6,814,278; Coloured Cottons, 7,964,162; Printed Cottons, 826,426 yards; Cotton Yarn, 56,727 lbs.; total value of Cotton Goods, £831,687. For the seven months ended 16th July, 1866: Plain Cottons, 5,056,298; Coloured Cottons, 6,471,244; Printed Cottons, 105,593 yards Cotton Yarn, 33,750 lbs.; total value of Cotton Goods, £313,424. For the seven months ended 16th July, 1867: Plain Cottons, 9,080,764; Coloured Cottons, 9,953,364; Printed Cottons, 634,768 yards; Cotton Yarn, 87,026 lbs.; total value of Cotton Goods, £493,166. Increase for 1867 against 1866, £179,742.

To CEYLON.—For the month ended 16th July, 1867: Plain Cottons, 902,648; Coloured Cottons, 111,935; Printed Cottons, 151,417 yards; Cotton Yarn, 39,895 lbs.; total value of Cotton Goods, £28,867. For the seven months ended 16th July, 1865: Plain Cottons, 4,620,233; Coloured Cottons, 990,181; Printed Cottons, 658,728 yards; Cotton Yarn, 141,149 lbs.; total value of Cotton Goods, £178,476. For the seven months ended 16th July, 1866: Plain Cottons, 9,076,191; Coloured Cottons, 1,070,546; Printed Cottons, 3,233,264 yards; Cotton Yarn, 489,009 lbs.; total value of Cotton Goods, £419,065. For the seven months ended 16th July, 1867: Plain Cottons, 10,669,821; Coloured Cottons, 963,624; Printed Cottons, 1,625,919 yards; Cotton Yarn, 93,495 lbs.; total value of Cotton Goods, £309,522. Decrease for 1867 against 1866, £109,543.

ARTICLES OF IMPORT.

TEA.—During the past fortnight business in our market has again been very limited, the demand both from the trade and exporters continuing light, whilst the advices from China of large settlements and shipments have caused increased anxiety on the part of holders to get out of stock before new season's Teas arrive. Thus the sales made have been at prices which show a considerable further decline in most instances, and even at this reduction there has been no increase in the demand. Congous: Siftings at the recent public sales went at 5¾d. to 6d. per lb., being ¼d. to ½d. per lb. lower, but privately they maintain about former prices. Broken-leaf kinds show no change. Fair to good common have sold a shade lower, the quotation being 11½d. to 1s. per lb. Fair to good flavoury kinds have been difficult to move, except at a decline of ½d. to 1d. per lb. Good Kaisows have sold 1d. per lb. lower; fine and finest have gone at a reduction of about 2d. per lb., also Pak Ling kinds. Common black-leaf have sold ¼d. to ½d. per lb. lower. Fair to good have again given way in price, the fall being about 1d. per lb. Fine to finest have only been saleable in small parcels at a reduction of 1d. to 2d. per lb. In new-make Cantons sales have been difficult to make at former prices. In Oolongs, Souchongs, and Flowery Pekoes, business has been small, and prices show but little alteration. Scented Capers, ex Sea Bird, have been sold to some extent at a decline of 1d. to 1½d. per lb. on previous quotations. Scented Orange Pekoes have also sold about ½d. to 1d. per lb. lower; Foochow kinds being rather better maintained. Uncoloured Japans: There has been a further arrival of these, but at present there is no business to report. In Green Teas, business in these kinds has been small, there being no fresh supplies on the market. Gunpowders are firm; in other kinds prices show but little change, the commoner kinds, as usual, being most difficult of sale. A few Canton Greens, ex Sea Bird, realised extreme prices. The last public sales of China Tea comprised 16,775 packages, of which 12,980 packages were sold, the whole being printed without reserve.

SILK.—No improvement since our last report—indeed the whole tone of the market has been miserable. There has been a general abstaining from purchasing, and holders have been unable to move any but the smallest and most desirable parcels. The receipt of telegrams from Shanghai advising 6,000 bales settled, and expected in the first fortnight of the new season, and at an immense cost, even up to 31s. 6d. for No. 3 Tsatlees, has kept everything in this market unsettled; the trade seem disinclined to move until the new silk has commenced to arrive and the opening prices in London are determined upon. The deliveries, although small, are not bad, considering the month and the position of the market. All quotations are to a certain extent nominal, and holders have been anxious to effect sales at some reduction under our last quotations. Arrivals of new silk are now looked forward to, but it is difficult to say at what range of prices the market will open.

No. 3	24	0	to	26	0

Deliveries from 1st to 24th inclusive. China, 1,682 bales; Japan, 556 bales; total, 2,238 bales.

COTTON.—A slight increase in the demand has been noticeable, but prices remain without improvement. No China has been offered. The sales in London have been 3,300 bales on the spot and 1,750 to arrive; and the stock of cotton on the 18th inst. was, of China and Japan, 241 bales; of all kinds, 82,802 bales. The total of the imports from 1st January to 18th July was 108,091 bales.

COFFEE.—The tone of the market is steady, with but little animation large arrivals of Ceylon and East India having caused purchasers to buy with less freedom. Full rates, however, have hitherto been obtained for good qualities of Plantation Ceylon, the commoner sorts, together with Native, being still dull of sale. The sales of Plantation have comprised 597 casks, 23 barrels, 94 bags, realising as follows:—Triage and ordinary, 54s. to 66s.; fine ordinary small to fine fine ordinary, 69s. 6d. to 75s. 6d.; low middling and middling, 76s. 6d. to 81s.; good and fine middling, 82s. to 87s.; pea-berry, 89s. to 96s. 6d. Of Native, 119 casks, 1,235 bags sold, very small at 53s.; good ordinary small, 58s.; good ordinary, 60s. to 61s. 6d.; bold, 67s. to 68s.; and by private contract 200 bags ordinary at 57s. per cwt. The arrivals from Ceylon from the 8th to the 20th July have amounted to 8,234 casks, 1,191 barrels, and 11,739 bags.

COIR GOODS.—No business either at auction or by private contract has been reported.

CUTCH.—The demand has somewhat improved, but prices have declined. At auction 1,000 boxes fine Pegu of fresh import sold; sound at 37s. to 37s. 6d.; heated, 36s. to 36s. 6d.; first-class sea-damaged, 35s. to 36s.; second-class, 35s.; and 100 boxes ordinary mixed at 25s. per cwt.

CAMPHOR.—China descriptions remain steady at the previous quotation of £6 17s. 6d. landing weights, but the transactions have been unimportant.

MANILA HEMP.—Market extremely quiet at steady rates, the total sales amounting to only 150 bales, chiefly Albay quality, which realised £52 per ton.

MACE.—Of 12 casks and 2 cases Batavian offered at the auctions, one-half sold at 1s. 6d. to 1s. 8d. per lb.

NUTMEGS.—The demand is limited, and the only sale reported is of 28 casks Batavian as follows:—Fine bold first sort, 60 to the lb., 3s. 11d.; 65 to lb., 3s. 6d. to 3s. 7d.; seconds, 77 to lb., 2s.; 96-91 to lb., 1s. 4d.; thirds, 107 to lb., 1s. 3d.; 130 to lb., 1s. 1d. to 1s. 2d.; limed, 92 to lb., 1s. 2d. per lb.

PLUMBAGO.—The market for Ceylon is extremely dull, and at auction 226 barrels of old import were all bought in, lump at 21s., dust at 7s. 6d. to 9s. 6d. per cwt.

PEPPER.—Black: There is not much activity in the demand, and the parcels offered at auction have been mostly bought in, holders refusing to accept rates below those previously current; the sales comprising 2,290 bags Singapore chiefly bought in at 3¼d. to 3⅜d., a few lots Borneo kind selling at 3d. per lb.; and 1,500 bags Penang, of which only a few lots sold at 2⅞d. to 3d. per lb. Privately, sales of Singapore in small lots have been made at 3¼d. per lb. for cash, and about 1,500 bags Penang at 2⅞d. per lb., short prompt. The total stock in the dock warehouses at this date consists of £2,900 tons, against 3,200 tons at same time last year. White: The demand continues very limited, and the sales privately have consisted of small parcels of Singapore at rather easier rates, 5⅛d. per lb. having been accepted. At auction, 682 bags were part sold on lower terms, viz.—5d. to 5⅛d. per lb. The stock in dock warehouses consists of 350 tons, against about 200 tons at corresponding period last year. A sale is reported of 500 bags afloat at 5d. per lb.

RICE.—A very extensive business has been done in floating cargoes, partly for the Continent, at full prices to 3d. per cwt. recovery. Several contracts have been made in Ballam Rice to arrive. The market on the spot remains quiet, with quotations the same as before. About 20,000 tons soft grain descriptions have sold afloat, the latest cargo sold including Rangoon at 11s. to 11s. 3d., or 11s. 9d. landed. Bassein at 10s. 9d. to 11s. 3d. Necrancie Arracan at 10s. 9d. to 11s. 3d. Larong, 10s. 9d. 350 tons new Rangoon, just in, have been disposed of at 11s. 9d. ex ship. 1,400 tons Ballam are reported at 11s. 6d. to 13s. 6d., according to quality and date of shipment. About 15,000 bags have sold on the spot:—Rangoon, 11s. 10½d. to 12s. 3d.; Necrancie Arracan, 11s.; Moulmein, 11s. 3d. per cwt. The recent landings have led to some increase in the stock.

SUGAR.—The market has been steady, with prices about the same as last reported, excepting in the few cases where importers pressed sales, when a slight decline ensued. West India continues in fair demand by the Refiners. Manila has not met with buyers on former terms. Grainy and crystalised Mauritius, owing to the diminished supplies, maintain their former value. A good business has been done in floating cargoes of Foreign, chiefly for the United Kingdom, and several have sold for exportation. With continued large deliveries, the stock has been further reduced, and it is now less than for several years past. At auction, 1,254 bags unclayed Manila realised 25s. to 25s. 3d. and 1,600 bags privately 25s. 6d. per cwt.

SAPANWOOD.—Since our last report 9 tons Ceylon have been sold at £11 to £11 2s. 6d. per ton, and 26 tons Manila bought in at £9 to £9 10s.

STICKLAC.—At auction 133 boxes woody Siam were bought in at 42s. 6d., and 536 boxes good sifted were withdrawn.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5 15s. to £6 5s.; nail rods, £7 10s. to £8; hoops, £8 10s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 10s. to £8; rails, £6 5s. to £6 7s. 6d

STEEL.—Swedish kegs, £15 to £15 10s.

COPPER.—Sheet and Sheathing, £81 to £86 per ton; yellow metal, 7d. to 7¼d. per lb.

TIN.—£91 for block; £92 for common bars. Tin plates, best charcoal I.C., 30s. to 31s.

LEAD, &c.—English pig, W.B., £21 5s.; shot, patent, £23; sheet, £21; spelter, £21 to £21 5s.; zinc, English sheet, £26 to £26 10s.; quicksilver, £6. 17s.

The following is from the Circular of Messrs. French and Smith:—With exception of a further improvement in foreign Tin, and an advance of about 5s. per ton in price of Spelter, we have no change to report in the metal market.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

In rates of freight to the Eastern ports we have no change to note; previous quotations are maintained.

Current rates of freight for vessels on the berth:—To Yokohama: 20s. to 30s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight, 40s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £56. For Saigon: £50. For Yokohama: £50. For Batavia: £27. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 18s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s.

The Admiralty have invited tenders for the conveyance, from Kingstown to Colombo, of about 37 officers, 10 ladies, 14 children, and 1,058 rank and file, including women and children; also of 6 tons weight cement, and 6 tons meast., hose pipe and stationery, from the Thames to Hong Kong.

CASUALTIES.

The St. Gravenhage (Dutch ship), Black, from Rotterdam to Batavia, put in at Rio de Janeiro, June 13, leaky. A partial discharge of her cargo had been recommended.

A telegram from Galle, dated July 17, reports that the Tai-wan, from Foochow to London, with tea, was totally lost in the river Min, June 20.

The Diana, Teengs, from Batavia to Rotterdam, which put into Mauritius June 8, leaky, has, according to advices since received, begun discharging there.

According to advices from St. Helena, dated June 27, the Amersham, Barton, from Penang to London, which put in there May 4, leaky, and was then recommended to be sold, had effected temporary repairs, and would soon be ready for sea, as, on further survey, she had been declared fit to go home in ballast. A quantity of her cargo had been sold, damaged, a portion shipped by the Mutlah, and the Alert had been chartered to convey another portion.

The Kennington, Howard, from Batavia, to Amsterdam, which put in at St. Helena, May 6, leaky, had reshipped part of her cargo, and the Quiver (schooner) had been chartered to convey a portion; both vessels were, on June 27, ready for sea. A quantity of the Kennington's cargo had been sold, together with the damaged portion, to defray expenses.

The Mathilde, Decker, from Penang, to London, put in at St. Helena, June 23, leaky, and with damage, having experienced heavy weather off the Cape of Good Hope; surveyors reported her waterway seams, and a portion of the maindeck seams, stanchions, and the combings of her hatches very slack, and recommended that she should partly discharge for further examination.

MISCELLANEOUS.

At ASCENSION.—June 10, Triton, from Batavia, and sailed for Rotterdam; 11, Niemen, from Macao, and sailed 14 for Havana.

Off ASCENSION.—June 1, Constitution, from Colombo.

At ST. PORT OF AMOY. CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful entrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c.

Apply at the Offices of Messrs. PATERSON, SIMONS, and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

New Harbour, Singapore, June, 1867.

THE AGRA BANK (LIMITED).

ESTABLISHED IN 1833.—CAPITAL, £1,000,000.

HEAD OFFICE—Nicholas-lane, Lombard-street, London

TWENTY-THIRD REPORT OF

THE CITY BANK, LONDON.

At a GENERAL MEETING of the SHAREHOLDERS, held at the London Tavern, on TUESDAY, 16th July, 1867.

DIRECTORS.
JOHN JONES, Esq., Chairman.

John Campbell, Esq.
Henry Vigurs East, Esq.
John Hackblock, Esq.
Andrew Lawrie, Esq.
Robert Lloyd, Esq.
William McArthur, Esq.
William Macnaughtan, Esq.
Jonathan Thorp, Esq.
James E. Vanner, Esq.
Augustus J. White, Esq.
George Young, Esq.

MANAGERS.
John Woolmore Duncan, Esq.
Alfred George Kennedy, Esq.

BRANCH OFFICES.
No. 34, Old Bond-street.—E. G. Mullins, Esq.
Nos. 159 and 160, Tottenham-court-road.—Alfred Gliddon, Esq.
No. 25, Ludgate-hill.—John W. Duncan, Jun., Esq.

The "Register of Shareholders" and "Register of Transfers" having been authenticated by impressing thereupon the Corporate Seal of the Bank, the following Report was read by the Secretary, viz. :—

The annexed statements of Liabilities and Assets and Profit and Loss show that after payment of Interest on Current and Deposit Accounts the Gross Profits of the six months ending 30th June last amount to £48,789 18s. 11d.

The Directors, therefore, after providing for the current expenses and rebate of Interest on Bills discounted but not yet due, declare the usual Dividend of 6 per cent. per annum, and a Bonus of 4s. per share, together equal to 10 per cent. per annum, free of Income-tax; add £1,644 1s. to the Reserve Fund, making the amount at the credit of that Account £80,000; and carry forward £699 14s. 5d. to the new Profit and Loss Account.

It will be remarked that the Acceptances of the Bank are now stated separately. These Acceptances are amply secured, and constitute a sound and profitable portion of the Bank's business.

The Directors who retire upon this occasion are—Mr. John Hackblock, Mr. Andrew Laurie, Mr. Robert Lloyd, who, being eligible, offer themselves for re-election.

The Auditors, Mr. Owen Lewis and Mr. John Curry, also again tender their services for the ensuing year.

The Dividend and Bonus will be payable, upon application at the Bank, on and after the 23rd instant.

The Dividend was then declared, for the Half-Year ending the 30th June last, at and after the rate of £6 per cent. per annum on the paid-up capital, and a Bonus of 4s. per Share, both free of Income Tax.

It was Resolved unanimously, that the Report now read be received and adopted.

The following Directors, having retired by rotation, were unanimously re-elected, viz.:—Mr. John Hackblock, Mr. Andrew Laurie, Mr. Robert Lloyd.

Mr. Owen Lewis and Mr. John Curry were re-elected Auditors of the Bank.

Resolved unanimously:—

That the best thanks of the Meeting be given to the Chairman and Directors for their able and efficient services to the Bank.

That the thanks of the Shareholders be awarded to the Managers, the Secretary, and the other Officers of the Bank.

That a vote of thanks be passed to the Auditors for their services in auditing the Accounts.

(Signed) JOHN JONES, Chairman.

Extracted from the Minutes,
C. J. WORTH, Secretary.

Subscribed Capital (50,000 Shares of £20 each) ...	**£1,000,000**	**0**	**0**
Paid-up Capital	**500,000**	**0**	**0**
Reserved Fund	**80,000**	**0**	**0**

CURRENT ACCOUNTS are made up to the 30th of June and the 31st December, in each year; and if the Credit Balance shall not, at any time during the half-year, have been below £500, Interest at the rate of 2 per cent. per annum is allowed on the minimum Monthly Balances. If not below £200, Interest at the rate of 1 per cent. per annum is allowed on the minimum Monthly Balances; but if under £200, no Interest is allowed. Parties keeping Current Accounts have the privilege of drawing Cheques, of having approved Bills discounted, of obtaining Loans upon negotiable Securities, of depositing Bills, Coupons, &c., for collection, and of lodging with the Bank, Deeds and other valuable property in the Fire-proof Strong Rooms for safe custody.

DEPOSIT ACCOUNTS.—Money, in amounts of £10 and upwards, is received from the public generally, subject to seven days' notice of withdrawal, and Interest is allowed thereon at the current rate of the day; the Bank notifying any change in the Rate of Interest by Advertisement in one or more of the leading London Newspapers. If the money be withdrawn within a fortnight, no interest is allowed. Persons having Current Accounts can transfer any portion of their Credit Balance to Deposit Account.

The AGENCY of COUNTRY and FOREIGN BANKS, whether Joint-Stock or Private, is undertaken by the Bank.

LETTERS of CREDIT, payable at any of the Chief Commercial Towns and Cities of the World, are granted. Marginal Credits are also granted by the Bank.

CIRCULAR NOTES are issued by the Bank, addressed to all, and payable at any, of the places on the Continent where the Bank has an Agent.

DIVIDENDS, &c., on Government and other Stocks, Annuities, Pensions, &c., are received for customers of the Bank without charge; the purchase and sale of Stocks, Shares, and Securities are also undertaken; and every description of Banking business is transacted.

The Officers and Clerks of the Bank are pledged not to disclose the transactions of any of its customers.

HOLLOWAY'S OINTMENT.—AGONISING PAINS.—It is gratifying to hear sufferers recount the ease they derived when first they applied this Ointment to their ulcers, sores, and abscesses, with which they had been afflicted for years. Soon after its application to a bad leg or inflammatory ulcer it restrains the excitement of the blood-vessels and nerves, which at once brings coolness and comfort, and furthers the gradual deposits of healthy materials to fill up the ravages caused by violence, debility, or disease. It expels all noxious matters, and heals all sores soundly. It gives ease to varicose veins, bad legs, and swellings of the feet and joints, where the agony is almost unremitting, and the pain too much for a giant's strength.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

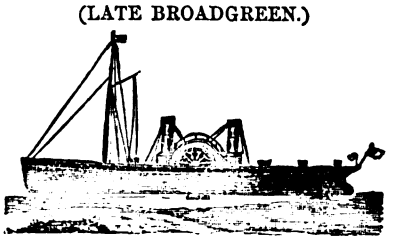
Elegant, Useful, and Instructive Presents.

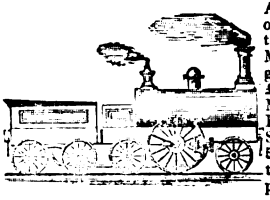
Catalogue free on application to

GEO. RICHARDSON & CO.,

Central Chambers, 17, South Castle-street, LIVERPOOL.

(LATE BROADGREEN.)





An immense variety of Vertical, Horizontal, Locomotive, and Marine Steam Engines from 6s. 6d. to £5 each. Metallic Model Screw and Paddle Steamers and Sailing yachts from 5s. to £20 each. All thoroughly tested previous to despatch.

TESTIMONIALS.

From LORD BROUGHAM.

I think very highly of your Telescope as a powerful Instrument, and am quite astonished at the very moderate price you have put upon it.

From D. CRIGHTON, Esq., Forfar, N.B.

I have thoroughly tested your £2 2s. Model Steam Engine, with which my boys are highly delighted, the material and workmanship are excellent, and being quite safe, I don't know of a more useful and instructive mechanical gift for young lads.

From the Hon. F. G. WYNNE.

The Hon. F. G. Wynne is highly pleased with the 17s. 6d. Vertical Engine; it is remarkably cheap, and well worth its price. He gives Mr. Richardson great credit for it.

From A. COURT, Esq., H.M.S. Cumberland.

Your Telescope and Microscope are both admirable and wonderfully cheap.

TELESCOPES.

The Lord Brougham Telescope.—This splendid Telescope will distinguish the time by a church clock five miles, a flagstaff ten miles, windows ten miles off, landscapes thirty miles off, and will define the satellites of Jupiter and the phases of Venus, &c. This extraordinary cheap and powerful glass is of the best make, and possesses Achromatic lenses, and is equal to a Telescope that costs £5. No Schoolboy or Tourist should be without one. Price 7s. 6d.; will be sent free by rail or post for 8s. 6d.

THE NEW MICROSCOPE.

This highly-finished Microscope is warranted to show the animalculæ in water, eels in paste, &c., magnifying several hundred times. The Microscope is mounted on a brass stand, and has a compound body with Achromatic Lenses, Test Objects, Forceps, and spare glasses for mounting objects, &c., &c. The whole contained in a highly polished mahogany case, price 7s. 6d., or will be sent carriage free (by rail) for 8s. 6d.

ILLUSTRATED CATALOGUE.

G. RICHARDSON and CO. have published a Catalogue of 80 pages, illustrated with 8 full page engravings of Steam Engines, 8 Lithographed Drawings, beautifully printed in colours, of Screw and Paddle Steamers and Sailing Yachts, and 12 Views of Magic Lanterns and Slides describing upwards of 1,500 Slides embracing every subject; also full particulars of Microscopes, Telescopes, &c., &c. G. R. and Co. earnestly invite every one to procure a copy, as it gives an extended view of the various articles which cannot be put into an advertisement. It will be sent free on receipt of ONE Stamp for postage.

P. O. Orders payable to George Richardson and Co. Liverpool, Cheques crossed Alliance Bank, Liverpool.

THE SHORTEST ROUTE TO AND FROM MANILA AND THE PHILIPPINES.

NOTICE to SHIPPERS and PASSENGERS by the OVERLAND ROUTE:—

The CHINA STEAM and LABUAN COAL COMPANY (Limited), in pursuance of an agreement entered into with the Government of Manila, have arranged to despatch the steamships "MONA" and "JAPAN," or other of their first-class steamers, with the mails and passengers monthly between Singapore and Manila, and Manila and Singapore, in correspondence with the Messageries Imperiales Overland Route.

By a special permit all goods by these steamers from the 1st August, 1866, will be admitted into Manila at the reduced duty of 10½ per cent.

The Company's agents at Singapore will take charge of goods for transhipment. For further particulars apply at the Offices of the Company, Ethelburga-house, 70 and 71, Bishopsgate-street, London, E.C.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT, from SOUTHAMPTON and MARSEILLES.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and RECEIVE CARGO and PARCELS for GIBRALTAR, MALTA, EGYPT, ADEN, CEYLON, MADRAS, CALCUTTA, the STRAITS, CHINA, and JAPAN (YOKOHAMA), by their steamers leaving Southampton on the 4th and 20th of every month. For GIBRALTAR, MALTA, EGYPT, ADEN, and BOMBAY, by those of the 12th and 27th of each month; and for KING GEORGE'S SOUND, MELBOURNE, and SYDNEY, by the steamer leaving Southampton on the 20th of every month. The steamers leave Marseilles on the 5th, 12th, 20th, and 28th of the Month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C., or Oriental-place, Southampton.

OVERLAND ROUTE VIA MARSEILLES.

SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

MESSINA, ALEXANDRIA, ADEN, POINT DE GALLE (Ceylon), PONDICHERRY, MADRAS CALCUTTA, SINGAPORE, BATAVIA, SAIGON, HONG KONG, SHANGHAI, and JAPAN.

The 9th of every Month for—

MESSINA, ALEXANDRIA, ADEN, SEYCHELLES REUNION, MAURITIUS

For passage, freight, and information apply to B. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., Liverpool; at the offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles; or to SMITH and Co., Rotterdam.

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles.

INDIA AND CHINA VIA ITALY.

SHORTEST SEA PASSAGE FROM EUROPE TO EGYPT

BRINDISI to ALEXANDRIA—Contract Passage, 82 hours
It is frequently done in 72 hours.

THE Società Anonima Italiana di Navigazione Adriatica Orientale, under contract to carry the Direct Mails despatch as under their first-class English-built steamers CAIRO, BRINDISI, PRINCIPE DI CARIGNANO, or PRINCIPE TOMASO, between BRINDISI and ALEXANDRIA. The vessels of the Company sail as follows:—From Brindisi for Alexandria on the 7th, 14th, 22nd, and 30th of each month, at 2 P.M.; Alexandria for Brindisi, on the arrival of the mails, about the 5th, 12th, 20th, and 29th of each month. The arrivals at and departures from Alexandria are in coincidence with those of the steamers of the Peninsular and Oriental Company, with the Calcutta, China, and Bombay Mails.

Fares:—Brindisi to Alexandria, including provisions 1st class, 275f.; 2nd class, 200f.; third class, 90f., and *vice versa*.

For further particulars apply to the Company's offices at FLORENCE, via Montebello, 42; PARIS, Rue de L'Universite, 108; LONDON, Messrs. PALMER, 44, Eastcheap, E.C.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN *en route* thence to YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month. Passengers by this route are less than ten days in the tropics.

The next departures from San Francisco are:—

GREAT REPUBLIC, 5,000 tons, September 3rd.

CHINA*, 5,000 tons, October 14th.

COLORADO, 4,000 tons, November —.

For particulars of Freight, through passage rates, &c., &c., apply to H. STARK and Co., General European Agents, 145, Cheapside, London.

* Name changed from "Celestial Empire."

NEW OCEAN MAIL ROUTE to CHINA and JAPAN, via the Isthmus of Panama and San Francisco.

THE WEST INDIA AND PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the Panama Railway Company and the Pacific Mail Steamship Company for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

The next departure will be

From LIVERPOOL on the 20th August,

intending to connect, at San Francisco, with the steamer leaving on the 14th October for Japan and China. The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

For rates of Freight and Passage apply to the agents, J. M. CURRIE, Havre and Paris; or at the Company's Offices, The Temple, Dale-street, Liverpool, and 117, Leadenhall-street, London, E.C.

ARTHUR B. FORWOOD, Managing Director.

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

JAPAN AND CHINA, by Mail Steamers throughout.—GOODS for YOKOMAMA, Nagasaki, Hong Kong, and Shanghai can be shipped under through bills of lading, via Panama, by the ROYAL MAIL STEAM PACKET COMPANY'S STEAMERS, leaving Southampton on the 2nd of September, 1867.

Apply to J. M. LLOYD, Secretary.
Royal Mail Steampacket Company, 55, Moorgate-street, London, E.C.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world. Baggage collected and shipped, insurances effected, &c.

To Sail on August 13.

FOR HONG KONG and WHAMPOA, the well-known clipper THE TWEED, A1 15 years (owned by John Willis, Esq.), 1,745 tons register; WILLIAM STUART, Commander; lying in the East India Docks. This magnificent ship offers a favourable opportunity to shippers of fine goods at this particular season, as she may confidently be expected to make the passage under 100 days, having proved herself to be one of the fastest ships afloat.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

First voyage—London to Ceylon, 77 days; Singapore to London, 84 days. Second voyage—London to Bombay, 89 days; Malabar Coast to London, 81 days. Third voyage—London to Bombay, 75 days; Kurrachee to London, 86 days.

Regular line of Packet Ship.
To follow the "Tweed."

FOR HONG KONG and WHAMPOA, the nearly new clipper-ship ALBERT VICTOR, A 1 13 years, 858 tons register, newly metalled; DAVID MUIR, Commander: lying in the East India Docks. This fine ship, built by Messrs. Steele, of Greenock, offers a favourable opportunity for shippers of fine goods at this season.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

To sail July 30.

DIRECT for POINT DE GALLE and COCHIN, the beautiful clipper-ship ANN LUCY, A1 11 years, 270 tons register; WILLIAM NOBLE, Commander a lying in the London Docks. This fine vessel offers; first-rate opportunity to Shippers of Fine Goods, and has very good accommodation for first and second class passengers.

For Freight or Passage, apply to JOHN C. CAMPBELL 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To Sail 28th July.

DIRECT FOR COLOMBO, the beautiful British-built clipper ship, SEA KING, A 1 12 years, 404 tons register, S. C. CLARKE, Commander; London Docks. This magnificent vessel, built in 1866, from her high-class and fast-sailing qualities, offers the best opportunity to shippers of fine goods.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Sea King."
Will meet with the usual despatch.

DIRECT FOR COLOMBO, the splendid Dundee clipper SEAFIELD, A1 10 years, 616 tons register; J. TOUGH, Commander; West India Docks. This magnificent vessel has just returned from Colombo, and from the good order in which she invariably delivers her cargoes offers the most favourable opportunity to shippers desirous of despatch.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To sail August 10.

COLOMBO DIRECT, the splendid clipper THAMES, A 1 13 years, 444 tons register; O. J. H. ARNOLD, Commander; to load in the West India Docks. Has magnificent accommodation for passengers.

For Passage apply to W. H TINDALL, 5, Tokenhouse-yard; and for Freight or Passage to F. TALLACK, No. 23, Birchin-lane, E.C.

To follow the "Thames," sailing August 25.

FOR COLOMBO, CEYLON, DIRECT, will have the usual despatch, having the greater portion of her cargo engaged, the clipper-ship PALESTINE, A 1, 608 tons register; THOMAS PARK, Commander; loading in the West India Docks. This magnificent vessel has a full poop, with accommodations of the first order for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23 Birchin-lane, Cornhill.

To follow the "Jessie Gilbert," and will sail July 28.

FOR BOMBAY direct, the fine British-built iron clipper ship BEBINGTON, AA1, 889 tons register, THOMAS WARLAND, Commander, East India Docks. This splendid vessel, from her high-class and fast-sailing qualities, is confidently recommended to shippers of fine goods.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Printed for the Proprietors by RICHARD KINDER Milford-lane, Strand, W.C., and published by JOHN ELLISON, at the Office of the "LONDON AND CHINA TELEGRAPH," 2, Cowper's-court, Cornhill, in the parish of St. Michael's, in the City of London.—Saturday, July 27, 1867.

The next P. & O. mail, with Hong Kong dates to June 29, is expected on the 13th instant. Telegrams have been received, via Galle, in advance of the mail leaving Hong Kong on the 13th July. Via Kiachta telegrams from Shanghai are in to July 9.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Euxine, from Southampton, August 4.—To Shanghai: Mrs. Algernon Wright and child. To Singapore: Capt. Formochy. To Hong Kong: Mr, Stratford, R.N., Mr. Grant, R.N., Mr. Platt, R.N., Mr. Blackburn, Mr. C. Jackman. To Ceylon: Mr. and Mrs. Milne.

From Marseilles, Aug. 12.—To Yokohama: Mr. Fredrick de Fiécher. To Shanghai: Count de Mont Blanc and five Japanese gentlemen.

Per P. and O. steamer Columbian, from Southampton, August 20.—To Shanghai: Mr. A. E. Hippisley. To Ceylon: Rev. J. Pickford, Rev. Griffith. To Hong Kong: Mr. Oldknow, R.N., Mr. Toxdale, Mr. Vercoe, Mr. White, Mr. Lugden, Mr. Pinkis, Mr. Lumley. To Singapore: Mr. Kellock, R.N.

Per P. and O. steamer, from Marseilles, September 4.—To Hong Kong, via Bombay: Mr. C. J. Alford.

Per P. and O. steamer, from Southampton, September 4.—To Hong Kong: Mr. and Mrs. G. W. Caine and child. Miss M. Middlemist, Mr. Lucas, Lieut. Spaight. To Singapore: Mr. Isemonger. To Shanghai: Mr. E. Price.

From Marseilles, September 12.—To Singapore: Mr. and Mrs. C. Heinszen, Mr. J. W. Miller. To Penang: Mr. L. Zander. To Hong Kong: Mr. and Mrs. Schenermann.

From Suez to Hong Kong.—The Bishop of Victoria and Mrs. Alford, Mr. E. Alford.

Per P. and O. steamer, from Southampton, September 20.—To Ceylon: Mr. and Mrs. Budd and two children, Miss Piachand. To Singapore: Mr. Hervey, Mr. Austen.

From Marseilles, September 28.—To Hong Kong: Dr. C. M. Jones, Mr. E. H. Price, Mr. Leopold Kahn. To Shanghai: Mr. D. Brand. To Ceylon: Mr. Morris.

Per P. and O. steamer, from Southampton, October 4.—To Ceylon: Mr. G. Crowe.

From Marseilles, October 12.—To Ceylon: Mr. J. Murdoch, Mr. and Mrs. Armitage. To Hong Kong: Mr. T. Pyke, Mr. T. Porter.

Per P. and O. steamer, from Southampton, October 20.—To Hong Kong: Mr. Armstrong, Miss Caldwell.

From Marseilles, October 28.—To Singapore: Mrs. R. Little and child. To Hong Kong: Mrs. J. Haffenden.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates hence are to the 12th June. The English mail of the 10th and the French mail of the 17th April arrived out on the 2nd and 9th of June respectively, the latter conveying London telegrams to May 16. The present mail brings but few items of interest. The following is from the *Japan Herald*' mail summary :—

When our last summary left, H.E. the British Minister ha just returned from Osaca in H.M.S. *Basilisk*. To the informa tion already given respecting the ministerial visit we hav nothing to add. It is now with us as a thing of the past, and i is not likely to be again brought very prominently forward unti such time as preparations may be necessary for carrying int effect the settlement of the new ports. H.E. the Frenc Minister arrived in H.I.M.S. *Guerriere* from Nagasaki on th 7th June; and by the French mail steamer H.E. Mons. Kin de Rodenbeck, the Belgian Minister, returned to, an H.E. M. le Comte de la Tour, the Minister for his Ma jesty the King of Italy, arrived in, Japan. The foreign resi dents are now hopeful that the greater question of th opening of the ports being settled, and that so satisfactorily Ministers will turn their attention to the wants of the existing settlements, and more particularly of Yokohama. In spite o the unsatisfactory condition of trade, which has led some house to close their establishments here altogether, the foreign quar ters are increasing, and every day the want of good municipal arrangements is more and more experienced. To this end last year the land-renters proposed a set of "land regulations' to the Ministers which, although dated October, 1866, an sent in about that time, have never since been heard of, and th public are now becoming impatient to hear something from the Ministers upon the subject. An impression has got abroad that in their present shape those "land regulations" will be inoperative. If the Ministers are of this opinion, they might point out in what particular they are likely to be so, and try to devise a scheme that shall be binding upon all. At present, things are in a most unsatisfactory state, and they must remain so until Ministers speak.

In all respects an improvement in business may shortly be looked for. The last few months, although so comparatively inactive and generally unsatisfactory, have seen several important restrictions removed and improvements introduced by the Japanese Government, and the effect of allowing the free import of rice has been all for good. Whether the Japanese will ever see their way, as some seem to think they will, to "free trade" is very problematical, but they evidently begin to acknowledge the advantage of the non-prohibition of imports. It will take them some time yet perhaps to see that equal freedom of export is likewise desirable. They will not immediately comprehend that we shall not take their rice unless we can make a profit upon it, and the people who are now lauding the importers of their staff of life in the time of their great need would cry out loudly against the first appearance of purchasers among foreigners for export, even though they should have ever such a superabundance in the country.

The advent of the warm weather operating on the humid soil of the settlement, aided by bad drainage and by fetid influences arising in the Creek and on its banks, has produced a great deal of fever, which at length became alarming and led to a public meeting. A committee was appointed to draw up a memorial on the subject to Sir Harry Parkes and the other foreign Ministers. The following is a copy of this document :—

To his Excellency Sir HARRY PARKES, K.C.B., &c, &c.

Sir,—In obedience to a resolution formed at a public meeting held this

Digitized by Google

day at No. 57, we beg to petition your Excellency on behalf of this community to carry into effect the wishes expressed in the following resolutions unanimously adopted at the meeting, viz :—

1.—"That this meeting do petition the Ministers to require from the Japanese Government that the necessary channel and outlet in connection with the Homura tidal drain be immediately made, in accordance with the report of the Sanitary Committee of the Municipal Council, and that furthermore the stagnant ditch and cesspool behind the native town be immediately flushed by sea water, as such evils originate the foul stench which can no longer be tolerated, and which is so productive of sickness, but that on no account the filling in of the swamp be delayed."

2.—"That this meeting do pledge themselves to support the efforts of the Municipal Council to benefit and improve this settlement, and do urge the Ministers to adopt the proposed land regulations on behalf of their respective Governments, or suggest some better mode of meeting the requirements of this settlement."

We trust your Excellency will deem fit to adopt the remedies suggested with a view to improve the sanitary condition of our settlement, and by enforcing immediate action on the part of the Japanese Government to prevent further inroads of the sickness now so prevalent amongst both natives and foreigners.

With reference to the second resolution, your Excellency will at once realise the importance of either enlarging the power of the Municipal Council by some such scheme as set forth in the land regulations laid before your Excellency last October, or by responding with some suggestion of your own that will better meet the requirements of this community, now represented by the Municipal Council.

Your petitioners make bold to avail of the present exigency, which may seem to us more alarming than it can to those not resident on the spot, to fervently urge the extreme importance of the very earliest possible attention to this appeal of the Community of Yokohama.

The scheme for building a theatre is abandoned until a more hopeful period—when money is more plentiful and there is less disinclination to go in for public amusements.

Thieves are as active in and out of the settlement as ever. A few nights ago a little 6-ton sailing-boat was robbed at her moorings of her sails, and a day or two later an engineer in the settlement was robbed of between $400 and $500.

By H.I.M.'s transport ship *Creuse*, from Saigon, there arrived 20 Arab horses, as a present from the Emperor of the French to the Shiogoon. The whole have been landed in fair condition, and a valuable addition they will be to the Shiogoon's stud. The Count d'Incourt is charged with the mission of presentation.

COMMERCIAL.—*Silk:* Settlements had been on very limited scale since the 29th May, when the 10th of April mail arrived with reports of war imminent in Europe, and of a large crop in China. Transactions ceased for three or four days; prices fell in consequence, and induced a few buyers to resume purchases but to such a small extent that the settlements of this fortnight do not amount to much more than 100 piculs. They consist almost entirely of medium and inferior Hank Silks, on which we may report a fall of from $20 to 50 according to quality. The best on offer have been paid from $870 to 850 and a small parcel of very fine Mybash is held at $900. The other descriptions have been quite neglected, and our quotations of them are nominal. Under less unfavorable circumstances the settlements of this fortnight could by no means have been large as arrivals added only 100 piculs to a stock reported in our last to consist of 200 or 250 piculs of the secondary and inferior sorts which form the bulk of a comparatively heavy unsold stock at home. The news brought by the French mail has produced a slight reaction and prices are firmer. Reports from the interior regarding the new crop unanimously agree in representing the production as being superior to that of last year — musters may come to hand in a week or two, but no arrivals of new silks are expected before the middle of July. *Tea:* There is no new feature to notice in our tea market. The new crop comes forward but slowly, the few samples shown are of a very medium quality, and the price talked of by the native dealers is so very high as almost to prevent any business being done unless some considerable reduction is made. The stock of new tea in the hands of the natives here is about 200 piculs. There have been a few settlements of new tea at rather high rates. We hear from native sources that 260 piculs have been placed at from $28 to 28.50 per picul. In old tea there remains a stock of say 2,000 piculs, principally of common kinds; this will most likely be worked off by the teamen by mixing it with the new crop. We hear of settlements to the extent of about 300 piculs, of which about 100 piculs were good medium to fine kinds. The settlements of both old and new teas amount to 560 piculs for the fortnight. *Freights:* To London: Cotton and Tea, £3 to £3 10s. per ton; Silk, £4 to £4 10s. per ton of 50 cubic feet. To San Francisco: Light Freight, $6 to 8 per ton of 40 cubic feet. Per Steamer, $15. New York per sailing vessel, £2 10s. to £3. Steamer, $45 per 40 feet. *Exchange:* Owing to the warlike news brought by the mail of 10th April, sterling rates immediately dropped 1d., and business remained *in statu quo* until the arrival of the French mail of 17th idem, the peaceful tenor of later advices causing a reactionary improvement. Scarcely any demand has existed for bank paper during the whole fortnight, the principal business done being in private at from 4s. 5½d. to 4s. 6d., at which rates close very firm.

NAGASAKI.

We have advices from this port to the 14th June. The chief item of intelligence relates to an attack made by a Japanese, on the night of the 13th inst., on two of the crew of the American barque *Valetta*. It appears that the two men were walking down the street to go on board their ship when they were met by the Japanese in question, who, without any apparent cause, instantly drew his sword and very nearly severed the head of one of the men off, inflicting a severe gash in the arm of the other; the former man was found dead on the spot where he fell, and the other, we were informed, is recovering from his wound. The Japanese had not been apprehended at the time of the *Feeloong's* leaving. Nobody appears to be able to give any information on the subject, and it is generally thought in Nagasaki that the men have been intoxicated, and have insulted a Yaconin. It is stated, however, that the deceased had been three years in the vessel, and had always conducted himself in a proper manner—a fact which renders the supposition that he misconducted himself somewhat unlikely.

The following is from Messrs. Alt and Co.'s Market Report, dated June 1 :—

IMPORTS.—Our market continues in the same unsatisfactory state as at the date of our last report, and the same difficulties in our Exchange preclude the possibility of our making profitable sales, except in barter against native produce. Lawns show a slight advance in value, and stocks are low. T-Cloths in demand at quotations; none in stock. Handkerchiefs inquired for. Turkey Red Cambrics: 2¼ catty wanted, but lighter goods are unsaleable. Grey Shirtings: 7lbs. wanted, and none in the place, but 8¼lbs. goods are in large stock. Yarn is in fair stock, with but small demand. White Shirtings continue to be inquired for. White Brocades are in small stock, with daily inquiries. Lustre Orleans saleable at quotations. Metals: Nail Rod Iron (small sizes), Bar and Pig Iron, are in increased demand with light stocks. Spelter, Tin Plates and Lead are also saleable at quotations, and of the former there are no stocks. Of English Coal there is none in the place. The following vessels have been sold to the Japanese during the past month:—The steamers Nepaul and Emperor, the barque Corea, and the schooner Alma. The steamers Ayrshire Lass and the Viola have been taken back by the foreigners from the natives.

EXPORTS.—Our produce markets generally have not been active during the past few weeks. Tobacco and Galls have been in small supply, and only a limited business has been done in the former at firm rates. Stocks of Wax have accumulated, and in the absence of any extensive inquiry prices have declined. Sales of Rapeseed Oil have been made at figures showing a turn in favour of buyers. The Tea market has been dull, owing to further unfavourable advices having been received of the home markets. A few musters of the new crop leaf have been shown, but the Teas are not expected in bulk within the next fortnight. Silk: There are several parcels now in stock, and further supplies are said to be coming forward shortly. Musters have been shown of parcels aggregating about 25 pls., but there are no sales reported.

EXCHANGE.—We quote 6 months' sight private paper on London 4s. 6d. per dollar. Drafts on Shanghai 10 days' sight, 1½ to 2 per cent. premium. On Hong Kong no rate is quotable. New Ichibous are nominally worth at present 335 to 340 per 100 dols., but goods are only saleable for Niboos, which are taken in payment for drafts at the rate of 350 to 360. Old Boos are worth 12 to 13 per cent. more than new ones, but they are never given in payment for goods, and are, as well as new ones, very difficult to obtain.

FREIGHTS.—For general cargo to London the rate is £3 5s. per ton of 50 cubic feet. For Tea there is no vessel on the berth for either England or America. For Shanghai the rate is 3 dols. to 4 dols. per ton of 40 cubic feet, and to Hong Kong 4 dols. is quoted.

CHINA.

TIENTSIN.

Owing to the continued absence of rain, the water routes from Tientsin into the interior remain in an unnavigable state for laden boats. Both the autumn and spring seed has failed, and the food of the people is daily becoming dearer. There is no demand for tonnage, as produce cannot come here. A correspondent of the *North China Daily News* writes as follows :—"On the 4th June we observed, about 2 P.M., the sky looking very black in the north-west. To new residents it looked like rain, but the old residents at once saw that a terrific dust storm was rushing over the earth from the north-west towards Tientsin. About 2.30 P.M. the dust storm reached the British settlement, when it became as dark as at midnight, the wind blowing fearfully. This lasted for nearly an hour. If the storm had overtaken people in a large plain they would certainly have been suffocated to death. After the dust storm passed we had a little rain and a cool evening. We judge from this storm that the north-west portions of China and Mongolia are suffering dreadfully from drought. The Emperor and his Ministers, besides the mandarins in the country, are every other day visiting the temples to pray for rain. The winter and spring seed crops have all perished from the dry weather. The food of the people is daily becoming dearer, and I understand many are now only eating once a day, fearing a famine is coming, for which they must, if possible, save some money to buy food. Of course the canals continue dry, and laden junks cannot move along them. The Shanse merchants continue to decline to buy manufactures as they cannot move them from here; and if the North of China and Mongolia suffer much longer from drought, the inhabitants will not have the means to buy clothing, but will require all their money to buy food. We hear that Shanse and Shense are beginning to be troubled with robbers; and that it is at present impossible for goods to move along the land routes with safety in these regions. The Governor of Shanse

Digitized by Google

gave permission last winter for the cultivation of the poppy this year in that province, under certain conditions; and if the crops are fairly gathered in this year we shall see again Chinese native drug competing against Malwa. We do not therefore expect that the consumption of Malwa opium will this year reach the amount of last year by a great deal. We do not remember ever to have seen the foreign import trade so depressed as at present, and if holders desire to realise they must do so at a great sacrifice on the prices hitherto ruling. The port is losing its shipping rapidly, and even the steamers appear here now at considerable intervals. They bring very few imports and leave with scarcely any produce."

HANKOW.

Advices from this port reach to the 15th June. We have received no papers, but take the following from Messrs. Olyphant and Co.'s Circular :—

COMMERCIAL.—*Teas:* During the past fortnight an unusually large business has been transacted, settlements to the extent of 55,019 chests and 3,353 half-chests having been reported. Prices have varied but little; finest Teas, of which the market is now cleared, being readily saleable at opening rates. The next grade of Oopacks must be quoted about a tael a picul higher, and medium Teas of this description are unchanged in value. Finest Oonahms are about 1 tael per picul dearer, taking quality into consideration, but other descriptions from this district are without change in value. The picking of the second crop will commence in a few days. We quote finest Oopacks at tls. 30 to 32 per picul, and medium to fine, tls. 23 to 29; Oonahms range from tls. 19 to 26½. Total export from 1st January to date is 11,591,467 lbs., against 7,414,926 last year.

KIUKIANG.

While Sir Rutherford Alcock was at Kiukiang an address was presented to him on the subject of opening up the Poyang Lake to small steamers. In reply, his Excellency said that the object of his visiting the ports in succession was to judge for himself by observation, and in communication with the merchants on the spot, what had been the working of the Treaty of Tientsin, and wherein it was imperfect or defective, or might with advantage be modified in the event of the revision of tariff and commercial regulation—which the contracting Powers had a right to demand next year—being deemed expedient. His Excellency observed that, however desirous he might be to effect any practical improvements, it was necessary to bear in mind that the question of modifying treaty provisions once opened it was equally the right of the Chinese Government to demand modifications on their side in what they might deem to their disadvantage. That many conditions distasteful and contrary to their wishes, if not to their interests, had been embodied in the treaty there could be no doubt; perhaps in none more certainly than the navigation of the Yangtze. It was the one stipulation most strenuously resisted and reluctantly conceded. Under these circumstances, while perfectly agreeing with the authors of the address that the opening of the navigation of the Poyang Lake would be a great gain to the foreign merchant and the port of Kiukiang, he could entertain no hope that it would be either spontaneously granted or willingly conceded by the Chinese Government. And he must repeat what he had said elsewhere, that it was not a right, and must, if the question be entertained at all, become a matter of negotiation. He would, however, willingly transmit the address to H.M.'s principal Secretary of State for Foreign Affairs, praying for this concession as the chief object, and so far as the British merchants and their interests were concerned he had no doubt, if obtainable, the advantages would be great. The Chinese would certainly object that such advantage could only be obtained at the expense of their own subjects, whose interests would be sacrificed. Junk owners, boatmen, and porters in large numbers would be thrown out of employment, setting aside all the dangers incident to the navigation by steamers of a lake, of large extent, through which there was only one narrow channel in its whole length. And whatever might be the ultimate result, or the compensation which enlarged trade might create in time, as the writers of the address assumed, not incorrectly as he thought, it might be very difficult to prove that the first effects could not be very disastrous to the classes referred to; and still more difficult to convince the Chinese authorities that they could be reasonably called upon to inflict such present injury upon their own people and incur the danger of popular trouble and discontent to swell the ranks of the insurgents and perpetuate a great evil for any further or prospective advantage. His Excellency remarked it was very melancholy to see what widespread desolation and ruin the insurgents had brought on all the surrounding country. The Yangtsze itself gave the saddest evidence in the absence of all native traffic. One of the finest rivers in the world, stretching through the breadth of a great empire, and the natural highway for the produce of districts rich in tea, cotton, and silk, had scarcely a native junk upon it between Hankow and Shanghai, a distance of 600 miles. A few foreign steamers monopolised apparently the whole traffic that remained. And if they extended the range of their operations into the Poyang Lake, the Chinese might not unnaturally anticipate a still further diminution of their own junk trade. It was essential in his opinion that treaties should be based upon principles of justice and equity with due regard to the interests of both contracting parties. In the end he believed this was the wisest and best policy, for all treaty stipulations imposing loss or wrong upon one side for the advantage of the other were likely to be broken or evaded by the party injured, and always proved a fertile source of trouble and misunderstanding.

COMMERCIAL.—Since the 1st instant a fair amount of business has been done in Tea. Considering the high rates demanded by holders, prices have been very irregular and at one time showed a decided advance on opening rates, but during the past few days settlements have been made on rather easier terms. We quote finest Ningchows at taels 28; fine do., 23 to 25. In Mohows, we hear of no business having been done. Settlements for the fortnight reach 4,699 packages. Shipments to Shanghai on native account, 8,674 packages. Stock 14,200 do. Comparative export to date, 1866-67, 5625 packages, against 1867-68, 13,328.

CHIN-KIANG.

A correspondent at this port gives the following account of an attack made by a tiger upon a Chinawoman who was sleeping in a mat cottage :—"For a long time it has been stated by the natives that a kind of tiger termed the 'dog-headed' existed on the hills of Chin-Kiang, and although the Chinese have at various times reported women and children being killed and eaten, yet for want of sufficient evidence they have never been credited by the foreigners. The matter, however, has at length been settled without doubt, for on the morning of the 15th instant there might have been seen within fifty yards of a foreign hong the remains of a poor woman who had been killed and eaten during the previous night—a thigh bone (fractured) and a pool of blood testifying to the strength and ferocity of the wild animal. It appears from a boy's statement, that he was asleep with his mother in a mat cottage, when he was awakened by an immense animal with a head like a dog dashing in and seizing his mother, who uttered but one cry; the boy ran to where other people lay, but none durst approach the beast, who had in the mean time dragged the woman a few yards from the hut and was devouring her; when daylight appeared they found but the one bone above mentioned, and the pool of blood, which were seen by various persons who had heard the report and wished to satisfy themselves by personal observation. The Chinese say the dog-headed tiger is far more formidable than the wolf, and differs in appearance, and that it was unheard of and unseen before the Taiping Rebellion."

SHANGHAI.

From this port we have advices to the 21st June. The outward mail of April 26th was delivered on the 15th June.

Sir Rutherford Alcock had passed through Shanghai on a visit to the Yangtsze ports; returned to Shanghai, and left again for the South on the 17th June. The following items of news are from the *North China Herald*:—

The bean-cake trade between the northern ports and Shanghai has been the subject of much discussion. While nominally assenting to the employment in it of foreign ships, the Taotai has always exerted his influence, surreptitiously, to prevent their engagement. From official correspondence which we publish elsewhere, it will be seen that the Governor-General of Nanking has, on the representation of Sir Rutherford Alcock, directed the Taotai to issue a proclamation declaring British vessels at full liberty to engage in the northern bean trade. It is feared, however, that the same secret influence may still be exerted to neutralise the apparent consent.

A scheme is on foot for constructing a road to the Fengwang-shan hills, to facilitate approach to the only rising ground near Shanghai. We doubt, however, whether sufficient funds will be procured for the purpose.

Some dissension has taken place in the Fire Brigade in consequence of the appointment by the Commissioner of some officers to No. 2 Company without consulting the members. No objection is entertained to the officers; but it is held that, in appointing them, the Commissioner has exceeded his power; that the right of election lies with the members.

The unfortunate delay in telegrams via Kiachta, at a time when they were most anxiously looked for, is explained by the

Digitized by Google

fact of the Russian wires having broken down. Mr. Grant however expresses a hope that the accidents are over for the season, as the ice has all disappeared now.

Some Chinese house property in the Maloo, bringing in a yearly rental of $1,080, has been sold at auction for taels 2,500.

A partial amalgamation of the local Post-office and the Packet Agency has been arranged. Both institutions will be gathered into one building, and one staff of coolies will suffice for both. The province of each will be defined; that is, the Packet Agency will cease to undertake certain duties which it now performs, to which the local office will attend exclusively. The revenues of each will of course be still distinct.

At a meeting of the British Episcopal Church Society held at the Consulate, Mr. Bryans was elected a trustee in place of Mr. Whittall. Mr. Lawrence then asked Mr. Kidner, the architect, when the new church was likely to be finished, as the present pews were dilapidated and rather draughty. Mr. Kidner was sorry the church was not likely to be finished so soon as he might perhaps have led the public to suppose six months ago. Since then various obstacles had arisen. Once or twice the workmen had struck—the strike on one occasion lasting for two or three weeks. Intimidation had been employed to prevent men who were otherwise willing to work from doing so. The greatest number that had been employed at any one time was 300, not half so many as would have been engaged if more could have been obtained. These were the only reasons why the building was getting on so slowly. Otherwise, every one connected with it was doing his best to push it forward; in fact it was the interest of every one that it should be finished as quickly as possibly.

The Silk Guild has submitted to the Taotai four rules, by which they proposed that transactions with foreign merchants should in future be governed. These rules having, however, been unanimously repudiated by the Chamber of Commerce and merchants generally, the Consuls have very properly refused to recognise them. They are as follows:—

Rules as to Trade with Foreigners agreed to by the Silk Hongs.

1. It has been hitherto the custom for linguists attached to the hongs of silk brokers through which silk is sold to foreign hongs before the commencement of each new silk season, after finding securities, to apply to the Customs Bank for a stamped (blank) book (of forms in which is entered every transaction) in order to ensure that the duties are properly paid. For the prevention of confusion, and to specialise the responsibility, those who do not apply for the stamped books through the guild, and all unattached linguists, are forbidden to purvey silk to foreigners as brokers.

2. The basis of commerce between Chinese and foreigners being good faith, and public feeling having of late undergone a change, native merchants desired that the trade should be altered to a ready-money system. As, however, the amount of money required by such an arrangement is very large, and the matters connected with deciding the quality and weight are somewhat complicated, it is feared that this course would be inconvenient even to the most respectable merchants. A certain amount of delay must be conceded to the foreigner if he is forced to obtain advance on the silk he buys.

It is now proposed as a safeguard to both parties to make it imperative that the price of the silk is to be paid before the departure of the mail steamer.

3. As, therefore, the ready money system is impossible, it is determined that when the silk has been weighed and the price calculated, the foreign hong shall be applied to for a note giving full particulars of the goods, and fixing the date of payment, which date must be before the departure of the mail steamer. This note is to be handed over by the linguist to the silkman for him to hold till the payment is due.

4. Silk sold to a foreign merchant, even after being weighed, packed, and stowed on board the steamer, shall not be treated as his property before the payment becomes due, or if the price has not been paid in full, and if news arrives from abroad that the foreign hong has failed, application shall be made to the Consulate to have the silk returned to the original owners.

The U.S. flag-ship *Hartford* and the *Wyoming* have returned from an expedition to the southern part of Formosa, whither they had gone to inquire into and avenge the deaths of the crew of the American barque *Rover*, which vessel was wrecked on the Bashees in March last, the crew escaping in boats, but only to be treacherously murdered by the natives of Formosa on reaching their shores. A force of blue-jackets and marines—numbering 180—was landed for the purpose of destroying any villages they might find and to burn the thick jungle which afforded cover to the natives, and succeeded in destroying several collections of huts, but found the jungle too green to burn. The natives retreated, keeping up a running fire, and drew the force some miles into the interior, when the effects of the heat, the thermometer standing at 92 deg. in the shade, were so great that a halt was called. While resting, an attack was made by the natives, and in charging the attacking party, the division was drawn into an ambuscade, and the officer in command, Staff Lieut.-Commander A. S. Mackenzie killed while leading on his men. Finding that nothing further could be done, the force retired carrying their wounded and those struck down by the sun, and on the following day the vessels retired, the Admiral deeming it imprudent to again expose the men to the heat of a tropical sun, as the jungle was too thick to admit of their penetrating it. There is however every reason to believe that effective chastisement will be meted out to the savages later in the season, when cooler weather will have set in and the jungle be dry enough to fire.

Commercial.—*Silk:* A large business has been done since last report at very full prices. The market re-opened after despatch of last mail at an advance of 30 taels on the then quotations, but owing to the anxiety to realise shown by holders, prices gradually tended downwards, until receipt of telegrams *via* Kiachta with positive orders from home caused great competition amongst buyers, and led to an advance of 15 to 25 taels, making No. 3 Tsatlees worth 550 to 570 taels, at which the market closes. *Teas:* Black: Settlements 3,133 chests, at 13½ taels for a small chop of old tea; 23 taels for a small chop mixed tea; 32 to 33 taels for Hohows; 34 taels for Ningchows; besides which a small chop of good Oopack is reported settled at 29. Kiukiang teas are realising about the equivalent of up-river rates, but Hankow teas can be bought on more favourable terms. Buyers at this are afraid of the large export and not willing to operate. Stock about 27,000 chests. Total settlements in Hankow to 13th, 112,226 chests, against 101,563 at same time last year. Stock 43,000, against 29,000 at same time last year. Settlements from 13th to 14th, 9,500 chests. Green Teas: Two small chops of Shanghai-packed tea have been settled at tls. 23.50, leaving about 5,000 half-chests in stock. The new leaf is still reported as costing very high; we cannot, however, give quotations at present. The John R. Worcester, Eliza Shaw, Challenger, City of Aberdeen, Sir Launcelot, Ajax (steamer *via* Hong Kong), and Gossamer have sailed for London, taking about 7,000,000 lbs. *Exchange:* The sterling rate is firm at 6s. 4d. for 4 months' sight, and 6s. 4¼d. for 6 months' private bills. Sales of 4 months' sight Bank paper have been made at 6s. 3½d.

FOOCHOW.

Advices from this port are to the 18th June. The *Ariel* was towed to sea by the steamer *Undine* on the 13th, so that the *Maitland* has 13 days' start of her; the *Serica*, 11 days; *Taeping*, 9 days; *Fiery Cross*, 8 days, *Ziba*, 5 days; *Flying Spur*, 4 days; *Taitsing*, 4 days; *Black Prince*, 3 days; *Yangtze*, 12 hours. Although nine ships left before the *Ariel*, she obtained 10s. per ton more than the ruling freight, and although defeated last season, there are many "backers" to be found ready even now to take her "against the field" at "evens."

Commercial.—A good business has been done in *Congous* since date of last report, settlements amounting to about 45,000 chests. Arrivals from the interior have been large, and include many fine teas, and prices of all descriptions have given way somewhat, a decline of as much as 2 or 3 tls. on fine grades being noticeable in some instances. At the close buyers showed little disposition to operate, and rates were weak, with a downward tendency. Stock was estimated at 26,000 chests. The Souchong market was opened on the 10th inst., tls. 42.8 o. b. (or about 8 tls. under last season's opening rates), and some 4,000 chests have since found buyers, latest settlements showing a reduction of about a tael, and a further decline was looked for. Stock about 9,000 chests. About 6,000 half-chests Oolong have been taken for England at rather easier figures. We are still unable to report favourably of the quality of Oolongs—they are very rough and dusty in leaf. Teamen state that finer grades are expected in about two weeks' time. A few small settlements of Scented tea have been made at lower rates. The Ariel, Chinaman, Yangtsze, and Golden Spur have sailed for London with about 3,900,000 lbs. tea. Rate of freight, £4.

HONG KONG.

Dates from this port extend to the 25th of June. The outward mail of May 10 was delivered on the 4th of June with London telegrams to May 30.

The new "Hope" Granite Dock at Aberdeen was opened on the 16th of June, with all the accessaries usually attendant upon such occasions. His Excellency the Governor took the opportunity of breaking a bottle of champagne on the occasion of the *Fire Dart* entering the dock, and made a neat little speech as he did so. It was at the suggestion of Mr. Lamont that the dock was so named, and he (the Governor) had much pleasure in christening it according to the suggestion of the man who had been the originator of the scheme. Success and satisfaction are the words which express the feelings of the party (about 125) who took part in the inauguration ceremony; and it is only due to the company to say that success in such an enterprise is a great thing in a distant part of the world like Hong Kong.

The bankruptcy case of Messrs. Lyall, Still, and Co. came on for final hearing on the 24th June. The following is a report of the proceedings:—

Charles Frederick Still and George Francis Maclean appeared for final examination.

The Attorney-General and Mr. Pollard, Q.C., appeared as counsel for the bankrupts.

Mr. Whyte, instructed by Mr. Sharp, appeared on behalf of Mr. Liebert, Mr. Mendel, and Messrs. Henderson, who are creditors. The Attorney-

Digitized by Google

General also appeared to represent Messrs. Chalmers, Guthrie, and Co., while Mr. Pollard also represented the Oriental Bank and Messrs. Fussell and Co. Mr. Hazeland appeared on behalf of Mr. Bridges, and Mr. Caldwell represented Messrs. Bower, Hanbury and Co.

On reference having been made to the notes of proceedings at the adjudication, some altercation arose between the Chief Justice and Mr. Pollard regarding the wording of the minute. The Judge maintained that all that had been said was not inserted, and that there was an important omission. On Mr. Pollard being interrupted in his reply by his lordship,

Mr. Pollard said: I submit, my lord, I have a right to be heard.

The Chief Justice replied that he had no right to be heard unless in answer to his questions.

Mr. Pollard submitted that the judge was bound to hear all his answer, and not part of it only.

Chief Justice: Will you sit down, Mr. Pollard; I do not want to hear you. Will you sit down or not?

Mr. Pollard then sat down.

Chief Justice: You are perfectly safe, Mr. Whyte. You can upset these proceedings.

Mr. Whyte: What proceedings, my lord?

Chief Justice: The whole bankruptcy.

Mr. Whyte: My learned friend has given me an undertaking—

Here followed a private consultation amongst counsel, which resulted in an apparent "smoothing" over of all difficulties. After another sharp skirmish between the honourable judge and the learned Queen's counsel,

The Attorney-General said that none of the creditors appeared either to examine or oppose the bankrupts. Mr. Still and Mr. Maclean had invited all the creditors to examine their books during the week, and it was admitted that their books had been kept in a very creditable manner. Every transaction had been stated therein, and they were ready to facilitate any further examination. He thought that the whole affairs of the bankruptcy would prove to be to the satisfaction of the Court. He would also mention that, on behalf of Mr. Whittall, who represented Messrs. Chalmers, Guthrie, and Co., he appeared for that firm, that they were creditors to the extent of about half the liabilities of the bankrupts, and that they had examined the books and found them perfectly satisfactory.

The report of the official assignee was then read. Mr. Masson therein stated that he had examined the accounts, and found them in a most perfect and correct state. There was a balance on the wrong side of the sum of $635,935, while there was not more than $2,000 on the right side; at the same time, a portion of the assets had been claimed by special creditors.

The Chief Justice said this was a most satisfactory statement, and was what should be expected from the position and reputation of the firm here in Hong Kong. The accounts and statements appeared to have been drawn up with very great care and very much attention.

Mr. Whyte here observed that, as representing his three clients, Liebert, Mendel, and Henderson, he did not intend to ask any questions, or to oppose the bankrupts' discharge.

Mr. Pollard stated that so far as Messrs. Fussell and Co. were concerned, for whom he appeared, he had no questions to ask and no opposition to make. He appeared also for the Oriental Bank, who had a possible interest in the bankruptcy. A gentleman of the bank's staff had examined the books, and had found them so correct that no opposition was offered.

The Chief Justice here recalled the controversy concerning the words used by Mr. Pollard at the adjudication, as expressed in the minute of proceedings. He wished that the words which Mr. Pollard averred he used at the time should be added to the original minute. He added that he had some doubts at the time as to granting the adjudication, and he did so only on condition that the bankruptcy should never be questioned. If it was also upon that understanding that Mr. Pollard accepted the adjudication, then it was all right.

Mr. Pollard, while altering the minutes, remarked that there could be no further difficulty about the matter. It would have nothing to do with the *Min* case.

Mr. Pollard observed that Chalmers, Guthrie, and Co., Jardine, Matheson, and Co., the Oriental Bank Corporation, Calvert and Co., Bowyer, Hanbury, and Co., and Fussell and Co.—who represented more than three-fourths of the liabilities of the bankrupt estate—had, through their counsel and agents, expressed their belief that the books contained a correct record of all the transactions of the bankrupts, and that they did not, therefore, wish to examine the parties.

The Chief Justice observed that as none of the creditors nor the official assignee had any question to ask the bankrupts, he would not attempt to do so. The creditors were supposed to be in a position to know best about such matters; and he therefore could not think of placing any obstacle in the way of the final examination of the bankrupts now before the court. It was a somewhat unusual course for two to pass, while a third partner was in England; but as nothing could be gained by a postponement, he would not allow that circumstance to affect the passing of the bankrupts. With the mass of evidence which the creditors themselves had produced, he was compelled to say that he had great pleasure in allowing the bankrupts to pass their final examination without further postponement.

The Attorney-General remarked that he was certain that the bankrupts had shown an unusual desire to do everything which was possible to do in the matter of simplifying an examination of the affairs of the estate.

Chief Justice: They can't do too much.

The two bankrupts before the court then applied for their final discharge; which, according to the terms of the Ordinance, is granted by an order coming into force fourteen days after the final examination. The Chief Justice, having asked in the usual way whether any one of the creditors proposed to oppose the final discharge of the bankrupts, and no one appearing, the discharge was granted accordingly.

His Lordship, in doing so, remarked that, from what he had seen, he thought nothing had entered the case which could be said to go beyond the common state of things present in any bankruptcy. It was satisfactory that the books told the whole tale, as that was the first merit in any bankruptcy, and both bankrupts were entitled to that credit in this case. They would leave the court without the slightest imputation, except that certain want of prudence which characterised almost every one who traded largely in China. There were, however, different interpretations of what constituted a want of prudence in the legal meaning of the term. That which in a place like London or Liverpool—[Mr. Pollard: Or Manchester (laughter).]—would be nothing extraordinary, would in a small town be looked on as an excess of speculation quite incompatible with fair business. The bankrupts had breathed a China air and formed China habits; they had played for high risks, and lost; and he thought that those who had supplied them with the means of such extravagant speculation had the least cause to complain.

Protection having been granted for the fourteen days intervening between the discharge of the bankrupts, the Court then rose.

(FROM OUR OWN CORRESPONDENT.)

It is a subject of almost universal remark that the recent announcement of Messrs. Dent and Co.'s suspension has, contrary to all probability, produced no visible effect upon business transactions of every description, both in Hong Kong and on the coast. In other times so great a disaster as this would have undoubtedly disorganised markets, by destroying credit and upsetting all calculations as to prices, but at present it seems as though the China trade had reached such a pitch of deterioration as to be beyond the reach of any further disturbing influences. It is not by any means that the present failure has been in the least degree anticipated; on the contrary, the announcement of the suspension a fortnight or three weeks ago certainly took the entire community by surprise; and it may be taken either as a proof that the unfortunate firm have acted with wonderful foresight in extricating themselves from immediate engagements or that the trade in general is so stagnant as to be quite unimpressible. The latter is probably the true hypothesis, and, in fact, there has not been a month hitherto in which so little business has been conducted at Hong Kong as the past one. Along the coast it has been different, and notably at Foochow, where, as I mentioned in my last letter, the operations of last year have been repeated, in despite of warnings, though on a somewhat reduced scale. Astonishment continues to be expressed at the prices given at Foochow for the teas recently shipped, which the best and most solvent houses have firmly refused to pay, and if, as seems inevitable, the return of the season's shipment again shows a loss, the crash that will ensue must surpass even the experience of the two preceding years.

As I anticipated two mails ago, the silk of the present season in the Canton province is entirely ruined by the cold and wet weather, which has lasted up to the middle of this month. The second "crop" is now verging upon its close, and barely 100 bales have been shipped from Canton. Judging from past experience, the four remaining crops are likely to suffer in a similar manner, if not to the same extent with the two first. As a compensation to the natives, perhaps, the unusually rainy season has been beneficial to the rice crops, and an extraordinarily plenteous harvest is anticipated. As a consequence, the heavy stocks accumulated here and at Canton are virtually unsaleable.

Throughout the North of China continued drought prevails, and at Tientsin has caused an almost entire cessation of business, owing partly to the consequent distress among the farming and poorer classes generally, but principally to the drying up of the rivers and canals having cut off the means of internal navigation.

At Shanghai the season is again extremely unhealthy, and deaths from heat, apoplexy, and fever, have already been numerous. The South, on the contrary, continues perfectly salubrious—an extremely advantageous circumstance for the fine young soldiers of the 73rd Regiment, who appear to be getting acclimatised with very little serious sickness.

Some curious facts have recently come to light here with reference to dealings in steamships, &c., in which the luckless Chinese Government has been pillaged as ruthlessly as the Japanese. Some few months ago the authorities at Canton purchased a small iron steamer, owned in Hong Kong, for river service, and appears to have been instantly attacked by the French Consul at that port, who, it is stated, demanded in the most positive terms that one or more steamers should forthwith be obtained through French agency, holding out the promise that French gunboats should be obtained from Japan. His importunity resulted in a bargain being struck, and a contract was entered into with a shipbuilder in Hong Kong, who very opportunely had on hand the engines and boilers of the late British gunboat *Flamer*, condemned as unserviceable. A hull to match was quickly put together, and the Chinese were called upon to pay some $70,000 for the valuable craft which resulted. The amount paid to the builder is stated to have been within

Digitized by Google

$40,000; and at present, after six weeks' service under a French captain (lately occupied in the coolie trade at Macao), the redoubtable gunboat is pronounced unserviceable from a complete breakdown in her machinery. Such are some of the lessons taught the Chinese by European civilisation.

Commercial.—There has been more activity in our market generally since despatch of last mail, and we are led to look for further improvement ere long. *Piece Goods:* Importers of Grey Shirtings made some slight concessions during the early part of the interval, which led to increased transactions, and latterly the inquiry has been quite active, enabling holders to effect sales at a slight advance on our last quotations. Dealers have shown a great desire to purchase T-Cloths either on the spot or "to arrive," and prices have been forced up 10 to 15 cents per piece. Stocks are now almost exhausted. A sale of 3,500 pieces American Drills—40 yards—is reported at $6.10 per piece, prices having advanced with those of English staple manufactures. In other descriptions there have been no transactions. Woollens are in more demand, and Long Ells have advanced in view of small supplies. Other kinds are unchanged in value, but more wanted. *Metals:* Iron is very firm; stocks light. Lead dull and weak. Tin steady. There has been but one arrival of *Coal*, and former rates are still demanded, while prospects favour an advance. *Tonnage:* Inquiry is only moderate, but the amount of available tonnage in harbour is small, and rates are fairly maintained. Nothing has been done in home charters direct, or *via* Manila, and only one vessel has been taken up for the Colonies, at former rates. *Exchange:* On London at six months' sight, 4s. 5¼d. for Bank, and 4s. 6d. to 4s. 6¼d. for first-class private paper; at six months' sight, 4s. 6d. for bank, and 4s. 6¾d. to 4s. 7¼d. for private. Only a moderate amount of paper has changed hands.

CANTON.

With regard to the reviving prospects of this port, the *China Mail* says:—"There are but two articles of extensive export which can materially affect the future of Canton, viz., tea and silk, and despite the misfortune which has attended mercantile effort in the North, we cannot think that the advantages presented by the Yangtze ports will ever be relinquished by foreign merchants, after the time and money which have been expended in creating those emporia of trade. But with respect to imports there is more hope. Cotton, for instance, which during 1860 was imported to the value of $5,700,000, had at the close of last year disappeared from the list. Peace in America, which enables Indian traders to send consignments of this article further East, instead of their being entirely diverted to Home wants, will doubtless have the effect of again making it an article of extensive import, while as a more liberal policy with regard to rice imported in foreign bottoms may be hoped for upon the revision of the treaty, by the abolition or reduction of tonnage dues, this trade may again assume its old proportions. It is strange, by the way, to hear it often asserted that teas are to be got almost as cheaply at Canton as at the Yangtze ports situated immediately in the neighbourhood of the tea districts. If this continue, the competition at the northern ports will soon cease to be dangerous, and apparently foreigners are doing their best by giving exorbitant prices to verify the statement. But at the best the position of Canton at this moment is such as to render one careful of too dogmatically pronouncing in favour of its progress or ultimate decline. To the outside world the building of new houses and the general air of improvement which prevails in the real 'model settlement,' is such as to lead to sanguine anticipations. Whether they will be verified it is almost impossible to say."

Commercial.—*Tea:* A fair business has been done in Scented teas. Some 22,000 boxes Scented Orange Pekoes have found buyers at from taels 23 to 27, and about 18,000 boxes Scented Capers at from taels 13½ to 26; of the latter one clean, common, but true leaf parcel of about 2,000 boxes was settled at 13½ taels. As it is reported that there is plenty of leaf about this district, we are in hopes to see prices ruling still lower for Scented teas. About 3,000 boxes new make Congous are reported settled for Buenos Ayres at from taels 23 to 25. Canton Greens: 2,000 boxes Gunpowders have been settled for England at 22 taels. In Country Greens nothing has been done; stock consists of three chops. *Silk:* Since the departure of last mail, our market has been extremely dull in consequence of small stocks. The country market for second crop produce was opened yesterday, and by the action of native speculators prices were run up to the following high rates, viz., —Tsatlee No. 1, $580; No. 2, $565; Loongkong No. 1, $550; No. 2, $535; Cumchoock No. 1, $530; No. 2, $515; best Re-reeled do., $600. At these figures there is on the part of foreign houses a great disinclination to operate. As stocks accumulate no doubt prices will fall considerably, as they appear now not to be sustained by actual demand, but rather by the combined action of the Guilds.

In general articles of export we have no changes to report, with the exception of Cassia, which continues to be purchaesd in small quantities at $18¼ to 18½ per picul.

LATEST TELEGRAMS.

(Received Aug. 4, via Galle.)

JAPAN.

Hong Kong, July 12.

Intelligence received here from Japan announces that the English settlement at Nagasaki has been damaged by a severe storm.

CHINA.

Hong Kong, July 12.

BIRTHS.

Bourne—On the 4th June, at Yokohama, the wife of William Bourne, Esq., of a daughter.

Davis—On the 10th July, at Alexandria, Egypt, the wife of the Rev. E. J. Davis, of a daughter.

Lyall—On the 23th July, at 47, Welbeck-street, Mrs. George Lyall, of a son.

Power—On the 13th June, at Shanghai, Mrs. A. B. Le Poer Power, of a daughter.

Sassoon—On the 27th July, at No. 95, Lancaster-gate, Hyde-park, the wife of Reuben David Sassoon, Esq., of a son.

Towers—On the 9th June, at Shanghai, Mrs. Towers, of a daughter.

Tyers—On the 13th April, at Fort Washington, New York, the wife of Mr. Richard R. Tyers, late of Shanghai, China, of a daughter.

MARRIAGES.

Adams—Hugo.—On the 18th June, at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, R.N., Acting Colonial Chaplain, William Stanley Adams, M.D., Surgeon of the Seamen's Hospital, to Susan Blanch Mary Hugo.

Bowring—Bellasis.—On the 31st July, at the Catholic Church of St. Mary Magdalen, Mortlake, Surrey, by the Right Rev. Dr. Grant, Lewin B. Bowring, Esq., Commissioner of Mysore, third son of Sir John Bowring, to Katherine, second daughter of Mr. Serjeant Bellasis.

Mainwaring—Hamilton.—On the 17th June, at St. Peter's Church, Colombo, by the Bishop of the Diocese, assisted by the Rev. Canon Bailey, Arthur Mainwaring, Ceylon Civil Service, eldest son of the late Rev. John Mainwaring, M.A., to Mary Charlotte, second daughter of Col. Hamilton, C.B., Dep.-Adjt.-Gen. in Ceylon, late 78th Highlanders.

DEATHS.

Mathers—Lost, with all on board, on the passage from New York to London, Capt. Joseph Mathers, of the ship Fychow, deeply lamented by his distressed widow and sorrowing friends. The ship left on the 15th March, and has never been seen since. Friends are kindly requested to accept this intimation.

Medhurst—On the 18th May, at Hankow, China, Alice Evelyn, aged 2 years and 7 months, youngest child of Walter H. Medhurst, Esq., H.B.M.'s Consul at that place.

Mence—Lost at sea, about the 20th March last, with the ship Fychow and all hands, from New York, while serving as second mate, Colville Haffez Mence, aged 19, second son of the late George Mence, Esq.

Murray—On the 16th June, at Hong Kong, Ellen Murray, infant daughter of Francis Douglas, Gaol Superintendent, aged 10 months.

Taylor—On the 12th June, at Foochow, John Taylor, second son of Capt. Richard Taylor, Deputy Commissary General, Singapore.

Whitfield—On the 12th June, at Amoy, from the effects of sun stroke, Jaspar James Whitfield, Acting Harbour-Master and Tide Surveyor, Chinese Customs' Service aged 34.

Woods—On the 22nd May, at Labuan, in the 24th year of his age, I. Tyndall Woods, Esq., Secretary to the Government, youngest and much-loved son of W. W. Woods, Esq., of the Colonial Office, Downing-street.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Yokohama.—From London, May 30, Medina; June 2, Cymberline; from Amsterdam, Telanak.

At Shanghai.—From London, June 7, Lauderdale (via Singapore); 11, Star of China; 14, Wild Deer; from Cardiff, 13, Como; 21, Helen Nicholson; Dunmail (reported by telegram).

At Hong Kong.—From Glasgow (via Singapore, &c.), June 20 Dragon (str.); from Cardiff, 22, Scawfell; from New York, 25, P.M. (str.) Costa Rica; from Cardiff, July 12, Louis Henry (reported by telegram).

At Singapore.—From Glasgow, June 29, Coquette (str.); from Liverpool, Thales (str.); from Shields, 28, Winfield Scott.

DEPARTURES.

From Yokohama.—None.

From Hankow.—For London, June 11, Eliza Shaw.

From Shanghai.—For London, June 10, J. R. Worcester; 14, City of Aberdeen; 15, Sir Lancelot; 19, St. Ajax (via Hong Kong, &c.).

From Foochow.—For London, June 14, Chinaman; 18, Flying Spur; —, Yangtsze.

From Hong Kong and Canton.—None.

From Singapore.—For Liverpool, Simoon (reported by telegram).

VESSELS LOADING.

At Yokohama.—For London, none; for New York, Havelock, Benefactress.

At Hankow.—Ada, Challenger.

At Shanghai.—For London, Anglo-Saxon, Elmstone, Coulnakyle, Gossamer, Isles of South, Peter Denny, Silver Eagle, Winfell, Agamemnon (str.), Hoang Ho, Caller Ou, Maiden Queen, Neptune.

At Foochow.—For London, Black Prince, Ariel, Argonaut; for Liverpool, Everest.

At Canton.—For London, Alma, Wemyss Castle, Niphon, Passe Partout.

At Singapore.—For London, Jean Meyer; for Liverpool and Glasgow, Edinburgh Castle; for Falmouth, Antelope.

SHIPS' REPORTS.

HONG KONG.

The British ship Scawfell reports having left Cardiff on March 5. Experienced strong easterly gales and heavy seas on leaving, and westerly gales and bad weather until the 20th. On the 8th, during a heavy easterly sea, the second mate and boatswain were washed overboard and lost. N.E. trades light and variable. Crossed the Equator April 2, in lon. 25 W

Digitized by Google

S.E. trades moderate and very unsteady. Passed the meridian of the Cape May 2, in 40 S. Heavy S.E. gales for three days with a very heavy sea. S.E. trade, moderate, and rainy weather with occasional westerly gales, and heavy squalls to Java Head which was made on June 4. Passed through Anjer on the 5th. In the China sea light airs and calms, with heavy rain and squalls for the first part. Middle part heavy N.W. to W.S.W. squalls with rain and afterwards southerly and S.W. squalls and continual heavy rains.

The Siamese steamer Viscount Canning, from Singapore, June 12th, reports light northerly winds and calms as far as Pulo Sapata, afterwards strong S.W. winds to Swatow. On the 19th, in lat. 19.16 N., and 114.20 E., signalised the ship Yang-tsze from Foochow to London.

The Madeira left Saigon on the 14th June, had light S.S. easterly winds to Padaran, from thence had stiff south breezes and hard squalls with much rain, and a high southerly sea all the way up. On leaving St. James the British barque Cap Sing Moon arrived, and off Padaran saw two clippers bound south, the Min was about 50 miles ahead of the second one, which had sky and mainsails set.

The Prussian ship Loreley, Carl F. Schenk, master, reports that she left Saigon, June 7th, and got to sea on the 11th; had light variable winds and calms, with thick rainy weather, until 11 deg. 34' N. and 110 deg. 37 E. by account, when she got a change from the N.W. June 16th, it blew in heavy gusts, barometer having fallen from 29.90 at 4 A.M. to 29.50 at 11 A.M., wind veering between N.W. and West, and blowing very hard with a tremendous sea running, causing the ship to labour and strain very heavy and ship quantities of water; split mainsail and mizzen-topsail, main jib and fore-topmast staysail. During the subsequent night the wind veered to S.W. and South, barometer rising, but the wind blowing harder than ever, raising the sea in confused heaps and swamping decks at intervals; ship labouring most frightfully and continued doing so until arriving at Hong Kong on the 19th.

The British steamer Dragon, from Singapore, reports that the steamship Taiwan left Singapore on the 10th June. The Dragon passed St. Vincent on the 30th March; crossed the line on the 6th April; exchanged colours on the 14th April with the ship Australasian in long. 103.100; passed the Cape of Good Hope on the 30th April; exchanged colours with the ship Taiwan on the 27th May in lat. 28.00 S., for Singapore. The Dragon is 100 days out from London; passed Anjer on the 3rd June.

COMMERCIAL POSTSCRIPT.

The amount of bullion by the P. and O. Company's steamer *Euxine*, from Southampton on the 4th inst., was, in gold, to Madras, £1,095; in silver, to Hong Kong, £5,506, to Shanghai, £5,390; total in gold, £1,095, in silver, £10,896.

TEA.—The sales which commenced on the 6th comprised 26,670 packages, of which 22,776 were printed "without reserve." The auctions have proceeded with fair spirit; and while prices show in certain cases some irregularity, yet, upon the whole, Congous may be quoted without alteration. Two breaks of fine Kaisow realised from 1s. 9d. to 1s. 9½d., and 1s. 11d. to 2s. 0½d. per lb. A chop of medium black leaf, 1s. 3¾d. and 1s. 4d. per lb. Common black leaf Congou sold at 11½d. to 1s. per lb.; common to fair red leaf, 1s. to 1s. 0½d.; Congou siftings, from 5¼d. to 6¼d., which showed a slight reduction; common to fair Oolongs sold at 10¼d. to 1s. 1¾d. per lb., being decidedly lower.

TIGERS IN JAVA.—We should fancy the people of Java must have rather a lively time of it. According to the latest official statistics contained in the *Tijdschrift vor Nederlandsch Java*, the tiger has in one single year consumed exactly 148 human beings, and in another year 131. The crocodiles cleared an average of 50 people a year, while serpents accounted for between 22 and 43. But the Dutch seem to accept their fate with characteristic equanimity. The Governor-General a long while ago offered as a prize for every tiger that was killed the munificent sum of twenty-two guilders (£2). His subjects apparently prefer being eaten by the tiger.

LAUNCH.—There was launched last week, from the building yard of Mr. Wm. Doxford, Pallion, near Sunderland, an iron clipper barque of about 800 tons register, called the *Victoria*. She has iron masts, steel yards, and all modern improvements to enable her to make rapid passages in the Manilla trade, for which she is intended. She has been built for Messrs. Olano, Larrinaga, and Co., of Liverpool, and is intended to form one of their line of vessels employed in the above-named trade.

Naval and Military.

Her Majesty's screw steamship Princess Royal, 73, Captain William G. Jones, flag of Rear-Admiral George St. Vincent King, from China, the Cape of Good Hope, and St. Helena, arrived in Plymouth Sound on the 31st July. The Princess Royal, we understand, will be paid off at Devonport next week. When this ship was first commissioned, many and evil were the reports about her. It was said she was rotten, her stern was weak and drooping, her shaft was not in line, and numerous were the predictions that a week from starting would see her back disabled in Plymouth Sound, but nevertheless she has gone over half the navigable world, and returns home with scarcely a defect, and the same spars she sailed with, and her officers much regret she is most probably the last of the liners they will ever serve in. During her commission the Princess Royal has visited Madeira, Sierra Leone, Cape of Good Hope, Trincomalee, Madras, Pondicherry, Bombay, Colombo, Singapore, Siam, Hong Kong, the chief ports in China, and all Japan. On her return home she called at Batavia, St. Helena, and Ascension. Her crew during the whole period has been remarkably healthy, and with the exception of one epidemic of small pox which took off eight men, she has been free from disease. One little fact is curious in connection with the ship, showing how constantly she was on the move. Her Majesty had graciously presented two portraits of the Princess Royal to the officers' messes (as her Royal Highness had christened the ship), but although sent before the ship left England, strange to say they never reached their destination for three years and three months, and were only then picked up on the homeward voyage. However, they were in perfect order, and were at length duly installed in the places of honour which had always been loyally kept vacant for them.

The Scylla, 21, screw steam corvette, 1,467 tons, 400-horse power, Capt. Richard W. Courtenay, recently returned from China, where she has been stationed during the last four years, is now in the large basin of Sheerness dockyard, and will be placed in the third division of the Sheerness Steam Reserve.

The Meeanee, 60, 2,591 tons, 400-horse power, attached to the Chatham steam reserve, is having the whole of her internal fitments, bulkheads, &c., removed, preparatory to being sent round to Deptford for the purpose of being converted into an hospital ship, to be stationed at Hong Kong. The Meeanee is well adapted for the particular service for which she is intended, there being space for hospital accommodation on her decks for several hundred men. Her engines and machinery will be removed into the factory.

The unarmoured screw sloop Daphne, 1,081 tons, 300-horse power, Capt. Sulivan, made her official trial of speed, preparatory to her departure on the term of service on the East India and China station, at the measured mile in Stokes Bay. Mr. John Ravenhill and Mr. Hodgson, of the firm of Ravenhill, Hodgson, and Co., the makers of the engines, had charge of the machinery during the trial. The ship drew 13ft. 6in. of water forward, and 17ft. 15in. aft, being a mean of 15ft. 5in. and 3ft. 10in. by the stern. Her weights were all complete for sea, and included twelve months general stores. The screw is a two-bladed Griffiths of 15ft. diameter, set at a pitch of 13ft. 9in. Six runs were taken over the measured mile with full-boiler power, giving the following speeds:—12·000, 12·996, 11·920, 13·186, 11·803, and 13·235 knots. The mean speed of the ship was 12·551 knots. The mean revolutions of the engines during the six runs were 101, steam-pressure 30lb., and vacuum 25in. The usual runs with half-boiler power succeeded the full-power runs, and those gave in four runs—9·235, 11·538, 8·955, and 11·285, knots, or a mean speed of the ship with half-boiler power of 10·499 knots. The Daphne is one of the class of sloops built from Mr. Reed's designs that is represented by the Blanche, Vestal, Sylvia, and others, which bring out on the measured mile a fair speed when driven by the full power of their engines, due consideration being given to the indicated power in proportion to their tonnage and length, but which give much more satisfactory results when driven only by half or two-thirds their boiler power. They afford very excellent and well-ventilated accommodation aft to the officers and also to the crew on the lower deck. It is but just to their commanders to say that they are very much undermanned. They have men enough to fight their few guns, but they have not men enough to handle the ship properly when under sail. The armament, although only of four guns, is very effective, consisting of two muzzle-loading rifle-coil-built 7-inch 6½-ton guns, and two muzzle-loading, rifled 64-pounder Palliser guns, besides the usual complement of boat guns and field pieces.

A number of shipwrights at Chatham dockyard have commenced cutting out the frames for the double-screw unarmoured gunvessel Woodlark, which is ordered to be laid down at that establishment, and built from the design of Mr. E. J. Reed, Chief Constructor of the Navy, for service in China. The Woodlark is to be constructed on the same lines and from the same set of drawings as the twin screw gunvessel Plover, building at Woolwich dockyard.

On the 29th ult. the Board of Admiralty paid their annual visit to the royal dock and victualling yards, Deptford. They were received by the superintendent, Capt. A. P. Eardley Wilmot, C.B., A.D.C., and the principal officers of both yards. After remaining about an hour in the superintendent's office, transacting official business, they proceeded to inspect the ships building, which occupied some time. Two composite gunboats attracted the particular notice of their lordships—the Thistle and Boxer, twin screw, intended for special service in the China Seas, under Sir Henry Keppel.

One thousand six hundred Palliser shell shot have been despatched from Woolwich to be shipped in the London Docks for transit to the guardship at Hong Kong. They were all carefully packed in canvas bags to protect the brass studs from being damaged by removal.

The Malabar sailed from Spithead on the 27th ult. for Bombay to enter, upon her troop-carrying duties, in conjunction with the Jumna and Euphrates, between the Indian ports and Suez. She calls in at the Cape de Verdes and the Cape of Good Hope on her voyage out. The following military officers and troops embarked at Spithead, and have proceeded in the ship to join their corps at the Cape of Good Hope and Bombay:—1st battalion 10th Regiment, Capt. Strong, Mrs. Strong, and two children; 2nd battalion 20th Regiment, Lieut. Harries and Ensign Bennett; 96th Regiment, Assist.-Surg. Wright and Ensign Brunson; Staff Assist.-Surg. Ratigan, Staff Surg.-Major Wall and Mrs. Wall; 116 non-commissioned officers and men and 20 soldiers' wives and children from various regiments.

A naval court martial assembled on board Her Majesty's ship Victory at Portsmouth last week, for the trial of Commander W. M. Menzies and Navigating Lieutenant Christian for the loss of Her Majesty's screw gun vessel Osprey, off Cape St. Francis, on the S.E. coast of Africa, on the morning of the 30th of May last. The court was composed of Rear-Admiral F. Warden, C.B., president; Captains F. B. Seymour, C.B., R. J. J. C. Macdonald, W. C. Chamberlain, E. W. Vansittart, M. N. Nolloth, and Roderick Dew, C.B. Mr. E. Hoskins officiated as Deputy-Judge Advocate. The facts are sufficiently explained in the finding of the Court delivered in the subjoined terms:—After a deliberation of two hours and a-half the Court was of opinion that Commander Menzies and Navigating Lieutenant Christian were guilty of negligence in not using the lead, or in making any attempt to get soundings in approaching the land; and in not wearing the ship off the land during the night, if it were considered dangerous to sound; but, in consideration of the character for great carefulness which commander Menzies had received, the Court thought such negligence arose from an error of judgment. They therefore adjudged him to lose four years' seniority, and to be severely reprimanded. Taking into consideration the high testimonials Lieut. Christian had received the Court adjudged him to lose two years' seniority, and to be severely reprimanded. The Court could not separate without expressing its regret that the Osprey was not supplied with the edition of 1865 of the *African Pilot*.

LONDON, THURSDAY, AUG. 8, 1867.

THE MAIL SERVICE.

THE momentous question of postal communication with the East has again formed the subject of a long discussion in the House of Commons. The principal speeches will be found at length in our Parliamentary Intelligence, but it will perhaps be advisable to recapitulate their substance here, in order to facilitate comment on the present position of the affair. Mr. CRAWFORD very ably commenced the debate by taking the Government to task for having neglected to pay due attention to the Report issued by the Select Committee of last year. The Committee, Mr. CRAWFORD said, was composed of persons specially fitted for inquiring into the subject, and their Report, based on a careful investigation, was eminently lucid and practical; yet the Government had failed to carry out some of its most important recommendations. First, with regard to the question of cost. There was a loss on the whole service of about £160,000, the entire expense being £396,000, and the amount received in postages £236,000. This deficiency proved the subject of a sort of triangular duel between the Treasury, the Post-office, and the India-office, neither of the departments being content to bear it, or even a portion of it; so that in the end the burden was likely to fall on the public, in the shape of an increased rate of postage. Whereas, this deficiency being in effect the cost to this country of the means by which not only the commercial, but the social and political connection between this country and its dependencies in the Eastern world was maintained, ought clearly to be borne by the Government. Then, the Committee specially recommended that the service of India should be kept separate and distinct from every other on the other side of Suez. But the Treasury, in their report, maintained that in keeping up the communication with China and Japan the India mails must be made use of as far as Aden. Thus the Government, entirely disregarding the evidence given before the committee, carried out their own economical view, entirely passing over the view the committee had expressed that the mails should be carried with the utmost rapidity between Suez and Bombay. Another point was as to the speed at which the mails were to be conveyed. The committee fixed the speed at 11 knots an hour, but that speed the Government reduced to 10¼ miles per hour. Another point was as to the passage across Europe. The committee came to the conlusion that Brindisi was not a fit place as a port of departure, and that the Mont Cenis line of railway, being only a single line, was not so well fitted for the conveyance of mails as a double line of railway would be. The Treasury, however, had shown a preference for the Brindisi route. He admitted that by the selection of that route a saving of 24 hours might sometimes be effected; but the delay would be incalculable in inclement weather, then the Mont Cenis line would be utterly impracticable. But the most important point of all, Mr. CRAWFORD said, was the presumed intention of the Government to allow the Messageries Imperiales Company to compete for the service. He protested against a contract being entered into which he believed would be adverse to the commercial interests of this country. If such an arrangement were entered into, what, he asked, would be the position of this country with regard to her communication with India in case of war with France, or even in the event of France being engaged in a war with another country? The Messageries Imperiales were under a contract with the French Government which entirely precluded the possibility of that with England being carried out properly, since the French Consuls would have power to delay the sailing of the vessels whenever they thought the interests of their Government required it. Another thing was that our companies were not fairly weighted in the race, inasmuch as the Peninsular and Oriental Company only received a subsidy of 4s. 6d. per mile per annum, whereas the Messageries Imperiales received 20s. per mile per annum. Mr. CRAWFORD concluded by urging that the P. and O. Company had proved itself deserving of all possible support. During the Crimean war that company carried no fewer than 60,000 men from this country, besides 12,000 horses and 2,000 officers. Everyone must also be aware what that and other companies did at the time of the Indian Mutiny, and where, he asked, should we have been if these vessels had not been in existence to carry out men and stores? Mr. HUNT replied on behalf of the Treasury, that the "slight deviations" from the Committee's recommendation that were complained of all arose from a wish to promote economy. He pointed out, somewhat unnecessarily, that if a single line between Suez and Aden were adopted the expense of a double line would be avoided. The question of speed also was a question of money. He justified a preference for the Brindisi route on the ground that Captain TYLER'S report showed a saving of 36 hours; and as regarded an arrangement with the Messageries Imperiales, communications had been going on between the English and French Governments which were not yet brought to a close. Mr. CHILDERS blamed the Government for everything, but chiefly for not having given notice to terminate the whole of the existing contracts two years hence, so that, the Indian railway system being completed, one line of steamers might carry all the mails and passengers for Bombay, Madras, and Calcutta. Mr. SAMUDA deprecated the injustice of placing the P. & O. Company in competition with a foreign company. They possessed vessels, he said, which had been brought into existence at a cost of £3,000,000 sterling. Those who were acquainted with shipping knew the enormous depreciation that took place in the value of material of this description, and the effect upon such a company of throwing this plant out of service. During their existence they had received a large revenue from the carriage of troops, but the Government had now become, or were about to become, their own carriers of troops, and there would be a reduction in this source of revenue. It was not fair to bring them into comparison with the Messageries Imperiales, which could hardly be said to be a public company at all, but rather a branch of the Government. It was, at any rate, a hot-house plant, which would not exist unless by the support of the Government. The Peninsular and Oriental Company employed a force of not less than 16,000 men. They were admirable sailors, and would be of great service in case of emergency. With regard to the amount of the subsidy, it should be borne in mind that it was merely part of a whole—viz., the work done by the post service and the return paid by the nation, and that there was a balance in the receipts of the Post-office of upwards of a million per annum over the expenditure. Mr. LAING pointed out that the French company had been established by the French Government in order to acquire political influence in the East, that being the motive avowed when the Chamber was asked to sanction what appeared an extravagant grant in its favour; and if the tender for the whole East was thrown open to it, the French Government would no doubt be prepared to back it up with an additional subsidy, in order to drive the Peninsular and Oriental or any other English company out of the field. No policy, he averred, could be more disastrous to the security of our Indian Empire. He attached no exaggerated importance to prestige, but for the postal correspondence of all the ports of the East to be conducted by the Messageries Imperiales, superseding English vessels, would be highly dangerous to the prestige of England. He urged upon the Government that adherence to pedantic theories and narrow views was the most fertile source of extravagance. They should especially beware of being guided by the Post-office officials, who, though zealous with regard to the pecuniary interests of their department, were dangerous advisers. Mr. HUNT again essayed a defence of the Government policy, and pleaded that the report of the committee was not interpreted in the same way by different members of it. Mr. CRAWFORD said distinctly that the Government should avail themselves of the Messageries Imperiales as an extra mail service. Mr. CHILDERS, on the other hand, proposed not to treat it as an extra service, but to

Digitized by Google

open up communications with the French Government to change the French service so as to dovetail into our own. Colonel Sykes for once made a speech on the right side. He said he had always been an advocate for competition in these matters, but then those who were to tender must stand on an equal footing. The Messageries Imperiales were chiefly supported by a subvention which the English Government would not give to any company whatever. It would be an act of great indiscretion to make a contract with such a company. The Peninsular and Oriental Company with its fifty three ships had really been an auxiliary to the navy. A desultory conversation followed, in the course of which Mr. Gladstone said he considered it incumbent on the Government to inform the House at an early date of the course they intended to adopt, to which remark the Chancellor of the Exchequer assented.

We have reviewed this discussion at some length, chiefly because it elicited strong condemnations of the parsimonious views of the Government from all quarters, even from such stanch advocates of economy as Mr. Childers and Colonel Sykes. In the "triangular duel" between the three departments, so happily described by Mr. Crawford, the Post-office must certainly be adjudged victorious—at least if the palm of victory be considered synonymous with the acmé of meanness. As far as matters of detail only are concerned, the Post-office is admitted on all hands to be an admirably managed department; but in an extended view of its scope of usefulness its guiding spirits have for a long time been sadly wanting. Their object should be to promote the interests of our foreign commerce, and to add to the value of our Eastern dominions, by affording the utmost facilities for intercommunication consistent with a moderate profit to their department. Instead of this, they unhappily concentrate their energies in the accumulation of as large a yearly surplus as possible. All considerations of national prosperity and public convenience are thrust aside; the vast importance to this country of a complete, rapid, and entirely independent system of communication with its Indian possessions is entirely ignored; the Postmaster-General degenerates into an importunate tax-gatherer; a system of cheeseparing economy reigns triumphant—and all in order that the already enormous surplus of the Post-office revenue may be still further augmented. This state of things, we trust, will not be allowed to continue. The entire postal service of the East must not be placed under the arbitrary control of a Continental despot, either by such a suicidal act as making a contract with a company which is in effect only a branch of the French Government, or even by the negative course of withholding proper support from our own old-established companies.

While, however, we unsparingly condemn the penny-wise, pound-foolish policy so inconsiderately adopted by the Government, we must own that the report of the Select Committee, on which they were expected to base their course of action, was on one point extremely vague. When it was first printed we took exception to the doubtful phraseology employed, particularly in the sentence "*having regard* to any facilities which "may be afforded by the monthly service to China now per- "formed by the Messageries Imperiales from Marseilles." We then pointed out that the meaning of the phrase "having "regard" was certain to be misunderstood, and so it turned out. At a later period Mr. Crawford wrote a letter explaining that the committee did not mean to recommend Government to enter into any contract whatever with the French company, but merely intended to point out the self-evident fact that whatever English mails were determined on would be supplemented by the French one. In the meanwhile, however, the French company had been invited to tender, and hence the present difficulty. We cannot for a moment suppose that after such a strong expression of adverse opinion Government will for a moment entertain the idea of accepting such a tender, even should one be presented; still, it is evident that the whole thing has been mismanaged, and it is only the vigilance of some thoroughly practical members of the House that has secured us from drifting into some very unsatisfactory arrangement. It is only by giving due weight to the recommendations of the committee, and also to the memorial of the merchants in the China trade, which formed a necessary supplement to it, that the service can be placed on a proper footing.

PROGRESS IN EGYPT.

In these days of rapid progress the traveller who turns homewards after an absence of even a few years often finds so many changes that he is scarcely able to recognise the scenes tha were most familiar to him in earlier times. Old residents in the East, however, who have returned by the overland route during the last year or two, have had their attention awakened to an entirely new order of things long before they reached British, or even European soil. It was a great change when the old method of crossing the desert by caravan was superseded by the more rapid and comfortable railway; but even that was hardly anything in comparison with the extraordinary revolution that is going on in Egypt, under the auspices of the present Viceroy, whose energies, already wonderful in a son of Islam, will doubtless receive a fresh stimulus from his visit to France and England. In the first place there is the Canal, which is some day to connect the two seas. Incredulous as we may be as to the ultimate success of this colossal scheme as a financial undertaking, all doubts of its reality in a material point of view are quickly dispelled by a glance at the vast works that are being vigorously pushed forward in connection with it. At Suez, we see the fresh water canal close to the town; extensive docks rapidly approaching completion; huge dredging machines constantly deepening the channel between the anchorage and the town; works for reclaiming large tracts of coral reef and mud from the sea, and lofty chimneys towering over all, showing the existence of numerous factories, and stamping the place with that unmistakable air of industrial activity that nothing but a factory chimney can impart. And the whole place seems animated with a spirit of energy and business such as those who have not passed through the place for eight or ten years can form no idea of. The desert daily increases its claim to the title of the high road to India, and with the further development of facilities for traffic we shall soon see large quantities of English manufactures passing across it on the way to India and China, and still larger quantities of produce being sent homewards. The P. and O. steamer *Mongolia* recently took upwards of 4,000 bales of shirtings and other cotton goods from Suez, nearly all for Calcutta, and so great is the increase in this species of traffic that already the expediency of doubling the line of railway between Alexandria and Suez begins to demand consideration.

The satisfaction with which we view all these tangible indications of progress is by no means unalloyed; nor can we be accused of selfishness if we own that the sole drawback to it is a feeling of regret that British enterprise and capital has so little to do with the development of a country which should have been under our special care and protection. It was English energy and wealth that first placed Egypt in the position of the great highway between Europe and India, by the organisation of the overland route; yet here we seem to have been content to rest, while the French, without any substantial interests or political *status* in the East, have stepped in and made the further development of the country their especial care. As for the Canal itself, English engineers and capitalists have agreed from the first in regarding it as a chimera, or at best as a scheme which, if completed, could only be ruinous to its projectors; and it may yet prove that in holding aloof from so gigantic a venture they have but exercised a wise discretion. But it is not the Canal alone that we have to consider. The Docks, the reclamation of land from the sea, the chief factories, and all the principal improvements are in French hands; French men-of-war and merchant steamers are always present in the anchorage, and, as a rule, a solitary P. and O. steamer is the only representative of the British flag. In short, French interests are entirely in the ascendant. This is not encouraging. Whether by rail or canal, the English merchandise and treasure that will pass through the country must far exceed those of all other countries together. Our mails must continue to use the same route, and we are even now making arrangements to convey all our troops, stores, and munitions of war through Egypt, instead of by the long and devious passage round the Cape. With such an important and rapidly growing traffic there must surely be profitable employment to be found in Egypt for English capital, labour, and ingenuity; and we cannot help expressing a regret that our countrymen do not more readily avail themselves of so promising a field.

It is with no slight gratification that we find our hopeful anticipations regarding the prospects of the Hong Kong Mint are in a fair way of being fulfilled. After a long and dreary interval of depression, trade in China is gradually assuming a more healthy tone, and, as one of the results, dollars are again at a premium there. We now hear that bankers and merchants are once more sending in silver for coining, while ichibous have for some time been flowing into the mint for conversion into dollars; and on this

Digitized by Google

side the sudden resumption of specie shipments points to the probable renewal at no distant date of that state of things which existed when the idea of establishing a mint at Hong Kong was first conceived, and which, in fact, encouraged its development. Under these circumstances it is probable that the course we have so earnestly advocated will be adopted by the Government, and the mint allowed to have a fair and patient trial instead of being hastily abandoned. We hear nothing further at present of any order for small coinage to circulate in the Straits, but hope that this will not be altogether lost sight of, as such a measure cannot fail to benefit both colonies.

The announcement in our Shanghai news in reference to the case of Mendel and Liebert was not very distinct. The verdict in favour of the plaintiffs must be read as in favour of the banks, and against Messrs. Mendel and Liebert. We understand that this decision will be appealed against, and a new trial asked for in England.

The Pacific Mail Company announce that the *Colorado*, which was advertised to leave San Francisco on the 4th ultimo on her third trip to Japan and China, will be followed on the 24th of this month by the new steamer *Great Republic*.

Parliamentary Intelligence.

HOUSE OF COMMONS.

POSTAL COMMUNICATION WITH THE EAST.

(Aug. 1st.) On the vote of £520,428 to complete the sum required for the Post-office packet service (with the usual proviso that none of it should be applied to the payment of Mr. Joseph George Churchward), Mr. Crawford rose to invite the attention of the House to the postal service of the East. At an early period of last session he had drawn attention to this subject, especially with reference to the effect that the great changes which had taken place in India and the railways that were in the course of completion would necessarily have in altering the arrangements of the Post-office. The result was that a committee was appointed, which in every sense of the word might be called a "select" committee—for it was composed entirely of gentlemen selected for their fitness to undertake the duties assigned to them. The committee sat a great number of days, and examined many witnesses. The result was a report concurred in unanimously The committee, in their report, recorded their opinion, so far as regarded the Peninsular and Oriental Company, which possessed a fleet of 84,000 tons and upwards of 20,000-horse power, that the service had been well performed, the assistant secretary to the Post-office stating to the committee that no mail which had been entrusted to that company had been lost. (Hear, hear.) The changes recommended by the committee had reference mainly to the improved internal communication of India by the establishment of railways; and they stated that the time had arrived when tenders should be invited for the establishment of a weekly service to India direct to Bombay; and that the other communication to Madras and Calcutta should be superseded so far as India was concerned, it being found that letters addressed to every part of India would reach quicker *via* Bombay than if the mails were despatched to every other port. They next suggested the extreme importance that the service should be an express one, unconnected with any service at the Isthmus of Suez, because it was impossible to avoid delay arising from the delay of other and independent vessels, beyond which there was the necessary delay of transhipment. They next turned their attention to the speed of the vessels, and required that it should be eleven miles between Marseilles and Alexandria, and ten on the other side of the Isthmus of Suez. Among other recommendations there was one to the effect that the Government take into consideration the arrangements to be made in consequence of the proposed separation of the Indian and China service for the establishment of a fortnightly service to China, and a monthly one to Australia. The report was presented at the end of the session, and as the representatives of the Government on the committee concurred in it, it was expected that its recommendations would be fulfilled by them to the letter. The conduct of the matter however passed into other hands; but the new Government recognised its importance, and reviewed the report of the committee at full length in a Treasury minute. The cost of maintaining this line of postal communication had been a vexed question, a sort of triangular duel, between the Treasury, the Post-office, and the India-office, each of them trying to shift the burden of the additional cost beyond the postage upon the other public departments. Mr. F. Hill had always expressed an opinion that the excess of cost for the Indian postal communication should be paid by the India-office; but that was objected to by Sir C. Wood, who urged that commerce greatly benefited by the additional facilities given to it by speedy postal communication, and ultimately it was thrown upon the postage, which was increased by 50 per cent. The whole cost of the postal communication to the East was £349,625, but from this was to be deducted £236,000 received for postage, so that the excess was something over £160,000. One-half of that was borne by India and the different colonies concerned, and the other half by the mother country. The increased cost occasioned by the difference between the amount of postage and the cost of communication, so far as India alone was concerned, was £48,000. He thought he had shown there were considerations of a public character which would hardly justify the Government in imposing on the public an increased postal charge. It was specially recommended that the service of India, being most important, should be kept wholly separate and distinct from other services on the other side of Suez, but the Government had entirely disregarded the evidence given before the committee in that respect, and they had also failed to follow the recommendations as regarded the route and speed. He was further sorry to see that a disposition had been shown to carry out the principles of economy submitted to the committee by affording foreign companies the opportunity of competing with British companies. He protested, in the interest of the country, against the ships of a foreign nation being employed in the conveyance of our mails. What would be the position of this country under such circumstances in the event of hostilities breaking out with the country with whose people the contract had been entered into? We should not only be deprived of a great advantage, but put our opponents in possession of those advantages which we ourselves ought to possess. (Hear, hear.) The peculiarity of the arrangement with the French company was this, that the competition was not a fair one. The Peninsular and Oriental Company held itself ready to meet any fair competition to which it might be subjected; but while it received a subsidy of 4s. 6d. per mile per year, the French company received from its Government a subsidy of 20s. per mile per year. During the Crimean war the Peninsular and Oriental Company carried from this country no less than 2,000 officers, 60,000 men, and between 11,000 and 12,000 horses, and it was well known what they did at the time of the Indian mutiny. And what was done in the *Trent* affair? Almost at a day's notice 10,000 troops were taken to Canada by vessels of the Cunard and other companies. The French Government were willing, and endeavouring to raise for themselves a power on the sea equal to that which we possessed through the agency of these companies, and, in fact, the Messageries Imperiales might almost be considered a department of the Government. And this was the company with which our steam shipping companies here and in India were called upon to compete. (Hear, hear.) He wished to enter his protest against any act on the part of the Government which would saddle this country with a contract with that company. He held that such a course was against public policy, and was unfair and unjust to the Peninsular and Oriental Company. It would be a sort of political insanity to put such a weapon into the hands of any foreign Power. The Peninsular and Oriental Company had received notice of the termination of their contract on the 1st of February next, and the tenders for the new contract were to be sent in by the 16th of September. He did not see how, in the interval, the Government could enter into any new contract, because they could not obtain the approval of Parliament. Any plan of the Government must necessarily come under the review of Parliament next session, and if it were not suitable to the exigencies of the service, and did not adopt the recommendations of the committee, he should invite the House to express its opinion upon their conduct.—Mr. Hunt said it was obvious that the main objection raised to the slight deviation by the Government from the direct recommendation of the committee was owing to their endeavour to promote economy; and they could hardly be blamed for doing that if it were consistent with the efficiency of the service. But he was prepared to show that the whole spirit of the recommendations of the committee had been embodied in the proposals of the Government. The Government were anxious to ascertain the cost of conveying the mails from Aden to Yokohama, and what would be the further cost of conveyance to Suez. The loss was on the Indian service, £48,000; China, £34,000; and Australia, £78,000. It was estimated that the weekly service to Bombay would entail a further loss of £40,000, making together nearly £90,000. The hon. gentleman had objected that an additional charge was to be imposed on the public to meet this loss; but he (Mr. Hunt) maintained that the additional charge would be upon those who used the service and for the relief of the public. After careful consideration it had been decided that the charge for the half ounce letter should be 9d. In reference to the question of speed, he need only say that this was a question of money, and the Government had asked for tenders showing the comparative cost for the different rates of speed. With regard to the routes from Marseilles and Brindisi, the Government were right in asking for tenders from both ports, and another reason why they did so was that, according to a report from Captain Tyler, a saving of 36 hours would be effected between England and Alexandria by the adoption of the Mont Cenis and Brindisi route. With reference to what had been said respecting the Messageries Imperiales, the Government had asked for tenders from all the world, and were they in that case to say no Frenchman need apply? But if what the honourable member for the City of London had said, namely, that the terms under which the French company were employed by the French Government would prevent their tendering to the English Government, were correct, there was no occasion for the alarm he had expressed. He trusted that he had now gone through the points raised by the hon. gentleman, and had given a satisfactory answer to them.—Mr. Childers could not agree that everything the hon. gentleman had done was satisfactory. On the contrary, it was very much to be regretted that the Government should in many points not have adopted the recommendations of the committee, and in others where they have adopted it in its letter they should have considerably departed from its spirit. The Treasury ought to have carried on the service by means of temporary arrangements till the completion of the Indian railways. It was again very ill-advised to call for tenders for the India and China service only. It would be extremely inexpedient to enter into arrangements with the Messageries Imperiales Company, which was a foreign company, having a contract with another Government, and it would be impossible to make the necessary arrangements with the company itself unless they consulted the French Government. —Mr. Samuda said that the question had branched out into one of general policy, and he thought the attention of the committee had been diverted from the recommendations. A memorial from the Peninsular and Oriental Company had been presented to the Government, complaining that it should have invited tenders from the Messageries Imperiales Company, and contending that there was nothing in the report of the committee which justified them in so doing. The Peninsular Company had now fifty-three vessels employed in the mail service, and those vessels had involved an expenditure of about three millions sterling. The effect of depriving them of the contract would be equivalent to a depreciation of the stock to the amount of about 10 per cent., and the vessels, which cost £3,000,000, would not, on a sale, produce more than £1,000,000. The entire sum paid in dividends was only £7,800,000, so that the entire earnings during ten years would not cover the depreciation. Originally they charged the country about 17s. 6d. a mile, and they now charged only 5s. a mile. They had, on renewal of the contract, diminished their charges to the country. In the first instance, they were paid 17s. 6d. per mile. At present their remuneration was only 5s. 6d. a mile. At the same

Digitized by Google

time, they were about to lose the profits they had made from the transport of troops, and were exposed to a severe competition, especially in respect of the Messageries Company, which was, in point of fact, no company at all, but a branch of the French Government. That was, that it was a hot-house plant, which could not flourish or even exist without the encouragement and support of the Government. So long as we kept the Peninsular and Oriental Company doing our work, we had their force of 16,000 men to draw upon, in case of necessity, to man our fleet; but if we engaged with a foreign company, those men, or at all events the greater part of them, would be thrown out of the employment of that company, and would be absorbed in the general mercantile marine, where we could not so easily command their services.—Mr. LAING said it seemed to him the Government had not fully appreciated the great gravity of the principal question before them. It was evident that the recommendations made by the committee were something entirely different from the course now taken. It was clear the Government had contemplated throwing a tender open for the whole of the service in the East to the French company; but there were questions of public policy involved in this subject. The motive which led the French Government to subsidise their line of steamers was distinctly that of increasing her political influence in the East. That being the case, if a tender for the service throughout the East were really thrown open to a French company, he did not doubt but that the French Government would be prepared to back up their company with any amount of additional subsidy, so as to take the service out of the hands of an English company. The duty of the Government was not simply to look at the matter as a question of profit and loss, but to keep up a postal communication with India on the most perfect system, and not entrust it to the hands of any foreign company. The problem for them to solve, therefore, was to get it done at the cheapest rate consistent with efficiency.—Mr. HUNT wished to explain with regard to the Messageries Imperiales that the Government had thrown open the tenders to foreign countries, and that it was only proposed to accept the services of that company as a third service in the month. —Colonel SYKES had always been an advocate for competition in these matters, but then those who were to tender must stand on an equal footing. The Messageries Imperiales were chiefly supported by a subvention which the English Government would not give to any company whatever. To invite English companies to compete with such a body as this was therefore idle. The French company would make an offer much below any which could be made in this country. Would the Government accept that offer? If they did, they placed our postal communications with foreign dependencies in the hands of a foreign Government, for this company was nothing more than a Government institution. (Hear, hear.) It would be an act of great indiscretion to make a contract with such a company. The Peninsular and Oriental Company with its 53 ships had really been an auxiliary to the navy. If a contract were made between this and next session, whoever the contractors might be, they ought to make it subject to the condition that they should be entitled to no recompense if it were not approved by Parliament.—Mr. LAING suggested that the best thing would be to make a temporary arrangement with the Peninsular Company, so as to bring the question under the cognisance of Parliament next year. (Hear, hear.) But if that could not be done, a special arrangement should be made with the new contractors to the effect that the arrangement should in the first instance be for a limited time.—Mr. CHILDERS strongly seconded this suggestion, and Mr. GLADSTONE said it would not be unreasonable to ask the Government to declare their intentions before the House separated.—The CHANCELLOR of the EXCHEQUER signified his acquiescence.

THE WEST INDIA MAILS.

(Aug. 1st.) Mr. J. SMITH strongly urged the claims of Falmouth as a point of departure for the West India mail.—This called up Sir R. COLLIER, who protested against this unprovoked attack which the hon. gentleman had made on Plymouth. (Laughter.)—Mr. KENDALL and Mr. WYLD, on the other hand, asked for a commission to inquire into the claims of the Cornish port.—Mr. J. A. SMITH and Mr. R. GURNEY, however, insisted on the advantages presented by Southampton. (A laugh.) After some further conversation, Mr. HUNT said the present arrangement with Plymouth was an experimental one, and would only last two years.

THE AMERICAN MAIL.

(6th.) Mr. GRAVES asked the Secretary to the Treasury if it was intended to confine the tenders for conveyance of Her Majesty's mails from the United Kingdom to New York to ships sailing under the British flag; and, if not, whether vessels tendering under a foreign flag will be subject to the surveys and conditions imposed on British ships carrying Her Majesty's Mails.—Mr. HUNT said the arrangement acceded to by the late Government was that the Post-office in this country provide for the conveyance of mails on stated days from the ports of the United Kingdom, and that the United States should provide for the return mails. There was no restriction as to flag; but, other things being equal, the Postmaster-General would certainly give preference to vessels sailing under the British flag. Any vessel under a foreign flag would be under the same conditions imposed on British ships.

Monetary and Commercial.

An Indian telegram of the 22nd July states that the plan for an amalgamation of the Bank of Bombay with the Bank of Bengal has fallen through. A strong effort was now being made for a reconstruction of the Bank of Bombay, and the new capital is said to have been nearly subscribed.

At a meeting of shareholders in the Bank of Hindustan, China, and Japan, the report of the liquidators (noticed in our last issue) was adopted. Captain Engledue explained that although the bank's affairs in India had been grossly mismanaged, he wished to exonerate from any participation in such mismanagement two gentlemen connected with the bank, Mr. Ross and Mr. Archibald Stewart, whose services had been of the utmost importance to it. In reply to some other questions, the chairman stated that their losses sustained by the Bank of Bombay had been £600,000; at Calcutta, £160,000; at China, £150,000; and in England, £128,300, in all £1,038,300. Their total liabilities at the present time were £444,500.

The biddings for bills on India were held on the 7th, at the Bank of England. The amounts allotted were—to Calcutta, £167,300; to Madras, £21,000; and to Bombay, £100,000. The minimum price was fixed as before, at 1s. 11d. per rupee on all the Presidencies. Tenders at 1s. 11⅛d. on Calcutta and Madras will receive in full; those at that price on Bombay about 48 per cent. All tenders above that price will receive in full. The terms thus obtained are about ½ per cent. higher than those on the previous occasion, and indicate a slight increase in the demand for means of remittance to the East.

The following circular, dated 30th July, has been issued by the liquidators of the China Steamship and Labuan Coal Company:—

Sir,—It having been stated at the meeting on the 19th June that the shareholders would be called together as soon as a report from Mr. Price arrived, and that such report was expected in the course of this month, we think it right to inform you, that according to the last advices from Singapore Mr. Price had found it necessary to go to Manila for the month of July, and, consequently, no report can be expected from him until September. Under these circumstances, we think it will cause the shareholders useless expense and trouble for the meeting to be held now as originally intended; but we shall, of course, call the shareholders together as soon as we receive Mr. Price's report. The petition by Messrs. Laird, who are shareholders, to wind-up the company compulsorily in the Court of Chancery, or under its supervision, has resulted in an order being made for the voluntary winding-up to be continued, but under the supervision of the court, with the usual liberty to apply for the intervention of the court in any matters relating to the winding-up.—We are, Sir, your obedient servants, J. D. H. ELPHINSTONE, Bart., JAS. B. GIBBONS, } Liquidators.

A call of £10 per share has been made in the matter of the Asiatic Banking Corporation, now in liquidation, payable next month.

The dollars by the West India steamer *Douro* were sold at 4s. 11½d. per ounce, and the bar silver at 5s. 0½d. The latter price shows no variation, but some transactions had taken place previously in dollars for the East at 4s. 11¾d. The *Pantheon* steamer from New Orleans brought 800,000 dollars, which have also fetched 4s. 11¼d.

The East Indian Railway Company have been authorised to issue forthwith £1,000,000 in 4½ per cent. debentures having five years to run, but not at any time convertible into stock. The readiness with which the guarantee system is allowed to be put in force for Indian interests, assisted by all the prestige of the Home Government, is a point for especial remark in contrast with the tone taken to the unfortunate investors in English lines, who have staked their means on the success of companies created and nursed and tied down in all their proceedings by Acts of the Imperial Parliament.

A meeting of the Anglo-American Telegraph Company has been held, when the directors' report, announcing a dividend at the rate of 23 per cent. per annum, was adopted. The chairman, Sir D. Gooch, M.P., expressed a hope that the tariff would be reduced one-half by the 1st of September next, and mentioned that a vessel would leave immediately to repair the injured cable. It was stated that the earnings of the last four months show a falling off of about £200 per day.

At a special meeting of the proprietors of the London and Westminster Bank the resolutions previously passed for increasing the capital were confirmed.

At the half-yearly meeting of the London and County Bank the report of the directors was adopted, and the usual half-yearly dividend of 6 per cent. and a bonus of 5 per cent. were declared, being equal to 22 per cent. per annum. The report, which will be found elsewhere, is of a most favourable nature, and was received with great satisfaction.

With regard to the advices of the opening of the Tea season recently received from China, the *Produce Market Review* says:—

Notwithstanding the low prices given at the opening of the tea season, we learn by more recent advices received from Foo-chow that the severe lessons experienced by the English merchants there have not even yet been severe enough to stop reckless shipping. It it said that the eagerness to ship as large a quantity as possible, in the shortest possible time, is nearly equal to that exhibited last year. The repetition of this unnecessary competition, although it is not likely to lead to such disastrous results, owing to the much more reasonable terms on which the tea has been bought, has unduly raised prices. The extreme haste to purchase shown, is, in our opinion, an exceedingly doubtful policy, for the rush for new season's teas has very much diminished of late years, as the supply of fine kinds increased. The retail trade are still, although their stocks are so much reduced, able to refrain from buying for some time, and their lessening desire to purchase new season's tea will certainly not be increased by

Digitized by Google

the probability that they will be able to buy more cheaply if they delay their purchases for a few weeks after the first arrivals.

The following, on the State of the Silk market, is from Messrs. Jacomb, Hogg, and Co.'s Circular of the 1st inst. :—

We have arrived at a period of the year at which it is not unusual for more or less inactivity to be displayed on the Silk market. But although we cannot expect much spirit to be manifested on the part of buyers at a moment immediately preceding the first arrivals of the new season's silk, yet so complete has been the stagnation of the past month that it may be described as almost unprecedented. It is not easy to assign any sufficient reason for our present position; it should, however, be borne in mind that our most sensitive market is particularly open to the influence of those numerous and subtle complications, commercial and political, which are at the moment restricting so generally the trade of the country, as evinced by the extraordinarily low Bank rate of discount (2 per cent.) now ruling. In China Silk there have been two or three parcels of No. 3 Tsatlee sold at 27s. per lb., to be delivered any time before the end of December; these transactions must be considered the expression of opinion as to future rates on the part of the individual operators, rather than an indication of prices now current. For Japan Silk there is no market, and our quotations must be considered purely nominal.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month and half-year ending the 30th June last present, on the whole, a more satisfactory appearance than they have done in any previous month. The value of the Exports for the month of June was £15,490,091, which is an increase of 5 per cent. upon those for June, 1866, when the value was £14,630,120. The Exports for the half-year, however, present, when compared with those for the corresponding period of last year, a decrease of 6 per cent., the value being £87,613,484 for 1867, and £92,857,830 for 1866, but this deficiency is less than that observable in the first quarter of the year, which amounted, it will be remembered, to 10 per cent.

The Import returns for the month of May also exhibit a marked improvement, the value of the Imports for that month being £23,275,243, against £23,225,301 for May, 1866, showing an increase for the present year of £49,942. For the five months there is a slight decrease, the value of the Imports being £8,589,319, or 9 per cent. less than for the five months of last year. The value is returned at £83,441,393 for 1867, and £92,030,712 for 1866.

Our Export trade with the Far East presents, according to these returns, considerable depression, the value of the Exports to China (exclusive of Hong Kong) for the five months ended 31st May, 1867, being 20 per cent. less than the value for the corresponding period of last year. To Hong Kong the reduction amounts to 43 per cent., to Japan 15 per cent., to Ceylon 16 per cent., and to Java 1 per cent. On the other hand, the Exports to Singapore and the Straits Settlements show an increase of 7 per cent., and to the Philippine Islands of 37 per cent., when compared with the five months of 1866.

The following is a summary of those figures relating to our Export and Import trade with China and the countries in the Far East :—

IMPORTS.

The total quantity of Raw Cotton imported during the month and six months ended 30th June, and the value to the 31st May, are thus given :—

From	1865.	1866.	1867.
Quantity for the Month ended 30th June.			
China	4,390	—	2.666 cwts.
British India	209,951	728,646	400,721 „
Egypt	109,663	68,287	45,634 „
Total from all parts	471,831	1,677,672	1,293,724 „
Quantity for the Six Months ended 30th June.			
China	210,885	—	4,707 cwts.
British India	1,135,842	2,378,199	939,536 „
Egypt	769,871	619.538	702,831 „
Total from all parts	3,108,853	6,857,742	5,647,206 „
Value for the Month ended 31st May.			
China	£252.585	—	—
British India	1,324.530	£2,723,419	£1,013,626
Egypt	395,775	1,023.937	729,991
Total from all parts	3,215,418	9,152,992	8,303,644
Value for the Five Months ended 31st May.			
China	£936.099	—	£10,001
British India	4,688.073	£9,066,887	2.290,194
Egypt	5,323.848	5.020,493	4,814.052
Total from all parts	17,182,887	38,397,752	25,883,272

The quantity and value of the Raw Coffee imported into the United Kingdom from British Possessions are thus shown :—

From	1865.	1866.	1867.
Quantity for the Month ended 30th June.			
Ceylon	7,794,493	11,346,468	11,229.174 lbs.
Other British Possessions	892,458	715,128	429,029 „
Quantity for the Six Months ended 30th June.			
Ceylon	29,908,873	31,588,282	36,103,245 lbs.
Other British Possessions	7,013,485	2,284,116	4,474,682 „
Value for the Month ended 31st May.			
Ceylon	£232.515	£153,693	£290,447
Other British Possessions	41,406	22,677	27,600
Value for the Five Months ended 31st May.			
Ceylon	£759,106	£658,692	£855,440
Other British Possessions	190,919	115,999	120,202

The following quantities were entered for Home Consumption :—

	1865.	1866.	1867.
In the Month ended 30th June.			
Ceylon	1,577,529	2,029,947	1,531,057 lbs.
Other British Possessions	563,791	397,551	384,940 „
In the Six Months ended 30th June.			
Ceylon	10,012,945	11,612,212	10,848,616 lbs.
Other British Possessions	4,262,469	3,036,821	3,322,391 „

Returns are given of the quantity and value of the Unrefined Sugar imported from Java and the Philippine Islands :—

	1865.	1866.	1867.
Quantity for the Month ended 30th June.			
Of 3rd quality	35,506	—	— cwts
Of 4th do.	48,024	26,570	5,883 „
Total, all qualities	83,530	26,570	5,883 „
Quantity for the Six Months ended 30th June			
Of 2nd quality	2,117	2	— cwts.
Of 3rd do.	89,819	50,327	63 „
Of 4th do.	330,901	138,777	151,394 „
Total, all qualities	422,837	189,106	151,457 „
Value for the Month ended 31st May.			
Of 3rd quality	—	£35,444	—
Of 4th do.	£15,987	50,319	£57,903
Total, all qualities	15,987	85,763	57,903
Value for the Five Months ended 31st May			
Of 2nd quality	£2,214	£3	—
Of 3rd do.	52,195	46,612	£63
Of 4th do.	280,399	94,037	118,031
Total value	334,808	140,652	118,094

The following were the quantities entered for Home Consumption :—

	1865.	1866.	1867.
In the Month ended 30th June.			
Of 2nd quality	515	1	— cwts
Of 3rd do.	22,871	4,352	190 „
Of 4th do.	15,409	19,440	36,342 „

In the Six Months ended 30th June.			
Of 2nd quality	1,720	4	191 cwts.
Of 3rd do.	110.299	26,759	65.317 „
Of 4th do.	110,972	80,307	187,050 „
Total, all qualities	222,991	107,070	252,558 „

The Hemp imported from the Philippine Islands during the month and six months presents the following figures :—

	1865.	1866.	1867.
Quantity for the month ended 30th June	14,346	—	11,334 cwts.
Quantity for the six months ended 30th June	104,331	27,327	42,503 „
Value for the month ended 31st May	£22,994	£20,402	£33,043
Value for the five months ended 31st May	£126,702	£59,517	£79,029

The following is a return of the total quantity of Raw Silk imported into the United Kingdom :—

From	1865.	1866.	1867.
Quantity for the Month ended 30th June.			
China	6,559	—	— lbs.
*Egypt	63,749	163,371	173,209 „
Other Countries	112,917	70,020	56,262 „
Total	183,225	233,391	229,471 „
Quantity for the Six Months ended 30th June.			
China	90,564	79,295	24,551 lbs.
British India	4,260	57,271	—
*Egypt	1,757,686	1,454,035	1,797,040 „
Other Countries	684,605	728,970	960,088 „
Total	2,537,115	2,319,571	2,781,679 „
Value for the Month ended 31st May.			
China	£37,721	£16,761	£9,828
*Egypt	415,953	155,480	334,996
Other Countries	139,749	121,479	149,494
Total	592,823	293,720	494,318
Value for the Five Months ended 31st May.			
China	£104,016	£92,608	£31,266
British India	4.047	64,430	—
*Egypt	2,042,957	1,507,267	2,094,606
Other Countries	728,020	898,344	1,264.477
Total	2,879,040	2,562,649	3,390,349

* In transit from India, China, and Japan.

The total quantity of the several Imports named brought into this country from all parts during the month and six months ended 30th June, and their value to the 31st

Digitized by Google

May of the years 1865, 1866, and 1867, together with the quantities entered for Home Consumption during the month and six months ended 30th June are returned as follows :—

	1865.	1866.	1867.
Quantity for the Month ended 30th June.			
Coffee (lbs.)	11,917,267	13,786,798	16,200,084
Hemp (cwts.)	61,987	107,651	64,641
Thrown Silk (lbs.)	2,224	1,910	16,371
Tea (lbs.)	9,639,689	19,316,618	3,312,619
Unrefined Sugar (cwts.)	1,180,312	868,196	1,112,193
Quantity for the Six Months ended 30th June.			
Coffee (lbs.)	47,358,214	45,587,655	58,641,347
Hemp (cwts.)	249,739	280,912	189,208
Thrown Silk (lbs.)	12,197	22,372	58,813
Tea (lbs.)	66,651,604	75,434,526	62,296,138
Unrefined Sugar (cwts.)	4,313,475	4,853,486	5,608,860
Value for the Month ended 31st May.			
Coffee	£394,337	£248,965	£376,855
Hemp	66,167	97,020	72,910
Thrown Silk	3,454	6,897	24,861
Tea	459,890	1,112,691	553,642
Unrefined Sugar	940,678	1,249,959	1,359,553
Value for the Five Months ended 31st May.			
Coffee	£1,152,872	£991,282	£1,182,491
Hemp	281,273	331,134	241,125
Thrown Silk	18,785	42,112	92,306

TO PARENTS IN INDIA AND CHINA.

THE ADVERTISER (who is the wife of a professional man) is willing to receive TWO YOUNG LADIES to be EDUCATED with her own daughter. The best course of education will be combined with all the advantages of a comfortable home. The house and garden are large, and in the neighbourhood of the Crystal Palace. Terms, £100 per annum each.

Address "T," "London and China Telegraph" Office, 2, Cowper's-court, Cornhill. Unexceptionable references given and required.

TO CHINA MERCHANTS.

THE ADVERTISER, having had considerable experience in the China Trade, both in managing a large business and as Silk Buyer for five years (his knowledge of Silk extending over a period of thirteen years), is anxious to meet with an APPOINTMENT, either in England or China.

Address, E. C. E., care office, "London and China Telegraph," 2, Cowper's-court, Cornhill.

TO JAPAN MERCHANTS.

AN energetic GENTLEMAN, aged 39, and possessed of 22 years' business experience (10 of which have been passed as a Merchant in one of the Australian Colonies, the remainder in London) SEEKS A CONFIDENTIAL APPOINTMENT IN JAPAN AS MANAGER OR OTHERWISE. Is a first-class Accountant and Correspondent, well acquainted with Merchandise, Shipping, Insurances, &c. Is competent to take the management of a Branch for a Marine Insurance Company, having great experience at Lloyd's. Is seeking an opening where integrity and ability may lead to future advancement rather than any immediate high remuneration. References of the highest character.

Address "S. W." care of Messrs. WILLIAM BROWN and Co., 40, Old Broad-street, E.C.

A GENTLEMAN, recently returned from Japan, having had for five years the management of the books of one of the principal houses in Yokohama, is desirous of a fresh ENGAGEMENT, either in Japan or any house in England connected with the East.

Address, E. J. S., 5, Love-lane, Aldermanbury.

CHINA AND JAPAN TRADE.

WANTED a PARTNER, either active or sleeping, to take a share in a business connected with China and Japan. Capital required, about £5,000 For interview address S. T., "London and China Telegraph" Office, 2, Cowper's-court, Cornhill.

PORT OF AMOY.
CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful centrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

NOTICE TO SHIPOWNERS.
SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c.

Apply at the Offices of Messrs. PATERSON, SIMONS and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

HOLLOWAY'S OINTMENT.—AGONISING PAINS.—It is gratifying to hear sufferers recount the ease they derived when first they applied this Ointment to their ulcers, sores, and abscesses, with which they had been afflicted for years. Soon after its application to a bad leg or inflammatory ulcer it restrains the excitement of the blood-vessels and nerves, which at once brings coolness and comfort, and furthers the gradual deposits of healthy materials to fill up the ravages caused by violence, debility, or disease. It expels all noxious matters, and heals all sores soundly. It gives ease to varicose veins, bad legs, and swellings of the feet and joints, where the agony is almost unremitting, and the pain too much for a giant's strength.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month. Passengers by this route are less than ten days in the tropics.

The next departures from San Francisco are:—

GREAT REPUBLIC, 5,000 tons, September 3rd.

CHINA*, 5,000 tons, October 14th.

COLORADO, 4,000 tons, November —.

For particulars of Freight, through passage rates, &c., &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

* Name changed from "Celestial Empire."

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

NEW OCEAN MAIL ROUTE to CHINA and JAPAN, via the Isthmus of Panama and San Francisco.

THE WEST INDIA AND PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the Panama Railway Company and the Pacific Mail Steamship Company for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

The next departure will be

From LIVERPOOL on the 20th August, intending to connect, at San Francisco, with the steamer leaving on the 14th October for Japan and China. The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

For rates of Freight and Passage apply to the agents, J. M. CURRIE, Havre and Paris; or at the Company's Offices, The Temple, Dale-street, Liverpool, and 117, Leadenhall-street, London, E.C.

ARTHUR B. FORWOOD, Managing Director.

No. 22, Great St. Helen's, E.C.

To sail on August 13.

FOR SHANGHAI, the splendid new clipper-ship DURHAM, AA1, 998 tons register; CUTHBERT VAUX, Commander; lying in the East India Docks. Has superior accommodation for passengers.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular line of Packet Ship.

To Sail on August 13.

FOR HONG KONG and WHAMPOA, the well-known clipper THE TWEED, A1 15 years (owned by John Willis, Esq.), 1,745 tons register; WILLIAM STUART, Commander; lying in the East India Docks. This magnificent ship offers a favourable opportunity to shippers of fine goods at this particular season, as she may confidently be expected to make the passage under 100 days, having proved herself to be one of the fastest ships afloat.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

First voyage—London to Ceylon, 77 days; Singapore to London, 84 days. Second voyage—London to Bombay, 89 days; Malabar Coast to London, 81 days. Third voyage—London to Bombay, 75 days; Kurrachee to London, 86 days.

Regular line of Packet Ship.

To follow the "Tweed."

FOR HONG KONG and WHAMPOA, the nearly new clipper-ship ALBERT VICTOR, A 1 13 years, 858 tons register, newly metalled; DAVID MUIR, Commander: lying in the East India Docks. This fine ship, built by Messrs. Steele, of Greenock, offers a favourable opportunity for shippers of fine goods at this season.

For Freight or Passage apply to SHAW, LOWTHER, and [illegible] Royal Exchange-buildings, London, E.C.

To sail August 20.

DIRECT for POINT DE GALLE and COCHIN, the beautiful clipper-ship ANN LUCY, A1 11 years, 270 tons register; WILLIAM NOBLE, Commander a lying in the London Docks. This fine vessel offers a first-rate opportunity to Shippers of Fine Goods, and has very good accommodation for first and second class passengers.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To sail August 20.

DIRECT FOR COLOMBO, the splendid Dundee clipper SEAFIELD, A1 10 years, 616 tons register; J. TOUGH, Commander; West India Docks. This magnificent vessel has just returned from Colombo, and from the good order in which she invariably delivers her cargoes offers the most favourable opportunity to shippers desirous of despatch.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Thames," sailing August 25.

FOR COLOMBO, CEYLON, DIRECT, will have the usual despatch, having the greater portion of her cargo engaged, the clipper-ship PALESTINE, A 1, 608 tons register; THOMAS PARK, Commander; loading in the West India Docks. This magnificent vessel has a full poop, with accommodations of the first order for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill.

To follow the "Jessie Gilbert," and will sail August 15.

FOR BOMBAY direct, the fine British-built iron clipper ship BEBINGTON, AA1, 889 tons register, THOMAS WARLAND, Commander, East India Docks. This splendid vessel, from her high-class and fast-sailing qualities, is confidently recommended to shippers of fine goods.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Bebington," and will meet with the usual quick despatch.

FOR BOMBAY DIRECT, the fine British-built clipper-ship PEGASUS, A1 (owned by J. K. Welch, Esq., of London), 1,183 tons register, THOMAS CORNWALL, R.N.R., Commander, East India Docks. This splendid vessel, built in 1862, is noted for her fast-sailing qualities, and is confidently recommended to shippers.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

List of Passengers.

PASSENGERS INWARD.

Per French mail steamer Camboge, arrived at Marseilles August 6.—From Yokohama: Mr. Banduin and four Japanese. From Shanghai: Messrs. Alcock and Ladreyt. From Hong Kong: Messrs. Marnier, De Valla, Payron, Den Brems, Warden, Preciot, Martinez, Rivas, Major, and Fejero. From Batavia: Messrs. Menn, Moser, Van Mariswell, G. A. Smith, G. H. Smith, Coblyn, Van der Schall, Van der Broken Begemann, Van der Zevreys. From Singapore: Messrs. Colino, Muniz, Salaro, Weiss, Saralta, Ayarra, Blanco, Aguirro, Del Barco, Navarro, Coro. De Trevins, Kaltenbach, Walter, Lefour, Clavery, Ruiz, Lopez, B. Ruiz, Remes. From Galle: Messrs. Northmore, Smith.

By this mail, to Marseilles, per P. and O. steamer Bangalore, arrived Aug. 11.—From Shanghai: Mr. F. King, Mr. and Mrs. J. F. Twombly and child, Mr. Swire. Mr. Rolfe, Lieutenant Rivington. From Hong Kong: Mr. Marshall, Mr. Ashton. From Singapore: Mr. Brennand. From Penang: Capt. Meyer. From Galle: Mr. A. M. Ferguson, Mr. White.

To Southampton, per P. and O. steamer Pera, expected to arrive Aug. 19.—List not to hand.

PASSENGERS OUTWARD.

Per P. and O. steamer Euxine, from Southampton, August 4.—To Shanghai: Mrs. Algernon Wright and child. To Singapore: Capt. Formochy. To Hong Kong: Mr, Stratford, R.N., Mr. Grant, R.N., Mr. Platt, R.N., Mr. Blackburn, Mr. C. Jackman. To Ceylon: Mr. and Mrs. Milne. To Calcutta: Mrs. Hornbrook, Major and Mrs. Wilkinson. To Madras: Lieut.-Col. Simpson.

From Marseilles, Aug. 12.—To Yokohama: Mr. Fredrick de Fischer. To Shanghai: Count de Mont Blanc and five Japanese gentlemen. To Calcutta. Dr. Cardew, Mr. Hickman, Dr. and Mrs. Irvine, Mr. G. Finch, Lieut. A. Brett, Mr. H. B. Ashworth. To Madras: Mr. and Mrs. J. V. Doyle, Col. Pouter.

Per P. and O. steamer Columbian, from Southampton, August 20.—To Shanghai: Mr. A. E. Hippisley. To Ceylon: Rev. J. Pickford, Rev. Griffith. To Hong Kong: Mr. Oldknow, R.N., Mr. Toxdale, Mr. Vercoe, Mr. White, Mr. Lugden, Mr. Pinkis, Mr. Lumley. To Singapore: Mr. Kellock, R.N.

Per P. and O. steamer, from Marseilles, September 4.—To Hong Kong, via Bombay: Mr. C. J. Alford.

Per P. and O. steamer, from Southampton, September 4.—To Hong Kong: Mr. and Mrs. G. W. Caine and child. Miss M. Middlemist, Mr. Lucas, Lieut. Speight. To Singapore: Mr. Isemonger. To Shanghai: Mr. E. Price.

From Marseilles, September 12.—To Singapore: Mr. and Mrs. C. Heinszen, Mr. J. W. Miller. To Penang: Mr. L. Zander. To Hong Kong: Mr. and Mrs. Schenermann.

From Suez to Hong Kong.—The Bishop of Victoria and Mrs. Alford, Mr. E. Alford.

Per P. and O. steamer, from Southampton, September 20.—To Ceylon: Mr. and Mrs. Rodd and two children, Miss Piachand. To Singapore: Mr. Hervey, Mr. Austen.

From Marseilles, September 28.—To Hong Kong: Dr. C. M. Jones, Mr. E. H. Price, Mr. Leopold Kahn. To Shanghai: Mr. D. Brand. To Ceylon: Mr. Morris.

Per P. and O. steamer, from Southampton, October 4.—To Ceylon: Mr. G. Crowe.

From Marseilles, October 12.—To Ceylon: Mr. J. Murdoch, Mr. and Mrs. Armitage. To Hong Kong: Mr. T. Pyke, Mr. T. Porter.

Per P. and O. steamer, from Southampton, October 20.—To Hong Kong: Mr. Armstrong, Miss Caldwell.

From Marseilles, October 28.—To Singapore: Mrs. B. Little and child. To Hong Kong: Mrs. J. Haffenden.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present mail brings only two days later dates from Yokohama—viz., to June 14th. The following items are from the *Japan Times*:—

We are still unable to give the name of the new port on the West coast. We are glad to find that our fear that Tsurunga would be chosen was unfounded; the foreign Ministers have expressed themselves strongly against it. The *Serpent*, one of H.B.M.'s surveying ships, is now engaged examining all the apparently eligible harbours on the West coast, and some weeks must necessarily elapse before Captain Bullock can make his report.

Our news from Osaka are by no means satisfactory; they augur anything but ease for the Shiogoon and peace for the empire. Consequently, unless existing difficulties can be previously arranged, we cannot anticipate much advantage for ourselves when the ports are opened next year. The combination of Daimios against the Shiogoon, to which we alluded last mail, we have now ascertained to be an actual and threatening reality. They very naturally object to the extension of a trade in which they have no share, and the profits from which only strengthen an able and dangerous rival, whom they shrewdly suspect of a design to become their absolute master. It appears that Osaka not being strictly his own port, the Shiogoon, by taking the responsibility of promising that it shall be opened in 1868, has so far committed himself that the Daimios opposed to him have just ground of complaint that they had not been previously consulted. They carefully avoided giving him any opportunity of consulting them, it must be remarked, by steadily refusing to attend the conference which he has repeatedly endeavoured to assemble for the purpose. Now they declare that Osaka shall not be opened, unless foreign trade is also permitted at certain points in their own dominions, and Satsuma, Chiosiu, Echizen, Tosa, and Kanga have declared that if Osaka be opened in 1868, they will themselves invite foreigners to trade at their own ports. It is difficult to say how this can be prevented with any show of right, and very easy to see that much evil will result from the fulfilment of their threat. Subjects of Powers having treaties with the Shiogoon can be punished for trading at any of his ports not opened by those treaties, but at ports out of his territory, and where his authority is not acknowledged, we can see nothing to prevent traders doing whatever business they can, particularly when specially invited by the Sovereign of that country. On the other hand, foreign Powers will certainly never make a number of separate treaties with these individual Daimios, and, consequently, foreign traders repairing to their ports would have to do so on their own responsibility, and would be without the inestimable advantage of consular protection. Probably business would be done, as in the early days of the India and China trade, by means of coasting vessels, supercargoes, and receiving ships, a system the evils and inconveniences of which are manifest. The development of the Japan trade has been so

Digitized by Google

remarkable as to be an absolute wonder: it would be most regrettable were its progress now to be checked by hasty, inconsiderate action, by either Shiogoon, Daimios, or foreign diplomatists.

We were just able, as we were going to press with our last, to announce the arrival of Sir Harry Parkes and suite in the *Basilisk*. The American and Dutch Ministers having returned before, the *corps diplomatique* usually resident in Yedo was made once more complete by the arrival of M. Leon Roches from Nagasaki in the *Guerriere* on the 7th inst. It has since received an addition in the person of M. le Comte de la Tour, who arrived in the French mail on the 9th inst. to represent in Japan the Kingdom of Italy; and by the same opportunity M. t'Kint de Roodenbeck, Minister for Belgium, returned from a lengthened tour in China. We hear that Mr. Eugene van Reed, an American gentleman who has resided here since the ports were first opened, is on the point of concluding a treaty with the Shiogoon for the Sandwich Islands, and Sweden will also soon be represented. The advantage accruing to either party to several of these newly formed alliances are not, at present, apparent, but no one can tell what the future may bring forth.

CHINA.

SHANGHAI.

Dates from this port are to the 23rd June, two days later. The outward mail of May 10 was delivered on the 22nd June, with London telegrams to May 30. The following few items of news are from the *North China Herald*:—

Further correspondence regarding the new rules proposed by the Silk Guild has passed between the Chamber of Commerce, the foreign officials, and the Taotai; also further voluminous correspondence regarding the employment of foreign vessels in the bean trade. The Taotai's late proclamation on the latter subject has, we are glad to learn, encouraged the charter of a number of vessels, and demand still continues. It remains to be seen whether the permission accorded is, this time, *bona fide*; or whether, on their return to Shanghai permission to land the cargoes will be again refused.

The negotiations that have taken place during the last two years regarding the employment of foreign ships in the bean trade disclose an amount of duplicity on the part of the Chinese authorities as disgraceful as it was unwise. So long ago as March, 1862, official intimation was given that the prohibition laid on the export of pulse and bean cake from the ports of Chefoo and Newchwang under the British flag had been rescinded, and a remunerative trade to foreign shipping was at once opened up. But two years later, when the danger which had induced the concession had passed away, and foreign assistance was no longer needed to prevent the Taiping occupation of Shanghai, the privilege accorded was secretly withdrawn. No open warning was given of the change, but, in June, 1865, vessels arriving here with beancake from the North found themselves prohibited from discharging their cargoes; and shortly afterwards, on the 3rd of August, a formal notice was issued that all shippers in foreign bottoms would subject themselves to this penalty. Eventually, at the request of several native consignees, permission was granted for discharge of vessels that had been chartered previous to the date of the prohibition; but an intimation was renewed that none chartered subsequently would be allowed to land their cargo. Shanghai was the only port at which this prohibition was enforced, so it would appear that the local Government and not that at Peking is at fault. Vessels have continued to run from Chefoo and Newchwang to the southern ports without let or hindrance. The thanks of firms interested in the shipping trade are due to Messrs. Tilby and Co. for the persistence with which they brought these facts to the notice of H.M. Consul, and urged the address of energetic remonstrance both to the local authority and to Peking, while others abandoned the cause in despair. On the 15th June, 1866, the public notification by the Taotai, for which they pressed—that natives as well as foreigners were at liberty to employ foreign vessels in the trade—was at length obtained. The Taotoi denied all interference on the part of himself or his subordinates, and officially proclaimed that "the conveyance had been authorised of pulse and beancake in foreign vessels from Newchwang and Tungchow." Better acquainted, however, than foreigners with the wiles of their own rulers, native merchants still declined to believe in his Excellency's intent; and when at length two from among them were induced to charter a couple of vessels for the trade, they were met, on the return of the ship and cargo to Shanghai, by a refusal to permit its discharge. "It was not allowed to import cargoes from the North in foreign bottoms; those cargoes could not be sold here, but must be sent away," was the reply received at the Taotai's office to an application on the subject. And here the matter rested; for more than eighteen months the northern trade has been closed to foreign shipping, no vessel except the two in question having been chartered since August, 1865. The occasion of Sir Rutherford Alcock's visit has been taken by the Chamber of Commerce to address a letter to him on the subject; but their action had been anticipated by his Excellency, who had addressed the Governor-General of Nanking on the subject a few days previously. Tsen-kwo-fan's reply reiterates the false assertion of the Taotai, that no prohibition against the employment of foreign vessels in the bean trade exists. He refers to the proclamation issued last year by the Taotai as a proof that no official interference has been exerted, and says H.M.'s Consul acknowledged that the behaviour of Chinese officials in the matter called for general gratitude. And now another proclamation has been issued, which has, we are glad to learn, had the effect of encouraging Chinese merchants to charter a whole fleet of vessels from hence to the northern ports and back. As, judging from previous experience, they have doubtless not done this without ascertaining the Taotai's real intention on the subject, we may hope that the permission now accorded is genuine.

The body of the second officer of the ship *Lennox Castle*, who had been missing for a fortnight, was found on the 17th June in the river. It is supposed that he was drowned on the 2nd June, as he left the ship about six P.M. on that day and nothing had been heard of him since. A court of inquiry was held to endeavour to ascertain the circumstances under which he met his death, but failed.

A disturbance took place at the Canton Theatre in the Maloo in consequence of three foreigners entering the theatre and occupying some private seats. They were asked to remove by some Chinese attendants, but not understanding them they sat still. The audience then commenced leaving the theatre, throwing cups, &c., but there do not appear to have been any severe injuries received by any one.

An account is given of the formal opening of the new Racquet Court on the 19th June. The building quite comes up to, if it does not exceed expectation, and comprises every comfort and convenience for players. It has been erected at a total cost, including the purchase of land, of about 12,000 taels.

A meeting for the discussion of missionary topics was to be held at the rooms of the Asiatic Society on the 24th June, which it was hoped would be the first of a series.

Twenty-three mow of land near Messrs. Gibb Livingston's wharf, having 300 feet water frontage, have been sold at auction for 17 taels per mow.

It has been resolved to erect the following lights at or near the entrance to the mouth of the Yangtze:—

1.—A *Revolving* Light of the first order on the North Saddle Island, at an elevation of 250 feet above the sea.

2.—A *Fixed* White Light on Gutzlaff Island, showing all round the horizon at an elevation of 210 feet, visible 15 miles over the Northern half, and 20 miles over the Southern half of the horizon.

3.—A *Revolving* Red Light at an altitude of 38 feet, visible all round the horizon at a distance of 12 miles on the present Light Vessel moored at the Tung-sha Bank.

4.—A *Fixed* Light, with short eclipses, visible 12 miles for the Kintoan Beacon, obscured on the land side.

We are glad to hear (says the *Friend of China*) that Mr Chaloner Alabaster, whose decoration of the Star of China we noticed before, is likely to receive a more substantial *douceur* in the shape of a thousand dollars from his Excellency the Taoutai, this being offered for his services in establishing and carrying out so economically the institution known as the Mixed Court, the sum to be paid from the Court's fee chest, provided his Excellency the British Minister does not say nay. All we say is we most cordially wish he may get it!

We are indebted to the *Shanghai Recorder* for the following:—"A Chinese official recently arrived from Nanking expresses his doubts as to the possibility of ever terminating the Nienfei troubles. This, he says, is a different affair to the Taiping rebellion, in which the opposition was greater, but it was at least concentrated, and the Government knew where to go and oppose the insurgents. But with the Nienfei it is hopeless. So soon

Digitized by Google

as a force is brought against them, they disperse and are off to the mountains; while no sooner are the Imperial troops removed than they are back again. The same person expresses his doubts as to the reported successes of Li in the North, adding that these victories are always egregiously exaggerated."

We regret to hear that the S.S.N. Company's new steamship *Manchu*, which left Shanghai for Tientsin on the 16th June, had the misfortune to strike on a rock off the Shantung promontory, and was compelled to return as fast as steam could bring her.

It is stated that the firm of Mackellar and Co., of Hankow, is in difficulties.

The following little story, given by the *North China Herald*, is curiously illustrative of Chinese social life, and though bearing the appearance of a romance is nevertheless perfectly true:—About thirteen or fourteen months ago, the mother of a young lady residing outside the north gate of Shanghai city discovered that her daughter was *enceinte*, and that this condition had been brought about by the trusted nurse of the family having been in the habit of trading on the daughter's charms, making always some excuse to the mother of a visit to a neighbour to account for the occasional absence of the frail one from the parental cottage. The mother, on making the above-mentioned discovery, was so incensed that she induced some of her male relatives to beat the nurse to death with bamboos. The friends of the nurse thereupon took legal opinion on the case, which resulted in a petition being presented to the Shanghai Hsien, who (with that love of justice, we presume, which so eminently characterises a Chinaman) caused inquiries to be made into the matter, and bringing home the murder to the mother as the instigator of the crime, condemned her to death. But the mother being far gone with child, the sentence was allowed to stand over till the child should have been born and weaned, and this latter circumstance having taken place the other day, the sentence was carried out, the mother being strangled outside the south gate. A cord was placed round the unfortunate woman's neck and gradually tightened till strangulation was nearly effected, when the cord was loosened and breath allowed to re-enter the lungs; this refinement of torture was repeated, and it was only on the cord being tightened the third time that the woman was allowed to die. Strange to say, during the thirteen or fourteen months which elapsed between the passing of the sentence and the execution, the woman was not kept in prison, but was allowed to live in her house outside the north gate, near the French concession, a "secure-man" having made himself responsible for her appearance when wanted for the purpose of being put to death.

FOOCHOW.

Dates hence are to June 23. The *Taewan* sailed on the 20th June. She met with a serious misfortune in her passage down the river Min. From Messrs. Gilman and Co.'s Circular of June 22, we learn that she had on board 789,500 lbs. of tea, and that she is on shore on the north bank "a total wreck." One thousand chests have as yet, it is said, been saved. Messrs. Gilman and Co. are Lloyd's agents.

The Foochow *Advertiser* says:—"There is little change to report in the tea market. As buying has continued on the same heavy scale, at about former prices. The only description in which a fall has been established is inferior Congou, which is now in full supply. Total settlements to date, of Congous alone, are nearly 150,000 chests. The export is already 11,500,000 lbs. and before the departure of the mail is expected to reach 14,000,000. Such figures as these, combined with the exports from the other tea ports which are no doubt in the same rate, cannot fail to affect the home market, and we must say that it surprises us that they produce so little effect on this market."

Mr. Watters, late H.M.'s acting Vice-Consul at Tamsuy, has been transferred to Foochow as third assistant, in place of Mr. Holt, who has been despatched to the former place to take charge of the vice-consulate.

HONG KONG.

From this port we have intelligence to June 29. No later mails or telegrams had arrived out since the date of our last advices. The *Overland China Mail* supplies the following news:

Cheong-po-sun, convicted of the murder of a clothseller in Tank-lane, and three of the four pirates convicted at the May Sessions for piracy and murder on the high seas, were, on the 24th June, executed at the usual place in front of the Gaol. The scene was probably the most exciting of the kind ever witnessed in Hong Kong for many years past, and may serve to show both the justice of the sentence passed upon the prisoners and the hardened nature of the criminals who pass through our courts of justice here in Hong Kong. Of the Tank-lane murderer it was clear that he had braced up his faculties to die as stoically as it is in the ability of a human being to do; and it must be said that he succeeded to perfection. On the scaffold he screwed up his face into a wrinkled and painful expression, but said not a word. Cheong-sin-fook, Lee-koon-hing, and Wong-asing, the three pirates and murderers, were the exact opposites of Po-sang, their violence being as strongly marked as was the coolness of the other. They made no confession, but endeavoured to mistify the story of the piracy as much as possible, each blaming the other, and all lying in the most barefaced manner conceivable. The only statement in which they could be said to agree, was that the fourth prisoner (he of the alleged medical proclivities) was not an active party in the piracy for which they were sentenced; and upon this additional confirmation, coupled with the lesser weight of evidence against this prisoner, he has been temporarily reprieved by the Governor. Perfect indifference and a species of bravado were maintained by these four piratical murderers until the fatal information of last evening; when the three doomed men underwent a remarkable change. Only yesterday morning two of them wished to fight each other; but this morning their pitiable moanings disturbed the quietude of the entire neighbourhood. While they were being pinioned, they sobbed and groaned incessantly, and on being led out to the Gaol office, where they were led by the Sheriff, they had to be supported by stimulants, which the Tank-lane murderer refused with a shake of the head. Before proceeding to the scaffold, a final attempt was made to draw some confession from the pirates and to clear some doubts arising from the former confession of Po-Sang, but without success. Po-Sang maintained that there were five men engaged in the murder of the clothseller; Cheong-lin-fook stoutly refused to make any admission, and influenced the others also to keep their counsel by his determination. As the bell struck six o'clock, the prisoners were led forth to the scaffold, near which were a number of Europeans, one or two companies of police under Mr. Jarman, and fifty penal servitude convicts ranged on one side of the compound. Cheong-fook had to be pushed up the scaffold ladder by main force; and when all the condemned men had reached the platform, there followed a scene which will not be soon forgotten by those who witnessed it. Po-sang was cool as a statue, with his painfully drawn-up features; but the other three swayed about uneasily, looked behind over the wall as if meditating escape, now noisily resisting the executioner and again moaning and groaning as before. Cheong-fook stamped and danced upon the platform, and cursed and swore at the crowd below, until it was feared some accident might happen to the scaffold, and he had at last to be bound round the ankles with a rope. The voice of the Roman Catholic padre was drowned in the torrent of abuse from the scaffold; and it need hardly be said that the exhortations of the ministers of religion seemed to have not the slightest effect upon any one of the doomed men, except perhaps Po-sang, who now and then during the morning had listened to what was said to him. At five minutes past six, at a signal from the Sheriff, the bolt was withdrawn, the fatal jerk given, and the miserable victims were left dangling in the air. Death must have been instantaneous, although the bodies quivered for some minutes afterwards. All three pirates were strong, powerfully built fellows, and would no doubt have given very great trouble had not the necessary precautions been taken in gaol and on the scaffold. With the exception of the objectionable fact that the stone parapet and the lower bar of the scaffold again formed a rest for the feet of two of the prisoners, the arrangements were perfect. The scaffold was removed by eight o'clock—an improvement on former occasions, when it was allowed to stand over Sunday.

Messrs. Margesson and Co.'s Chinese shroff has been taken in custody on a charge of having embezzled monies to the amount of $420 within the last four months. The compradore of that firm appears as complainant in the case.

We regret to learn that a fatal accident occurred on board the *Princess Charlotte* while the coronation salute was being fired. One of the guns missed fire, and the firing party passed on to the next gun; the sponger who followed being unaware that the gun had "missed," proceeded to sponge out, when the gun exploded, and blew the poor sponger from the deck—of

Digitized by Google

course into eternity. Such is the fact as narrated to us, and we are further informed that the body of deceased has not yet been found.

It is, we learn, in contemplation by certain benevolent and liberal Chinese, to erect an hospital for the benefit of the poorer class of their own nationality in Hong Kong. They have already bought a large piece of ground upon which to build, and have asked the permission of the Surveyor-General to commence work at once. The petitioners are prepared to defray the entire expense at their own cost, and their intention, so far as we at present understand, is to place the establishment under purely native conduct.

The report of the case of Olyphant and others *v.* Loo A-hung, for breach of warranty on a sale of sugar, contains the following extraordinary proceedings :—

Shortly after this case commenced, and while Mr. Whyte was cross-examining plaintiff's compradore, some reference was made to another Chinaman, also in plaintiff's employ, and the Chief Justice said "put him in the box;" when the following conversation ensued :—

The Chief Justice said that, as the man was a servant of the plaintiff, they should produce him.

Mr. Pollard: You cannot produce him like a piece of paper. Let him be subpœnaed in the usual way.

Chief Justice: Do you mean, Mr. Pollard, to put them to the trouble and expense of subpœnaing him? Well, if you don't produce him, I will take that into account in my direction to the jury.

Mr. Pollard: I will put only those witnesses in the box which I, as counsel for the plaintiff, may see fit. I may make a mistake, but I will not be dictated to or talked down by any one as to what I am to do.

Chief Justice: I am not talking you down, Mr. Pollard. You will do your duty, and I will do mine.

Mr. Pollard: That's all right, if we would only stick to it.

Chief Justice: Now, Mr. Pollard, you will always have the last word; and I think it is most disrespectful to the Court to use language you are in the habit of using.

The Chief Justice then left the Bench; but after an interval of a minute or two returned.

Chief Justice: Do you apologise, Mr. Pollard?

Mr. Pollard: For what, my lord?

Chief Justice: You know what has passed; you know what for.

Mr. Pollard: If I have offended in any way, there is no man more willing to admit it, and to apologise. Will you hear me?

Chief Justice: For an hour, if you like.

Mr. Pollard began to state that his lordship asked him if he would produce a witness.

Chief Justice: You told the Court in a taunting way that a witness was not a piece of paper, as if I did not know that a man was not a piece of paper.

Mr. Pollard: Is it that you wish me to apologise for, my lord?

Chief Justice: There's more than that.

Mr. Pollard: If you will be so good as to inform me for what I have to apologise, my lord, there is no man more willing to do so.

Chief Justice: You know very well what it is, Mr. Pollard. (Turning to the jury.) Gentlemen of the jury, I shall adjourn this case until Saturday, as we cannot get on in the present circumstance.

Mr. Pollard: That is entirely without precedent, my lord.

Chief Justice: And the other was much less without precedent.

Mr. Pollard: I object to the proceeding now taken by the Court, and I hope you will take note of my objection.

Chief Justice: I'll note anything you like.

Mr. Whyte: Will you not allow me to finish my cross-examination of this witness, my lord?

Chief Justice: Certainly not; I can't go on until Mr. Pollard apologises.

Mr. Pollard: If I have done anything wrong, there are certain steps which may be taken by the Court. But I don't see why the case should not—

Chief Justice: There are such steps, but these I will not take. Silence, sir. You would not dare to use such language anywhere else. (Rising.) This Court is adjourned.

Mr. Pollard: I always answer when I am attacked, and not without.

Chief Justice: If every one would do his duty in this court—

Mr. Pollard: I have done my duty for a long series of years, and I have never been attacked in the same manner before; and I will not allow—

Chief Justice: Silence, sir, if you please.

The Chief Justice here checked the usher of the court, who was, by Mr. Masson's orders, adjourning the Court until ten o'clock on Saturday, say—"Indefinitely, as I must have an apology from Mr. Pollard before the case can go on."

Mr. Pollard: There will likely be another counsel to appear.

The Chief Justice repeatedly ordered Mr. Pollard to be silent, but the learned counsel had the last word by saying that he answered only when he was attacked.

Mr. Masson informed the jury that they would be advised what time they would next be called upon to attend.

We learn that the case was ultimately submitted to arbitration.

JAVA.

The account given in a late issue of the *London and China Telegraph* of the disastrous earthquake that recently occurred in this island was, we are informed, in some respects inaccurate. The following additional particulars are extracted from a Samarang Circular, and may be received as authentic :—"On the 10th of June a serious earthquake occurred in the centre of the island, the effects of which were also felt here, but caused no important damage. Other districts suffered severely, and this is especially the case with Djocjacarta, where several indigo and sugar manufactories have sustained injury; the former, however, were promptly got in working order again, so that work was only momentarily interrupted. Most of the sugar mills are again in operation, while others will be able to commence grinding within a month at the farthest. Regarding the extent of the damage to private property caused by this disaster, no definite statements have yet been received; it is already apparent, however, that the reports spread on this subject were exaggerated. The crops have not suffered at all."

STRAITS SETTLEMENTS.

SINGAPORE.

The London mail of the 27th May arrived out on the 27th June, and London telegrams had been received to 14th June. During several sittings of the Legislative Council the chief subject for discussion had been the purchase of a steamer or steamers for the service of a local marine. As was represented in an able paper, laid before the Council by the Executive, the position of the Settlements, placed as they are in the midst of a series of native States, frequently at war with one another, and the disturbances in which seriously affect the trade, render it desirable that the Government should have it in its power to interpose its authority, and this can only be done by way of sea or river. For these and other reasons it has been decided by the Council that a paddle steamer of about 300 tons, with special adaptations to the service, should be intended for from England, together with a Tender and a steam launch for shallow river operations.

It has been decided by Government to give a subsidy of £100 per month to the British India Steam Navigation Company for the maintenance of the present mail line between Calcutta, British Burmah, and the Straits Ports.

Colonel Anson, the Lieutenant-Governor of Penang, had arrived there and relieved Colonel Man of charge. Mr. W. W. Cairns, the Lieutenant-Governor of Malacca, had been sworn in, and proceeded to Malacca to relieve Major Burn. Sir William Hackett, Acting Chief Justice, had arrived from Penang, and would open the third criminal session of the year on the 9th July. The calendar was not large.

PENANG.

Dates hence are to July 10. The *Penang Gazette* gives the following account of an expedition by H.M.S. *Wasp* to the Nicobar Islands :—

H.M. steamer *Wasp* left on the 12th June for the Nicobar Islands to investigate about the murder of the crew of the brig *Futteh Islam* of Penang, which was said to have been perpetrated in these islands. The return of the *Wasp* gives us a miserable story connected with the Nicobar Islands, at least with those particular islets visited. To say that a nest of pirates have been discovered is almost too mild a term; all the stories that we have heard of Chinese pirates hardly exceed in their narrative horrors such as we were yesterday told have been perpetrated in the Nicobar Islands, comparatively in our neighbourhood, and these have gone on for years unpunished until now! It is only now that one begins to think of the vessels which are reported as having been missing in the Bay of Bengal, and though there are but a few brought to light the presumption is that a great many more have disappeared, victims to the remorseless cruelty of those savages (we can call them nothing else) who inhabit the Nicobar Islands.

At Trinkut the *Wasp* met two vessels, the *Rattlesnake*, under English colours but belonging to the Sultan of the Maldives, and the *Harriet*, of Penang; they were both at anchor, and trading with the natives. It is reported that the natives threatened to attack the *Rattlesnake* on the departure of the man-of-war. The captain of the *Rattlesnake* stated that he had seen a white (European) woman on the island about eight months ago, in November last. It appears that about six years ago a ship was wrecked on these islands, the captain and crew were all murdered by the natives, the wife of the captain and two children were taken on shore, and the ship plundered. The fate of the poor woman is sad enough; she was passed about from one to another through the whole tribe, according to their wishes, the children being secluded. When the poor lady was seen and spoken to by the captain of the *Rattlesnake* the natives probably got alarmed of the consequences of her being discovered, and the history goes that these miscreants gave her poison in the shape of a well-known poisonous fish, the *ikan buntal*

Digitized by Google

This was not sufficient to kill her outright, and the sufferings she endured caused her to scream and cry out so much that one of the chiefs was forced, for his own comfort (!) to take her into the jungle; he returned without her, and she was never more seen. The *Wasp* has brought over three men and one woman as prisoners. One of the men, calling himself Francis, confesses to have had a white woman living with him for four months. These people are detained by the captain of the *Wasp* until further orders.

About two and a-half years ago another brig was seized at the Great Nicobars, the captain and crew murdered, and a lady with two children taken on shore, probably treated in the same way as the former one, at all events, as far as daily life goes there, she is said still to be alive. The hopeful affair in this case is that, as the lady and children are on the Great Nicobar, and in the south-west monsoon which prevails just now, the canoes cannot cross over from Trinkut; the chances are, therefore, that relief will be given by one of our men-of-war before the rascals can despatch her in the same way as previously related. In the month of May, 1864, the three-masted schooner *Baillie Nicol Jarvie*, Capt. Cowie, left this for Rangoon. He has never been heard of since, and it was presumed that he fell into the hands of some of these Nicobar savages. Some time ago it was reportod here that Mrs. Cowie was seen in charge of some natives in the Nicobar Islands. Can it be that she is one of these unfortunates enduring that miserable existence? We are happy to say that conjectures do not point to such a conclusion, for dates are rather obscure on the matter, and indeed we hope so, for death would be preferable to being left to the tender mercies of the Nicobarians. January, 1855, the British ship *Arrogant*, of London, 550 tons, was cast away on the north end of Trincut. What has become of the crew of this vessel? Have they also been made victims of by these savages? That, too, is a question which it behoves our Goverment to elucidate, somehow or other.

A most pertinent question to all this is how is it that we have allowed these people, who are so to speak, quite our neighbours, to carry on their nefarious trade so long? Surely now that the whole affair has been brought to light steps will be taken to remedy it, if not adieu to our prestige in this part of the Archipelago. From the months of March to October the S.W. monsoon blows in the Bay of Bengal and from October to April the N.E. monsoon prevails. The months of April and October are variable. A ship in the S.W. monsoon leaving any of the North-Eastern ports of the bay and bound for the Madras coast or Bombay will have to run down the East side of the Nicobar Islands, thence to the South; but if in the early part of the monsoon, say April, she would take the Sombrero Channel between Nangcowry and Little Nicobar. We would therefore remark that vessels taking this route, which is a usual one in the season we mention, might find themselves in this very nest of pirates with which we are now too well acquainted. Ships sailing from such ports and never again heard of might have their loss easily accounted for by falling into the hands of such scoundrels. The harbour between Nangcowry and Camorta is perhaps one of the finest harbours in the world. It is completely landlocked, and with deep water at its entrances. There is room for a large fleet of first-class vessels, and it is a wonder that such a valuable harbour has been so long neglected. We hope that now, as the *Wasp* has recently been there and reported upon the advantages of such a harbour, it will no longer be left in the hands of savages.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BOWRING—On the 9th August, at Larkbeare, Exeter, the wife of John C. Bowring, Esq., of a son.
COLLINS—On the 28th June, at Hong Kong, the wife of Mr. Charles Collins, of a son.
CRAWFORD—On the 26th June, at Hong Kong, Mrs. D. R. Crawford, of a daughter.

MARRIAGE.

WOOD—BENTON.—On the 7th August, at the parish church of Wakefield, Yorkshire, by the Rev. C. E. Camidge, M.A., Joseph Leach Wood, of Barnsbury, London, and late of Foochow, China, to Eleanor, youngest daughter of the late Joseph Benton Horbury, near Wakefield, Yorks. No cards.

DEATHS.

BURDETT—On the 19th June, at Shanghai, Edward Burdett, aged 35 years.
PATON—On the 19th June, at Shanghai, David Paton, aged 31 years.
WOOLLEY—On the 17th June, at Shanghai, John Woolley, aged 30 years, major in the Imperial service, for some time in charge of the Ordnance Department at Nanking

COMMERCIAL REPORT.

CHINA IMPORTS.

HONG KONG.—A considerable improvement has at length taken place in the market for Grey Cotton Goods and the Chinese have been buyers to a large extent. This is probably owing to the very small stocks on hand, of which the dealers seem only now to have become suddenly aware. Sales of Yarn have been on a large scale, particularly in the first part of the fortnight. In the last few days the market has been quieter, but it closes steady, and no change can be made in quotations. Grey Shirtings have been in great demand, and have been sold to the extent of about 82,000 pieces, the largest settlements of these goods which have been made in one fortnight for upwards of eighteen months. An advance in prices of about 10 cents all round has been established, and the market closes very firm, with a steady demand. There have been a few sales to foreigners on speculation. T-cloths have again advanced about 10 to 15 cents per piece, and there have been large sales both of goods on the spot and to arrive. White Shirtings have shared in the general improvement only to a very small extent; rates are slightly firmer. Fancy Cottons remain completely neglected, and prices tend downwards. Woollens: Spanish Stripes, Long

Digitized by Google

Ells, and Lastings show a slight improvement in price, a slight demand having arisen for these goods; Long Ells continue very scarce. Metals: Lead continues firm, as a Canton demand still continues; other metals remain much as before reported. Coals continue firm; a cargo of 1,100 tons Bristol Channel Coal has been sold at 16 dols. per ton ex ship.

SHANGHAI.—The market has somewhat improved; the arrival of the steamer from Tientsin having given an impetus to several articles—any improvement in that market acts favourably on prices here. Grey Shirtings are in fair demand, and holders not forcing sales, prices are steady at quotations; best Eagles 8 lbs. 4 oz. tls. 2.60. T-Cloths: A little lower for inferior makes, but best goods still wanted; of these there there are but few. White Shirtings are quite neglected; Drills in better inquiry and prices rather firmer. Woollens: Long Ells have been placed to a fair extent at tls. 7.25 for H.H. assorted, and 7.20 for C.P.H.; Scarlet do not maintain their value of a fortnight since. Camlets: A few sales of favourite colours are reported at fair prices, but ordinary assortments continue very dull of sale. Spanish Stripes: H.H. have been sold at 65 cents per yard; the demand is not active, and in other woollens there is no new feature. Metals: There is little change to note; buyers have fairly supplied themselves; stocks have not been increased, and prices remain about the same; Nail Rod, for best brands, tls. 2.50 to 2.55 per picul. Coals: Stocks have been increased by the vessels named as arrived from Sydney, and the cargo of the Lady Alice from Nagasaki. Quotations: Cardiff, from ships' side, tls. 15; N. Wales, tls. 14, nominal; English, tls. 14 to 15, nominal; Anthracite, tls. 13 to 13.50, nominal sales, to arrive, at tls. 13.25.

YOKOHAMA.—A decided improvement is noticeable in Grey Shirtings and Cotton Yarn, and a good business, both on the spot and to arrive, has been done in both staples at a slight advance on our last quotations. Stocks of Yarn are very light. We have to notice a contract just concluded for 150 bales, to be delivered in six weeks, at the following rates:—16 to 24s $68, 28 to 32s $70, and 38 to 42s $73. A fair inquiry has commenced for Chintzes and other light summer goods, and it is worth notice that, in consequence of rumours that the French contracts for Black Cloth will be annulled, this article is again saleable, and a slight demand has sprung up. Most other Woollens continued quite inactive, a forced sale of Camlets SS at $15.50 being the only transaction calling for remark. In Metals, more business is doing; a demand existing for hoop and Nail Rod Iron and Lead, and some improvement in prices is apparent.

CHINA EXPORTS.

TEA.

YOKOHAMA.—The new season has been opened by the arrival of about 700 piculs of medium and good medium tea, the bulk of which was bought to complete the cargo of the Benefactress for New York, at an unnecessarily high figure: say from 27.50 to 30 dollars. The quality of this first sample is not satisfactory, but considerable arrivals are now daily expected, when we shall have fair opportunities of judging of the character of the new crop. The remaining stock of last season's tea is about 2,000 piculs, and quite unsaleable. We give no quotations, therefore, for any but the kinds at which, as we have stated, business has been done.

SHANGHAI.—Black.—A small inquiry has sprung up during the past few days for the new Ningchows and Hohows, and as much as Tls. 34.0.0 has been paid for a chop of each kind. Settlements have been light, but a very large amount of reshipments have taken place. The rates paid for the finest Teas are about equivalent to those ruling at the opening of last season, but fair and medium are obtainable at somewhat easier prices. Settlements for the fortnight, 3,700 chests; reshipments on owners' account, 68,400 chests; stock, 46 chops, or 26,500 chests, 72,100 chests. Quotations.—Hohow, fine to finest, 32½ to 34 tls. per pcl.; Oonam, common, 23 to 23½ tls. per pcl.; Ningchow, fair to finest, 29 to 34 tls. per pcl.; Oopack, 29 tls. per pcl. Green.—Only two chops of common Tea have been settled during the fortnight at Tls. 23.5.0, and the season is nearly closed. Settlements for the fortnight, 415 half-chests; stock, 9 chops, or 5,000 half-chests.

HANKOW.—The business of the fortnight has been exceptionally large, and shipments continue on an enormous scale. Two settlements of finest Teas have been made at full rates, while medium to fine have advanced in value nearly Tls. 2.0.0. At the same time sales have been somewhat irregular. Quotations were—Oopacks and Con-sou-kais, medium to good, Tls. 24.0.0 to 29.5.0; finest, Tls. 30.0.0 to 31.5.0 Oonams, fair to fine, Tls. 19.0.0 to 24.5.0. Export of Tea from 1st January to 15th June, 1867, 11,591,467 lbs.; export of Tea from 1st January to 15th June, 1866, 7,414,926 lbs.; increase, 1867, 4,176,541 lbs.; stocks, 29,000 chests.

KIUKIANG.—Black Teas: About 25,000 packages are to hand. With the exception of the purchase of two small chops at tls. 26.0.0 nothing was done on the market till the 11th, when six full chops of finest Ningchows found buyers at tls. 25.5.0 to 28.0.0 per picul, and since that date little has been doing. Quotations were:—Ningchows: Finest, tls. 25,0.0 to 28.0.0. Export from 1st January to 15th June, 1867, 15,097 packages; export for the same months of 1866, 17,106 packages; stock, 30 chops; decrease 1867, 2,009 packages. Green Teas: Nothing has been done.

FOOCHOW.—Congou: The price for the finer descriptions has continued firmly supported during the past fortnight; the rates for the commoner grades, which were slightly easier after the departure of the last mail, have advanced to about the former scale, in consequence of the demand for Australia. Souchong: The teas, being generally of good quality, have been freely taken for shipment to the United Kingdom; a large proportion of this description is more or less "tarry." Oolongs: Full prices have been paid for these kinds, but rates are now slightly easier; the demand for America has not yet commenced. Scented Teas: Those at first offered were deficient in scent, the flowers being very backward; the teas have in many instances, however, commanded full prices; those now coming forward are better scented. The Taewan, bound for London, having a cargo of 789,500 lbs. of tea, struck on the banks outside the mouth of the river, and is likely to become a total wreck. Sales for the fortnight and prices are as follows:—Congou: Dust and broken leaf kinds, 5½ to 9 taels, short; ordinary common, 10 to 14 taels, short; good common, no sales; light flavoury, 19 to 24 taels, short; good flavoury to medium Kysow kinds, 25 to 32 taels, short; fine Kysow kinds, 32 to 40 taels, short; sales, 81,826 chests. Souchong: Common to medium, no sales; good to fine, 30 to 40 taels, short; sales, 11,976 chests. Oolongs: Common to good cargo, 20 to 28 taels, short; fine, 30 to 33 taels, short; sales, 22,300 half-chests. Flowery Pekoes: Common to medium, no sales; fine to finest, no sales. Scented Teas: Common to medium, 18 taels, short; fine to finest, 28 to 36 taels, short; sales, 15,656 boxes.

CANTON.—Country Congous: Three chops have been taken at from Tls. 17 to 18, leaving a stock of 5½ chops or 3,764 pkgs. Although musters of a few chops of the new crop have arrived, it would be premature as yet to express any opinion concerning them. Country Greens remain unnoticed. Canton-made Teas: Considerable settlements have taken place both in Scented Orange Pekoes and Scented Capers; prices have been somewhat irregular, but as a rule they are tending upwards. Canton Congou of new make has received rather more than usual attention, and Gunpowders have been inquired for to a moderate extent. Quotations are as follows:—Country Congou, Tls. 17 to 18; Canton Congou (new make), Tls. 24 to 27; Young Hyson, Tls. 22; Scented Orange Pekoe, 23 to 32; Scented Caper, 13.5 to 29; Gunpowder, 20 to 27.

SILK.

YOKOHAMA.—Business has, of course, been on a very small scale during the fortnight. The exhaustion of our stock is sufficient to account for this, even with the general suspension of home orders, consequent on the fear of war and uncertainty regarding the new European crop. We estimate settlements, consequently, at only 125 piculs, which have been bought, generally, at a slight reduction on our last quotations. Stocks do not exceed 250 piculs, chiefly of mixed, low kinds. Reports from all the districts within reach are most favourable regarding the crop of 1867-8, which, it is generally expected, will show a marked increase over that of the season now closing. The weather has been all that could be wished, both for the worm and its food.

SHANGHAI.—During the past fortnight considerable transactions have taken place at higher rates, and the settlements are estimated at fully 4,000 bales: making a total of 5,700 bales since the 1st June. The demand has been chiefly for chops and good silks, and lower grades could have been bought at comparatively cheaper rates. The late arrivals fully confirm former fears regarding the coarseness of the new silk, the parcels to hand being chiefly very full in size, and owing to the hurried manner in which the silk has been packed to meet the increased demand at this port many of the settlements are much mixed in size and quality. Thus far the reports of the second crop from all districts are satisfactory, and the Chinamen are unanimous in asserting their belief that we shall have fully 45,000 to 50,000 bales of China silk available for export. Arrivals having come forward freely, the unsold stock has increased to 4,000 bales, and about 9,000 bales are known to be close at hand. From Ningpo 300 to 400 bales have been received.

CANTON.—After the arrival of the English mail with rumours that the total yield of the Continental crop would be much smaller than that of last year a good demand for fine silk sprung up. In the absence of stock, buyers in their eagerness only succeeded in forcing up the rates without obtaining any cargo. In the producing districts it seems that native speculators have bought up nearly the whole second crop, which they are now keeping back. Tsatlee reels are very scarce. Quotations are as follows:—Loongkong, No. 1, 560 dols. to 565 dols.; Loongkong, No. 2, 545 dols. to 550 dols.; Kowkong, 500 dols. to 510 dols.; Rereeled Cumchuck, 595 dols. to 600 dols.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—None.

At HONG KONG.—From Newcastle, June 16, Helen; 23, Princess, from Cardiff; 27, Stuart Wortley, from Clyde (via Singapore); 21, Taiwang (steamer).

At MANILA.—None.

At SINGAPORE.—From Liverpool, July 6, Condor; 30, from Cardiff, Koffyboom; from Newport, July 2, Heros; from Newcastle, June 30, Cornelie David; 29, Marion.

At PENANG.—From Glasgow, July 2, Huntley Castle.

DEPARTURES.

From YOKOHAMA.—None.

From HANKOW.—For London, June 17, Challenger; 19, Ada.

From SHANGHAI.—For London, June 18, Gossamer; 21, Whinfell.

From FOOCHOW.—For London, June 9, Flying Spur; 10, Black Prince; 12, Yangtsze; 12, Ariel; 18, Golden Spur; 20, Taiwan (since reported as lost in the river).

From HONG KONG and CANTON.—For London, June 27, Ajax (str.); for Hamburg, 14, Peru (from Macao).

From MANILA.—For London, June 13, Monarch; for Liverpool, 11, Hamilla Mitchell; for Cork, 13, Cosmos (via Cebu); 18, Lodore; for New York, 13, Daniel Marcy; 13, Wild Rover; for Boston, 21, Pocahontas.

From SINGAPORE.—For London, June 22, Thusnelda; July 4, Jeanne Meyer, Ajax (str.).

From PENANG.—For London, June 14, Ceylon; 22, Zambeze; July 6, Ajax (str.), for Falmouth, f. o. 12 June, Dr. Peterman.

VESSELS LOADING.

At YOKOHAMA.—For London, none; for New York, Havelock, Benefactress.

At SHANGHAI.—For London, Isles of the South, Elmstone, Silver Eagle, Coulnakyle, Peter Denny, Caller Ou, Anglo-Saxon, Agamemnon (str.), Coranjah, Sovereign of India, Mary Whitridge, Star of China, Lennox Castle, Hoang Ho, Jubilee, Maiden Queen. For New York, none.

At FOOCHOW.—For London, Chusan, Belle of Southesk, Shunlee (full), Armadine, Argonaut, Thomas Bell, Morning Star; for Liverpool, Everest.

At HONG KONG and CANTON.—For London, Atma, Niphon, Passe Partout, Wemyss Castle; for Hamburg, Albatross, Maria Lucia.

At MACAO.—For Havana, Cataluna.

At Manila.—For London, Lady Agnes Duff; for Cadiz, Elena.
At Singapore.—For London, Admiral de Winter, Lanercost; for Liverpool and Glasgow, Edinburgh Castle (full); for Falmouth, (Fr. o.) Antelope; for Boston, Catherine.
At Penang.—For London, Zingra; for Boston, Borneo.

FREIGHTS AND CHARTERS.

At Yokohama.—To London, cotton and tea, £3 to £3 10s. per ton; to New York, £2 10s. to £3.
At Shanghai.—Rates for home have declined to £3 to £3 10s. per ton; tonnage in harbour abundant. There is but little offering in coast freights.
At Foochow.—To London, £3 10s. per ton.
At Hong Kong and Canton.—Tonnage is somewhat scarce both for home and coasting voyages, and all available vessels have been taken up. Rates, though firm, remain at £3 per ton. The circular of George Holmes gives the number of disengaged vessels in harbour (exclusive of Siamese) at 17, representing 9,293 tons.
At Manila.—Tonnage continues very scarce, and no disengaged vessels in port. The settlements during the fortnight have been the Cosmos to load a full cargo of unclayed sugar at Cebu for Cork or Falmouth for orders, to discharge in the United Kingdom, at £3. 12s. 6d. per 20 cwt. net weight delivered, or £4. 2s. 6d. if discharged on the Continent; the Lady Agnes Duff proceeds to London, obtaining £3. 7s. 6d. per ton for dry sugar, and £3. 10s. per ton for hemp; the Sir Harry Parkes gets £3. 10s. per ton for 300 tons sugar, and £5 per ton for about 600 tons hemp, calling at Pernambuco for orders, to discharge in New York or Boston, or any port in the United Kingdom.
At Singapore.—Rates have further advanced; vessels on the berth for London are loading at £3. 10s. per ton, for some articles of light freight £3. 15s. is asked. Tonnage scarce, and it is possible a further advance may take place.
At Penang.—The Zingra, 485 tons, has taken the berth for London, and gets £3. 15s. for tin and hides, £3. 10s. for sugar and light freight; £4 per ton for measurement, and 4d. per gallon for rum. The Huntley Castle offers to load for London at £3. 10s. dead weight, £3. 5s. light freight, and £3. 15s. for measurement.

VESSELS PASSED STRAITS OF SUNDA.

Date.	Ship.	From.	To.

SHIPS' REPORTS.

HONG HONG.

The P.M.S.S. Co.'s steamer Costo Rica reports having left New York April 1st, and arrived in St. Vincent on the 15th. Left again 21st after coaling, and proceeded to Capetown, arriving there May 11th. On the 15th proceeded for Mauritius, where she arrived on the 27th, and after staying only seven hours left again same date. On the 11th inst. she arrived at Singapore, where she remained until the 18th, having experienced fine weather during the entire passage.

The British steamer Taiwan, from Aberdeen *via* Singapore, reports that on June 11 she spoke the barque Emilie, from Singapore, bound to Amoy; same day when about N.E. of Singapore, saw the John Bright steering to northward and eastward. On June 14, off Cape Paddang, saw a full rigged clipper ship flying British colours and No. 9,248 third distinguishing pendant. Two hours afterwards saw a similar full rigged clipper ship, English ensign and No, 9,812, the pendant not distinguishable, being entangled with the upper flag of the signal, which was either 9 or 0; she had double topsail yards on all three masts, and both ships looked like Steele's build. June 15, 10 A.M., exchanged signals with the British ship Min, from Macao, bound to London, in lat. 14.30 North longitude 109.30 E. On the afternoon of the 17th the barometer began to fall rapidly with a northerly wind. Ran into Sampan harbour in the island of Hainan and anchored; wind veering to N.E. with heavy gusts. 18th. Tremendous gale from E.N.E.; veered cable to 60 fathoms on both anchors; midnight, heavy gale from E.S.E., with much rain; barometer, 29.19. At noon on 19th wind S. and barometer rising; weighed anchor and proceeded to Hong Kong.

The British ship Chanticleer, from Saigon June 2nd, reports having experienced light southerly winds and fine weather during the passage. On the 5th at daybreak, when off Collao Ray, a long and low piratical craft very heavily rigged, carrying a studding sail of European canvas and stink pots at the mast head, came out from under the land, and at 9 A.M. bore up in the wake and gave chase; she was about three miles distant at the time, and the wind was light. She kept in chase all day until nine o'clock in the evening, by which time she had come up to within three quarters of a mile distant, when the breeze fortunately freshened and the vessel began to crawl away from the pirate, who at once hauled his wind, firing two guns, and ran in for the land again. On the 8th at noon, in lat. 19.50 N., long. 112.25 E., passed H.M.S. Urgent.

COMMERCIAL POSTSCRIPT.

Arrivals not in the Tables.—August 6, off Dungeness, from Java, Regina Maris, Sirius; at Palais, B.I., from Saigon, Ines; 8, at Falmouth, from Akyab, Coquetdale; 6, at Gironde, from Saigon, Palais Gallien; 8, at Deal, from Singapore, John Cobbold; 7, at Texel, from Batavia, Electra, from Tjilatjap; Edouard and Marie; at Cuxhaven, from Hong Kong, Picciola; 8, at Texel, from Banjoewangie, Calumet; July 27, at Boston, from Manila, Cyclone.

Departures.—Aug. 6, from Sunderland, for Galle, T. B. Ord, for Batavia, Francina Wilhelmine; from Liverpool, for Hong Kong, Coringa; 9, from London, for Singapore, Arab Steed; 7, from Newport, for Hong Kong, Glenlee; from the Clyde, for Colombo, Christian Rankin; 8, from Sunderland, for Galle, Elliotts; 5, from Nieuwe Diep, for Batavia, Australie; 12, from London, for Galle and Cochin, Anne Lucey; 7, from Shields, for Galle, Annie Comrie; 8, for Penang, Alice, for Hong Kong, Queen of the Ocean; 10, from Liverpool, for Shanghai, Lorton.

Laid On.—At London, for Singapore and Penang, Anne Dymes, James Paton; at Liverpool, for Manila, Jesus; at Glasgow for Singapore, Roslin Castle.

Spoken.—Englishman, Liverpool to Hong Kong, June 30, 10 N., 36 W.; Maria, Batavia to Middleburg, July 18, 37 N., 38 W.; Yang-tsze, Foochow to London, June 19, 16 N., 114 E.; Bourse d'Anvers, Cardiff to Hong Kong, June 22, 19 S., 32 W.; Augusta, Amsterdam to Batavia, July 3, 12 N., 26 W.; Cameo, Shields to Ceylon, July 3, 12 N., 26 W.; Emma Arvigne, Macao to Havana, May 13, 29 S., 41 E.; Eliza Laing, Colombo to London, May 21, 33 S., 32 E.; Ernonting (?), Colombo to London, July 13, 33 N., 43 W. Nazarene, Milford to Shanghai, July 6, 12 N., 26 W.; Glenheten, Shields to Shanghai, 36 days out, July 5, 9 N., 25 W.; Palma, Cardiff to Hong Kong, July 26, 50 N., 7 W.; Stad Leyden, Batavia, to Rotterdam, July 10, 27 S., 8 E.; Ocean Rover, for Galle, Aug. 10, 49 N., 6 W.; Sea Witch, Batavia to New York, June 16, 30 S., 35 E.

Casualties.—The Pieter Adolf, Jaski, which arrived at Batavia from London, May 26, had sustained damage in her cargo, having been struck by seas, when much water got into the cabin, &c. The Kinderdyk, Verdoes, which arrived at Batavia from Cardiff, May 26, had encountered heavy gales off the Cape of Good Hope, in which she lost her starboard bulwark, steering wheel, &c., and had two men seriously injured. The Tweelingen, Brugus, which arrived at Batavia from Cardiff, May 26, had lost spars, bulwarks, &c., and would have to proceed to Onrust to repair.

Miscellaneous.—The Neckar, Heidon, which sailed from London on the 4th inst., was not bound for Batavia as reported. The Admiralty have accepted the Hesperia for conveyance of stores to Colombo. At St. Helena, June 29, Elsabea, Kohn, from Nagasaki, and sailed 30 for New York; Tjilingsie, Ouwerhand, from Batavia, and sailed for Amsterdam; 30, Lady Bird, Mantle, from Colombo, and sailed July 4 for London; July 1, Hermine Marie Elizabeth, Dyker, from Tjilatjap, and sailed 2 for Amsterdam; 3, Jose and Maria, Ron, from Manila, and sailed 5 for Havana; 7, Dresden, Caulfield, from Singapore, and sailed 8 for Boston; 8, Ariosto, Penny, from Macao, and sailed 9 for Havana; 10, Anna, Bok, from Samarang, and sailed for Rotterdam; Cervantes, Aguirre, from Macao, for Havana; 12, Silver Cloud, Atkinson, from Colombo, and sailed 13 for London; 13, John Stanton, jun., White, from Singapore; 15, Vanguard, Scott, from Shanghai, and sailed for London; Johanna Hendrika, Lleeuwen, from Sourabaya, and sailed for Amsterdam; Silesia, Ewing, from Manila; Hugh Fortescue, Perriam, from Canton: Empress, Stranach, from Colombo.

At Simon's Bay, July 2, Island Queen, sailed for Shanghai.

The Admiralty have invited tenders for the conveyance of 12 tons, measurement, stores from the Thames to Hong Kong.

Portions of the cargo of the Mathilde, Decker, from Penang to London, which put in at Helena 23 June, leaky, and a large portion of the cargo of the Galilei (Dutch ship), from Banjoewangie to Amsterdam, which was at Algoa Bay, discharging on the 22nd June, on account of damage by striking on her anchor, have been landed in a damaged state and sold.

The Gunboats in China.—Our latest advices from China (says the *Army and Navy Gazette*) represent the gunboats as being in excellent order, and in the highest state of discipline. Their commanders were looking forward with anxiety for the arrival of the new Commander-in-Chief, Vice-Admiral the Hon. Sir H. Keppel, as they were in hopes that he would be provided with an organised plan for putting down piracy, which would not only give them and their crews a certain amount of prize-money, but, what they more valued for themselves, chances of promotion. The duties on the China station are responsible, and very frequently irksome. The distance from home is great. The climate is admittedly most injurious to European constitutions, and there seems always a fatality attending an officer when he has once been there; he is generally selected to go out again. The Lords of the Admiralty might, just by way of encouragement, grant a commander's commission annually to the officer who has most distinguished himself during the year. In the squadron some of the lieutenants can boast of ten, and even twelve years' seniority. Verily, patience is very much exercised in China.

Coolies at New Orleans.—In connection (says the *New York Times*) with the reported arrival of coolies at New Orleans, brought hither to be used as labourers on the Mississippi sugar plantations, it may be interesting to know that Ah Yuk, a Commissioner from the Chinese Government, has concluded contracts with a number of Lousiana, Alabama, and Texas planters to bring 5,000 more Celestials to this country for their use, and that they will arrive within a few months. Ah Yuk intends to bring them here himself, and will remain in New Orleans for a few months after their arrival to insure the fulfilment of the requirements of the contract, among which is an agreement that in case of the death of any of the labourers their remains shall be returned to China at the expense of the employers. The planters expect to profit greatly by the introduction of this class of labour, to supply the places of the women and children of the freedmen, who are now supported by their husbands and fathers, and attending schools, instead of working as field hands as they did when slaves.

The iron screw steam storeship *Hesper*, 2 Staff-Commander James G. H. Thain, from China, arrived at St. Helena July 4, and sailed on the 5th for England.

The London & China Telegraph.

LONDON, TUESDAY, AUG. 13, 1867.

THE RIVAL TELEGRAPHS TO INDIA.

In a late issue we noticed three new plans for establishing a more satisfactory system of telegraphic communication with India and the East. These comprised, firstly, the Anglo-Indian Company, which proposes to construct an independent line by way of Susa, Modica, Malta, and Egypt; secondly, the India, China, and Colonial Company, which prefers a complete chain of submarine cables, starting from Falmouth, *via* Gibraltar and Egypt; and thirdly, a plan for an entirely new route through Prussia and Russia. The details of the last-mentioned undertaking were at that time incomplete, but a tolerably full account of the plan having recently been made public, we are now in a better position to compare the respective merits of the rival schemes. The name of the last new company is not yet announced; we understand however, that a direction has been established both in London and Berlin. It is proposed, in the first place, to lay a cable across the Channel, connecting the English and Prussian coasts, and to connect this with the Black Sea by a land line through Prussia and Russia. The Black Sea would be crossed by a new submarine cable 280 miles in length, from the Crimea to the Circassian shore, whence another land line would complete the connection with the existing Persian Gulf line to Kurrachee and Bombay.

Each scheme of course has its special merits, nor must we expect to find either of them entirely free from defects. The Anglo-Indian line will probably be the first in operation, and being carried by a short and direct route, and worked throughout by an English staff, there seems no reason to doubt that the anticipations of the company—that they will be able to transmit messages between London and Bombay in six hours—will be fulfilled. The arrangement by which a second route to Alexandria is secured is especially valuable as a provision against the oft-recurring interruptions to which cables in the Mediterranean are liable; and the advantageous contract made with the Telegraph Construction and Maintenance Company is a sufficient guarantee for permanent efficiency. The only weak point we can find in the prospectus of this company is, strange to say, contained in its very first line: "The object of this company "is to establish, *under one control and management in London*, a "direct and thoroughly effective line of telegraph *via* Egypt and "Aden, to India, with extensions hereafter to Singapore, China, "Japan, and Australia." Of the advantages likely to accrue from an undivided *management* in London there can be no doubt; but the *control*, we fear, at least of the Continental portion, would rapidly pass out of the hands of the London board of directors in the event of a general European war breaking out—and we see no indications of the immediate arrival of the Millennium. But we cannot have everything. This objection entirely disappears in the scheme of the India, China, and Colonial Company, for, as we have already seen, its chief feature is the almost entire abolition of land lines, and the wires will nowhere touch foreign soil except in the transit across Egypt. Politically, therefore, this route would seem to possess decided advantages over any of its competitors; but submarine cables are expensive to lay down, and still more so to keep in repair, especially in the Mediterranean and the Red Sea. As regards original cost of construction the overhead line through Prussia and Russia would probably be cheapest of all; but this recommendation by no means extends to its subsequent maintenance, for in Russia the land lines constantly require repair in consequence of ice collecting on the wires and breaking them down. This liability to interruption has other than mere pecuniary disadvantages. Our last advices from China state that Grant's telegraphic service *via* Kiachta, which has lately proved so useful during the summer months, had been temporarily interrupted by a breakdown of the Russian lines from this cause. And with the still unsettled "Eastern question" staring us in the face, it is impossible to forget that a war with Russia would close this route at once. Still, there is no reason why all three should not be carried out. In a mercantile point of view all will be useful; competition will ensure careful management and a moderate traffic; and political considerations render a choice of routes always valuable.

THE POSTAL SERVICE.

All apprehensions concerning the probability of our overland mails falling into the hands of the French company have been set at rest by a distinct disavowal of the Duke of Montrose of any such intention on the part of Her Majesty's Government. So far, so good; but the Postmaster-General goes further than this, and takes upon himself to declare that no such idea ever has been entertained, an assertion which is strangely inconsistent with facts. In his statement to the House of Lords on the 9th instant the noble Duke said:—

A very curious idea has got into the public mind on the subject, namely, that in following out the recommendations of the committee we intended to give up the control of the postal communication with India, and throw it into the hands of foreign Governments. This is almost entirely a mistake. *Such an idea never entered into my mind or into that of any other member of the Government;* and the only ground for it could be that in giving notice for tenders we did not put into them that we would not contract with any foreign Government.

Now compare this with the following report of a question and answer on the same subject in the House of Commons on the 3rd of June last:—

Mr. Childers asked the Secretary of the Treasury whether any overtures had been made to the French Post-office with a view to render the French mail service to India and China more available for the purposes of this country under the new system of postal communications, as recommended by the committee of last session?

Mr. Hunt replied that forms of tender had been sent out, *and it was hoped that the Messageries Imperiales might be induced to make an offer*.

The Postmaster-General says that the idea of allowing a foreign company to compete "never entered his mind, or that of any other member of the Government;" the Secretary to the Treasury says that forms of tender have been sent to the French company, and "he hopes they will be induced to make an offer." Mr. Crawford, the champion of common sense against official stupidity, has written a letter to *The Times*, pointing out how absurdly the two departments are at variance; but comment on so glaring a discrepancy is almost needless. Really, my lords and gentlemen, you should endeavour to be a little more consistent!

THE FAILURE OF MESSRS. LYALL, STILL AND CO.

Our last issue contained a report of the examination of Messrs. C. F. Still and George Maclean, two of the partners in the firm of Messrs. Lyall, Still and Co., before the Court of Bankruptcy at Hong Kong. Our readers will have been astonished to find that no opposition was offered to their passing through the court. We must confess that we were struck with amazement at the following statements made in court on the bankrupts' affairs which, according to the report of the official assignee, stand briefly as $635,935 on the wrong, and only $2,000 on the right side.

The Chief Justice said this was a most satisfactory statement, and was what should be expected from the position and reputation of the firm here in Hong Kong. The accounts and statements appeared to have been drawn up with very great care and very much attention.

Mr. Whyte here observed that, as representing his three clients, Liebert, Mendel, and Henderson, he did not intend to ask any questions, or to oppose the bankrupts' discharge.

Mr. Pollard stated that so far as Messrs. Fussell and Co. were concerned, for whom he appeared, he had no questions to ask and no opposition to make. He appeared also for the Oriental Bank, who had a possible interest in the bankruptcy. A gentleman of the bank's staff had examined the books, and had found them so correct that no opposition was offered.

His Lordship, in doing so, remarked that, from what he had seen, he thought nothing had entered the case which could be said to go beyond the common state of things present in any bankruptcy. It was satisfactory that the books told the whole tale, as that was the first merit in any bankruptcy, and both bankrupts were entitled to that credit in this case. They would leave the court without the slightest imputation, except that certain want of prudence which characterised almost every one who traded

Digitized by Google

largely in China. There were, however, different interpretations of what constituted a want of prudence in the legal meaning of the term. That which in a place like London or Liverpool—[Mr. Pollard: Or Manchester (laughter).]—would be nothing extraordinary, would in a small town be looked on as an excess of speculation quite incompatible with fair business. The bankrupts had breathed a China air and formed China habits; they had played for high risks and lost; and he thought that those who had supplied them with the means of such extravagant speculation had the least cause to complain.

This expression of opinion in Hong Kong on the failure of the firm is so diametrically opposed to that current in London and Manchester that we have considered it our duty to examine into the case, and we regret that the result is very unfavourable to the bankrupts. It has been correctly described as "a very bad case," and how Judge SMALE could commit himself to such an expression of opinion—amounting really to panegyric on the conduct of the bankrupts—is a mystery. Surely his legal mind must have seen that there were most important irregularities in the matter of the assignment of goods per *Min*, as that case had been heard before the court, and in summing up his Lordship decidedly did so in favour of MENDEL and LIEBERT, the vendors of the goods, and against the right of the bankrupts to make over the property to the banks as security for overdue obligations. Here is what his Lordship is reported to have said :—

Did the parties who took the bills of lading take them with knowledge, or under circumstance in which reasonable men must have known that these men were insolvent, and that they ought not to have parted with goods at the time. First, as against Mr. Kaiser, this point presents itself. I repeat it because I think it important, that he resorted to a threat of a kind which was not excusable even if he then knew the firm was insolvent. I leave it to you as men of business to consider under the circumstances, must the man using so unjustifiable a threat be taken not to have known that the firm was insolvent.

Really, one cannot help inferring, in the face of such apparent obfuscation, that his Lordship had himself very largely absorbed the China air and "China habits" to which he attributed the bankrupts' disasters. The expressions on the 24th June are so totally at variance with those of the 6th, that no small amount of criticism has resulted. It is unusual, and rather too bad that any judge should go out of his way to animadvert on the discretion of the parties who had trusted the firm of LYALL, STILL, and Co., by stating that he "thought "that those who had supplied them with the means of such "extravagant speculation had the least cause to complain." Now this expression very emphatically partakes of the nature of adding insult to injury, and it is most inexplicable how his Lordship could commit such an indiscretion. At this stage we will enlighten him as to the manner in which the "means" were supplied by the Manchester houses. Mr. GEORGE LYALL and Mr. C. F. STILL, the two senior partners, then, being resident in London—and, according to report, living in mansions at Hyde-park in Oriental magnificence, and having good connexions, including Messrs. CHALMERS, GUTHRIE and Co., who acted as their financial agents—no difficulty was found in obtaining credits, and in the usual way negotiating with Manchester houses for the shipment of cotton and woollen goods. Messrs. LIEBERT, MENDEL, and HENDERSON informed them that for some years, owing to heavy losses by failures in India and China, and the altered condition of the trade, they had been in the habit of conducting such business on certain conditions—that they did not part with goods unconditionally. The nature of their terms will be best understood by the following heading of an invoice :—

Invoice of 170 bales forwarded to Messrs. Killick, Martin, and Co., London, for shipment per *Ariel*, and consigned to Messrs. Lyall, Still, and Co., Hong Kong, for realisation, proceeds to be remitted specially to meet Messrs. Geo. Lyall and C. F. Still's acceptances against the shipment.

The terms were assented to by Messrs. LYALL and STILL, and subsequently by the firm at Hong Kong conducted by Mr. MACLEAN. This gentleman wrote to one of the Manchester houses under date the 14th December, 1866, as follows :—

We have the pleasure to acknowledge your favour of 24th Oct., in which you refer especially to the arrangement entered into between your good selves and Messrs. George Lyall and C. F. Still for the remittance from this side of cost of four shipments of goods purchased on our account. These arrangements we have now to say will be carefully attended to by us, and remittances will be made in the form appended to your letter. Copies of our letters advising remittances to our friends will be sent to you regularly."

Notwithstanding this letter it appears that Mr. MACLEAN handed over to certain banks shipping documents of the goods that were afloat on that very day, and even previous to that date—viz., on the 30th Nov.; and on the 22nd Dec. they made an assignment to the banks of all, or nearly all, the property they possessed, although they were to all intents and purposes insolvents. This act was certainly one of the grossest injustice to the bulk of the creditors. That Mr. MACLEAN knew that the firm was insolvent appears clear by a letter in the hands of the official assignee. The letter is dated 27th December, and addressed to Mr. Lyall, and runs as follows :—

"As I told you in my last, I had a long chat with Pounceforte, the Attorney-General, and his great idea was that Kayser and Kaye should be kept quiet here, so as to give every chance at home, as so much depended upon that. Pollard, who was consulted two or three days after the mail left, by the two above-mentioned bankers, came to me to talk the matter over in a friendly way and see what could be arranged, so that these two banks might say they had made satisfactory arrangements with Lyall, Still, and Co. Pounceforte and Pollard eventually came to the conclusion that the best thing that could be done would be to give these two banks a lien on such property as I could muster up. The two lawyers both considered that Kayser and Kaye were first entitled, the one legally the other morally, to be satisfied, even at the expense of other creditors, hereafter; and if things came to the worst, and if the document which I have signed is proved to be illegal by the other creditors, as to all intents and purposes we were insolvent at the time, then Kayser and Kaye have no advantage, and would not retain their lien. Kayser is supposed to hold his as security for acceptance of the drafts by Chalmers, Guthrie, and Co., I having been unable to give documents, and Kaye for balance of account, in both cases hard cash having been paid, one in consideration of my promising to do something which afterwards I was unable to carry out."

Now we know that it is customary with banks to "grab all" in a case of this sort, but it is also customary for them to disgorge without demur such portion as can be shown to be held by the assignors in trust. It is idle to pretend that Messrs. KAYE and KAYSER did not know that LYALL, STILL and Co. held the documents covering the goods of MENDEL, LEIBERT and HENDERSON then afloat under certain special agreements as to the proceeds, although this is a point for the consciences of the bank managers and Mr. MACLEAN; but we condemn their conduct in attempting to defend their claim when the facts of the case were known beyond doubt. By the verdict of the jury they have a triumph over the victims who trusted to the *honour* of the partners; but as announced in our last, it is the intention of Messrs. MENDEL and LIEBERT to appeal against the verdict to the Privy Council. The case of Messrs. HENDERSON has not yet been brought to trial, and this accounts for the counsel, Mr. WHYTE, stating at the examination of Messrs. STILL and MACLEAN that he had no opposition to offer. This statement created most profound astonishment in this country, when placed in juxtaposition with the statements current as to the flagrant wrong inflicted on the Manchester houses. It appears that on Mr. WHYTE rising to examine the bankrupts he was informed by the Judge that if he examined either of them "as to any of the debts due to "them by the bankrupts, he would consider it to be a proof of "those debts, and an election by him to proceed in bankruptcy "and so to waive any right to stop *in transitu* that was already "claimed, or to avail ourselves of the benefit of any lien or "legal remedies."

Mr. WHYTE was thus prevented from bringing to light the entire *modus operandi* by which the firm had been kept afloat up to the final crash. This is to be regretted, as the moral character of China firms has suffered an immense blow, and it is only just that such acts should be made an example of, and not glossed over in the manner they have been. It is nothing more than a burlesque that the bankrupts should be told that they leave the Court without the slightest imputation, and be positively complimented on the nice manner in which they kept their books! It is not necessary for us to detail all we have been informed on this subject; but if one tithe of the acts imputed to these gentlemen be true, we blush for the honour of the China trade.

WE understand that private telegrams have been received from Hong Kong, announcing that the affairs of Messrs. DENT and Co. have been thrown into bankruptcy. The "Union Insurance Society," hitherto managed exclusively by Messrs. DENT and Co., is in future to be placed on an independent basis. It is reported that at a recent meeting of shareholders the accounts submitted showed a large deficit; this, however, is in direct contradiction to a statement made some months since that the funds of the "Union" were intact, and its affairs in a satisfactory condition. We trust the latter version may prove the correct one, but on this and other matters connected with the failure of this firm we shall have more to say in our next issue.

THE high prices ruling of late for China raw silk have rendered the published calculations of cost per lb. laid down in London of little practical utility. The new tables issued by

Digitized by Google

Mr. Edward Holdsworth contain, in addition to *pro forma* invoices and account sales of silk shipped to London, the cost per lb. of China raw and waste silk laid down in London at 5s. 6d. to 7s. 5d. per tael exchange for raw, and 5s. to 7s. 6d. for waste. The cost per picul of raw silk is calculated in these tables at 200 to 800 taels, and of waste at 5 to 64 taels.

We notice that the *Taeping* was the first of the tea clippers to pass Anjer. She left Foochow on the 3rd June, and passed Anjer on the 27th. The *Maitland* sailed two, and the *Serica* four days before her.

The Civil Service.—Foreign-office.—Mr. H. B. Bristow has been appointed student interpreter in China or Japan. The Queen has been graciously pleased to appoint William Graham Sandford, Esq., now a Third Secretary, to be a Second Secretary in Her Majesty's Diplomatic Service.

Parliamentary Intelligence.

HOUSE OF LORDS.

POSTAL COMMUNICATIONS.

(Aug. 9th.) The Duke of Montrose: I beg to lay upon the table a postal convention between this country and the United States, under which the postage between the two countries would be reduced from one shilling to sixpence. We hope that, in addition to this reduction, we shall have a more frequent communication with America; and I have little doubt that in a short time we shall arrive at what, perhaps, we never could before have expected—a daily communication with the United States. By means of this convention we shall also be able to reduce very considerably the postage to Canada. The letters to Canada passing through the United States will be reduced from one shilling to eightpence. We shall also have an opportunity of facilitating the communication with the new colony of British Columbia. We shall be enabled to send letters there in a much shorter time than by the present route by the Isthmus of Panama, and at a very much reduced cost. I think your lordships will consider that these arrangements will be satisfactory to the country at large. I must say that the United States Government have acted with the greatest cordiality and with the greatest anxiety to facilitate all these communications. (Hear.) I am anxious to take this opportunity of making some remarks on the subject of our postal arrangements with India and China. After long consideration of the subject, a committee of your lordships' House recommended the Government to give notice for the termination of the existing contracts for the purpose of having fresh tenders and a more frequent communication with India. It was proposed that we should have a weekly mail to Bombay, and that a mail should proceed by railway from Bombay to Calcutta and Madras. We have followed out the recommendations of the committee. We have given notice to terminate the existing contracts, and advertised for tenders for future contracts to run mails from Marseilles to Alexandria, and from Alexandria to Bombay, China, and Australia. But a very curious idea has got into the public mind on the subject, and it has been alluded to in the other House of Parliament, and in many of the newspapers—namely, that in following out the recommendations of the committee we intended to give up the control of the postal communication with India, and to throw it entirely into the hands of foreign Governments. This is most entirely and gratuitously a mistake. Such an idea never entered into my mind, or into that of any other member of the Government; and the only ground for it could be that in giving notice for tenders we did not put into them that we would not contract with any foreign Government. From that people have taken the idea that we were to contract with the Messageries Imperiales, and give up the control of the communication by our own vessels. In the committee of the House of Commons it was suggested that we should avail ourselves of the Messageries Imperiales in several cases, and even that we should throw it into their hands if they offered a cheaper service than our own countrymen. That is wrong, but I do not say that we shall not under some circumstances avail ourselves of that company, and at present we send some letters on their way to China by their boats. But these are only supplementary arrangements associated with the boats under our own control. To throw everything into the hands of any foreign country would be extremely impolitic, even although in the first instance it might enable us to perform the service cheaper. As I have said, there has been an entire mistake, and the supposed arrangement, which, as I have said, was never entertained, was suggested by the very persons who now find fault with it. They said we should not keep up the contract with the Peninsular and Oriental Company, and that we should give them notice and throw it open; but now they find fault with the Government for doing what they recommended, saying that the Peninsular and Oriental Company have some very fine ships, and have done the work satisfactorily. I would not have troubled your lordships with this statement if there had not been such an entire misconception on the subject, of which it was desirable that the public should be disabused.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

About the new Minister of the Colonial Department a deep silence prevails now in the press, only the *Arnheinsche Courant* said that Mr. Hasselman accepted the portfolio with the condition that again an Indian ground-rent Bill should be brought in Parliament, whilst in this Bill should be stipulated that the right of possession should be granted to the natives. You will remember that the Second Chamber amended in this sense the last Bill, which led to a Ministerial crisis. The assertion may more or less be true, but I cannot warrant it. The same paper also told that the Minister of the War Department has the intention to augment the militia with 25,000 soldiers, so that the budget of war will be brought from 13 to 20 millions. This, however, was firmly denied by the Ministerial paper, which ascertained that the militia will only be increased with a few thousand men.

Much is said in our papers about the losses involved by the insurance societies during the last year, so that most of them are not able to pay a dividend, whilst some have lost a good part of their capital. It is of too much interest that I should not reproduce what is said about it in a small local paper, because it is worthy to be known generally that during the last year the "Javasche Zee en Brand Assurantie Maatschappy" lost its reserve fund and 50,000f. of its capital; the "Bataviasche Zee en Brand Assurantie Maatschappy" lost 50,000f. of its capital of 180,000f.; the "Koloniale Zee en Brand Assurantie Maatschappy" lost its reserve of 50,000f. and 66,000f. of its capital; the "Tweede Koloniale Zee en Brand Assurantie Maatschappy" (established last year) lost 61,000f.; and the "Oosterling" (established last year) 30,760f. of its capital. The very unsatisfactory result of the companies who are represented here is due to the fact that they accept too great risks and insure too large sums upon the several ships.

COMMERCIAL.

Coffee.—The market remains in a very good position, because there was more demand for consumption. For Malang coffee of the last sale of the Dutch Trading Company somewhat higher prices were paid; the white yellow, yellow, and brown sorts are very scarce. Of private imports 800 bags ordinary to good ordinary greenish, some brownish, and 800 bags good ordinary greenish, ex Kandeish, were sold at different prices. Imported were 3,144 piculs Java, ex Triton; 1,034 piculs, per Eva Johanna; and 2,612 piculs, ex Landbouw. The deliveries in June amounted to 45,314 b., against 27,101 in 1866, and 58,332 in 1865. From January 1 to July 31, 1867, 484,694 b., against 358,397 in 1866, and 470,830 b. in 1865. Stock, 474,660 bags, against 473,586 in 1866, and 482,413 in 1865; floating are for the Dutch Trading Co., 190,000 bags, and for private account, 41,200 b. Total stock in Holland (including all qualities), 525,500 b., against 530,100 in 1866. The Trading Company will offer on the 21st inst. 97,700 b. Java, Padang, and Menado coffee in public auction.

Sugar (Raw).—The 38,924 baskets Java which were sold by the Dutch Trading Company on the 24th ultimo realised full May prices for brown and yellow sorts, and f. ½ to ¼ under them for white quality. For export were taken 5,000 baskets, and the rest by home refiners. The result of the sale made a very good impression upon the demand, which has been very firm since. Of private imports 8,500 baskets were sold before and after the sale, of which 3,500 per Eva Johanna at full July prices to ¼f. higher. The unsold stock of Java at the Dutch Trading Company was on the 1st inst. 28,825 baskets, against 49,854 in 1866. Stock in first private hand 50,033 oaskets and 1,730 mats, as well here as in Amsterdam. Yesterday were sold 2,221 baskets Java at 29½f.; No. 11¾, damp and very damp, ex Triton.

Tea.—The market is unaltered; the quotation is for China Congou, 80c. to 175c.; and for Java do., 65c. to 75c., according to the quality.

Rice.—The market is very firm; of uncleaned, 1,896 b. Sourabaya, ex Maassluis were sold at Amsterdam at a little above 8f., and here, 2,500 b. Rangoon floating, per d'Elmina, at 7½f., and 1,000 b. at 7⅝f. Imported were 10,200 b. Rangoon per New Brunswick, and 9,800 Bassein per John Allen, 3,000 piculs per Landbouw, and 1,000 b. do. per Eva Johanna.

Spices.—Firm; Nutmegs No. 1, 96c.; No. 2, 86c. to 87c.; Mace D, 108c.; Cloves No. 2, 29c.; Java Cinnamon No. 3, 136c., but cannot be bought now under 140c.; the stock is very insignificant; of Pepper 745 b. Sumatra ex Aletta Augusta were sold at different prices. On the 28th inst. the Dutch Trading Company will offer in sale 550 casks Nutmegs, 560 casks Mace, 195 b. Cinnamon, and 1462 b. Pepper. The deliveries in July were as follows: 34 casks Nutmegs, 28 do. Mace, 10 b. Cloves, and 24 b. Cinnamon.

Tobacco.—Of Java the following imports took place: per Surat, 240 b. H and A Blitar; 225 b. do. do. Kedirie; 500 b. Kotta; 441 b. P and A; 214 b. G B; 290 b. A S Malang; 95 b. K P; 75 b. Tanak Nanjie; 219 b. P and A. For the Java Malang the prices were low, because the quality was very inferior; for the Djarit there was a good demand, and the prices paid very high. Stock in first hand 5,179 b., and at Amsterdam 7,022 b. The Rotterdam Stock will be offered for sale in this month.

Indigo.—For Java there was much demand, some lots good to fine were sold at higher prices; ordinary quality sells very difficult. The 450 chests imported per Kanagawa and Princess Amalia will soon be brought into the market.

Cotton.—With some demand for export; 300 b. were sold at 45c. for middling fair, Dhollerah at 46c. to 47c. for fair, and 49c. for good fair.

Manufactures.—The market is unaltered, and the quotation is for 6½ Madapollams and Calicots 5f. to f.5.10 each; No 28 Warps, 14¼d.; No 14, 13¼d.; No. 30, Cops, 13d.; No. 16 do., 12¼d.

Tin.—For Banca the market is quiet; the quotation is 53f. to 52¾f.; 100 slabs were sold at 53¼f.; and 800 slabs at 53f. Billiton is quoted 52¼f.

Rattans.—153,460 b. at auction by the Dutch Trading Company, on the 1st inst., were sold as follows:—

At Rotterdam:			At Amsterdam:		
Banjermassing	f.5.	to f.8.60	Banjermassing	f.7.50	to f.11.80
Padang	6.	to 12.70	Padang	11.80	to 14.90
Koetie	4.50	to 7.20	Koetie	5.50	to 8 80
Different sorts	7.	to 7.40	Different sorts	6.	to 10.

Miscellaneous.—Of Preserved Ginger 350 chests China will be offered for sale; the valuation is from 85c. to 90c. Camphor, firm, but quiet. Cassia Lignea, quiet. Cassia Vera: With some transactions at 35c. for ordinary quality. Cassia-oil: 4½f.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, August 7.

The endeavours of Mr. August Behn to emancipate the German and other Continental shipowners from the thraldom of the French *Bureau Veritas* by the establishment of a "Germanic Lloyd's"—of which I gave your readers some account a few months ago—have been crowned with the most

Digitized by Google

signal success, and the full concurrence of the shipowners and underwriters in Bremen and Lubeck, in the Baltic ports and in Denmark, Sweden, and Norway. The Association has declared itself "constituted," and is in full operation. The central seat is Hamburg, with branches at the principal ports. The following is a list of the directors:—August Behn, Shipowner, Hamburg, President; F. H. Bitter, Managing Director of the Hamburg Marine Assurance Company of 1866, Vice-President; A. Beel, Managing Director of the Marine Assurance Company of 1859 at Lubeck; F. Harkort, formerly Captain in the Army, Knight of the Iron Cross of Bravery, Hornbruck, near Dortmund; Franz Paetow, Shipowner, Rostock; Fr. Schuler, Shipbuilder, Stettin; and R. Werner, Captain in the Prussian Royal Navy, and Director of the Royal Dockyard at Danzig. The two last-named gentlemen form also the technical committee.

It is understood that the directors have placed themselves in communication with the French "Registre Maritime," the "Lloyd Austriaco" at Trieste, the "Associated Underwriters" at Copenhagen, and the "Norske (or Northern) Veritas" at Stockholm, and intend with their full concurrence to publish a Register of Shipping, the materials for which are now being collected, and the work will appear on the 1st of October next. The fees for surveys of vessel are fixed at very low rates, so that there will be no complaints on that score. Two dollars will be the charge for a simple survey, and the fees of watching the building and repairs of vessels less than half the amount authorised by the Bureau Veritas to be charged. The signs for the first-class will be A1 and A2, B for the second-class, C1 and Ck for the third (signifying long or short voyages). Ships to remain ten years in the first-class, but after four years must undergo a fresh survey. At Bremen and the other ports on the Weser the shipowners, underwriters, captains, and shipbuilders are all most favourably disposed to support the new institution to their utmost, and hopefully prognosticate that in less than ten years the "Bureau Veritas" will be talked of as a thing of the past and an historical fact.

Great fears are entertained here that the Prussian Government is seriously contemplating cutting the Gordian knot of the vexed question of the railway bridge over the Elbe between this city and Harburg—which has been in negotiation between Hamburg and the Government of Hanover for more than twenty years without finding a solution—by taking the matter in their own hands, and building it from Harburg to a point on the Holstein side of the river below Altona, thus circumventing Hamburg and entirely cutting us off from direct communication with the sea. So much is certain, that a Prussian railway engineer has been sent down to "study" the locality, and draw up a report with estimates. The line has already been surveyed and staked out, and as the execution of the works will be not only difficult, but must last five or six years, as the bottom to a great depth is all morass and soft mud, the estimated cost is twenty-five millions of dollars, or about £3,500,000, whilst the estimates for the two bridges across the two arms of the Elbe and the island of Wilhelmsburg from this city to Harburg, the plans and surveys for which have long since been prepared, were only ten millions of dollars. I need scarcely add that should the plan be really executed the commerce of Hamburg and Altona will be irreparably ruined, as it is not to be supposed that the arches of the new railway bridge will be either high enough or wide enough to admit the passage of large steamers and three-masted sailing vessels at all times of the tide, and in the night too, which would be a dangerous operation; nor could the navigation be carried on if obliged to depend on the arrival or departure of railway trains, and the consequent temporary opening of a swing bridge. It is a great question whether Prussia, though undoubtedly in the possession of both banks of the Elbe, would have the right, in an international point of view, of cutting off the communication with the sea for an independent State. Hamburg is now quite as much a seaport as London, but should the bridge be built where now projected, Hamburg will become as much an inland city as Dresden or Berlin. Our only hope is that Prussia will not be prepared to throw away five-and-twenty millions of dollars, when the object may be obtained without its costing her anything, for it might easily be made a condition in the concession about to be granted to the Cologne and Minden Railway Company, who are willing to undertake the construction of the so-called Paris and Hamburg direct railway, that they be bound to make the bridge from Harburg to Hamburg, the more so as the Hamburg Government has declared its readiness not only to bear five millions, or one-half of the estimated cost, but to give up without any remuneration the land required for the terminus and other parts of the works.

COMMERCIAL.

On the whole the produce markets have been quiet since last mail, and there is but little to report. Rice firm. Cassia Lignea continues in good demand, at 11½ sch. bco. Pepper is more in request, and among the transactions were 1,500 bags of Singapore, at 3 5-16ths sch. bco. The holders of Spelter will not listen to lower offers, and steadily adhere to their demands of 13⅞ marks banco, both for delivery and in loco. As no buyers can be found at that figure, there have been no transactions.

SHIPPING INTELLIGENCE.

ARRIVED.—Grossvater, from Java.

LOADING.—Pudel, for Singapore and Penang; Isabelita, Manila; Aldebaran and Energie, for Hong Kong; Saturnus, for Shanghai; Christine, for Nagasaki and Yokohama.

Monetary and Commercial.

The China Steam and Labuan Coal Company have received advices from their managing director at Labuan giving satisfactory accounts of the possibility of bringing the undertaking into remunerative working without additional outlay. The following circular, dated 9th August, has been issued by the liquidators of the company:—

Notice is hereby given, that a general meeting of the members of the company will be held at the London Tavern, Bishopsgate-street, in the city of London, on Thursday, the 15th day of August, 1867, at two o'clock in the afternoon, to receive and consider the reports of Mr. J. Spencer Price and the company's agents in the East; also a statement of accounts, and to pass such resolutions with reference to the affairs of the company as such meeting may think fit. J. D. H. ELPHINSTONE, JAS. B. GIBBONS, } Liquidators.

The *Pantheon* steamer from New Orleans brought 800,000 dollars, some of which have only fetched 4s. 11½d. per oz., showing a further decline of ⅛d. The demand for China has very much slackened within the last few days, and further arrivals of dollars are expected shortly.

The report of the Electric and International Telegraph Company, presented on the 7th inst., shows an available balance of £68,995, and recommends a dividend of 5 per cent. for the half-year, or at the rate of 10 per cent. per annum. The receipts have slightly exceeded those of the corresponding period of last year, but have not shown the usual ratio of increase, owing, it is presumed, to the general inactivity of business and total absence of speculation. A sum of £10,000 is to be carried to the trust fund, which will then stand at £105,174, and a balance of £4,626 will remain to be carried forward. With regard to the agitation in favour of the taking over of the telegraph system by the State, the directors have never been able to elicit any information as to the intentions of the Government. They hope by the date of their next report the uncertainty may be removed, since it tends to paralyse arrangements that might otherwise be made for an extension of their operations.

The half-yearly general meeting of the shareholders of the City Discount Company (Limited) was held at the London Tavern, when the directors recommended that out of the balance of £4,859 11s. 8d. the sum of £500 be written off preliminary expenses; that a dividend of 10 per cent. per annum, free of income tax, be declared; and that the balance, amounting to £1,496, be carried forward to the next account. The report was unanimously adopted.

At the general meeting of shareholders of the East London Bank (Limited) the directors' report was adopted, and a dividend at the rate of 5 per cent. per annum was declared.

At the meeting of the shareholders of the Bank of Egypt a dividend was declared at the usual rate of 10 per cent. per annum for the half-year. £5,000 was also carried to the reserve fund, which is thus raised to £50,000, and a balance of £8,810 remains to be carried forward to the next account.

A meeting of Spanish Passive Bondholders has been held to consider the terms of settlement offered by the Government. Mr. David Robertson, M.P., presided, and announced a proposal of Messrs. Baring to advance to the holders of the exterior stock, to enable them to subscribe for the additional amount they are to be forced to take, a sum of £800,000, which would be equal to 50 per cent. of such payment. The advance would be for six months, at the rate of 5 per cent. per annum, with ¼ per cent. commission, the stock being held as security. A strong feeling was immediately manifested that these conditions would present no advantage whatever, and that in fact to entertain them would be simply to trifle with the interests of a body of claimants who have already for so many years experienced great injustice. It was therefore resolved, with apparently only two or three dissentients, that the terms should be rejected, and that application should be made to the Committee of the Stock Exchange to continue the exclusion of Spanish securities from the London market.

At a meeting of the Eastern Assam Company it was announced that the directors are not in a position to recommend a dividend, owing to the partial suspension of operations occasioned by the suits in Chancery.

The directors of John Crossley and Sons (Limited) have declared an interim dividend of 15s. per share for the past half-year, being equal to 15 per cent. per annum.

An extraordinary meeting of the Telegraph to India Company was held on the 9th, when the agreement with the Telegraph Construction and Maintenance Company was confirmed.

ARTICLES OF IMPORT.

Tea.—The public sale of last week was larger than any that have been held for many months past, and consisted principally of a good selection of Congous and Scented Teas. The prices obtained for Congous were very irregular, owing to the hesitation of buyers; but, on the whole, they showed a decline on those given at the last sale. There is no alteration of importance in the value of Scented Teas, with the exception of the lower grades of Scented Orange Pekoes, which are rather lower, and all descriptions of Green Tea realised full prices. Some dust sold at the sale at 4½d. to 5d., but it was offered "with all faults." Some interest was taken in a few parcels of Japan Greens, ex Rifleman, which has just arrived, and a few transactions in them have taken place, and the remainder of this cargo will no doubt be readily disposed of, as there is a good demand for all descriptions of Green Teas. The market price of Common Congou is 11d. per lb. Sound Broken Leaf can be bought at 6½d. per lb., and Tea Dust at about 5½d. per lb.

Silk.—Since our last report the Silk market has experienced little or no change, no one buying beyond present requirements. The absence of demand, both at home and abroad, has been almost unprecedented, and prices are mostly nominal. The arrival this week of some of the early settlements of the new China crop has created a slight diversion, about 400 bales finding buyers; the opening price of Tsatlees being 26s. to 30s. In Canton Silk there has been some little business doing at rather easier rates, but the assortment is by no means generally desirable. Japan Silk is quite neglected. The total deliveries show a slight improvement, being 407 bales China, and 234 bales Japan. We can as yet discern no general improvement in the Silk market; the first unloading of new Chinas has naturally attracted some attention, and led to some little business, but there is no disposition on the part of the trade to buy more Silk than is absolutely necessary, and speculation seems out of the question. The opening price for classic No. 3 Tsatlee, 29s., is higher than some people expected, but appears moderate as compared with the quotations we have for some time past been accustomed to. There is a wide margin between chop Silk and medium and inferior descriptions, red Peacock having been sold at 26s. 6d., and good No. 4 at 26s. The estimate of export for the season has been reduced by recent telegrams from China to 40,000 bales, and if the reported failure of the second crop prove true, it is possible that even this figure may not be reached. In Japan Silk there is nothing doing, the best descriptions of Mibash are firmly held, but ordinary and inferior qualities are pressed for sale.

Cotton.—The market since our last report has remained extremely quiet, the business having been to some extent restricted by the firmness of holders. The only sale of China reported is of 30 bales fair quality at 8¼d. per lb.

Coffee.—There has been a good demand, and although supplies have been ample, the values of good current descriptions have been maintained. Fine sorts have shown an advancing tendency, but common and low qualities have sold irregularly and at lower rates. The shipments from Ceylon at the last returns were 714,000 cwts., against 723,000 last season, made up of 545,000 cwts. Plantation and 169,000 cwts. Native, against 510,000 and 213,000, and the quantity now afloat for this country is 13,000 tons, against 18,000 last year. The principal transactions on the spot, with the latest prices paid, have comprised 8,000 casks 2,000 bags Plantation Ceylon, low middling to good bold greens 74s. 6d. to 84s. 6d., low middling to good middling blue 74s. 6d. to 82s., bold 85s. 6d., peaberry 91s. to 95s.; 200 casks 2,500 bags Native Ceylon, fine ordinary bold 64s., good ordinary 59s., small 50s., peaberry 65s. 6d. to 66s.; and 8,000 packages East India—Singapore, ordinary 45s. to 48s., Java 68s. The total deliveries of coffee in Holland from the 1st of January to the 31st of July were 484,694 bags, against 358,397 bags in 1866, and the stock at the end of last month was 525,500 bags, against 530,100 bags.

Cutch.—In fair demand, and 2,000 packages good Pegu have realised 37s. to 38s. per cwt.

Camphor.—China and Japan descriptions are firm, with fair private business at £6 15s. to £7 per cwt.

Gum Benjamin.—The market is steady, and of 56 cases Siam at auction half sold at £24 to £24 15s. per cwt. for fine third quality, and £11 to £11 15s. for dark. Of 42 cases Sumatra three-fourths sold at £8 2s. 6d. to £8 12s. 6d. per cwt. for false packed second quality.

Galls.—The transactions have comprised 100 cases China at 64s., and a small portion Japan at 58s. per cwt.

Manila Hemp.—The market is now firm, with a moderate business at fully the previous rates, 587 bales having been sold at auction at £49 10s. to £50 5s. per ton for fair current quality.

Pepper.—There has been a fair inquiry for black privately, and nearly 3,000 bags have been sold, Penang at 2⅞d. to 2 15-16d., Singapore 3¼d. to 3 5-16d., and Tellicherry at 3¼d. At public sale, 840 bags Penang were all taken at 2⅞d.; also 164 bags Singapore White at 5d. to 5¼d., and 100 bags privately at 5d. cash.

Rice.—A rise in the Corn market, consequent upon the uncertain weather, has been followed by a movement in this article. Owing, however, to the small stock there has been but little in which to operate on the spot, and in consequence the greater part of the transactions have taken place in floating cargoes or parcels. About 18,000 bags have changed hands on the spot at full to rather higher prices, viz., 10s. 9d. to 12s. 3d. for Soft-grain, and 16s. to 16s. 6d. for white Bengal. Of floating cargoes about forty have changed hands, the latest sales being at 11s. to 11s. 3d. for Necranzie, Bassein, and Rangoon, besides parcels equivalent to about 5,000 tons at 11s. 6d. to 12s. 6d. for distant shipment Ballam, and 11s. 4½d. to 11s. 9d. for Rangoon. There has been a moderate demand for Cleaned at about previous rates. The Imports into London to date have been 3,296 tons, against 10,156 and 23,661; the deliveries 27,487, against 30,686 and 43,272, and the stock is 5,609 tons, against 12,771 and 21,611 at the corresponding periods of 1866 and 1865 respectively. To Liverpool the imports to 1st August were 19,287 tons, against 26,159 and 12,841; the deliveries 34,773, against 36,648 and 43,667, and the stock was 7,204 tons, against 17,510 last year and 12,224 in 1865.

Sugar.—There has been a fair demand from the trade, but speculators having done but little in the article scarcely any alteration in prices has taken place, and quotations of most descriptions are about the same as on the 8th ult. Foreign refined continues to be offered at prices lower than to allow the English refiners to compete with profitable results, but as the prospects of supply from the cane-growing countries indicate an out-turn by no means equal to our requirements, it is not probable that any material fall in values will take place, unless, indeed, the production of beetroot sugar should be on a larger scale than hitherto. The deliveries in all the sugar-consuming countries are progressing most satisfactorily, showing a decided and steady increase. The last sale of the Dutch Trading Company took place on the 24th ult., and comprised 39,000 baskets Java; grey and yellow realised the rates current at the May sale, but white sold at ½ fl. decline. The principal transactions on the spot have comprised 14,000 casks West India; 16,000 bags Mauritus; 3,000 bags Bengal; 14,000 bags Madras; 1,500 bags Penang; 33,000 bags Manila; 1,200 casks Cuba and Porto Rico, and 850 bags Guatemala. The imports of sugar into the United Kingdom during the seven months ending 31st July amounted to 341,758 tons, against 322,277; the deliveries for home consumption were 316,846 tons, against 272,761, and for export and coastwise 5,966 tons, against 13,006. The stock on the 1st August was 189,736 tons, against 221,253 at the same date in 1866.

Spices.—At the quarterly sales on the 29th ultimo, comprising 1,260 bales Ceylon, good and fine qualities were difficult to sell, and only partly realised at moderate prices; medium quality brought full rates, and the inferior sorts an advance of 1d. to 2d. on the April sales, viz., fourths 1s. 3d. to 1s. 8d., thirds 1s. 10d. to 2s. 1d., seconds 2s. to 2s. 6d., firsts 2s. to 2s. 9d., and superior 2s. 5d. to 3s. 1d. per lb. Mace continues scarce and firm; 2 cases Penang at auction sold at 1s. 10d. to 1s. 11d. per lb. for medium reddish. Nutmegs are 1d. to 2d. per lb. dearer, with increased inquiry; good business done privately; 14 cases Penang and 87 cases Batavia sold at auction at 1s. 2d. to 1s. 9d. per lb. for ordinary small to middling medium. Sapanwood: Steady, and 9 tons Siam at auction realised £12 to £12 15s., also one-third of 35 tons Ceylon offered, realised £10 15s. per ton.

Tapioca.—At auction 136 bags Singapore were chiefly sold, good middling and good white 4½d. to 5d. per lb.; and 165 bags pearl Tapioca fetched 30s. to 31s. per cwt.

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars, £5 15s. to £6; nail rods, £7 10s. to £7 15s.; hoops, £8 10s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 10s. to £7 15s.; rails, £6 5s.

Steel.—Swedish kegs, £15 to £15 10s.

Copper.—Sheet and Sheathing, £79 to £83 per ton; yellow metal, 7d. to 7¾d. per lb.

Tin.—£91 for block; £92 for common bars. Tin plates, best charcoal I.C., 30s. to 31s.

Lead, &c.—English pig, W.B., £21 5s.; shot, patent, £23; sheet, £20 15s.; spelter, £20 17s. 6d.; zinc, English sheet, £26 to £26 10s.; quicksilver, £6. 17s.

The following is from the Circular of Messrs. French and Smith:—There has been no activity in the Metal Market the past month, the increasing abundance and cheapness of money having apparently no influence. Almost all transactions reported have been for immediate consumption or shipment. Iron: Scotch and Welsh are quoted a shade easier; Staffordshire is steady, with a good demand for the East; as some few of the railways are on the market again for Rails, a firmer tone in this branch of the trade may reasonably be expected. Copper is rather lower than at the beginning of July. The mail, on 13th ult., brought advices of charters for about 1,400 tons Copper, 850 tons of which were Bars. That on the 29th ult. brought advices of about 1,800 tons Copper, of which 1,200 were Bars. Sales of Bars have been made at £67 10s. Prices now quoted are: Burra, £84 to £85; Wallaroo, £82 to £83; English Tough Cake, £75 to £76; Chili Bars, £68 to £69. Tin: A large business was done in Tin during July, principally for immediate delivery; and the quantity of Straits taken out of warehouse here is very large. The consumption in England continues great, especially for Tin-Plate manufacturers, whose works were never more fully employed. The price for fine Straits in July was between £86 10s. and £87; it is rather weak at the latter quotation to-day through some pressing sellers. Banca is steady in Holland at 53 guilders; English firm, at quotations. Tin Plates are in very good demand, and, notwithstanding the large production, prices are rather stronger. The shipments in July were 140,000 boxes, against 165,000 boxes same month in 1866. By the Board of Trade returns, the exports, January to June, were 86,690 tons, against 84,750 tons in 1866, and 30,410 in 1865. Lead is more inquired for, although there is at present no improvement in price. Spelter advanced in the middle of July to £21 5s., at which some small business was done, but has gone back to £20 17s. 6d. The stock on 31st July was 3,627 tons, against 6,808 tons in 1866. Quicksilver unchanged.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

PORT OF AMOY.
CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful entrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 13 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

NOTICE TO SHIPOWNERS.
SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c.

Apply at the Offices of Messrs. PATERSON, SIMONS, and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

HOLLOWAY'S OINTMENT and PILLS.—Dangerous Diseases. How many life-long maladies spring from neglecting trifling symptoms. The pimple, so readily curable in the nursery, becomes through carelessness, the irremediable torment of after-life. With a knowledge of the curative powers of Holloway's Ointment and Pills, those who fail to use them for extirpating the first seeds of hereditary ailments will have to bear the punishment resulting from their folly. Holloway's remedies will remove eruptions of the skin, scorbutic diseases, and scrofula, heal every description of ulcer, sore, wound, or abrasions. By the use of Holloway's excellent, speedy, and safe medicament, much pain and immense expense may be saved, and great benefit be conferred on the present and succeeding generations.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month. Passengers by this route are less than ten days in the tropics.

The next departures from San Francisco are:—

GREAT REPUBLIC, 5,000 tons, September 3rd.

CHINA*, 5,000 tons, October 14th.

COLORADO, 4,000 tons, November —.

For particulars of Freight, through passage rates, &c., &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

* Name changed from "Celestial Empire."

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 93, Leadenhall-street, London; or THOMAS HILL, Southampton.

NEW OCEAN MAIL ROUTE to CHINA and JAPAN, via the Isthmus of Panama and San Francisco.

THE WEST INDIA AND PACIFIC STEAMSHIP COMPANY (*Limited*) have made special arrangements with the Panama Railway Company and the Pacific Mail Steamship Company for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

The next departure will be

From LIVERPOOL on the 20th August,

intending to connect, at San Francisco, with the steamer leaving on the 14th October for Japan and China. The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

For rates of Freight and Passage apply to the agents, J. M. CURRIE, Havre and Paris; or at the Company's Offices, The Temple, Dale-street, Liverpool, and 117, Leadenhall-street, London, E.C.

ARTHUR B. FORWOOD, Managing Director.

JAPAN AND CHINA, by Mail Steamers throughout.—GOODS for YOKOMAMA, Nagasaki, Hong Kong, and Shanghai can be shipped under through bills of lading, via Panama, by the ROYAL MAIL STEAM PACKET COMPANY'S STEAMERS, leaving Southampton on the 2nd of September, 1867.

Apply to J. M. LLOYD, Secretary.

Royal Mail Steampacket Company, 55, Moorgate-street, London, E.C.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world. Baggage collected and shipped, insurances effected, &c.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

NOTICE to SHIPPERS to HONG KONG and WHAMPOA.—The well-known clipper ship TWEED, A1 15 years, 1,745 tons register, will receive goods in the East India Docks all Friday, the 16th inst.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

Regular line of Packet Ship.
To follow the "Tweed."

FOR HONG KONG and WHAMPOA, the nearly new clipper-ship ALBERT VICTOR, A 1 13 years, 858 tons register, newly metalled; DAVID MUIR, Commander: lying in the East India Docks. This fine ship, built by Messrs. Steele, of Greenock, offers a favourable opportunity for shippers of fine goods at this season.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

To sail August 20.

DIRECT for POINT DE GALLE and COCHIN, the beautiful clipper-ship ANN LUCY, A1 11 years, 270 tons register; WILLIAM NOBLE, Commander; lying in the London Docks. This fine vessel offers a first-rate opportunity to Shippers of Fine Goods, and has very good accommodation for first and second class passengers.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To sail August 20.

DIRECT FOR COLOMBO, the splendid Dundee clipper SEAFIELD, A1 10 years, 616 tons register; J. TOUGH, Commander; West India Docks. This magnificent vessel has just returned from Colombo, and from the good order in which she invariably delivers her cargoes offers the most favourable opportunity to shippers desirous of despatch.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

A regular trader. To follow the "Seafield."

DIRECT for COLOMBO, the splendid British-built ship, GRANVILLE, A1 15 years, 696 tons register; G. GALLICHAN, Commander; West India Docks. This magnificent high-classed vessel, well known in the Ceylon trade, offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

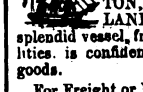
COLOMBO DIRECT, will have immediate despatch, having nearly all her cargo engaged, the beautiful clipper ship THAMES, A1 13 years, 444 tons register; O. J. H. ARNOLD, Commander; loading in the West India Docks. Has splendid accommodation for passengers.

For Passage apply to W. H. TINDALL, 5, Tokenhouse-yard; and for Freight or Passage to F. TALLACK, No. 23, Birchin-lane, E.C.

COLOMBO DIRECT (to follow the "Thames"), the clipper PALESTINE, AA1, 608 tons register; T. PARK, Commander; loading in the West India Dock. Has unrivalled accommodation for passengers.

For Passage apply to W. H. TINDALL, 5, Tokenhouse-yard; and for Freight or Passage to F. TALLACK, 23, Birchin-lane, E.C.

To follow the "Jessie Gilbert," and will sail August 15.



FOR BOMBAY direct, the fine British-built iron clipper ship BEBINGTON, AA1, 889 tons register, THOMAS WARLAND, Commander, East India Docks. This splendid vessel, from her high-class and fast-sailing qualities, is confidently recommended to shippers of fine goods.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Bebington," and will meet with the usual quick despatch.

FOR BOMBAY DIRECT, the fine British-built clipper-ship PEGASUS, A1 (owned by J. K. Welch, Esq., of London), 1,183 tons register, THOMAS CORNWALL, R.N.R., Commander, East India Docks. This splendid vessel, built in 1862, is noted for her fast-sailing qualities, and is confidently recommended to shippers.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Printed for the Proprietors by RICHARD KINDER, Milford-lane, Strand, W.C., and published by JOHN ELLISON, at the Office of the "LONDON AND CHINA TELEGRAPH," 2, Cowper's-court, Cornhill, in the parish of St. Michael's, in the City of London.—Tuesday, August 13, 1867.

The next Mail (French) is due on the 6th September. Telegrams have been received from Hong Kong to 29th July and Shanghai to 25th.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per P. and O. steamer Delta, arrived Aug. 26.—From Shanghai: Mr. F. Harvey, Mr. Maertens, Mr. Matthaei, Mr. Rainbow. From Hong Kong: Mr. Still, Mr. May. Lieutenant Fuke, R.N., and five second-class passengers. From Singapore: Hon. J. Buckley, Commodore Hutchinson. From Galle: Mr. and Mrs. Blacklaw and child, and three second-class passengers.

To Suez.—From Galle: Mr. Gower.

To Southampton, per P. and O. steamer, Euxine, expected to arrive, Sept. 3.—From Hong Kong: Commissary-General Nicholas, Mr. and Mrs. Larkens, two children, and servant, Mr. Blaney, and three second-class passengers. From Singapore: Mr. Spencer, Mr. Ponsonby, Mr. Leonewen and child, and one second-class passenger. From Penang: Mr. Eaglesome. From Galle: Mr. and two Misses Vanderspar.

By last Bombay mail, to Marseilles, per P. and O. steamer Tanjore, arrived Aug. 19.—From Singapore: Mr. Beaver.

Per steamer Agamemnon, for London.—From Hong Kong (put back): Messrs. Davison, Pater, and Laurence, Mrs. Dennys, and Mrs. Coventry. Second-class.—Eight naval and military invalids and two children. Third-class.—Twelve naval invalids.

PASSENGERS OUTWARD.

Per P. and O. steamer Ceylon, from Southampton, August 20.—To Shanghai: Mr. A. E. Hippisley. To Ceylon: Rev. J. Pickford, Rev. Griffith, and one 2nd class passenger. To Singapore: Mr. Kellock, R.N., Captain Formochy, Dep. Asst. Comy. Gen. Saunders. To Hong Kong: Mr. Oldknow, R.N., Mr. Loxdale, R.N., Mr. Vercoe, R.N., Mr. Sugden, R.N., Mr. Purkis, R.N., Mr. Smiley, R.N., Navg. Lieut. E. S. Clapp, R.N., Mr. C. May, Miss May, Surgeon Hearn, Asst. Purvr. Burke, Mr. T. Hart, Mrs. M. A. Antey and child. To Calcutta: Mrs. F. Browning, child, and Ayah, Miss Shallow, Mrs. McGregor, child, and Ayah, Mr. E. W. Staples, Mr Robertson, Captain J. Stevenson, Mr. and Mrs. I. de Ruzv, Dr. J. Carroll, Captain S. A. Ward, and one 2nd class passenger. To Madras: Mr. F. East, Asst. Surgeon and Mrs. Faught, Capt. Bromley, and three 2nd class passengers.

From Marseilles, August 28.—To Ceylon: Mr. F. W. Gordon. To Shanghai: Count de Mont Blanc, four Japanese gentlemen, and two men servants, Mr. Dillon. To Hong Kong: Mr. Sinderam. To Calcutta: Mr. and Mrs. Shervinton, Mr. F. Aitcheson, Sir George Cooper, Mr. F. W. Peterson, Mr. J. Cull, Mr. T. Hall, Lieut. Garnault, Mrs. Keell, Dr. J. H. Hughes. To Madras: Mr. and Mrs. Kershaw and child, Capt. J. G. Thomas, Lieut. W. W. Edwards, Mr. and Mrs. Holloway, Mr. Holloway, jun.

Per P. and O. steamer, from Suez, Aug. 29.—To Shanghai via Bombay, Mr. Saml. Rawson.

Per P. and O. steamer, from Marseilles, September 4.—To Hong Kong, via Bombay: Mr. C. J. Alford.

Per P. and O steamer Massilia, from Southampton, September 4.—To Hong Kong: Mr. and Mrs. G. W. Caine and child. Miss M. Middlemist, Mr. T. Woodfield, R.N., Mr. Lucas, Mrs. Davies, Lieut. Spaight, Mr. F. H. Moore, R.N. To Ceylon: Mr. Everard, Mr. L. H. Pierce. To Singapore: Mr. Isemonger. To Shanghai: Mr. E. Price, Mr. R. Bristow, Mr. C. M. Ford, Miss Partridge, Mr. C. W. Everard. To Yokohama: Mr. J. J. Quin, Mr. G. G. Hodges.

From Marseilles, September 12.—To Singapore: Mr. and Mrs. C. Heinszen, Mr. J. W. Miller. To Penang: Mr. L. Zander. To Ceylon: Mr. C. Dowden, Mr. F. H. Campbell. To Hong Kong: Mr. and Mrs. Schwemann, Mr. and Mrs. W. H. Alexander, Mr. E. Schultze.

From Suez to Hong Kong.—The Bishop of Victoria and Mrs. Alford, Mr. E. Alford.

Per P. and O. steamer Ripon, from Southampton, September 20.—To Ceylon: Mr. and Mrs. Rudd and two children, Miss Piachand. To Singapore: Mr. Hervey.

From Marseilles, September 28.—To Hong Kong: Dr. C. M. Jones, Mr. E. H. Price, Mr. Leopold Kahn. To Shanghai: Mr. D. Brand. To Ceylon: Mrs. Morris.

Per P. and O. steamer, from Southampton, September 27.—To Singapore, via Bombay: Mr. Cody, Miss Hennessey.

From Marseilles, October 4.—To Hong Kong, via Bombay: Mr. and Mrs. Hartmans. To Singapore: Mr. Pope Hennessey.

Per P. and O. steamer from Marseilles, October 12.—To Ceylon: Mr. J. Murdoch, Mr. and Mrs. Armitage. To Hong Kong: Mr. F. Porter.

Per P. and O. steamer, from Southampton, October 20.—To Ceylon: Mr. P. D. Millie, Rev. C. Merson. To Hong Kong: Miss Caldwell.

From Marseilles, October 28.—To Singapore: Mrs. R. Little and child. To Hong Kong: Mrs. J. Haffenden, Mr. T. Pyke. To Yokohama: Dr. and Mrs. Jenkins.

Per P. and O. steamer, from Southampton, Nov. 4.—To Ceylon: Mr. and Mrs. J. M Vanderspar and four children, Mr. Malcolm, Miss Malcolm. To Singapore: Mr. and Mrs. J. McLachlan, Mrs. Dunman and two daughters.

From Marseilles, Nov. 12.—To Ceylon: Mr. F. H. Campbell, Mr. J. F. Dickson.

Per P. and O. steamer, from Marseilles, Nov. 28.—To Singapore: Mr. J. D., Mrs., and Miss J. Almeida.

Per the Tweed, from Gravesend, August 19.—For Hong Kong: Mr. and Mrs. da Selva, Mr. and Mrs. George Holmes, Mrs. Edmond Holmes, Mr. Edwards, Miss Paramore, Miss Kate Martyn, Miss Ellen Martyn, Mr. J. Fogarty, Mr. Rowe, Captain Harrington, Mr. and Mrs. Walsh, two children and one servant.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The P. and O. mail of 26th April arrived out on the 15th June, with telegrams to the 14th May from London. Dates are now up to the 27th June. The intelligence is very unimportant.

A mixed Court had been established which, however, seemed to give anything but satisfaction to foreign officials or merchants.

The visit of the Ministers to Osaka has been almost forgotten; but beautiful as was the gloss on everything when they were there, and smooth as seemed the surface of the lately troubled waters of Japanese affairs, there seems to have arisen a very universally felt apprehension in the minds of the trading classes around us that the result of the visit will be, not opening of the ports, but a very determined and even armed opposition to the Shiogoon, unless that Prince permits, at all events, the large Daimios on the seaboard to open their ports and to trade with foreigners.

The *Japan Times* says:—

Politically, commercially, and socially, we have had a very quiet fortnight. In our last we gave considerable details of the state of affairs at Osaka, where a combination of powerful Daimios has placed itself in direct opposition to the Shiogoon. We have received no fresh intelligence thence, but letters from Nagasaki confirm the news we have already made public. The Shiogoon still remains at Osaka, and, in the present unsatisfactory state of politics, it is hardly likely that he will be able to visit his own capital for some time to come.

The French have requested the interference of the Shiogoon in the Corean difficulty and a Japanese embassy to Corea is in course of preparation. This method of settling the existing dispute is by far the best, if its success be possible; France can better afford to let a nation of savages rejoice in the belief that they have beaten her than, in the present state of European politics, to despatch an expeditionary force, which would necessarily have to be of considerable magnitude, to a distant field of action, where nothing is to be gained by success and everything to be lost by failure.

Digitized by Google

If we except certain disasters in our small commercial world, of which we cannot with propriety yet give any details, the subjects most occupying our attention during the fortnight have been—an attempt to establish a Japanese Court in the British Consulate, the *Medina* case, and the alleged rapidly degenerating sanitary condition of the settlement, which has compelled a reconsideration of our municipal arrangements. The case of Messrs. Wilkin and Robison *v.* Matsukiya is one of such vital importance to all shippers of goods to Japan, that we have devoted our leading columns entirely to its consideration—giving, in the first article, a history of the case and showing the utter absurdity and injustice of the native judge's decision, and, in the second, discussing the general principles involved. It is curious and noteworthy that this attempt to establish a new tribunal was made without notice, that the Court was opened without proclamation, that no publication was made of its rules of procedure, that no Court of Appeal even was indicated, and that the British Minister only became aware of its existence by reading an account of the first case, that which we have so fully discussed in our local issue. We believe that the originator of the scheme, one of the deeply read legal authorities of our British Consulate, imagined that he was creating a court similar to the Mixed Court at Shanghai. He entirely forgot how widely different are our relations with the Japanese and Chinese. The Chinese have been thoroughly beaten and thoroughly cowed, the will of the Foreign Minister is supreme at Peking, and the consular official who sits with the Chinese Judge in the Shanghai Mixed Court is really that judge's colleague, and a colleague whose lightest word considerably affects that judge's decision. The Chinese judge *dare* not give an iniquitous sentence in his presence. Here, the case is widely different. The Japanese judge has no objection to have an English Consular officer to act as interpreter for him, but he gives his countrymen pretty clearly to understand, by his demeanour, that such Consular officer is in no sense his colleague, and in no way influences his judgment. Whether such a position is one consonant with the dignity of Her Majesty's service is a question which we leave Sir Harry Parkes to decide—to us profane vulgar it is a bitter sight to see any Englishman a servant to the heathen in such mean capacity.

The *Japan Herald* says :—"Amongst our more recent and most important concessions from the Government is the establishment of a Japanese Court for the hearing of complaints of foreigners against Japanese. The first case tried resulted in a decision which has anything but satisfied the former. Our contemporary has dealt very freely with the case, and his articles have led to the two letters upon the subject which appeared in our 'daily' issue and are republished herein. We are very decidedly of opinion that in spite of the transparent absurdity of this first decision, according to European views, the Court will be essentially useful, *i.e.*, if the judges are uncorrupt, as we hope to find that they are."

H.M.S. *Basilisk* is shortly to leave for Hakodadi. H.E. Sir Harry Parkes proposes to go up in her; and Mr. and Mrs. Eusden will also avail themselves of the opportunity.

Our Municipality, so hardly struggled for, so difficult to obtain, and so really useful since it came into existence—is under a cloud. A meeting of land-renters was called on Monday last at three P.M. when the following resolution was proposed to the meeting :—

Resolved that,—

1st. It being evident that with existing receipts only the Municipal Council cannot meet their necessary yearly expenditure, and having no means of levying rates for municipal purposes, it is proposed that they resign office; and the land-renters memorialise the different foreign Ministers, requesting them to call upon the Japanese Government to take upon themselves all the duties of the municipality, proper guarantee being given that the Japanese Government will effectually drain the settlement, carry out all measures necessary for sanitary purposes, maintain an efficient European police, and further that they shall establish a Government office specially appropriated to municipal affairs, at the head of which shall be a European Surveyor of Roads, &c., &c., to whom all complaints about roads, drains, &c., can be referred.

Two amendments were moved; viz., first :—

That the Municipal Council continue to act in its present form; but as the amount granted by the Japanese Government, of 20 per cent. on the ground rents, is totally out of proportion with the expenditure necessary for the proper conducting of the Settlement, a memorial be addressed to the several foreign Ministers, requesting them to obtain from the Japanese Government a grant more in accordance with the amount necessary to carry out the work they have pledged themselves to—say three-fifths of the entire ground rents paid by foreigners.

The second amendment proposed was to the effect that a request should be made to the Government to give to foreigners all necessary municipal powers, including, of course, that of taxation.

The original proposition was carried.

The fine Dutch-built frigate *Kai-yuomar* was handed over to the Japanese Government on the 22nd inst., and now displays the morning sun flag at the peak.

NAGASAKI.

Per *Cadiz*, from Nagasaki, with dates to 2nd July, we learn that Admiral Keppel, in the *Salamis*, had left for Yokohama. The harbour was full of steamers under Japanese flags, sold or waiting to be sold to native Daimios.

Under date 27th, a passenger by the *Kiangsoo* writes from Nagasaki, per *Feeloong*, as follows :—

"The *Kiangsoo* sustained her reputation as a fast boat on the run across. It was 20 minutes past five, you remember, when we left Pootung Point, by seven we were abreast the *Hellespont* wreck (junk), and at 8.25 sent pilot Brandt, in the ship's boat, to the light-ship. It was 9.30 before the boat was back and hoisted up, and then we started with a bound. The weather was fine next day till nearly sundown, when it began to snuffle from the southward and eastward with a heavy swell, and we anticipated a dirty night; so I induced Captain Gregory, who has not been in these regions before, to keep a course to the southward of the Asses' Ears. These we had in sight on the port bow at 2.30 A.M., on Monday—or, less the hour lost in dropping the pilot,—a run of 32 hours; say, from sight of light-ship to Asses' Ears, 29 hours. About 11 we reached Nagasaki harbour, and landed the London mail bags of 10th of May—their 45th day out—a feat which took the Nagasaki-ites by surprise. They had not looked for said mail for a week at least

"The *Cadiz* arrives as I write, and the *Feeloong's* mail closes presently. H.M.S. *Salamis* arrived on Wednesday, and (*on dit*) goes to Yokohama to-morrow. Admiral Keppel's flag is here on the *Pelorus*. Boos are 327 to $100. Three years ago the exchange was 227 only; a difference as wide as having three half-crowns in one's pocket instead of two."

The *Nepaul*, late P. and O. Company's, was bought by an English house here for £20,000 ($100,000), and then, it is said, sold to the agents of a Daimio for nearly the double of it.

The following is an account of the storm noticed in a telegram. On the night of the 14th it rained in torrents and caused a great deal of damage and loss of life; about twenty Japanese are reported drowned or killed by the falling houses. The two large wooden bridges in the town that lead to Desima have been completely washed away, and a great deal of damage has been done both in the native and English settlements by the great quantities of water which have been pouring down from the hills. Many of the godowns have been flooded and much cargo damaged. On the 18th the weather was still very bad; a heavy gale blowing from S.W. accompanied with violent rains. It was one of the severest storms that we have had at Nagasaki for some time. Four or five stone bridges were carried away, houses flooded and destroyed, and a large quantity of rice damageed. One poor woman was found floating towards the *Pelorus*, but Jack had compassion on her, and soon restored her to her native element, for which kind act he got the thanks of the Governor.

The case of Kniffler and Co. *versus* J. Elliot, the master and owner of the ship *Rifle*, has been decided in the Provincial Court. The plaintiffs claimed $750 for the contents of two cases of merchandise shipped in London, and found on delivery in Nagasaki to contain nothing but rubbish. The finding of the Court was as follows :—

This is a claim brought by the plaintiffs for the value of the contents of two cases—M. W. A. 245 and 250, merchandise, shipped in good order and condition in London on board the *Rifle*, but found on arriving at Nagasaki to be filled with rubbish.

On the 17 November last clean bills of lading were signed by the captain for M.W.A. 244 53—ten cases merchandise, and on the 18th Dec. he noted a protest before a notary public in London against a certain robbery which had been committed in the West India Docks, during the supposed lading of the vessel, and which was brought to his notice by the detectives of police, but there was no evidence to prove any connection between the alleged robbery and the cases specified in the above mentioned bill of lading.

Further, the Court was unable to accept the conflicting evidence of the defendant's witness, Captain Robertson, as to the two cases being in the like good order and condition on delivery as when shipped.

The Court is therefore of opinion that the defendant had failed to establish the fact exonerating himself and the owners of the vessel from their liability under the said bill of lading, and finds for the plaintiff for the amount claimed with costs.

CHINA.

TIENTSIN.

On the night of the 18th June a heavy rain set in which, however, ceased on the succeeding day, and since then the weather has been fair, with no signs of rain. That which fell on the night of the 18th June was soon dried up. The north of China is still suffering much from drought, and all hopes of saving the crops are at an end. It is said that it is difficult for camels even to travel over Mongolia to Russia, owing to the absence of grass and frequently of water on this route. The state of the water routes and the crops have caused the Shanse inland traders for some weeks past to decline buying manufactures and other imports at Tientsin; and we fear that very little business will be done by them during the rest of this year, as the mass of the inhabitants of the north of China will not be in a position to buy clothes, requiring all their money to buy food, which will be very dear.

The market for imports is quite nominal.

In consequence of large numbers of southern, chiefly Shanghai and Ningpo, junks having come to this port with rice, the river has been very crowded, and the navigation for steamers and foreign sailing vessels extremely difficult. Numbers of collisions have occurred, the junks in the generality of cases suffering much damage, and being frequently sunk. Complaints have of course been made to the Consuls representing the flags of the colliding vessels, and collision cases are at present the order of the day at the consulates.

CHEFOO.

A correspondent, under date 1st July, thus writes:—"For the last week or ten days this community has been in a great state of excitement, daily anticipating an attack of the Nienfei rebels, who had crossed the grand canal and surrounded the city of Tsi-nan-foo. A volunteer corps was at once formed among the foreigners, and drilled at the British Consulate, but the martial ardour will soon cool down as the rebels are now in full retreat, having been worsted by the Imperialists. A detachment of drilled troops have left Tientsin and are marching on the rebels at Che-chin-foo, so for the present the alarm is over, the natives are settling down to their trade again, and in a few days it is hoped that business will be resumed as if this rebel incursion had never happened."

NEWCHWANG.

The prospects of the harvest in the immediate neighbourhood of Newchwang are very poor; the drought having been of exceptional severity, and the fields presenting a most parched appearance. The millet, in some cases, is hardly above the ground. Happily the evil is not of large extent, as, a few miles passed over, the aridity is replaced by fresh and thick crops. The present season, in one respect, compares most favourably with preceding ones. Not a single vessel has, as yet, been lost. This fortunate improvement is, of course, to a great extent attributable to the presence of the buoy, and the light ship. A harbour master has been appointed, and the new pilot regulations will soon be inaugurated. The demand for manufactures continues, and trade is generally prosperous. The country is tranquil and quite free from rebels or banditti.

HANKOW.

Heavy and incessant rain fell at Hankow on the 25th June, and the force of the stream increased so rapidly that, about 11 P.M., several tea junks carried away their anchors and were washed with great violence against the bows of the *Rona*, sustaining serious damage. About midnight ten or twelve others which were anchored ahead of the steamer broke adrift, and came down with such violence athwart her that some were literally cut in two. Several lives were lost, and the destruction of tea chests was enormous; a good many, which were floating about in the eddies between the wrecks and the sides of the *Rona*, were saved by the sailors and stowed on board neighbouring junks. The tea, however, must of course have been badly damaged.

The *Hankow Times* says that Sir Rutherford Alcock, K.C.B., H.B.M.'s Minister Plenipotentiary, &c., &c., arrived with his suite at this port in H.M.S. *Argus*. He took up his quarters at the British Consulate, where the local authorities waited on him; but we did not hear that any business of importance was discussed. An attempt was made on Wednesday afternoon to convene a meeting to consider the expediency of addressing him a memorial on the subject of the commercial requirements of the port; but the matter cannot have weighed very heavily on the minds of those concerned, for no one responded to the call, and we are informed that the Minister expressed himself as rather relieved at having at last met with a community who were fortunate enough to have no wants. The Minister is also represented to have been highly gratified with the general appearance of the place, and to have been particularly struck with the busy aspect of the Bund and by-streets, so contrary to what he had been led to expect. He would probably have formed a different opinion had he chanced to visit us at a dull season of the year.

During the temporary absence of the undersigned, John Gibson, Esq., will officiate as H.B.M.'s Consul at this port.—W. H. MEDHURST, Consul.—British Consulate, Hankow, 25th June, 1867.

SHANGHAI.

The French mail of the 17th May arrived out on the 4th July with telegrams to the 7th June. The dates are now down to the morning of the 6th July.

Private letters state that, in addition to the failures already reported, several more are likely to follow. The rumours about a bank in difficulties refer to the Hong Kong and Shanghai Bank's proceeding against Dent and Co.

The Customs Return of trade for May is remarkable for the great falling off shown in the import of almost of every description of soft goods. Only 10,900 pieces of grey shirtings were received, against 166,040 last year; white shirtings have similarly declined from 38,189 to 9,389, and dyed from 15,850 to 4,420. T-Cloths, 3,000 against 8,000; Drills, 2,000 against 5,000; Chintzes, 1,000 against 7,000. Handkerchiefs, 92 dozen against 12,000 dozen. Camlets, 3,700 against 8,900. Spanish Stripes. 1,200 against 4,200. Lustres, only, show an increase from 7,791 to 13,846. The import of coals during the corresponding months has been very nearly identical—about 7,500 tons; sugar also figures at 94,000 piculs brown, and 61,800 white against 98,000 and 52,000 in 1866. Raw cotton has fallen from 4,776 to 949 piculs.

If we may judge from the following prices obtained at the sale of a well-known racing stud, a few days ago, people are beginning to get tired of paying the enormous prices ponies used to command. The Tientsin crack, Sans Peur, realised only 300 taels; The Squire, 210 taels; Ozone, who was bought two years ago for 1,000 taels, went for 40 do; Lottery, 95 taels; Curio, 120 taels; some Griffins realised 110, 90, 70, and 45 taels respectively.

The American portion of the community celebrated their annual festival on the 4th of July. The declaration of independence was read at the U.S. Consulate in the morning; some boat-races took place during the day, and several large dinners were given in the evening.

Voluminous correspondence has passed between the Chamber of Commerce and the foreign Consuls regarding the establishment of a river police. The constant robberies that occur of merchandise passing between ship and shore have long rendered this protection eminently necessary. Every description of theft, from bags of nails to bales of silk, has been perpetrated with impunity, the pawn-shops affording thieves a ready means of disposing of their booty.

The steamer *Island Queen* has been sold by auction for the sum of 10,000 taels. Some dispute having arisen, however, she was to be again offered to public competion at the upset price of 10,000 taels on the 10th July.

Some official changes have taken place at the British Consulate, Mr. Vice-Consul Markham having left for Chinkiang and Mr. Interpreter Alabaster for Chefoo, to which ports they have been respectively appointed in temporary charge by the British Minister. Mr. Interpreter Forrest has relieved Mr. Alabaster as acting Vice-Consul at Shanghai and as British Consular Assessor in the Mixed Court. The title of "Co-Judge," except in Consular notifications, appears to have exploded with its originator.

Mr. John Lloyd is to appear in Hankow for examination on the 1st July. Messrs. Handy and Crawford have received their discharge. Mr. C. Treasure Jones, lately of the Consular Service, having been declared bankrupt, is to appear before the Court on the 15th July.

In the Supreme Court, before Mr. Mowat, acting law secretary, Mr. Reuben (late of Messrs. Moses and Co.'s) was, at the instance of Mr. Cowasjee Pallangee and Co., charged with uttering a forged order for fifty chests of opium, knowing it to be forged. It seems that this order on the *Ariel*, in favour of a Chinaman named Hutsing, was handed to the French bank by Mr. Reuben, in order to obtain an advance upon it of 18,000

Digitized by Google

taels, but when the manager applied to the commander of the *Ariel* to transfer the opium to his name the forgery was at once discovered. Mr. Reuben stated in his defence that he did it as a matter of business for a Chinaman named Hutsing, and had no knowledge of the order being anything but correct. He pointed out the Chinaman from whom he received it, who, however, on examination denied all knowledge of the transaction, and stated his name to be Lechow, and that he had never seen the prisoner before. The prisoner was committed for trial, but, after consulting with the chief judge, Mr. Mowat agreed to accept two sureties of $500 each for his appearance.

The new tower which is being built on the French Municipal Hall is creating an unexpected panic among the Chinese. It interferes with the free progress of the Feng-shui, who are stopped by it in their flight and diverted to the right and left over neighbourhoods which would otherwise have escaped them.

The native owner of some peas and beancake imported from Newchwang in the *Miaca*, has failed to obtain a purchaser for his goods. It would seem, therefore, that the combination against the importation in foreign bottoms has not yet been broken up.

A serious accident occurred at the recent sale of Mr. Major's effects, at Ningpo. The verandah gave way in the middle of the proceedings, and several of the gentlemen on it at the time were seriously injured, amongst others H.M.'s Consul and the Commissioner of Customs.

A meeting of shareholders of the Shanghai Wharf Company was held on the 26th June, to consider the position of the company. As it appeared that the Commercial Bank was pressing for payment of the loan of 22,000 taels due to it, it was proposed by Mr. Robinson, seconded by Mr. Winchester, and carried—

"That the directors and agent be and are hereby authorised and directed forthwith to sell by public auction, without reserve, the property and premises of the Shanghai Wharf Company, and to take the necessary steps to discharge the claims against the company, and that this meeting be adjourned until the 2nd of August next."

Mr. Edmund Warden, who has been for many years the agent of the P. and O. Company, was adjudicated a bankrupt on the 25th June. Mr. Thomas Sutherland has assumed the charge of the company's affairs. Messrs. Mackellan and Co., of Hankow, and Messrs. Townend and Co., also of Hankow, have been declared bankrupts. In the bankruptcy case of Rehhoff, Vale, and Co., Mr. Julius Bernard is appointed administrator of the estate from the 1st July. Mr. Robert Meadows, of Ningpo, was to come up for his last examination at Ningpo on the 10th July. Mr. J. W. Malcolm had received his discharge.

In the *Supreme Court and Consular Gazette* we find the following letter addressed to the agent of the P. and O. Company relating to the systematic plundering from bales of silk during the shipment on board the steamers :—

Sir,—We the undersigned residents at this port and shippers of cargo by the ships of the company which you represent, beg to draw your attention to the fact that the constantly recurring complaints from Europe about the plunder of raw silk render it imperative on us to adopt some measures for our protection.

We believe you incline to the opinion that many of these robberies take place on board the lighters and cargo boats which convey our silk to your steamers. Supposing such opinion to be correct, we conceive that an effective river police force would be the best and speediest check to the continuance of a system so ruinous to shippers, and have petitioned through the proper quarter for the immediate establishment of such a force.

We have also arrrived at the conclusion that you will materially assist us in the detection of plunder if you will adopt the system of weighing each bale of silk as it arrives on board your steamers, and recording such weight on the mate's receipt.

We have determined to stamp each bale of silk as it leaves our hongs with the gross weight in pounds in legible characters; and in the event of such weight not tallying with the weight of the bale, as shown on board the steamer, it would be excessively easy to detain the men of the cargo boat where such discrepancy occurred until the matter could be investigated.

We are aware that in the event of 2,000 bales being shipped per mail steamer on the morning of her departure, it would be next to impossible to weigh each bale on its arrival on board, and are of opinion that the necessity for weighing each bale shipped at such time is not so imperative as when silk is shipped one or two days prior to the steamer's departure; for if the system of silk plunder is carried on at all in cargo boats, there is no doubt that the chances of plunder are very much greater in the latter case than in the former.

The following is the official notification of Consular changes alluded to above :—

By order of Sir R. Alcock, K.C.B., H.B.M., Minister Plenipotentiary, the following appointments and changes having reference to this Consulate take effect from the 1st of July, 1867 :—

Mr. Vice-Consul Markham proceeds as Acting Consul to Chinkiang to take charge of the Consulate there, vice Mr. Consul Harvey returning to England on sick certificate.

Mr. Acting Vice-Consul and Interpreter Alabaster proceeds to Chefoo to take charge of the Vice-Consulate.

Mr. R. J. Forrest, lately Acting Consul at Ningpo, is transferred to this Consulate as Interpreter and Acting Vice-Consul.

Mr. Forrest will act as Co-Judge of the Mixed Court, and is in charge of the Land Office.

Charles A. Winchester, H.B.M.'s Consul.

A brutal attack was recently made upon Captain Winchester, of the *Coral Nymph*. He had summoned one of his sailors to the British Consulate for breach of duty, and the sailor happened to be the first at the office. When the captain was coming up the steps he flew at him, knocked him down, and jumped on his body, from which the unfortunate man appears to have sustained a slight concussion of the brain, and his ribs and loins were so severely injured that the greateat care will have to be taken of him for some days. The man was arrested, and is now in prison awaiting his trial.

The following paragraph relating to the Corea, which appears in the *Shanghai Recorder*, is of interest, as showing that the natives are becoming more exclusive even than they have been hitherto :—"We are informed that the Coreans, who formerly purchased a large quantity of European goods from Chinese merchants, have recently prohibited the import of such cargo, and in consequence several Chinese junks have returned with their cargo to ports in the Liautung Province. The Corean officials threatened death to any contravening the regulations prohibiting this trade.

A special meeting of the North China Branch of the Royal Asiatic Society was held on the 26th June at the court room of the Supreme Court, Dr. Winchester, President of the Society, taking the chair. After the usual routine business, the corresponding secretary read an interesting paper by Mr. Elias, Junior, F.R.G.S., entitled "A few notes on the old bed of the Yellow River, and the water supply of the Grand Canal." The writer, who had recently paid a visit in company with Mr. Charles Hay to the locality where the Grand Canal crossed the former bed of the Yellow River, gave a concise statement of the observations he had made accompanied by a chart of the locality.

On the conclusion of the paper Dr. Macgowan made some remarks on what had been read. He was glad that a gentleman able to take scientific observations had at last visited the river; he himself had some eleven years previously been the first to draw attention to the change in the Yellow River spoken of in the paper.

After a few words in explanation by Mr. Elias, Dr. Winchesf ter congratulated him on his interesting paper, the subject o which was one that could not readily be exhausted, and any attempt to elucidate which must result in throwing much light on the science of geology and internal history. He hoped that now the attention of the merchants would be directed to the Yellow River, and thought that if it were possible to open mines at Hangchow-foo, the navigation of the river would tend much to the development of the resources of the North of China. After a few remarks from Mr. Kingsmill, Dr. Winchester stated that a considerable portion of the other paper intended to be read at the meeting having been published in the Hong Kong journals it would not be read that evening; but he called upon Mr. Kingsmill to explain the valuable specimens of the minerals of Shantung which had been presented by the Rev. Mr. Williamon, and after a short conversation, the winter session of the society was closed.

The following notice has been issued :—"During the absence of Mr. John Fogg Twombly, from Shanghai, our business will be left in charge of Mr. Howard M. Twombly, a partner in our firm, and Mr. Silas D. Webb, who is authorised to sign our firm. Mr. James Henry Crutchett is a partner in our 'Store Department,' and in charge of the same. Mr. Harry Alonzo Holcomb is a partner in our 'Auction and Commission Department' and in charge of the same.—H. Fogg and Co. Shanghai, June 21, 1867."

NINGPO.

Mr. W. H. Fittock has arrived out from England, and assumed charge of the Consulate. Sir Rutherford Alcock, in H M.S. *Argus*, arrived on the 3rd July, and is reported to have left for Peking on the 4th. Some important matter must have called him back as he has not visited the Southern ports.

Digitized by Google

FOOCHOW.

The following on the subject of the purchase of new teas is from the *Recorder* :—

We have just been cognisant of a piece of information which few know of, no doubt, and which still fewer, we dare say, will believe when we tell it. The teas which we have been buying at 28 taels this year the native merchants purchased at 6 and 7 taels in the interior; and our very crack chops, which we have been ready to give 38 and 40 taels for, have been secured to the vendors at 10 taels. In fact no teas have been bought up country this season at a price above 10 taels, and the bulk of them have been settled to 6 and 7 taels. We were told, and of course we believe it, that the tea market in the interior had opened at 23 to 24 taels, but it turns out that this was all a piece of palming off on the part of the Chinese, and that no such prices were realised.

We are naturally asked for our authority. In answer to this we reply that our authority is something better than the words of compradores or tea brokers, who of course would be the last men in the world to let the secret out of the bag, and who, we have no doubt, will swear point blank that we are wrong, nay most false in our information and all that. Still, we do not regard what compradores or brokers or any of their gulls will say; indeed we accept their stout denials as only compliments paid to the truth, for we go to their own market report, which they keep a dead secret, and we find the figures we have quoted there. Our authority then is the native market report, and surely the figures of a market report, which the Chinese preserve most carefully from foreign eye, which is got up expressly for themselves and with the proviso that no foreigner lays hands on it, is far more reliable than any amount of words they trip on the tongue with the express design of keeping us in the dark.

We shall say no more on this subject at present, but we leave it to the reflection of our readers first, whether the Chinese tea report is safer information than men who are all banded in a trade union in order to cheat and blind us? and second, whether if only 6 to 10 taels have been paid for teas this year, foreigners have not been well let in? Last year the same tea report to which we have referred showed that 28 to 30 taels were paid for the second season's teas, which realised here only 20 to 22 taels, but this year buyers have profited by their last year's losses to such an extent as to almost quadruple their capital in two months or less, a turning of evil to good account the like of which we have seldom heard.

AMOY.

On June 26th an address was presented to Sir R. Alcock at Amoy by the British community resident there against the Mandarin squeezes. The reply of Sir Rutherford was most satisfactory. He has pledged himself to do all in his power to put down the Leekim taxes, and he has already taken measures for stopping the embargo on the Formosa rice trade. We further understand that from what Sir Rutherford said it appears that the tonnage dues are to be set aside to meet the expense of lighthouses, buoys, and harbour police.

HONG KONG.

The P. and O. mail of the 26th May arrived out on the 3rd July, being 37 days from London. Telegrams reached to the 14th June. Dates are now down to the 12th July.

The community have been highly interested in a quarrel between the judge and Mr. Pollard, the latter gentleman being fined $200 for contempt of court and suspended from practice till the fine was paid.

The intelligence respecting the Mint is that employment continues, and about $300,000 had been turned out in the month, and that the same quantity of bullion had been sent in for coining. This at 2 per cent. seigniorage and a proportion of small coin would pay the current monthly expense. Still the Governor is opposed to its being kept open, and waits orders from home to shut it up. These orders, however, have not been sent out.

An advertisement has appeared of an intended meeting of the Chamber of Commerce to consider whether any and what representations be made to Sir R. Alcock respecting the revision of the Treaty. We are well aware of the recently introduced rule which obtains respecting deliberations of the Chamber, by which their results only are communicated to the public through the medium of the local journals. But in this instance we venture to think that the Chamber would be acting wisely by admitting the representatives of the press to be present during so important a discussion. As the views held by members are likely to influence in no smal degree the course of action which those concerned in the revision will pursue, the meeting assumes a political importance which ordinary deliberations of the Chamber do not possess; and those who speak will come prepared to put forth their views, less in the conversational manner usual at such meetings, than in a way befitting the importance of the occasion. We have fully upheld the right usually exercised to consider meetings of the Chamber in the light of private conferences on subjects interesting more immediately to the actual members than the public at large; but in the present case not only Hong Kong, but China and England, will attach importance to the opinions put forth, and we may fairly hope that in view of the importance of the occasion our suggestion will be accepted.

The *China Mail* says :—"If it be true, as alleged by the *London and China Express*, that the East India Telegraphic Company has commenced sending out materials for the proposed telegraph between Hong Kong and Shanghai, it seems somewhat remarkable that people in China should hear so little of the progress which it may be assumed has already been made."

A fine living specimen of the fish called the sea-horse is at present to be seen at the Hong Kong Dispensary. It was caught by Mr. J. de Souza, over at Kowloong, and is a most beautiful and graceful little animal, of about six inches long; its colour is dark green and very light yellowish green, mixed and streaked together. The head and neck have a striking resemblance to the horse, and as the fish courses gracefully round the trough in which it is placed, you can fancy it to be a blood racer. As its propelling power does not depend upon the action of fins, the ease of its motion, with head erect, is all the more remarkable.

The S.S. *Hayo Maro*, George Carnes commander, bound from London to Japan, arrived here on June 28. This vessel is perhaps better known as the Confederate man-of-war *Tallahassee*, which vessel did such damage off New York during the war. She has since received a thorough refit with special reference to the China trade. On her trial trip in London she attained a speed of 15 knots, and has run the distance between Folkestone and Calais (21 nautical miles) in seventy minutes being at the rate of eighteen miles per hour. Her armament consists of four twenty-pounder rifled Blakely guns, and her small arms are also on new principles, both revolvers and rifles. She left Cardiff on the 21st March and has called in at Madeira, Saint Vincent, Cape of Good Hope, and Singapore, at each of which places she remained some time, and she has besides performed the whole voyage either under sail alone or with only one boiler. While off St. Paul's, in the Indian Ocean, she experienced a very severe hurricane, which lasted 24 hours, and in which she received some damage to boats, &c., but in which she proved herself a most excellent sea boat. Off Java Heads she spoke the *Sir W. Wallace* from Cardiff, and in the Straits of Sunda the ship *Fortune*, both for Shanghai with coals. H.M.'s *Satellite* arrived at Singapore on the 18th June, with the Governor on board, and H.M.'s *Urgent* was to sail on the 20th for Mauritius, &c. Crossed the line April 24; left Table Bay May 5. The *Hayo Maro* was 2 days at Madeira, 3 at St. Vincent, 7 at the Cape, 14 at Singapore, and 2 at Anjer; total 28. She was at sea 70 days.

The progress made towards the completion of the new hotel leads us to believe that Hong Kong will before long possess enlarged facilities for those who desire either temporary or permanent accommodation. Whatever may be the advantages presented to those who are visiting or passing through the colony, it must be, we think, conceded that the chief support of the institution will arise from the profits to be derived from the residence of those who would be but too glad to avail themselves of it as a permanet nresidence. Placed in a central position, and within easy reach of the club, the chief mercantile houses, and the Government offices, it will present many advantages. We trust that the tariff for such boarders will come under discussion at the next meeting.

The report laid before a half-yearly meeting of shareholders in the Hong Kong, Canton, and Macao Steamboat Company (Limited), held on the 8th July, states that the company's fleet consists of the same vessels as before—the *Kin-Shan*, *Kiu-Kiang*, *Fire Dart*, *White Cloud*, and *Poyang*. The report, after stating in general terms that the half-year shows highly satisfactory results, goes on :—

"The result of the working of the traffic for the past six months is most

Digitized by Google

satisfactory, and affords ample proof of the remunerative character of the shareholders' investment. The accounts are now laid before you, but the board confines itself to stating that after paying all commissions, running expenses, salaries, premia of insurance, interest on loans, and outgoings of every description up to the 30th June, there remains a sum of $97,372 29 in the hands of the company."

"Of this the board propose to appropriate $20,000 to the reserve fund, and assuming that you will agree with them that the best investment of that fund will be the reduction of the loan upon the company's spare boats, they have reduced the account of the loan to $180,000, and propose paying off another $10,000, so as to leave it at the sum of $170,000, which will be considerably reduced by the next six month's earnings, even if not entirely cleared off by the sale of a boat.

"These appropriations will leave the sum of $67,372.29, out of which the directors recommend the payment of a dividend to shareholders of $7.50 per share, being at the rate of 20 per centum per annum on the paid-up capital of the company, which will absorb $56.250, and the balance, $11,122.29, will be carried forward to the next half-year's account."

At the meeting the following gentlemen were elected directors:—Messrs. J. B. Endicott, E. Pettit, R. Deacon, Quok Acheong, J. S. Lapraik, G. F. Heard, E. A. Hitchcock, the Viscount de Cercal, and Mr. E. Cunningham.

A memorial has been presented to the Governor on the coolie traffic.

The following account of the petition in bankruptcy against Messrs. Dent and Co. is from the *Daily Press*:—

SUPREME COURT, JULY 10th.

IN BANKRUPTCY.

(Before Chief-Justice SMALE.)

At the opening of the court the Chief-Justice said that the final discharges of Mr. C. F. Still and Mr. George Maclean, of the firm of Lyall, Still & Co., bankrupts, had been signed and were now ready.

RE DENT AND CO.

This was a motion on behalf of the Hong Kong and Shanghai Banking Corporation to set aside or vary an order of court made in a petition in bankruptcy of one Gomez, for an adjudication of Messrs. Dent & Co., bankrupts.

The Attorney-General said that he appeared on behalf of the Hong Kong and Shanghai Banking Corporation, to move in regard to an order of court made relative to a petition for the adjudging of Messrs. Dent and Co., bankrupts, and to pray that such order might be set aside.

Mr. Pollard, instructed by Mr. Gaskel, appeared for Mr. Gomez, the petitioning creditor, and Mr. Whyte appeared on behalf of Messrs. Dent and Co.

Mr. Pollard wished to take a preliminary objection, and as it would more properly come at this time he would ask leave to take it now.

The Attorney-General thought a preliminary objection was not in order. There had been no previous notice given of such objection, and how could he come prepared for it? His learned friend was always taking preliminary objections as a matter of practice, but he would challenge him to show a case in the books were they were in order without previous notice.

The Chief Justice had never in his experience seen it required that notice should be given of a preliminary objection. They were always taken as now, and he thought in this case it would be much more convenient that he should hear the objection first. If it was desired that he should give a decision in this matter he must have time to consider all the important points that had been raised, but if the parties could agree to any form of order that would protect the rights of the applicant he would make such order without at length going into all the reasons and law of his opinion. Such a form was drawn up by both counsel, and the Chief Justice then said that having regard to all that had been advanced by both sides, he felt that he could not rescind the order, and he was also of opinion that it could not be raised for the present, but he thought that for the protection of the applicants he could make the order proposed. (This gave the applicants the right to seize leasehold in execution of their judgment, but without prejudice to the petitioner or the bankrupt estate, should such be adjudicated.) He thought he might also add that he took it as a very important ingredient that the bank corporation were not judgment creditors at the time the petition was made, and further that under the ordinance collusion in bankruptcy was not illegal. In the matter of costs there would be no costs, but if the bankruptcy should proceed and be adjudicated he would then order that Gomez be paid out of the first assets realized of the estate.

PHILIPPINES.

MANILA.

The London mail, with dates from London to 10th May, and telegrams to 29th, arrived on 22nd of June.

The market for imports has continued without much animation since the departure of last mail, and only a limited business has been done in piece goods.

White Shirtings—36 inches by 40 yards. Dealers are fairly supplied and do not show any anxiety to purchase except a few at reduced quotations. Sales during the fortnight, 3,861 pieces, making a total for the month of 15,053 pieces. Quotations per 40 yards.—12 by 10 $3-12½ to 3-25, 14 by 12 $ 62½ to 3-75, 14 by 13 $3-87½ to 4. 15 by 14 $4-25 to 4-50, 16 by 14 $4-62½ to 4-81¼, 17 by 15 $4-75 to 5, 8 by 17 $5-12½ to 5-37¼, 19 by 17 $5-62½ to 5-75. Grey Shirtings.—39 inches by 38 to 39 yards. For 7 lbs. importers supply the demand at $4, and 8¼ lbs. at $4-75 per 40 yards. The transactions of the fortnight have been 540 pieces, and for the month 3,003 pieces. Gray Longcloths.—39 inches by 36 yards 3,310 pieces have been placed since last report. Total for June 4,210 pieces. Demand is inactive at quotations of $4-50 for 8 lbs.; $4-56¼ for 8½ lbs., and $4-75 to 5 or 9 lbs. per 40 yards. Grey Twills.—27 to 28 inches by 30 to 32 yards.

Notwithstanding a considerable decline in exchange, by which the sterling cost of all articles is greatly reduced, the produce markets show no signs of activity.

Sugar.—The supplies of current on the market have been small, and dealers have established an advance of 12½ cents. per picul, 12,000 piculs having been placed at $2 per picul. Superior current is quoted nominally at $4-37½ per picul, no transactions being reported. Unclayed: Further sales of Taal have taken place at $2-43¾ to $2-50 per picul. A limited quantity of Visayas has changed hands at $2-56¼ per picul. Hemp: The demand is unabated at $8-25 per picul, but there have been no transactions on the spot during the fortnight owing to the absence of supplies. The receipts for June amount to 26,706 piculs, making the total to 30th June 227,316 piculs, against 222,810 piculs last year, and 196,397 piculs in 1865. Cordage: There is fair demand for 1 to 5 inch at $12-50 per picul, and contracts for smaller sizes have been entered into at $16 per picul. Coffee: No important transactions are reported, but Indian is quoted at $14-25 per picul, and Zamboanga at $10 to $11 per picul. Rice: Sales of Pangasinan Current have taken place to some extent at $2-15 per cavan, Zambales is worth $2-40 per cavan. M. O. P. Shells: No arrivals: recent sales have been at $35 per picul, but there is now less demand. Hides and Hide Cuttings: Some enquiry for shipment to America at $11-50 per picul. Indigo: Without transactions, but stocks are held of the article.

STRAITS SETTLEMENTS.

SINGAPORE.

The London mail of the 10th June arrived out on the 11th July, and the French mail of the 19th June on the 18th July. Telegraphic dates extended to the 6th July.

The third Criminal Session of the year opened on the 7th July, for the first time, under the judgeship of Sir William Hackett, the Acting Chief-Justice. The calendar was a heavy one, but has been disposed of by this time. There were two indictments for murder, but a discharge in one case and a committal for manslaughter in the other were returned. The Legislative Council holds its next meeting on the 23rd July. The weather has been hot and oppressive, but with occasional rains.

PENANG.

Dates from this port are to the 23rd July. The *Penang Gazette* has the following items relative to the disturbances among the native population, which have since, according to a telegram appearing in another column, culminated in serious riots:—"A petty warfare is at present going on between the members of the powerful societies of the Toh-Peh Kong and the Ghi-Hin. The animosity which prevails among the members of these societies is so strong that guns and cannons are freely used, and mounted men of both parties traverse the country. A wholesale slaughter has been committed, the most reliable information placing the number of men killed at four hundred, while some increase it to a thousand. The disturbance is at present confined to the interior and country districts, but apprehensions are felt for the safety of the town, and we understand that the Rajah has written to the Siamese Consul at this port to procure assistance from our Government. The quarrel seems to have originated at the tin mines, between the Toh-Peh Kong and the members of another society named the Ho-Seng respecting the right to some water which both required for washing their tin; the Ho-Seng society, consisting of members who had seceeded from the Ghi-Hin, the parent society, was requested by the Rajah to procure a settlement of the dispute, which they endeavoured to do, but only succeeded in drawing the resentment of the Toh-Peh Kongs upon them. The schooner brought a large number of Chinese passengers who have fled to Penang for safety, of whom forty are women.

It is feared by a large section of the community, as well Europeans as Chinese, that the disturbances at Junk-ceylon may affect Penang and awake the animosities of the rival Toh-Peh Kong and Ghi-Hin societies here. The town is at present quiet, but a general feeling of distrust prevails among the native population in town. All parties appear to be apprehensive of a fresh outbreak, and the slightest provocation will not only cause an immediate repetition of the disgraceful rows which we have lately witnessed, but also the loss of much life and property. We notice all the cloth shopkeepers in Chuliah-street are taking measures to strengthen their shop fronts. All the streets which were before alive with people till ten and eleven o'clock at night are now deserted towards evening, and the people who used to walk about the town on moonlight nights such as we have at present, prefer trusting to their houses. Lower Reach-street and Ujong Passir do indeed form an exception, but it must be remembered that these quarters are the stronghold of the Toh-Peh Kong.

Since writing the above we hear that this morning at ten o'clock a Chinaman carrying some fruit was beset by

Digitized by Google

about 20 to 30 Chinese at Ujong Passir, and so severely beaten that it is doubtful whether he will recover from it. The Chinaman is a Ghi-Hin, and is reported to have lately arrived from Tongkah. No further reason for the assault can be assigned. As usual in such cases and in the murders which have been lately committed, none of the parties were arrested, nor can any evidence be procured, although the affair took place in broad daylight and in the midst of a thickly populated quarter of the town.

LATEST TELEGRAMS.

(Reuter's.)

JAPAN.

Shanghai, July 20.

Intelligence has been received here from Japan that the Dutch Minister had been fired at by a Japanese in Yedo, but sustained no injury. The assassin had not been arrested.

CHINA.

Hong Kong, July 29.

Grey shirtings, 6½ catty, $3.60.
Water twist, $1.90.
Tea—Export, 40,250,000 lbs.
Exchange on London, 4s. 5½d.
The steamer *Agamemnon*, with new teas, has been obliged to put back with broken shaft, and will probably proceed home under sail.

Shanghai, July 23.

Grey shirtings, 6½ catty, 2.00 taels.
Tea—Congou: firmer prices check to business.
Silk flat. No. 3, 565 taels; settlements in fortnight, 3,000 bales; export to date, 12,000 bales.
Exchange on London, 6s. 3½d.
Freights—Tea, £3.

(Via Kiachta.)

Shanghai, July 25.

Grey shirtings, 2.85 taels.
No. 3 Tsatlee Silk, 540 taels.
Exchange, 6s. 4d.

STRAITS SETTLEMENTS.

Penang, Aug. 9.

Serious coolie riots have occurred here, and all the Europeans are under arms. Tranquillity prevails at present.

H.M. store steamer *Hesper* has arrived from China at Plymouth.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Coffin—On the 23rd Aug., at 51, Oxford-Terrace, Hyde-park, the wife of Major-General Sir Isaac Campbell Coffin, of a son.
Collins—On the 28th June, at Hong Kong, the wife of Mr. Charles Collins, second clerk, Police Court, of a son.
Droege—On the 29th June, at Shanghai, Mrs. A. Droege, of a son, stillborn.
Durrant—On the 21st August, at 13, Montagu-square, W., the wife of Sir Henry Durrant, Bart., of a daughter.
Evans—On the 21st June, at Hankow, the wife of J. H. Evans, of a son.
Gabriel—On the 5th June, Hill-street, Singapore, Mrs. Gabriel, of a son.
Gwyther—On the 24th August, at Meadowcroft, Lower Sydenham, the wife of Howard Gwyther, Esq., of a daughter.
Haskell—On the 9th July, at Hong Kong, the wife of Capt. F. H. Haskell, of a daughter.
Knevitt—On the 22nd August, at Berwick-on-Tweed, the wife of Commander H. P. Knevitt, R.N., of a son.
Marshall—On the 16th June, at Spottiswoode-park, Singapore, the wife of Mr. W. Marshall, of a son.
Marshall—On the 30th June, at Shanghai, the wife of J. Marshall, Esq., of a daughter.

MARRIAGE.

Dix—Coleman.—On the 15th June, at the British Chaplaincy, Hankow, by the Rev. Thos. McClatchie, William Brownsell Dix, of Briston, to Henrietta Maria Coleman, of London.

DEATHS.

Bonhote—On the 22nd August, at 101, Lancaster-gate, John Lewis Bonhote, Esq., formerly of Java, aged 62.
Cobb—On the 7th June, at Anjer, Java, on his passage to Shanghai, George Cobb commander of the ship Wild Deer, of Glasgow.
De Johns—On the 10th July, drowned at Hong Kong, while bathing in the harbour, John De Johns, seaman, residing at the Sailors' Home.
Galton—Lost, on board the Sunny South, on the voyage from Yokohama to Shanghai, during the typhoon which commenced on the 12th of September, 1866, Howard Allen Tucker, fourth surviving son of E. J. Galton, Esq., of Brixton-rise, Surrey, in the 23rd year of his age, deeply regretted.
Gingell—On the 22nd August, at Hastings, Eleanor, relict of the late Edward Gingell, Esq., of Fulham-road, West Brompton, aged 77, deeply lamented.
Mackenzie—On the 15th August, at Shanklin, Isle of Wight, in the 31st year of her age, Margaret Ruxton, wife of D. Mackenzie, Esq., of Shanghai, China.
Macpherson—At Santa Cospa Coffee Estate, Mercara, Singapore, Duncan Macpherson, M.D., Inspector-General, Madras Army.
McTaggart—On the 13th August, at his seat, Ardwell, Stranraer, N.B., in his 79th year, Sir John McTaggart, Bart., for many years M.P. for the Wigton District of Burghs.
Mallan—On the 10th July, at the General Hospital, Hong Kong, J. Mallan, private, Army Hospital Corps, aged 29, of cholera.
Saunders—On the 4th July, at the Civil Hospital, Hong Kong, T. Saunders, police constable, aged 23 years.
Shaw—On the 29th June, at the Shanghai General Hospital, of apoplexy, Alphens Franklin Shaw, a native of Portland, Maine, U.S.A., aged 39 years.
Shields—On the 28th June, at Hong Kong, William Shields, master mariner, aged 53 years.
Simpson—On the 21st June, at the Seaman's Hospital, Hong Kong, James Simpson, engineer, aged 35 years.
Smith—On the 25th June, at Hong Kong, — Smith, seaman belonging to H.M.S. Salamis, who was found drowned, supposed to have fallen overboard when asleep.
Spooner—On the 20th August, suddenly, of apoplexy, at his residence, Poonah House, West Worthing, Sussex, Richard Spooner, Esq., son of the late Richard Spooner, Esq., M.P., and formerly of the Bombay Civil Service, in the 57th year of his age.

COMMERCIAL REPORT.

CHINA AND JAPAN IMPORTS.

Hong Kong.—Nos. 16 to 24 Yarn have been in request at former rates, for shipment coastwise, but other numbers are not much wanted, and have slightly declined. Piece Goods have not been dealt in largely, owing in a great measure to the condition of stocks. Grey Shirtings are nominally lower; White Shirtings, T-Cloths, and American Drills dearer; and other descriptions unchanged. Woollens are very firm, but Spanish Stripes alone show any improvement in value. Metals generally are improving. The Ginseng market is lifeless, and sales could only be effected at very low figures. Coal: English and Australian are a little weaker—there is no Anthracite on offer. Flour and Wheat are again dearer, the additions to stock being very limited.

Shanghai.—Cotton manufactures have been in fair demand, purchases having been freely made on Ningpo account, and rates advanced to 2.77 taels for 8¼ lb. Grey Shirtings. Tientsin quotations are less favourable, and Hankow market affected by the suspension of a large house there. Grey Shirtings: There has been a large business done since last mail at gradually advancing rates. Sales from first hands amount to about 100,000 to 120,000 pieces, leaving stocks with *bona fide* imports very bare. The highest point touched has been 2.77 taels per piece for best 8¼ lbs. Eagle Chop, at which rate there are now not many sellers. Prices have been materially assisted by foreign and native speculation. T-Cloths have been in fair demand, ordinary to good cloth being most asked for. Several sales of 7 lbs. are reported at 2.15 to 2.20 taels per piece; but for the few parcels good cloth in stock higher prices are asked. White Shirtings: The lower counts have been in moderate request at higher rates, 56 reed having realised taels 2.45 per piece and 60 reed taels 2.55 to 2.60 per piece. The higher numbers are not wanted. Camlets: Are difficult to place, only the best colours being saleable, ordinary assortments

Digitized by Google

may be quoted at taels 13.50 per piece. Spanish Stripes: Good colours are saleable at last quotation and there is some sign of a better demand. Long Ells: Scarlet still in less favour but good assortments maintain their former value. Figured Orleans: Large sales are reported at a decline of about 3 mace per piece on last prices. Metals: The market remains without change. The Dunmail brings about 200 tons of Iron. Nail Rods may be quoted at taels 2 50. Lead at taels 4.90 to 5.10. Coals: The cargoes per Sir W. Wallace and Fusiyama have increased stocks of Welsh and Sydney. The demand is less active for Australian and Japan cargoes, but as stocks on the market, of all descriptions, are light, rates continue very firm.

YOKOHAMA.—We have to note a sale of rifles to the Government of as much as one hundred thousand dollars' worth. In staple imports the activity reported last mail in Yarns and Grey Shirtings remains unaltered. Considerable sales of Black and Assorted Velvets have been made at a reduction on our last quotations. Black Lastings have come into sudden demand. Camlets continue heavy, but a few sales have been made, and other woollens are not inquired for. It is to be remarked that many of the reported sales have been in barter for a portion of what little Silk and Tea has been brought to market. The now excessively high value of the dollar in native coin—the quotation being 388 boos per 100 dollars—of course materially checks business.

CHINA AND JAPAN EXPORTS.

TEA.

YOKOHAMA.—The market has been almost entirely inactive. About 800 piculs of new tea of medium quality have come in, but holders ask higher prices than foreigners are inclined to give, and but 180 piculs have been bought. Quotations remain as per our last.

SHANGHAI.—Black Teas: There has been a little more activity displayed in this market, some demand having sprung up for teas for the steamer Agamemnon, and also to complete the cargoes of sailing vessels that have left during the fortnight. Prices, still irregular, are about on a par with former rates, the value of medium teas having been especially well maintained. There appears to be an unusual absence of fine tea, notwithstanding the very large stock on show. Flavoury Ningchows and Hohow Kaisows have continued to command a preference, the few re-sales of Hankow teas having been at ruinous rates to holders. A large quantity of teas bought at extravagant prices have come down from the river ports in foreign hands to compete with the native stock, and as the second crop had begun to arrive in Hankow, we may expect a still larger increase before the next mail leaves. Our present stock is estimated at about 70,000 chests, against 40,000 at same date last year. Green Teas: The market for the new Pingsueys was opened on the 25th June by the purchase of a chop at 40 taels, the same price as that paid at the opening of the market last year, a fortnight later. Since then arrivals have been taken up eagerly at taels 36½ to 40 for fair to fine chops. The Teas generally are much mixed, and we notice the same absence of strength that distinguishes the Black Teas this season. There is no stock held here, the Teas being shipped up from Ningpo by steamer as sold. One chop of old Fychow has also been settled at 34 taels, bringing the total fortnight's sales up to 12,000 half-chests. The fine Moyunes from Chinkiang continue to be firmly held; these, with 2,000 packages Shanghai-packed, comprise the whole of the stock.

KIUKIANG.—Reported settlements to the 1st July amounted to about 3,200 chests, at 24 to 25 tls. per picul, but a great portion of these were shipments on native account, there being no general desire to buy, except very much below the teamen's ideas. Green Teas were said to be very cheap in the country, good medium chops costing about 25 to 26 tls. laid down in Kiukiang.

HANKOW.—Advices to 28th June state that settlements for the previous fortnight had amounted to 33,000 chests, at advanced rates for medium to fine Oopacks, a few chops having been settled on a par with last mail's quotations. A few musters of second crop Oopacks had just arrived, and were of very indifferent quality. There were no finest teas left. The market closed quietly.

FOOCHOW.—Congou: A large business has been transacted, medium and common grades have been wanted for Australia, and for these kinds prices have been fully supported. Fine has in one or two instances been settled at slightly easier rates. The Teas of the second crop from the lower districts are now beginning to come forward, and appear to be of fair average quality. Souchong: The demand has continued for this description, and taking quality into consideration, somewhat higher prices have been paid. Oolongs: The demand for America has not yet commenced, but the teamen are holding firmly. Flowery Pekoes: A few small parcels have been settled at irregular prices. Scented Teas: Unlike the former ones, those now coming forward are well scented and of very good quality.

CANTON.—During the fortnight a moderate business has been transacted, principally in scented kinds, the chief portion of which was settled shortly after the departure of last mail; the market closes quietly, operators showing but little inclination to continue purchasing at present rates. Country Congous: The entire stock of old season Congou, with the exception of a small chop of 170 chests withdrawn from the market, has been cleared by two foreign houses at from 14½ to 17½ taels. Two chops new season teas have been placed on the market, and others are shortly expected. No bids have as yet been made for these teas. Country Greens: No inquiry whatever exists for the three chops on the market, the extreme prices demanded precluding business. Canton-made Teas: About 1,500 boxes Canton-district Congous have been settled at from 25 to 26½ taels; it is now difficult to meet with parcels possessing sufficient strength to induce purchases to any extent in this class of teas. In Scented Orange Pekoes 6,500 boxes have been settled at from 20 to 32½ taels, and 13,500 boxes Scented Capers at 13½ to 31 taels. Canton Gunpowders: About 2,500 boxes have been settled, as well as 600 boxes young Hysons, the former at from 20 to 24½ taels, and the latter at 20½ taels.

SILK.

YOKOHAMA.—The market has been completely cleared during the fortnight of all Hank sorts, the sum amounting to only about 160 piculs. There remain, perhaps, 100 piculs of low kind in stock, but the bulk of this is unsaleable. We are anxiously expecting supplies of the new crop, of which only one or two bales, much mixed with old silk, have as yet reached us. No estimate can, therefore, be formed of its quality. All native reports concur in stating that we shall have not less than 16,000 bales this season.

SHANGHAI.—Immediately after the departure of the last homeward mail on the 24th June, settlements of Silk were briskly resumed at daily advancing prices, and transactions have rapidly increased until they now reach 2,000 bales, only a small proportion of which are chops. Prices show an advance of fully tls. 10 to 20 per picul for Tsatlees, tls. 5 to 10 per picul for Karshing Taysaams, and tls. 10 to 20 per picul for Yuenfas and Hainings. For Chop Silks the dealers are very firm in their demands for the quotations given below, though for medium and common descriptions they appear, as the mail is closing, somewhat more anxious to realise, and would submit to a decline in prices. This desire evinced by the natives to accept lower rates is owing to the large proportion of our present unsold stock being composed of these descriptions of silk. The late heavy rains are reported to have seriously interfered with the gathering of the second crop, and the yield consequently is not expected to realise former estimates; yet we think it is certain that fully 45,000 bales of silk will be available for export for the season of 1867 and 1868, as the first crop's yield was so successfully collected. The latest advices to hand from the interior report less business transacted.

CANTON.—The arrival of about 90 bales Tsatlees and 120 bales Loongkongs has placed us well in stock. The finer descriptions were eagerly sought after, and a good business has been done in Tsatlees, notwithstanding the excessive rates demanded by holders. Really fine fetched as high as $640 to 660 per picul, good clean round thread $620 to 625, and the usual No. 1 $595 to 600. Prices remain firm, and 20 to 30 bales in stock are held for rates as quoted. The produce of the third crop has not yet been placed on this market; from all accounts the yield is said to have been a fair average one, and the silk of good colour and quality. In re-reels settlements amount to 80 boxes for the fortnight; the demand for this kind of silk is slack, and no buyers are to be found at present quotations. Settlements and quotations are as follows: To Europe, 10 bales Loongkongs and 90 do. Tsatlees, equal to 100 bales; to America, re-reeled Cumchook 80 boxes.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Cardiff, June 19, Nellie Hastings; from Clyd (via Hong Kong, &c.), July 7, str. Dragon (reported by telegram).

At SHANGHAI.—From London, July 1, Vigil; 4, Dunmail; from Cardiff, 4, Sir W. Wallace; from Sunderland, 5, Coral Nymph.

At HONG KONG.—From London, July 2, Naomi; from Liverpool, 8, Sardinia; from Cardiff, 1, Chalgrove; from Newport, 7, Prudhoe; from Newcastle, 7, Luis Henry; from New York, 2, Samuel Russell, Wild Gazelle; from Clyde (via Singapore, &c.), June 28, Hayo Maro, str. from London, Solent (reported by telegram).

At MACAO.—From Lisbon, July 6, D. Maria Pia.

At MANILA.—None.

At SINGAPORE.—From London, July 10, Benvoirlich; from Liverpool, 14, Simoon; from Glasgow, 18, Lamont (str.).

At PENANG.—July 7, Benvenue.

DEPARTURES.

From YOKOHAMA.—For New York, June 16, Benefactress.

From SHANGHAI.—For London, July 3, Silver Eagle.

From FOOCHOW.—For London, July 27, Belle of Southesk; 28, Chusan; for Liverpool, 23, Everest.

From HONG KONG and CANTON.—For Liverpool, July 29, Capriolani; for New York, 4, Ethel.

From MACAO.—For London, July 8, Falcon.

From MANILA.—For Cadiz, June 28, Elena; for New York, 25, Daniel Marcus.

From SINGAPORE.—For London, July 19, Lanercost; for Falmouth, Antilope; for Liverpool and Glasgow, 10, Edinburgh Castle; for Boston, Catherine.

From PENANG.—For London, July 14, Zingra.

VESSELS LOADING.

At YOKOHAMA.—For London, none; for New York, Havelock.

At SHANGHAI.—For London, Isles of the South, Elmstone, Coulnakyle, Peter Denny, Anglo-Saxon, Hoang Ho, Jubilee, Lennox Castle, Mary Whitridge, Sovereign of India, Star of China, Helen Nicholson, For New York, none.

At FOOCHOW.—For London, Shunlee, Armadine, Argonaut (all full), Pakwan, Burdwan, Thomas Bell, Morning Star; for New York, none.

At HONG KONG and CANTON.—For London, Alma, Wemyss Castle, Niphon, Passe Partout (filling up at Macao).

At MANILA.—For London, Lady Agnes Duff, Odulia (via Cebu), Trinidad (do.); for Liverpool (via Cebu), Sales; for Falmouth, Chalmers, Evangeline; for Pernambuco, Sir H. Parkes.

At SINGAPORE.—For London, Admiral de Winter, Corneille David, Meg Merrilies.

At PENANG—For London, Benvenue; for Boston, Alexander.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, cotton and tea, £3 to £3 10s. per ton of 50 cubic feet; silk, £4 to £4 10s. To New York, £2 10s. to £3.; per steamer $45 per ton of 40 cubic feet.

At SHANGHAI.—To London the rate is £3 per ton; disengaged tonnage not so abundant, in coasting charters little is offering.

At FOOCHOW.—To London, £3 per ton.

At HONG KONG and CANTON.—To London direct there are no fresh settlements to report; the Charlgrove, however, is expected to take the berth at Canton at £2 10s. per ton. To New York there is no inquiry for tonnage. The number of disengaged vessels in harbour, according to the circular of George Holmes, is, exclusive of Siamese, 17, representing 10,302 tons.

Digitized by Google

AT MANILA.—Suitable vessels are scarce, but arrivals are expected. The only settlements in the fortnight have been of Spanish vessels, viz.:—The *Trinidad* for Liverpool, taking dry sugar at £2 10s., and hemp at £3 per ton. The *Sales* goes to Cebu to load for Liverpool at £3 for wet sugar and £3 5s. per ton for hemp, after taking 150 tons wet sugar from this port. The *Odulia* has obtained £3 for wet sugar, and £3 15s. for hemp to load at Cebu for London.

At SINGAPORE.—Freights continue firm, and there is still a great scarcity of shipping in the harbour. The demand for vessels is not large, and a few disengaged ships dropping in would at once weaken rates. Rates to England are firm at £3 10s. per ton all round. The Admiral de Winter, Corneille David, and Meg Merillies, are loading at this rate for London; and the Huntly Castle, daily expected from Penang, is almost fully engaged for Liverpool. Ships are inquired for to load in Java for Europe at £3 10s. per ton, but this offers no inducement.

SHIPS' REPORTS.

SHANGHAI.

British ship Pegasus arrived at Shanghai July 5. March 28th left New York. Experienced first part of the passage strong N.W. and W.N.W. winds up to 20 N. lat. From thence to crossing the Equator, April 18, light E. winds. Off the meridian of the Cape of Good Hope May 11; thence to St. Paul's Island; had W.N.W. gales and heavy seas. May 24, in 38 S. lat., 73 E. long., lost 3 boats and part of bulwark by a heavy sea coming on board; sighted Java Head June 9. 13, anchored at Anjer; 8 p.m., left Anjer; passed through the Straits of Gaspar 14. The latter part of the passage S. winds with squally weather. June 1, in a squall from the S.E., lost main top-gallant mast. July 3, made the Saddle Islands; 4, received a pilot on board, making the passage in 96 days from pilot to pilot. Spoke the following ships in the Straits of Sunda: British barque Meteor, from New York to Shanghai, 90 days out; British barque Baracouta from Liverpool, bound to Japan, 117 days out; British barque Lanercost, from Liverpool to Singapore, 115 days out; British ship Cambura Castle, from Glasgow to Singapore, 97 days out; British barque Naomi, from London to Hong Kong, 98 days out; June 23, passed ship Helen Ritchie bound S.

Sir William Wallace, British ship, arrived at Shanghai July 4th, left Cardiff Feb. 18.; experienced strong S.W. gales till 4th March; in the lat. of Scilly Islands very unsettled weather; had very poor trades till 27th, when experienced westerly gales, losing part of bulwarks; arrived off Java Head June 1st; spoke steamer Hayamaro on 4th; called at Anjer; ship Seawfell passed through bound north; passed Gaspar Straits June 9th, in company with ships Philomela and Dunmail; very squally weather till off Pulo Sapato; June 16th passed ship Belted Will, bound to London; arrived at Light Ship July 2nd.

Dunmail, British ship, arrived at Shanghai July 4th, left London March 9th; discharged pilot on the 11th at the Downs, spoke the ship Raghabmabub in 42 N., 12 W.; 29th, E. Flemming 28 N., 22 W., from Greenwich to Otago; Simoon, from Liverpool to Singapore, 40 days out; April 11th passed the Equator; 16th, lost one man overboard, fell from main top gallant yard; May 8th passed meridian of the Cape; prevailing winds from N. to W.; made the passage from pilot to pilot in 113 days.

HONG HONG.

The British ship Stuart Wortley, reports having left Cardiff on the 13th March, passed the meridian of the Cape May 9. Very heavy weather to the southward, washed away a great part of the bulwarks, and stove in the front of the poop, filling the cabin. On May 21 experienced a perfect hurricane which lasted two days in which the sea struck her stern and started a butt. Passed the ship Roslin Castle hove to. Sighted Amsterdam May 23, after which the wind moderated. On June 1, in lat. 21.42 S., 105.57 E. signalised the barque Lannercost from Liverpool to Singapore 106 days out.

The British steamer *Hayo-Mayo*, reports having left London on the 7th March and Cardiff on the 21st. Experienced strong westerly winds with snow and hail until within one day of Madeira. Anchored in Funchal March 29th, and after coaling left again on the 31st. Steamed to St. Vincent and arrived April 4th, Left again on the 6th after taking in more coal. Crossed the line April 14 in 6 west. Moderate S.E. trades and anchored in Table Bay April 29th. Left again May 5th, and had fine weather to the 21st, when she experienced a severe hurricane, which lasted twelve hours; split sails, lost one lifeboat, stove in engine-room and saloon skylights and smashed the gig. Arrived at Anjer on June 4, and left again on the 5th. Singapore on the 7th, and remained there until the 20th. Calms and fine weather up the China Sea, but was detained on account of being short of coals. The voyage was performed under one boiler, and partly under sail alone. Off Java Head spoke the Sir William Wallace, and in the Straits of Sunda the Fortuna, both from Cardiff for Shanghai.

The British ship Sardinia reports having left Liverpool on March 6. Experienced fine weather down Channel, and heavy gales in the Bay of Biscay. Moderate N.E. trades, and crossed the Equator on April 16, in 25.19 W. steady S.E. trades, and afterwards heavy S.W. gales to the meridian of the Cape, which she passed on May 14, in 40 S. A succession of heavy westerly gales in running down the easting, during which a portion of the bulwarks were washed away. In 41 S. and between 50 and 60 E. experienced a cyclone, in which the barometer fell to 28.48, lasting twenty-four hours, and appeared to be travelling in an E.S.E. direction. During this time it blew a gale from every point in the compass, with a heavy cross sea. Continuous heavy weather to Amsterdam, which was sighted on May 28. Anchored in Anjer Roads on June 19, and experienced light easterly winds from Pulo Sepata to Hong Kong. Spoke several vessels during the passage, but none of them bound for ports in China or Japan.

The British ship Naomi reports having left the Downs on March 5. Crossed the Equator on April 17 in 18.40 W., and the meridian of Greenwich on May 5, in 37.30 S. Rounded the Cape on May 18, in 39 S. Experienced heavy gales until past St. Paul's. Entered Straits of Sund June 9. Light southerly winds and fine weather up the China Sea. Spoke no vessels.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—August 12, at New York, from Nagasaki, Elsabea; 23, off Falmouth, from Rangoon, Germania; 22, at Brouwershaven, from Batavia, Anna; 25, in the Downs, from Colombo, Marie Eliza; from Singapore, Octavia; from Akyab, Natalia; 26, at London, from Macao, &c., Acacia; at Deal, from Colombo, Empress; 27, at Falmouth, from Rangoon, Palmyra.

DEPARTURES.—Aug. 24, from London, for Shanghai, The Sir Jamsetjee Family; for Yokohama and Nagasaki, Pampero; for Colombo and Calcutta, Peeress, Harkaway, Clyde; for Hong Kong and Canton, Chaa-Tze; from Rotterdam, for Padang, Maria Sarah; 23, from Cardiff, for Galle, Dunloe; 16, from Shields, for Batavia, Jacoba; 26, from London, for Cardiff and Galle, Ernesto Parodi; 24, from Cardiff, for Nagasaki, Vulcan (s.s.); for Hong Kong, Ocean Spray; for Singapore, Crested Wave; 7, from Havana, for Hong Kong, Alta Gracia; 22, from Glasgow, for Yokohama, Runnymede; July 16, from Callao, for Amoy, Frederica.

LAID ON.—At London, for Shanghai, Lahlos, Spindrift; at Liverpool for Singapore, Harvest Home. At Liverpool for Singapore, Prince Arthur; for Hong Kong, Arab; for Sourabaya, Fayel; at Glasgow, for Samarang, Jane Spiers; for Hong Kong, Sunrise, (s.s.)

SPOKEN.—Tamerlane, London to Shanghai, July 7, 1 S., 23 W.; Vriendschap (not as before reported), Rotterdam to Batavia, July 8, 6 N., 24 W.; Amersham, from Penang, Aug. 21, 49 N., 6 W.; Aline, Havre to Hong Kong, July 20, 11 N., 29 W.; Java Packet, Amsterdam to Batavia, June 26, 3 N., 24 W.; Colorado, Boston to Hong Kong, June 27, 26 S., 26 W.; Scotland, the Tyne to Galle, July 20, 9 N., 24 W.; Herman de Ruyter, Amsterdam to Samarang, Aug. 14, 46 N., 12 W.; Francina Willemina, Sunderland to Batavia, Aug. 16, 48 N., 7 W.; Robertus Hendrikus, Sourabaya to Rotterdam, Aug. 12, 42 N., 29 W.

A NOVELTY FROM SWATOW.—A document perfectly *unique* in its way has reached us in the shape of an address from the Chinese inhabitants of Swatow to G. W. Caine, Esq., the Consul for that place, who is at present in England, but returns by the next mail. We present to our readers the following extract:—"At the moment of leaving, you were pleased to say that your triumphal return to your noble country would not cause you to be absent from us for more than nine months. Having heard these words the people of Swatow waited patiently for you month by month. Alas, at this time more than ten months have passed away, and no one has yet witnessed the advent of your Excellency! The eager expectation of the merchants and people may truly be likened to the longing of those who 'in time of drought watch for rain.' With one consent, therefore, we join our names together, and write to entreat your Excellency to show indulgence to the circumstances of our case, and to address on our behalf a memorial to the Sovereign of your noble country, praying the Imperial permission to gratify the expectations of the people by returning at once to take up your former post at this port.

CHINESE AND JAPANESE IN CALIFORNIA.—Both Chinese and Japanese immigrants are settling in California in considerable numbers. The San Francisco correspondent of an American journal, in a recent letter, thus speaks of the settlers and the differences between them:—"There is one

Digitized by Google

marked difference in the characters of the Japanese and the Chinese which is already becoming apparent to our people. The Japanese are quick to appreciate the advantages of foreign improvements of all kinds, and readily adopt our manners and customs when travelling among us. They are anxious to perfect themselves in all our arts, and to study our institutions in the minutest details. In this they differ from the Chinaman. The latter is 'a law unto himself,' and however long he may remain among us, he remains essentially a Chinaman. His civilisation is older than our world, if the Mosaic account of the creation is correct, and he is perfectly content therewith. In his dealings with us he conforms cheerfully to our laws; and is in this respect a model which our own citizens might study to advantage; but he governs his family, his trade, and all his private and social affairs by the laws of Confucius and the habits and customs handed down to him through countless generations of his ancestors. Every vessel coming from Japanese ports at this time brings a greater or less number of Japanese of wealth, coming to study our customs and learn all which is worth their learning of our laws, institutions and civilisation generally. There are already four Japanese students in our city college, where no Chinaman ever entered even as a spectator, and by the *Colorado*, on her last trip, came a number of Japanese gentlemen who propose to study the art of navigation and marine warfare, as taught at the Mare Island Navy-yard, under Admiral Craven. One of them is a prince, and he daily promenades Montgomery-street with two or three followers, wearing a curious sheep-shed shaped, three-cornered hat of glazed material, and two swords in his girdle. His servants have already adopted the full American costume, and he is making progress in that direction, having already got as far as the pantaloons, coat, vest, and boots. These fellows have a sharp eye to business, and, if they could be promised protection against unjust laws, and the violence which is constantly practised on the Chinese by the half-civilised, ignorant, and degraded portion of our population, native and foreign born, they would soon be here in force. They see thousands on thousands of acres of rich land in the low valleys of the Sacramento and San Joaquin lying idle and unproductive, and would buy it and turn it into rice and corn fields immediately, adding thereby millions to the taxable property of our State. As it is, some of them now offer to contract for 10,000 skilled labourers and artisans warranted superior to the Chinese for field work or workshops, or on railroads, at less wages than the latter now earn, and it may be that the Central Pacific Railroad Company will make a contract with some of them as an experiment. The Chinese have worked so well on the railroad that the company would employ more (they now have 11,000 of them at work) if they could get hem, and may take Japanese instead."

Japanese Emigration to California.—The following is from the *California China Mail*:—"A city contemporary, in remarking upon the Japanese quickness to learn, and readiness to adopt foreign arts and improvements, says:—'The attention of the Japanese who have already visited California is attracted to the great extent and cheapness of our tule lands, which their countrymen would willingly turn into rice fields. Now that the Government of Japan has removed the prohibition of emigration, we may look for the arrival of Japanese labourers, to whom California rates of wages appear very tempting. We understand there are parties in town who offer to supply ten thousand or more skilled Japanese labourers at the rates paid Chinamen, to whom they will guarantee them to be in every respect superior.' We shall be but too glad to see these labourers, and more like them, fairly established among us. The one crying necessity of our State is an industrious population; men fit to build roads, to drain marshes, to cultivate the soil; above all, the last. Of men for the manual labour needed in the cities we are likely to have enough; it is the agricultural population that fails us. Whether superior to the Chinese, or merely his equal, the Japanese is wanted here; there is more than room for all that are likely to come. The remark about our tule lands is very much to the point; the millions of acres of such land now lying useless could be turned to immediate account by both Chinese and Japanese, whose systems of agriculture, according to Liebig, are superior to any others of which he has knowledge. We consider it the true policy to encourage the emigration of these people of every class; but we especially need the agricultural labourers. Many branches of our manufactures may be carried on without Chinese or Japanese labour, but our agricultural future absolutely depends upon them. As tillers of the soil they would add to our wealth in the surest and most solid way; and they would be almost entirely removed from the danger of collision with other labourers, of "superior" race, but decidedly inferior to these Asiatics in the social virtues of quiet and orderly conduct. If the Government could be brought to see what is our true interest, we should suggest that land be offered in full possession to Chinese or Japanese settlers, as it is already offered to European emigrants. Such a measure would effectually knock on the head all schemes in any way resembling the coolie trade, and the State would gain an industrious, energetic population, who would make the rich soil of California outdo everything hitherto related of its wonderful productiveness.

The Oriental Restaurants at the Paris Exhibition.—The Japanese have a couple of pretty-looking toy-structures in the park—the first a sort of summer-house, not unlike a big sandal-wood cabinet, erected by the Daimio Satsuma, one of the few hundred foreign princes who have come to Paris for a holiday; the other a genuine Japanese tea pavilion, situated within a little enclosure which you have to pay five sous to enter. There you generally encounter a party of Japanese loungers—members of the suite of the Shiogoon's little brother, probably. They all wear the national costume. The tea-house is built of bamboo and some choice white wood, and has its little counter, at which tiny cups of tea, with sugar-plums to sweeten it are retailed; and also a tea-room where both tea and liqueurs are supplied to the guests, who, go at what hour of the day you will, are sure to number among them one or more Japanese elegants who have assumed the latest Parisian costume—cutaway coats or spencer jackets, painfully tight trousers, and low-crowned hats, and who, with their neckties, scarf-pins, and watch-chains of the Jockey Club type, would, were it not for their peculiar physiognomy, pass well enough for "gandins" of the Boulevards and the Bois. In an adjoining little salon are three young Japanese damsels with their hair turned up and twisted above the nape of the neck into chignons, which are ornamented with little crape crowns and pierced in a slanting direction with bronze pins. Their tunics and tight-fitting underskirts are of flowered silk; the loose sleeves of the former serving the purpose of pockets. These young ladies, named O-Kane, O-Sato, O-Soumi, drink tea, smoke, play at cards, and laugh, ogle, and prattle with the liveliest of their sex. Like the Japanese tea-house, what is called the Café Chinois stands in an enclosure of its own—a veritable Chinese garden, stocked with real Chinese shrubs and flowers, tended by genuine Chinese gardeners, and entered through a lofty red green painted gateway where a toll of half a franc is exacted of you before you are permitted to pass the barrier. A gradually ascending pathway leads to the tea pavilion, said to be an exact model of the kosque in the garden of the Emperor's summer palace at Peking. The first floor of this gaily decorated pavilion forms the "Café et Restaurant Chinois;" the sole Chinese characteristics of which are, first of all the decorations of the apartment; next its cookery, which does not appear to be much in demand, for the swallows'-nest soup costs twenty francs the portion, and the cheaper dishes range from two francs and a half to three francs the portion. The chief characteristic of the establishment is unquestionably its tea. It is served to you by Parisian garçons, it is true; but as you are informed, "a la Chinois," in cups without handles, but with lips, which you move slightly on one side when you are disposed to drink, so as to escape being choked by a mouthful of tea leaves; for Chinese tea "a la mode de l'Exposition" is made by pouring boiling water upon a little tea put into the cup itself. Adjoining the café is a small pavilion where you can purchase scented tea done up in tinfoil packets of a couple of young Chinese "dames de comptoir," who we are informed came from the province of Fokein.

Russian Tea-houses.—The tea-houses of Russia are quite as characteristic a feature in the manners and customs of that country as those of Japan. Mr. Lumley, Her Majesty's Secretary of Embassy at St. Petersburg, states in a recent report that in the capital alone there are 697 common tea-shops, besides the cafes and restaurants of a superior description, the daily consumption of tea at some of these places being from 80 to 100 lbs. They are the resort of the droschky drivers, carters, and labourers of every description; and it is not without interest to witness the orderly behaviour and polite demeanour of these poor peasants. As they enter the long room in which the tea is served, each man greets the bar-keeper, and, as he passes the sacred image, which is to be found in every Russian room, and before which a lamp is always burning, he reverently doffs his cap, and while in the room all remain uncovered. Numerous tables are ranged along the apartment, at each of which may be seen groups of six or eight sturdy moujiks wrapped in their sheepskin pelisses, which are worn with the fleece inwards, and which, no matter what the heat of the room, are seldom taken off or even opened. A large teapot of boiling water, and a smaller one containing an allowance of tea for each man, are placed on the table; a plateful of small squares of black bread, a saucer of still smaller lumps of sugar cut like dice, one for each man, and a glass of corn brandy constitute the repast. Both teapots are generally replenished as soon as the larger is emptied, but occasionally the larger one alone is refilled, and the liquid becomes tea only in name. The tea is drunk out of saucers, and the sugar is not put into the tea but is held in the mouth; some poor fellows who are still more economical will put a piece of black bread in the saucer, place a lump of sugar on the bread, pour in the tea, and after drinking two or three cups in this way, wrap the slightly diminished piece of sugar in paper and carry it away with them. Time seems to be no object to the tea-drinkers, and at a sitting many will take six or eight and even more cups of tea before turning the cup down in the saucer as the sign that they have had enough. The effect of the atmosphere heated by stoves to 75 or 85 deg. of Fahrenheit, in a low room from which the air is carefully excluded by double windows, combined with these numerous cups of hot tea, on a body wrapped in a sheepskin pelisse, may be easily conceived. The tea-drinker, while imbibing his favourite beverage, is literally taking a modified vapour bath; some men will go on steadily drinking until they have reached a condition which is denoted by the term "Pey do tretiavo pota," to drink to the third degree or expression of transpiration, after which they will sally forth into a temperature of perhaps twenty degrees below the freezing point, and throwing themselves on their sledges, fall asleep enveloped in steam, having thus imbibed, and this no doubt intentionally, a sufficient amount of caloric to last them to the next halt, where a repetition of the tea-drinking takes place on the same scale and with the same effect.

American Telegraph to China.—The *New York Times* has the following, for the encouragement of American enterprise in this direction:—"The completion of the railway tunnel through the Sierra Nevada Range shows with what rapid strides we are clearing a pathway to the Pacific. These gigantic enterprises and improvements, moreover, we have the satisfaction of thinking are to be carried out solely with American capital, and will be permanently controlled by American skill. We want the same to be said of the great telegraphic projects which are to connect our west coast with Asia, and which are bound to penetrate into Asiatic Russia along the coast of Japan, and connecting all the great ports of that country, as well as China, which are now open to American trade. We cannot afford to lead only in the establishment of new steam lines for the East. An American company has got the advance of all others in securing a most liberal charter from the Emperor of China for running a coast telegraph line a distance of nearly 900 miles along what may be called the great marine highway of the Empire. That work the directors of the East India Company in New York find themselves, we understand, in a position to construct at once. Their programme is the purchase of the cable which was made for the Russian Telegraph Company, which is now the property of the Western Union Company, and which lies on board a vessel in Vancouver's Island port. Let us hope the directors of the Western Union Company will find themselves in a position to accept the offer which we hear has been tendered them for the Russian Cable. Whatever expedites the commencement of the China line insures the continuance of its control in American hands. British capitalists are eager to step in, provided only they can secure a controlling interest. The Western Union Telegraph Company are interested in preventing *that*, if possible. The Pacific Mail Company are equally interested in making the China telegraph first, and principally and always tributary to our commerce. Let us urge upon both the importance of having the American Company which secured the charter retain possession of it under all circumstances."

Suicide of a Japanese Student in the United States.—Ashiwara, one of the six Japanese youths who have been pursuing their studies at Monson, Massachussets, lately committed suicide by hanging. His absence from his boarding-house all night roused suspicion, and search was commenced by a number of the citizens. Twenty-four hours after his disappearance his body was found suspended from the limb of a tree in a retired spot about a mile east of the village, and a little distance from the highway. Beside him on the ground lay his hat, coat, and umbrella, and around his neck was tightly knotted a strip of cotton cloth which he had taken with him from his house, showing that the act was one of mature and deliberate premeditation. His watch was found going, and his pockets undisturbed. His body was immediately removed and the remains prepared in the Christian order for burial, his countrymen assisting in the sad offices. The cause of the act was undoubtedly extreme depression of spirits, resulting principally from a chronic disease which had for many months afflicted him, and from which there was little or no hope of relief. Ashiwara was about thirty years old, and left a wife at his home in Yokohama, whence he came by way of San Francisco, arriving at Monson in November. The deceased Japanese is spoken of by his instructors and acquaintances at Monson as a man of true and unusual nobility of character, and industrious and faithful to his duties. He was sensitive to the last degree on all points of honour or personal reputation, and during his stay in this country had won the esteem and regard of all with whom he had come in contact. During the first few months of his residence at Monson he was often oppressed with home-sickness and earnest longing for his native land, but had lately seemed to overcome in a great degree these feelings, and appeared quite contented.

Music in China.—The Boston *Evening Post* has lately contained some interesting intelligence on the musical capacities of the Chinese, in reference to the statement of "a gentleman in Hong Kong," who claims to be the first to have instructed the Chinese in European music. An Episcopal clergyman, who long resided at Shanghai, upsets the claim without hesitation, and mentions sundry details which are sufficiently curious and instructive. He says that the Episcopal schools at Shanghai have taught European music to Chinese boys and girls for many years with great success, and that Chinese organists are employed both in school and mission chapels. The Presbyterians at Ningpo have done the same, and in 1858 they published a psalm book in Chinese with 250 tunes. But the most remarkable success has been that of the Roman Catholic clergy. Mr. Styles, the Episcopal clergyman who gives the information, says he can vouch for the fact that elaborate mass music is sung by Chinese choristers in the Catholic cathedral at Shanghai, accompanied by an organ made with bamboo pipes. Considering, indeed, the extraordinary imitative powers of the Chinese in general, it would be surprising if they were incapable of taking to European music. But still it is interesting to know the real facts, when they can be got at. Mr. Styles adds that they have a great fondness for anything in the shape of an opera, but condemn the ballet as indecorous.

Naval and Military.

The following troops have embarked at Gravesend on board the chartered troop-ship Coldstream (belonging to Messrs. Teighe and Smith) for Singapore:—Three battalions, two brigades, consisting of four officers and 101 non-commissioned officers and men of the Royal Field Artillery (3rd battery, 2nd brigade), five men of the Army Hospital Corps, and Staff-Assistant-Surgeon Donovan, 10 soldiers' wives, and 15 children. The officers of the above battery are Brevet-Major Talbot, and Lieutenants Hubback, Shippard, and Atchison.

The Rodney, which sailed hence on the 23rd April last, arrived at the Cape on the 12th July, and left again for China on the 18th.

The official account of the receipt and expenditure of naval prize, bounty, salvage, and other moneys between the 1st of April, 1866, and the end of March in the current year shows that the total receipts from these sources amounted collectively to £45,803. Of this sum £12,020 was derived from slave and tonnage bounty, £3,194 from salvage services rendered by Her Majesty's ships, £3,760 from bounty for destruction of pirates, £1,331 from booty captured in China, £1,661 from captures for breach of blockade, and £6,082 from grants for special service in China. There are also sums of £973 derived from Indian prize money, of £1,002 from booty captured in Pegu, and of £8.071 for stores captured at Kertch and Yenikale in 1855, as well as £5,599 derived from unclaimed prize money. From the detailed statement of slave and tonnage bounty given in the appendix, it appears that accounts as to 85 captures are still unsettled, one of which dates back as far as August, 1857. The sum distributed or paid on account of the slave and tonnage bounty amounted to £6.871, and the balance in hand in April of the current year was £5,328.

A statement just published shows that at the commencement of the spring of this year the number of vessels of war employed on foreign and colonial service was as follows:—China station 40, of the aggregate burden of 30,246 tons; Mediterranean station, 20, of the aggregate burden of 34,617 tons; North America and the West Indies, 29, of the aggregate burden of 34.827 tons; south-east coast of Africa, 9, of the aggregate burden of 7,647 tons; the East Indies, 7, of the aggregate burden of 7,590 tons; the Cape of Good Hope, 3, of the aggregate burden o 3,078 tons; West Coast of Africa station, 19, of the aggregate burden of 13,179 tons; the Pacific station, 14, of the aggregate burden of 19,342 tons; and Australian station, 6, of the aggregate burden of 6,793 tons. The China station absorbs a larger force than any other.

The double screw composite gunvessel Beacon, 2, 464 tons, 120-horse power, intended for service in China, has been docked at Chatham, after receiving her masts, a number of shipwrights and other workmen being employed on her to bring her forward for commission. The Beacon is of exceedingly light draught of water, drawing only 3ft. forward and 4ft. aft.

Her Majesty's double screw gunboat Plover, 3, 663 tons and 160-horse power, built at Deptford and completed for service at Woolwich, has made a trial trip to test the temperature of the engine-room, which, since her former trip, has undergone some alterations in order to improve the ventilation and reduce the degree of heat. The average rate of speed is given as 10.7 knots per hour. The temperature was quite satisfactory. She returned to the outer basin at Woolwich, in order to make some slight alterations in her screw propeller, after which another trial will be made again to register her rate of speed, preparatory to her being commissioned for service. Staff-Commander Dillon took charge of the vessel during the trial, and Mr. Patridge superintended the working of the engines on behalf of the Admiralty officials.

Parliamentary Intelligence.

MAIL COMMUNICATIONS.

(Aug. 12th.) Mr. D. Griffith gave notice that he should on an early day ask a question of the Chancellor of the Exchequer as to whether he intended to do anything during the recess with regard to the contract with the Peninsular and Oriental Company for the conveyance of the India mails. (15th.) Mr. Laird asked the Secretary to the Treasury whether before coming to any decision as to accepting tenders for the conveyance of the East India, China, and Australian mails, Her Majesty's Government would afford the House an opportunity next session of giving an opinion on the subject; and if, in consequence of postponing the decision, any temporary arrangement might be requisite for the conveyance of the mails, whether Her Majesty's Government had made or were prepared to make such arrangement; also, whether the hon. gentleman knew what was the nature of the arrangement contemplated by the Government with the Messageries Imperiales with regard to the conveyance of the China mails.—Mr. Hunt replied, in reference to the first question put by his hon. friend, that no question had yet arisen with regard to the Australian mail, as no notice had been at present given to terminate that contract. The only question which arose had reference to the India and China mail. The position of affairs was as follows:—The present contract would, in pursuance of the notice which had been given, terminate in the beginning of February next - he believed on the 2nd of that month. In consequence of the contract expiring at that period of the year, the House of Commons would not have an opportunity of expressing an opinion on the subject until after the new contract had come into operation. That result, he believed, was not foreseen at the time the notice was given to the company; but even if it had been foreseen it could not have been avoided, because the Government before giving notice had received a notice from the Peninsular and Oriental Company to the effect that they would give the Government notice if the Government did not give them notice. In consequence, however, of the expression of opinion on the part of many members of the House of Commons to the effect that it was undesirable that the contract should be entered into before the House had an opportunity of discussing the matter, Her Majesty's Government were anxious to ascertain whether some temporary arrangement could not be made. Immediately after the debate in that House communications were opened with the Peninsular and Oriental Company, who were asked whether they were willing to continue the service for another six months, notwithstanding the notice. Yesterday a communication was received from the company saying that they were willing to continue the service, but on terms which, he thought, the House would deem to be totally out of the question. They asked for 10s. per mile, which would amount to about a quarter of a million a year. The Government thought these terms exorbitant, and declined to accept them. He was glad to answer the question with reference the China mails and the French company, because considerable misconception had arisen at home and abroad regarding the Government's intention. The recommendations of the Select Committee which sat last year were taken by the Government as its guide in this respect, and Government had done nothing beyond acting on those recommendations. The committee thought it advisable that this country should avail itself of the services of the Messageries Imperiales in respect of the Japan mails, and the Government, although it endeavoured to act on that advice, had no intention of offering the whole service to the French company. It was hoped that if the Messageries Imperiales could induce the French Government to alter the times at which the mails should be carried both the French and English mails could be carried once a fortnight to China and Japan, instead of only once a month, and to secure this end the Post-office sent forms for tenders to the French company, and semi-official communications had been carried on with the French Government on the same point. If this could be managed it would put an end to the ruinous competition now going on between the two companies, both would have a handsome subsidy, neither would be treated unfairly, and the arrangement would be economical to the Government and tend largely to the convenience of the public. The Government would willingly accord the House the desired opportunity of giving an opinion on the subject.—Mr. B. Cochrane asked whether the Government had considered the important question which would arise if the contract with the Peninsular and Oriental Company were to cease before other arrangements were entered into.—Mr. Ayrton asked whether the Government had contemplated a failure in their negotiations, and the chance that the Peninsular and Oriental Company would take advantage of the circumstances by asking an exorbitant price, and whether the Government had thought of availing itself of the transport vessels plying between India and Suez, for the purpose of carrying the mails. His impression was that the arrangement he had suggested would prove the most economical that could possibly be made.—Mr. Hunt would prefer answering that question at another time.—Mr. Laird asked whether the Government would lay before the House the particulars of any arrangement to be entered into.—Mr. Hunt said that depended on whether the Government was able to make a temporary arrangement. It would do so if possible, and then Parliament could consider it as the probable basis of all future contracts.—Mr. Childers asked whether the Government anticipated making any arrangements with the French company.—Mr. Hunt repeated that the Government wished to have all the different schemes before it and to consider them on their merits; in asking for tenders the Government had distinctly stated that it could not be bound at present.

LONDON, WEDNESDAY, AUG. 28, 1867.

THE LABUAN COAL COMPANY.

THE failure of any legitimate attempt to develop the resources of our Eastern possessions must be a matter of deep regret to all who take any genuine interest either in the extension of trade, the spread of civilisation, or the maintenance of British supremacy in that quarter of the globe. No one can doubt the expediency of establishing a company to work the valuable coal mines known to exist in Labuan, the position of that island, midway as it were between the Straits, China, and Manila, rendering it peculiarly convenient as a coal depot; and the partial failure of this company to fulfil the anticipations of its promoters has therefore been viewed with regret, not only by those immediately concerned in the venture, but by disinterested persons also. We say *partial* failure, because, although the company is at present in process of liquidation in order to form a new company, such a fair prospect of future prosperity has now opened up that, under careful and economical management, ultimate success appears to be no longer a matter of doubt. It is almost certain, indeed, that had an able, clear-headed and energetic man like Mr. PRICE been sent out earlier to take the management of the company's affairs, the series of disasters that have placed the shareholders in their present unpleasant position might have been altogether avoided. Nor does it appear that the directors are in any degree responsible for these disasters, except so far as regards their arrangement with Mr. SINCLAIR, a step doubtless taken in good faith, but one that proved most unfortunate. The report recently received from Mr. PRICE — which is so explicit, and is written in such a truthful and candid spirit that it carries conviction in every line — shows clearly enough the lamentable results of the imprudence and mismanagement that have prevailed. There is no attempt in this report to gloss over the evil state of things exposed by his investigation. The shareholders are plainly told how their late manager expended the funds of the company in making fresh openings into the immense coal field of which the whole island is but a portion; neglecting to provide enough coal from the existing openings, as he might easily have done, to secure a constant supply for sale at Singapore and other ports, where it would have realised sufficient funds to cover all expenditure, and thus avoided heavy drafts on the company during the whole of the disastrous year of 1866. This and other particulars of mismanagement are set forth without any disguise, as well as the disorganised state of affairs that followed as a necessary result.

So much for the dark side of the picture; let us now look at the reverse. Under Mr. PRICE'S supervision, that which before was chaos is now being rapidly restored to a state of order and regularity. The entire force available is concentrated on those parts of the mine that will be immediately productive. Labour—the most important element of success—has of late been wanting; a simple and certain method has now been put in operation to obtain an ample supply of it. The large European staff, the support of which has not only been a superfluous and useless expenditure, but an element of discord in the establishment, has been reduced to reasonable proportions at a saving of some £1,200 per annum. The management under which all these losses have occurred, is now replaced by one already proved to be thoroughly efficient, Mr. MOREL, the successor of Mr. SINCLAIR, having shown himself during a probationary period to be not only competent, but zealous to preserve the company's interests; and, finally, Mr. PRICE, after having examined every person in the island from whom any information could be extracted, arrives at the conclusion that there are no difficulties in the way of ultimate success that cannot be surmounted. So far, this is very satisfactory, but there still remain three great desiderata which we hope yet to see fulfilled. The first of these is regular direct communication between Labuan and Singapore, and this Messrs. A. L. JOHNSTON and Co., who have fortunately been chosen as the company's new agents at the latter port, consider of vital importance to enable them to supply the funds needful for carrying on the works. The second is the employment of machinery for cutting the coal, an innovation strongly recommended by Mr. MOREL, who asserts that it would help to solve the labour difficulty, besides economising time and money. And the third is the employment of screw colliers so as to ensure regular supplies of Labuan coal to those ports where a market can be found for it. These must be vessels specially adapted for their work, a condition not fulfilled by the steamers at present possessed by the company. The intended sale of these vessels appears to be a very proper measure, as it will relieve the shareholders of a considerable responsibility, while it brings in (doubtless at some sacrifice) a supply of the much needed ready money. An impartial review of the circumstances of the undertaking as we have here recapitulated them certainly justifies the belief that a season of prosperity is at hand, and it is an additional source of satisfaction to learn that Mr. POPE HENNESSY, the newly-appointed Governor of Labuan, has formed a favourable opinion of the undertaking, and is disposed to do all in his power to promote its development.

COCHIN CHINA.

"FROM this day forth there will be one authority, one administration, in Lower Cochin China; the six provinces of which are, *and will remain*, FRENCH." So says Admiral DE LA GRANDIERE, in a proclamation announcing the annexation of the three remaining provinces of Cochin China, in which, to quote his own words, he has now "substituted the dominion of France for that of the kingdom of Annam," and accomplished this operation morever, without either violence or bloodshed. French dignitaries are generally oracular; Admiral DE LA GRANDIERE is prophetic also. Divested of the florid embellishments peculiar to Gallic composition, this proclamation means simply, that the French have got a secure footing in Southern Asia, and that they mean to hold it against all comers, and make it, in fact, the nucleus of an Indian Empire, destined—perhaps—to rival our own. For the sake of the poor Annamites, however, we are glad to find (on the indisputable testimony of the Admiral's own proclamation) that the victorious French army was led to the shores of Cochin China solely by considerations of philanthropy and benevolence. No sordid ideas of political prestige or territorial aggrandisement influenced the chivalrous Gauls; like the knight-errants of old, they were actuated purely by "sympathy with misfortune," and an irrepressible desire to "protect the interests" of the people. Having partially fulfilled their errand of mercy by subduing three of the six provinces (after a long period of harassing warfare, which however is scarcely worth mentioning, as the end of course justified the means), they next proceeded, we are told, to introduce "a civilisation based upon religion, justice, "and a respect for all rights." (The King of ANNAM, it seems, hadn't any rights at all.) The natural result of bestowing these inestimable blessings on the population soon manifested itself in "new wants and aspirations," springing up among the enraptured natives, to satisfy which their kind protectors have been compelled—apparently with much modest reluctance—to swallow up the remaining provinces. They have certainly made two bites at their cherry; but the second half seems to have been much easier of digestion than the first.

The Admiral's mission, he tells us in the concluding paragraph of his prospectus—we beg pardon, proclamation—will now resolve itself into developing the welfare and prosperity of the country, which we are glad to hear, as it must include among other things the promotion of commercial industry. At present, trade does not seem to thrive to the extent that might be expected under the wing of so paternal a Government; and late advices from Saigon represent the necessity for a British Consul there as being more pressing than ever.

THE PACIFIC MAIL ROUTE.

THE new steamer *China*, sister ship to the *Great Republic*, is announced to leave San Francisco for Japan and China on the 14th October. The *China* is the vessel that was originally intended to be called the *Celestial Empire*, and the change of name is certainly to be commended on the score of brevity. Communication with the above vessel from England will be effected by the Royal mail steamer leaving Southampton on the 2nd September. Passengers by the Pacific line will henceforth have the choice of another route from Europe to Panama by the vessels of the French COMPAGNIE GENERALE TRANSATLANTIQUE, a company of high standing, subsidised by the Imperial Government. This company already has an efficient line of steamers running from St. Nazaire to Colon, and arrangements are now in progress to make these work in conjunction with those of the Pacific Mail Company. The through rates from St. Nazaire by tickets issued in London are to be—for first-class passengers to Yokohama £126, and to Shanghai and Hong Kong £136; second and third-class in proportion; while goods are to be taken at a uniform rate of £21 per ton of 40 cubic feet. These rates of passage-money, it will be observed, are somewhat higher than those of the P. and O. Company to Shanghai, although a saving is effected as regards Yokohama. The steamer in connection with the *China* will be the *Imperatrice Eugenie*, leaving St. Nazaire on the 8th September; and it is expected that the entire distance to Yokohama will thus be performed in about 54 days.

From the *San Francisco News Letter* we learn that the *Colorado* on her third voyage took an unusually valuable cargo for Yokohama, including a large quantity of firearms, and valued altogether at $272,000. For China she had a much smaller quantity valued at $38,000, including 1,000 flasks of quicksilver. She took also treasure to the extent of about $220,000, and no less than 514 passengers. The homeward steamer leaving Hong Kong about the middle of August and Yokohama on the 22nd of that month, is due at San Francisco on the 13th September, about which date we may therefore expect to receive telegrams through the Atlantic cable.

THE POSTAL SERVICE.

MR. LAIRD, in a recent debate in the House of Commons, succeeded in eliciting some further explanations of the proceedings of the Government with regard to the new contracts for the India and China mails. It appears that as notice has been given to terminate the existing contracts on the 2nd of February next, and the House will have no opportunity of expressing an opinion on any arrangements that may be concluded in the interval, it was thought advisable to invite proposals from the P. and O. Company for a temporary continuance of the present service for an additional six months; but for this the company demanded an increase of subsidy which the Treasury considered exorbitant, so that the question still remains open. With regard to the French company, it seems that the Treasury conceived an idea that if they could be induced to alter their dates of departure to suit ours, one English mail a month might be made to suffice, as the mails could then be despatched by an English and a French steamer each alternate fortnight. MR. HUNT considered that by this means a great saving would be effected, while an amicable co-operation would be substituted for the ruinous competition at present going on between the two companies. There seems little likelihood of this ingenious but somewhat Utopian theory being put into practice; and in the meantime the whole question must remain in an unsettled state, until all the tenders have been received and deliberated upon. In the meantime we hear that Captain Tyler, R.E., has left London for Paris to make further inquiries as to the practicability of coming to an arrangement with the French Post-office authorities respecting the transmission of the Eastern mails through France and Italy to Brindisi. Captain Tyler will subsequently proceed to inspect the works of the Mont Cenis Railway, the opening of which for traffic is expected to take place next month.

THE EAST INDIA TELEGRAPH COMPANY.

WHILE various schemes are on foot for providing increased facilities for telegraphic communication between Europe and the Far East, the American Company formed for the purpose of constructing a system of local telegraphs on the coast of China has not been idle. Mr. RITSO, the London agent of the East India Telegraph Company, has received information by Atlantic cable, that the company has concluded the purchase, from the Western Union Telegraph Company, of some 525 nautical miles of cable, that was originally intended to be laid across Behring's Straits, but which will now be sent from San Francisco to China, to be laid on such portions of the coast between Hong Kong and Shanghai as may be considered advisable. It is expected that the ship *Egmont*, with this cable, will be ready to leave San Francisco about the end of the present month, and she will convey an efficient staff of engineers and electricians to superintend the operations. A further quantity of cable, sufficient to complete the intended system (which we have fully described in a former issue) will shortly be despatched by Mr. RITSO from this country.

DENT AND CO. AND THE UNION INSURANCE SOCIETY.

THE announcement of a deficiency in the funds of the Union Insurance Society, which appeared in our last issue, gave rise to the following comment in *The Times'* city article on the 15th:—

"A paragraph appeared in the *China Telegraph* of the 13th which might lead to the supposition that the Union Insurance Society of China is seriously compromised by the failure of Dent and Co. It is positively stated, however, that such is not the case, the bulk of the assets of the society being in this country."

There was, however, no intention of implying that the capital of the society was in any way jeopardised, or even the premia on policies payable in London; the deficit comprised local premia only, collected by the firm at Hong Kong and other ports. We are assured that policyholders need entertain no anxiety as to the safety of their risks, the London agents, Messrs. DENT, PALMER, and Co., being prepared to pay all losses. The Union is now placed under a committee consisting of Messrs. KESWICK (JARDINE, MATHESON, and Co.), DUNCAN, SON (GIBB, LIVINGSTON, and Co.), FOSTER (RUSSELL and Co., NISSEN (SIEMSSEN and Co.), and SASSOON (DAVID SASSOON-) SONS, and Co.).

SIR JOHN BOWRING has now received his credentials as Envoy Extraordinary and Minister Plenipotentiary from the King of Siam to the Courts of Europe, and Mr. CHARLES KENDALL has been appointed Siamese Consul in London. We understand that the Siamese Ambassadors who lately left Paris succeeded before their departure in obtaining a settlement of certain questions regarding the frontiers of Siam and Cambodia.

A PARIS paper states that the SHIOGOON, being childless, has decided, in accord with the chief Daimios, that his younger brother, Prince MIM-BOU-TAYOU, now in Paris, shall be declared his legal successor. In order that this heir to the Japanese throne should receive an education suitable to his high position, the SHIOGOON has requested the Emperor NAPOLEON to appoint a governor for him, whose duty it will be to direct his studies during the four years which the Prince is to pass in France The EMPEROR accordingly has named Lieutenant-Colonel VILETTE Aide-de-Camp to the Minister of War, to be governor to the Prince.

A "FRANCO-AMERICAN TELEGRAPH COMPANY" has been formed for the purpose of laying a cable between Brest and New York. Of the proposed capital (£900,000, in £10 shares) two-thirds has already been subscribed, and it is expected that the remaining one-third will be taken up privately. This will put London in direct communication with New York, and will still further facilitate the transmission of messages between Europe and China.

THE *Gazette* announces that the Queen has been pleased to direct letters patent to be passed under the Great Seal, granting the dignity of a Knight of the United Kingdom of Great Britain and Ireland to Harry St. George Ord, Esq., Colonel in Her Majesty's Army, Lieutenant-Colonel in the Corps of Royal Engineers, C.B., Governor and Commander-in-Chief of the Straits Settlements.

NEW VESSELS FOR THE FAR EAST.

The attention of shipowners and builders continues to be directed towards China and Japan, and we have to record the departure of several new steamers and clippers in that direction. On the 13th instant there sailed from Southampton for Japan a fine screw gunboat named the *Henda*. She is a wooden vessel, built by Mr. Dudgeon, and commanded on the outward voyage by Captain Swainson. Her dimensions, &c., are as follows:—Length on the water line, 120 feet; beam, 22 feet; depth, 9 feet; tonnage, builder's measurement, 275; horse power, 60; rig, three-

Digitized by Google

masted schooner. The Borneo Company (Limited) recently despatched for Siam a beautiful screw steamer named the *Kalahome*, built by special order for the Siamese Government. She takes out a general cargo for Singapore and Bangkok, and will fit her screw at Singapore, the voyage out being so far performed under sail alone. A full-powered screw, of 738 tons and 140-horse power, called the *Hiogo*, is announced to sail on the 20th proximo for Yokohama, &c., under the command of Captain Bainton; this vessel is intended, we believe, for sale to the Japanese. Two additions have lately been made to the already large fleet of China tea-clippers. The *Lahloo*, to sail next month for Shanghai, belongs to the same firm as the *Taeping*; she is 799 tons register, and commanded by Captain J. Smith, late of the *Min*. The *Spindrift*, whose launch we noticed in a late issue, belongs to the owners of the *Serica*, and is now loading for Shanghai. A new screw steamer is being built for Holt's line, from Liverpool, and will be launched some time in November. The next departure by this line will be the *Ajax*, which is expected to arrive from China with the new season's teas about the 10th proximo, and will be despatched again about the 15th of October. The *Pasig* steamer has sailed from Glasgow for Manila.

MANDARIN EXTORTIONS.

The *Produce Markets Review* has the following remarks on the illegal exactions to which foreign merchants are subjected by the mandarins at Amoy and elsewhere, as detailed in a letter from Messrs. Boyd and Co., that appeared in a recent number of the *London and China Telegraph*:—

The illegal exactions practised upon British merchants by the Chinese mandarins have frequently been commented upon in the columns of this journal; but a letter dated Amoy, May 27th, which appeared in the *London and China Telegraph* of July 27th, places these exactions in a much clearer light than we were able to do, from the fact of the writers of the letter being themselves eye-witnesses of the circumstances, besides being sufferers to a considerable extent from the prohibitory taxes levied by the Chinese officials in direct violation of the treaty of Tientsin. There is no doubt that our trade with China could be increased to ten times its present dimensions could the Chinese officials be brought to look upon an extended commerce in the same light as Europeans; that is, as an advantage to be obtained by all fair means rather than as an evil to be deprecated. Over and above the tariff duties and transit dues, it appears that nearly all British goods pay a considerable mandarin tax, amounting in some instances to as much as 40 and 60 per cent. on the value of the article, and in one case to 90 per cent. Chinese notions of trade are so different to those which are recognised amongst all European nations, that it would be useless to point out to them how prejudicial to their real interests such underhand extortions must always prove; but we can take stronger ground, by insisting on a rigid compliance with the provisions of the treaty of Tientsin, the twenty-eighth article of which was specially framed to obviate the very evils of which complaint is now made. "In the face of the stipulations contained in this treaty," say Messrs. Boyd and Co., in the letter above alluded to, "it is an undoubted fact that the taxes we complain of are exacted under the very noses of our consuls. If we are right in our interpretation of the above article, it follows that a grievous wrong has been suffered by British merchants here for the last two years in the diminution of their business; and if we are wrong, the sooner the treaty is altered the better; for under it, as it now stands, it would be competent for any mandarin to put a stop to all trade in imports by simply placing prohibitory taxes upon the consumers of our goods. In any case, the matter is one of great importance to all who have vested interests in treaty ports, or are in any way interested in the China trade." Until some improvement is made in this respect, even the comprehensive scheme said to be about to be adopted by the Chinese Government of throwing open all its ports to European commerce will realise only a partial success. "This measure," says one of the French papers, "cannot fail to augment the trade with China; but in order that it may receive all the development of which it is capable, the navigation and customs' dues must be moderate, and merchants must enjoy personal security. We fear, however, in any case, that the trade of France with China will remain insignificant. Our productions cannot compare in that country with those of the English, and the articles we take in return are of little importance, with the exception of silk, which in Great Britain and the United States is taken in considerable quantities. Our customs' returns show that in 1866 France received £320,000 worth of goods from China, and sent her £220,000 worth. This is very little compared with the £32,000,000 of the English."

THE IMPROVEMENT OF YOKOHAMA.

(To the Editor of the *London and China Telegraph.*)

Sir,—Will you excuse me if, for the credit of the land-renters of Yokohama, I trouble you with a few facts, called forth by the article in your issue of the 27th of July, headed "The Improvements of Yokohama?"

When Yokohama was first settled, in the latter part of 1859 and first of 1860, there was no system of drainage, and the few foreign compounds were much scattered over the ground then set apart by the Japanese Government as a foreign location; in fact, any one who desired to settle had only to signify such desire to the Customs officials, point out the lot he fancied, and squat down at once.

According to the land regulations the Japanese Government undertook the formation, repair, and cleansing of the streets. On a further new concession being granted to foreigners, about the latter end of 1860, surface drains were constructed at each side of every street, measuring about one foot and a half wide by the same depth, the material being pine inch-deals for the sides, supported in their places by pegs about a yard apart, and having no bottom but the soil. They were thought so unserviceable that few if any private drains were run into them. This state of affairs lasted till about the commencement of 1863, when a grand system of surface drainage originated either in the brain of one of the foreign consuls or the Japanese land officer. About that time the residents were surprised to find several of the streets impassable on account of large ditches being dug on each side, the diggings from which were thrown into the middle of the streets. On inquiry it was found that large stone-faced drains of two feet width and depth were being constructed without the slightest regard to grading, but following the undulations of the streets! The community, inclusive of the then British Chargé d'Affairs, protested against their construction before they were half finished, which was met by an assertion from the consuls, on the part of the Japanese authorities, that they would be found to work admirably. Experience proved how ill-founded such assurance was. Said drains when finished looked very well, but besides taking about six feet at least off streets of no great width, they were found quite inefficient as drains, and most dangerous as man and horse traps, one or more men having been killed and injured by falling into them on dark nights, and several having bones broken by their horses getting into them. However, the community seeing a legitimate outlet for refuse water from their cook and bath houses, ran their private drains into the street ones, the result being that the bottoms of the latter were always covered with a few inches of stagnant filthy water, which had no chance of running off. I have no doubt in my own mind, and I believe most of the residents will agree with me, that the settlement was at that time in more danger from diseases arising from malaria than since, as at that time large surfaces of stagnant water were exposed, whereas since, as I shall hereafter explain, these surfaces were reduced to about one tenth, or even less, of their original extent. The municipal government of the settlement at this period was handed by the consuls into the hands of a municipal council duly elected by the land-renters by ballot. The ground rent paid by foreigners to the Japanese Government on all land held in the settlement is at the rate of about five hundred and twenty Mexican dollars (about £120) *per acre per annum*, out of which the foreign Ministers agreed to accept a return of 20 per cent. from the Japanese Government, said funds to be employed in doing what the Japanese undertook at first to do—viz., to maintain a police, and keep the roads and drains in order. This amount was objected to by a majority of the land-renters as being much too small for the requirements, but they were politely informed that the matter had been arranged between the Ministers and the Japanese Government, and that they must take what they could get and their self-government into the bargain. At the first meeting of this new council, somewhere about May, 1865, two working committees were formed of a portion of the members—viz., a police committee and a road and sanitary committee. Both committees got voted to them by the council what funds they applied for, the Road and Sanitary Committee only applying at first for sufficient funds to keep up a gang of coolies for the purpose of cleansing the settlement, *i.e.*, keeping the streets clean, and carrying off refuse water from the drains and emptying it into the sea, which was done regularly every day. Tenders were invited for the construction of an efficient underground system of drainage, but the amount required was far beyond the means at the disposal of the council, so it was decided to keep the settlement clean with the existing drains so far as practicable. The scavenger corps found great difficulty in gathering up the refuse water scattered over the whole extent of the large drains, so it was proposed in council and carried unanimously that all the street drains should be filled up excepting a few feet left at the outlet of each private drain as a reservoir to collect the refuse waters, such reservoir to be covered over and emptied every day into the sea by means of coolies and covered tubs. This was done, and the streets assumed a respectable appearance, not being disfigured by those eye-sores the *Consul-erian* drains. I believe it was the opinion of most civilians and all medical men that the above was the best system to be adopted short of underground drainage. So far as I am aware, this system is still in operation, and if you or any of your readers interested in Japan matters can recommend anything better I am sure the land-renters of Yokohama would be glad to adopt it. Having tried to explain the present sanitary arrangements of Yokohama, I will give you an idea of attempts made at municipal improvements by the land-renters previous to the formation of the present council. About the commencement of 1862 a few gentlemen where chosen by the land-renters as a municipal committee to assist the consuls in the municipal matters of the settlement by pointing out to them what was necessary for its welfare, such wants to be represented to the Japanese authorities by the Consuls. This committee made several suggestions to the Consuls, such as "a proper system of drainage, construction of a reservoir above the settlement for the accumulation of water for flushing drains, in case of fire, &c., lighting the streets, and the removal of slaughter-houses out of the settlement," but with the exception of the latter no benefit resulted from those suggestions. After a few months' labour, and a large amount of correspondence without any good results, the Consuls declaring that they could not get the Japanese to do anything that was required, this committee called a meeting of land-renters and resigned office. About the latter end of 1863, finding that the Japanese were not keeping the settlement in a proper sanitary condition the land-renters in a full meeting requested three gentlemen to act as a sanitary committee, and voted about three or four hundred dollars per mensem for the purpose of forming a coolie scavenger corps to keep the settlement in somewhat better condition than the Japanese Government had been doing, at the same time not waiving our claim on them for the proper fulfilment of their contract. These gentlemen did their work well and continued in office till the formation of the present Municipal Council, when their duties were assumed by the Road and Sanitary Committee of said Council. If by the insertion of these few statements in your next issue the stigma of apathy regarding their sanitary welfare is removed from the land-renters of Yokohama, my end in writing them will be fully served. There may be some slight inaccuracies of date and detail, as I have no memoranda in this country to refer to; but the main facts are correct. I am pleased to see by late papers from Yokohama that the land-renters are reminding the Ministers of the duty of the Japanese Government. With them, and not the residents, rests the blame of the present state of the settlement, and if they had been pushed hard by our diplomatic agents to fulfil their contract in the land regulations as faithfully as the land-renters have had to fulfil theirs, there might not now have been the complaints there are about the sanitary condition of Yokohama.—I am, Sir, yours truly,

M. S.

August 12, 1867.

THE P. AND O. COMPANY.

The following article on the position in which the P. and O. Company is placed by the uncertainty that exists regarding the mail contract question is from the *Daily News*. Our own opinions on the subject have been fully expressed in our late issue:—

It is to be hoped that before the House of Commons is dismissed from its labours the position of the Peninsular and Oriental Company will be clearly defined. At present it must be admitted that the opinion and designs of the Government as to the overland mails are by no means either consistent or very intelligible. The Secretary of the Treasury, in the House of Commons, seems to adopt one view, while the Postmaster-General, in the House of Lords, adopts another. All we desire is that the public shall be informed which of these views is to prevail.

To a man of ordinary understanding it is certainly very difficult to attach any other meaning to the speeches of the Secretary of the Treasury than that, when the present contract for the conveyance of the mails should terminate, it is probable that if the Messageries Imperiales make the cheapest offer the contract will be transferred to that foreign company. But the Duke of Montrose repudiates this idea, and declares that "to throw everything into the hands of a foreign Government would be extremely impolitic, although (he adds) we might in the first instance do these duties at a cheaper rate." The view thus stated by the Duke certainly appears to be the more sensible of the two, and the grounds upon which this opinion rests are almost on the surface. If the only object of the people of this country were to get the mails conveyed to India at the cheapest rate, it might be unnecessary to consider the character and circumstances of the agency which undertook the duty. But the question which has excited so much attention is very different. In the first place, it must be observed that regularity and permanence are quite as essential as cheapness, and that any arrangement which would be liable to unexpected interruption ought to be carefully avoided. Now apply this test to the case of the Overland Mails. At present they are conveyed by a British company possessed of a splendid fleet, commanded by admirable British officers, and manned by picked British seamen. This company has earned a character for punctuality and safety, and has proved of the utmost benefit to the Empire during the Indian mutiny and the Crimean war—periods of no common anxiety and danger. So long as the Indian Empire subsists the connection between India and this country must be kept up; and if that connection were interrupted for many months, the doom of our Eastern Empire would be practically sealed. England maintains her position in India by force of arms; and it is a principle both of war and of common sense to take efficient means to keep open the lines of communication between the base and the field of operation. To abandon the present system of subsidising a private company would be to abandon those advantages which experience has proved to attend it; to employ a foreign company exclusively would be practically to transfer the lines of communication into hands which might some day prove hostile, and that without a moment's warning.

It is impossible to contemplate without a shudder the consequences which might result if the Government should ever neglect to maintain its own means of communication with the East. If war should arise, it might be difficult enough to keep up the communication even with a fleet so well appointed as that which now exists. But if the fleet upon which this country relied were in the hands of a foreign Power, what would be the consequence? In the first place all communication would at once cease. A new mercantile or postal fleet would have to be organised, and this would not be rendered more easy by the fact that at the same time other fleets would have to be equipped and manned to meet the enemy. Nor, it should be observed, would this result arise in one case only. If, indeed, the Société Impériale should obtain the contract, a war between this country and France would directly produce the consequences to which we have alluded; but the same consequences might follow if France should be at war with any other country, Great Britain remaining neutral. The French sailors might be withdrawn to other duties, or the Société might suddenly come to an end. These are not contingencies to which this country or the Indian Empire should be exposed. It is, indeed, impossible to provide with perfect certainty against them. But there are no better means of securing this result than by keeping with scrupulous anxiety the means of communication by the Mediterranean in the hands of the British Government. There is only one route to India at present, and the sole question is—How is this route to be kept open for England? If, indeed, the route to India by the Mediterranean were closed, let us ask ourselves whether any other route equally convenient can be found. If not, and if our communication with India is worth preserving, let the project of transferring the overland mails into the hands of the French Government be at once abandoned. At all events, let us hear what Ministers intend to do on the subject.

CHINA STEAMSHIP AND LABUAN COAL COMPANY (LIMITED).

A general meeting of shareholders was held on the 15th inst., at the London Tavern, to receive and consider the reports of Mr. J. Spencer Price and the company's agents in the East; also a statement of accounts, and to pass such resolutions with reference to the affairs of the company as might be thought fit; Sir James Elphinstone occupied the chair.

The published reports of Mr. Morel, who in April last succeeded Mr Sinclair in the management of the company's works at Labuan, and of Mr J. Spencer Price, the managing director, who arrived in that island on the 8th of June, were placed before the shareholders.

The Chairman, in descanting upon them, and referring to the question whether the undertaking should be carried on or not, said it was his belief that the company had overcome their difficulties, and that they had now a good prospect of success. The value of their property had very much increased, and as the labour question was in process of solution, it was to be hoped the enormous amount of coal at their command would be utilised. If it seemed proper to continue the management and to instruct the liquidators to proceed as rapidly as they could with the liquidation of the company, because, come what might, the company must pay their debts either by calls or loans, or in some other way, so as to get the Labuan Coal Company into operation, he thought the property would do well. That morning the directors had had an interview with the under secretary for Colonial Affairs, at which Mr. Pope Hennessy, the new governor of Labuan, and of whom he (the chairman) entertained the highest opinions, was present. The object of their visit to Mr. Adderley was to impress upon him the desirability of instructing the governor not only to do his own duties, but in some degree to be able to report to his government on the progress of this company. Mr. Hennessy's views with regard to them were of the most liberal description, and he (the chairman) was certain that instead of the Government of Labuan thwarting them as had hitherto been the case, a new era would be established in that respect, and he was sure they would find in Mr. Hennessy a friend who if anything was going wrong with their affairs would let them know. The chairman also stated that there was reason to believe that the claim arising out of the collision between the *Mona* and the *Agamemnon* would be settled without litigation.

A statement of the company's accounts was then read, and showed the following figures:—Paid-up capital, £328,000; vessels (estimated value), £44,000; Labuan property, £222,068 3s. 8d.; debts owing to the company, £16 159. 11s 2d.; arrears of calls on existing shares, £30,013. 10s.; arrears of calls on forfeited shares, £11,453.

Mr. Miller moved a resolution expressing the satisfaction of the shareholders with the information received from Labuan, and at the admirable prospects of the company.

An amendment was introduced but it found no seconder.

Mr. M'Kenzie, the solicitor of the company, replying to the remarks of several shareholders, said that the company's debts were £45,000. Of the £44.000—the amount of the arrears of calls—he believed fully one half was a good asset. He recommended a call of 30s. a share, and if the debts were disposed of he thought it was not at all unlikely that the £50,000 debentures for which they were liable would be transferred to the new company.

The resolution was then put and carried, with four dissentients.

A second resolution, requesting the liquidators to carry out the recommendations made in the reports, was also carried; as well as an addendum to the effect that no further call ought to be made until the ships are sold

The proceedings then terminated.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Aug. 23.

On the 16th inst. the session of the States-General was closed in the usual manner by the Minister of the Home Department, and, of course, the papers make use of the opportunity to give a history of the past session.

His Majesty has appointed Mr. G. C. C. Pels Rycken, Minister of the Marine Department, and Mr. J. A. van den Bosch, Minister of War, Commanders of the Order of the Netherlands Lion. As soon as the new sitting of the States-General is opened, the last-named Minister will bring in a Bill to modify the law referring to the militia. According to the Ministerial paper, *De Amsterdamsche Courant*, the annual conscription is to be increased by 3,000 soldiers, so that the total of the budget will be augmented by 270,000f. The rights of the substitute (*remplacer*) will be much limited; but, on the other side, fashionable youths will become possessed of the right to choose in what regiment they wish to become incorporated; they may live in furnished apartments, wear most exquisite clothes, whilst they will not receive any payment from the State. With regard to our National Guards, the Minister will propose that they all must be in active service. I need not add that the first as well as the last measure is highly condemned.

Notwithstanding the necessity is urged by a great many papers that the Government is obliged to help most liberally those who sustained losses by the last earthquakes in Java, nothing has yet transpired as to whether the Government intends to give ear to this just pressure. As to private endeavours to collect some money on behalf of these unfortunate ones, I have only to state that a commission has been instituted in Groningen, and that it has made a first appeal on the Dutch generosity, but neither here nor at Amsterdam do we hear of any endeavours to help. I think it is their duty that the first assistance should be provided by these commercial towns. But in general the public is not much animated, and we must wonder ourselves still more over this coolness, because India showed itself not only always most generous when Holland was vexed by any plague, but the welfare both of the State and of private persons is due for the very greatest part to India. Of course this indifference and want of affection must make a very bad impression in India.

In my former I stated that some sporadic cases of cholera occurred in this town, but since the disease has become of a more epidemic character. Not only are the fatal cases increased to 16 a day, but several towns and villages in the neighbourhood have been attacked, so that it is feared that if temperature continues to be so very warm (85 to 90 Fahr.) the disease will spread more and more. The illness has also a very malignant character, so that those who are attacked die mostly within a period of three to five hours. From Veenhuizen (an asylum for vagabonds) we hear that leprosy has broken out, but that only four to five persons were attacked.

The reports about the rinderpest are more favourable. Only some sporadic cases still occur, but it may be regarded that this plague has passed away.

Some days ago a general annual meeting was held at Amsterdam by the Society for Common Benefit (*tot nût van t' Algemeen*), which numbers now 13,816 members. At this meeting it was resolved to spend 3,500f. for the purpose of publishing a work, in which the India culture-system should be described in a most simple and useful manner A premium of 500f. will be proffered to the author. The volume may not exceed 160 printed pages. A commission of seven gentlemen (*specialites*) is appointed to adjudge the premium.

On Tuesday last the members of the association for the benefit of the Javanese met at Arnhem. The chairman, Dr. W. Bosch, stated that the association had still more and more success, so that every day the number of members augmented. Resolutions were voted that henceforth meetings are to be held in every town and village, in order to promote the knowledge about India and the necessity of Liberal Reforms.

On Sunday last the Evangelical Alliance held its first meeting at Amsterdam, where deputies from England, France, Germany, Switzerland, &c., assembled to speak about church matters.

His Majesty the King, the Queen, and Prince Alexander have started for the Royal seat, "het Loo," whilst the King and Queen of Sweden, who visited their parents, Prince and Princess Frederic, at the Hague, started with the last-named, *via* Berlin, to Muscau, the seat of his Royal Highness. In a short time the Queen will visit England. The war-steamer *de Valk* is equipped on purpose to bring her Majesty on the other side of the Channel.

Amongst the number of eminent men who have visited our country during the past few days are M. Victor Hugo and Clam Gallas. The last-named resides at our beautiful watering-place, Scheveningen, where more strangers are assembled than ever was the case before.

The strike of diamond-cutters at Amsterdam, which lasted about three weeks, has finished.

The Minister of the Marine Department has ordered in England several men-of-war, viz:—At Birkenhead, an ironclad, *de Stier*; at Glasgow, an ironclad, *de Buffel*; two monitors at Birkenhead, *de Panter* and *de Krokodil*; and one at Glasgow, *de Tyger*.

According to official returns, the sum of 4,489,523f. was spent in 1865 for the education of the lower classes.

Mr. van Heiden Reinesteen being appointed Royal Commissioner in the province of Groningen, an election for a member of the Second Chamber of the States-General will take place at Assen on the 16th September. As candidates are named—Messrs. P. P. van Bosse and Oldenhuis Gratama.

COMMERCIAL.

Coffee.—Of private imports 1,000 bales Java, ex Kanagawa, were sold at Amsterdam, and 250 b. Padang, ex Aletta Augusta, at different prices. 1,950 b. Java, ex Landbouw, fine good ordinary white greenish W. J. quality changed hands at 42 to 44½c.; and 4,550 b. do., ex Kanagawa, fine good ordinary white yellowish Preanger quality, from 43½ to 47¾c. The valuation of the 93,721 b., offered in auction by the Dutch Trading Co. on the 21st inst., was 40c. for good ordinary Java. The yellowish and brown sorts were mixed in this sale, whilst white and yellowish white were very scarce. This caused much demand for these sorts. The result of the sale is as follows:—The Menado Coffee was sold at the valuation to 2c. higher; Padang ½ to 2c. above the valuation; white and Malang at the valuation to 1c. higher; the unclean sorts at the valuation to ½c. higher; greenish at the valuation.

Sugar (Raw).—5,000 baskets Java imported by several ships were sold here and at Amsterdam at ½ to ¾f., we think, under the prices of the July sale. The market is unaltered and firm.

Rice.—Uncleaned is unaltered. The imports include 6,200 b. Java, ex Sultana; 2,897 pic., ex Coquetdale; 5,000 b. Necranzie, ex Bristolian; the last parcel was sold at 7½f.

Spices.—The valuation of the Dutch Trading Co. sale is as follows:—Nutmegs No. 1, 100c.; No. 2, 90c.; No. 3, 70c.; No. 4, 45c.; Macassar No. 1, 95c.; No. 2, 85c.; No. 3, 45c.; No. 4, 40c.; Mace E, 108c.; F, 103c.; Amboina Cloves No. 2, 30c.; No. 3, 29c.; Java Cinnamon No. 3, 145c.; No. 4, 135c.; Black Pepper, 16c. The 240 casks Amboina Cloves imported per Maria Elise will be sold also on the 28th. Last week there was a good demand for nutmegs. No. 1 was sold at 100 to 102c.; No. 2 at 90c. The biddings for Mace D was higher, so that 116c. is quoted now; E, 110 to 111c.; Java Cinnamon No. 3, 145c.

Tea.—At Amsterdam 1,252 ½, 729 ½, and 319 1-12th ch. Java of different qualities will be offered on sale for private account on the 13th September. The market for Java and China is unaltered.

Java Tobacco.—Without transactions. On the 12th of September 5,115 b. will be offered for sale, they are of the following marks:—

761	bales Javs,	PA.	207	bales	Kidol.
464	,,	GB.	278	,,	VR.
52	,,	Kemoening	626	,,	ETB/Malang.
15	,,	KG.	571	,,	Djaiah/Malang.
604	,,	LS.	225	,,	H&A/Kedirie.
44	,,	G&C.	219	,,	H&A/Blitar.
648	,,	Blitar	2387	bskts.	Java (Apenhaar).
209	,,	S.	110	bales	Sumatra P vd A.
82	,,	SS.			

Arrack.—At very firm prices were sold 105 casks and 50 half casks Batavia, ex Jessie Ann; 25 casks Sourabaya, ex Nydia; 60 do., ex Anna and Sophie, were offered but not sold. At Amsterdam, 148 casks, ex China, and 95 do., ex John Fraser were sold.

Indigo.—Is in a very good position with much demand. The different imports of last week will find a very good market.

Cotton.—The transactions were unimportant, but at the closing of the market there was some more demand at firmer prices; fair Scinde 40c., middling fair, 36½c.

Manufactures.—The market is firmer, and the position somewhat better; the quotation is for 6¼ Madapollams and Calicots, f.5.20; No. 28, Warps 14¼d.; and No. 14, 13½d.; No. 30, Cops, 12¾d.; and No. 16 12d.

Banca Tin.—3,000 slabs were sold at 52¼f., 800 slabs at 52½f., and 1,000 slabs at 52¾f. The rather nominal quotation for Billiton is 52f.

Hides.—Of Java were sold 1,000 ps. Malang cow, weighing from 3¼ to ½ kilo., and 313 ps. Buffalo, 7½ No., ex County of Lanark.

Drugs.—Camphor with some transactions and a little higher in price. Cassia Lignea 67c., cubebs unaltered. Gum Benzoin: 138 ch. imported from Padang per Aletta Augusta were sold. The market closes firm. Gum Damar: 700 ch. per Electra were sold floating.

Rattans.—In the first hand were sold—205 pic., ex Kanagawa; 418 pic., Cœur de Lion; 200 pic., ex Sirius; 230 pic., ex Charlotte; 250 pic., ex Maassluis; 75 pic., ex Zes Gezusters.

Money.—The business in the market for stocks was very limited, but prices in many instances closed at a decline. Money is less abundant, but the courses is unaltered. Dutch Two-and-a-Half per Cents., 53; Three per Cents., 63⅝; Four per Cents., 84.

Exchange.—London, 3 mo., f.11.86; 2 mo., f.11.88; short, f.11-92. Hambro', 3 mo., f.34.95; 2 mo., f.35; short, f.35.10.

SHIPPING INTELLIGENCE.

Arrivals.—August 15, at Texel, from Banjoewangie, Coquetdale; 17, from Batavia, Medea; 18, at Brouwershaven, from Batavia, Mary and Hillegonda; 20, at Texel, from Sourabaya, Kensington; 21, at Brouwershaven, from Batavia, Professor van der Boon Metsch; at Hellevoet, from Sourabaya, County of Ayr.

Departures.—August 12, from Brouwershaven, for Batalia, Maria Sarah; 15, from Texel, for Singapore, *via* Sunderland, Laura and Adele; 14, from Veere, for Singapore, *via* England, Burgemeester van Middelburg; 17, from Texel, for Batavia, Holland.

Passengers Inward.—From Java: Per Medea, Mrs. van der Stok and family, Mr. Breukma and family, Messrs. Deketh, Tennissen, and family, and Heyting and family. Per Mary and Hillegonda, Mr. H. E. de Vogel and family.

Passengers Outward.—For Java: Per Holland, Mr. Vaarenkamp and family.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, August 23.

All the Imperial and Royal visiting and interchange of courtesies that has been going on this summer has not prevented proper attention being paid to business,—at least in Germany, where so many things are new that there is more to be done than in any other European States whose organisation is complete. The general elections for the whole of the North German Confederation are fixed for the 31st inst., and the Parliament will be opened the second week in September. In the meantime, the *Bundesrath*, or Federal Council, has already been convened, and is busily engaged in working up the drafts of laws to be laid before Parliament. Amongst these are the reconstruction of the Zollverein; the Federal Budget; the incorporation of all the now separate post-offices of different States as one Federal establishment, with a tariff of postage common to all; a law for the appointment of Federal Consuls abroad, and the powers to be accorded to foreign Consuls in Germany; a law concerning the nationality of merchant vessels; a law for the uniformity of weights and measures; the abolition of the passport system; and a law permitting the right of removal of families from one State to another. The Bill respecting the Federal Consuls abroad is based on the principle that hitherto the Prussian and other German Consuls were not clothed with as much juridical authority as those of other Powers; nor was this possible to obtain, as by far the greater part are of the mercantile profession, and unacquainted with even the fundamental principles of international law. The Consular service is in future to be organised as a distinct and subordinate branch of diplomacy; and in order to obtain appointments it will be necessary to pass an examination in geography, history, languages, and, above all, in international law, and a knowledge of the commercial laws of different foreign countries.

On the 1st of October next the Hamburg Contingent will be incorporated with the German Federal army, but very few of the officers feel induced to transfer themselves to the new service. The field officers have expressed their intention of retiring altogether on the pension to which they are entitled, and the subalterns will give up the military profession and devote themselves some to commerce and others to the study of law.

Mr. W. Pustau, and two other merchants of Altona, have just returned from Berlin, whither they went as a deputation of the mercantile body of our neighbours at Altona, to represent to the Prussian Government the inconvenience and inexpediency of the new regulation by which foreign bills of exchange on Altona, even when made payable in Hamburg, are liable to a stamp duty, and to endeavour to get the order rescinded, but without success. Count Bismarck received them with his usual courtesy, and regretted that it was not the intention of the Government to make an exception in their favour. In consequence of this and other charges that have been imposed on commercial undertakings, a good many of the Altona merchants are taking steps to remove their establishments altogether to Hamburg.

I regret to state that the postponement of the long-talked of Austrian expedition to the Far East is confirmed, and that it will certainly not take place this year. The reason assigned by the official organs is that no provision was made for the expense of the expedition in the estimates when the Budget for this year was passed by the Austrian Parliament. I believe this to be formally correct; but where there's a will there's a way.

The annual fair at Nijni Novgorod was officially opened on the 27th ult. by hoisting the flag, accompanied by the usual formalities, but the real business has not yet commenced. It is not yet known where the tea and other China goods will be located this time, because the bridge opposite the flagstaff leading to the go-downs is not yet passable.

A letter has been received at Berne from Herr Brennwald, the Swiss Consul-General in Japan, announcing that the conflict with the Prussian diplomatic representative on account of the piece of land granted to Dr. Lindau, formerly Consul-General for Switzerland, but now claimed by him as his personal property, has been amicably adjusted in a manner satisfactory for both parties, the Government of Japan having generously given to Switzerland another plot of ground on which to erect the buildings of the Consulate-general. It is stated that the Federal Government is by no means pleased with the conduct of Mr. Brennwald, in consequence of which he has been recalled, and will be replaced by Herr H. Sieber, of Zurich.

The Prussian naval budget for 1868 is fixed at six millions of dollars. The administration of the navy, which has hitherto been carried on as a branch of the War-office under General von Roon, is to be organised as a separate service; and Rear-Admiral Jackmann, who gained his flag for the gallantry he displayed in attacking a Danish squadron against their very superior force in the Baltic during the late war, will probably be the new Minister for the naval department.

Digitized by Google

The Russian squadron lately returned from the North Pacific station, consisting of the screw steam frigate *Svetlana*, with the flag of Rear-Admiral Kern, the corvettes *Askold* and *Variague*, and the clipper *Izoumrood*, are ordered to be paid off, and are now being dismasted at Cronstadt, where they will be laid up in ordinary and thatched over for the winter. The admiral has just been decorated with the Grand Cross of the Imperial Order of St. Stanislaus. On the other hand orders have been received at that port to fit out the steam frigate *Khabri* for service in China and Japan, and vigorous exertions are being made to get her ready for sea, so that she may be enabled to leave the Baltic before the frost sets in.

A special paragraph of the North German Confederacy (sec. 55) provides for the creation of a Federal flag for the mercantile navy, and says simply that the colours are to be "black, white, and red,' but nothing further is mentioned as to the proportions of each or the combination intended. As the old German flag was back, red, and yellow, in horizontal stripes of equal dimensions, it is assumed that this will be the arrangement for the new flag, and already a good many are seen here, but chiefly on buildings and for pleasure boats; there are, however, some vessels rash enough to sail under the new flag, though by the laws of nations they are liable to be treated as pirates for wearing a flag not yet legally in existence, the creation of which must be duly notified to all other maritime States, and formally recognised by them. Nevertheless, we learn from Antwerp that a few days ago a festival was celebrated by the German merchants and skippers at that port in honour of the new Federal mercantile flag.

On the other hand the war flag is decided on, and a royal decree on the subject has been published. It consists of a white field divided into four quarters by a black St. George's cross, in the centre of which is a white medallion containing the black Prussian eagle. The upper quarter nearest the mast to display the Federal colours, black, white, and red, in which is the Prussian Iron Cross. It is further ordered that the old flag is to be hauled down at sunset on the 30th September, and the new flag hoisted at sunrise on the 1st of October. As, however, no other German State has any ships of war, this new flag will only be carried by vessels belonging to the Prussian royal navy.

The *Bundes-Rath*, or Federal Council, is convened for the 15th inst., their functions being chiefly confined to drawing up the Bills to be presented to the German Parliament when the sessions opens, which will probably not be for a month or two, as the day for the general elections has not yet been fixed. The three members for Hamburg elected at the last Parliament having declined to serve again, the Liberal and free-trade party have resolved to put in nomination Mr. Edgar Ross, of the firm of Ross, Vidal, and Co., and Mr. E. von Melle, both merchants of this city. The third candidate is Mr. Richter, a mechanic.

In consequence of the introduction of the new German Mercantile Code of Laws (*Handelsgesetzbuch*), which is now compulsory for all the States of the Confederation, several modifications and alterations in the conditions required for marine insurances have become necessary. The revision having been accomplished, fresh forms of policies have been printed, and the associated underwriters and insurance companies at Hamburg give public notice that on and after the 1st of January next they will only sign policies containing the new conditions.

Mr. J. A. T. Meadows has been appointed Danish Consul for Tientsin and the ports of Taku and Chefoo, by Royal Patent dated Copenhagen, August 2.

Mr. Carl H. Cramer, hitherto Consul at Singapore for the Grand Duke of Mecklenberg-Schwerin, has tendered his resignation, which has been accepted.

Mr. R. Lindau, merchant at Nagasaki, is appointed Prussian Vice-Consul at that port, Vice Kniffler resigned.

COMMERCIAL.

Cassia Lignea continues in good request, and full prices are paid. Pepper commands more attention, and several parcels of Singapore have changed hands at a trifling advance. In Spelter there is no alteration in value; a few thousand centners were sold at 13 mks. 13 sch. banco. Discount as last reported.

SHIPPING.

SAILED.—Aldebaran to Hong Kong; Saturnus, to Shanghai; Pudel, to Penang and Singapore; Energie, to Hong Kong.

Monetary and Commercial.

The advices from Shanghai and Hankow state the excessive purchases of tea and silk has produced considerable difficulty, and re-sales had been attempted at a great loss. The banks are said to be careful in their advances on bills and produce, but in some cases the margin is not sufficient. The old standing houses have held back from shipping at the excessive rates current. They will have their opportunity at lower rates, and have exchange if they will only have patience and allow the wild purchasers to run themselves out.

It appears to be an accepted fact that all hopes of resuscitating the Commercial Bank of India have been abandoned, and notices will be issued to the shareholders that the authority of the Court will be applied for on the 7th Nov. to enforce a call of £10. The full amount for which the shareholders are liable is £25 per share, and even this will not suffice to pay all the creditors' claims in full. For the balance they must wait the realisation of assets in India and China, which may range over three or five years. When all is realised, however, it is expected that besides paying the creditors' balances, there will be a surplus at least sufficient to recoup the present call on the shareholders.

All persons having claims against the Bombay Royal Insurance Company, the Bombay Cama Insurance Company, and the Cama Constituents Insurance Company, which are now in course of winding up, are required to present them for payment to Messrs. D. D. Cama and Co., of London, by the 31st of December.

Messrs. Baring have issued a notification that they are authorised by the Spanish Government to carry out the conversion of the several classes of the Passive debt. If the conversion be made within 30 days the new bonds will carry interest from 1st of January last. If it be deferred till after the 24th September they will carry interest only from the 1st of July. On the 31st of December the conversion will be closed. The terms offered are those that were unhesitatingly rejected at the recent meeting of bondholders.

The biddings for £270,000 in bills on India were held on the 21st at the Bank of England. The amounts allotted were to Calcutta, £162,300; to Madras, £7,700; and to Bombay, £100,000. The *minimum* price was fixed, as before, at 1s. 11d. on all the Presidencies. Tenders at 1s. 11¼d. on Calcutta and Madras will receive about 90 per cent., and on Bombay about 47 per cent. All tenders above that price will receive in full. The terms thus obtained are again about ¼ per cent. higher than those on the previous occasion, and indicate to that extent an increased demand for means of remittance to the East.

The Mexican dollars by the West India steamer have been disposed of at 59d. per ounce, showing a decline of ⅛d. The demand for China has very much slackened, owing to the receipt of telegrams quoting lower exchanges, and a further large supply of dollars is expected to arrive at the end of the month.

The bar silver brought by the West India packet has been sold at 60⅜d. per ounce, showing a decline of ⅛d. per ounce from the price realised for that by the previous arrival.

Advices from Manchester announce the failure of Messrs. Nichols and Ashton, spinners and manufacturers, of Darwen, and carrying on business at Baxenden under the title of Ashton and Co. Their liabilities are estimated at nearly £40,000. At a meeting of creditors held last week, a majority agreed to accept a composition of 6s. in the pound, payable in three instalments, two of 2s. 3d. each, in two and six months, and a final one of 1s. 6d., in nine months, the last to be guaranteed.

The dividend next month to the creditors of Overend, Gurney, and Co. (Limited), is expected to be 4s. in the pound, which will make 10s. paid. The debts over which it will have to be distributed are about £4,000,000, so that the total disbursed will be £800,000. The pending call upon the shareholders has thus far been extremely well met, although it has caused much suffering, and has perhaps necessitated many sales of Consols that have influenced the market during the past few days.

The eighty-fifth half-yearly meeting of the shareholders in the General Steam Navigation Company was held yesterday at their offices, 71, Lombard-street, when the report of the directors was read and unanimously adopted. The customary dividend of 14s. per share was declared.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton on the 20th inst., was, in gold, to Madras, £1,000; in silver, to Hong Kong, £855.

The following relates to a joint-stock enterprise in Egypt:—

"London, Aug. 20.

"Sir,—In the year 1864 a company was brought out under the auspices of the Egyptian Commercial and Trading Company, entitled the Société Agricole et Industrielle d'Egypte. The direction was to reside in Egypt, with a London committee composed of the following gentlemen:—M. Ed. Dervieu, Le Colonel de Kiss, Mr. J. W. Larking, Mr. J. E. Horn, Mr. A. Tod. This company paid one dividend at the rate of 10 per cent. At the end of 1865 the shares were called up in full for the purpose, as the shareholders were informed, of completing several public works and contracts of importance for the Viceroy and his Government. In November, 1866, however, without any previous communication, slips of *The Times* were sent to the shareholders, containing advertisements informing them that it had been decided to wind up this company; and from that day to this not a word has been vouchsafed to any one on the subject. It appears to me that shareholders have a remedy against the London committee for neglect. At all events, I trust that this letter will call forth the explanations, which it is impossible otherwise to extract from these gentlemen.—I am, Sir, your obedient servant, A SUFFERER.

The following is from the London Stock and Share Company:

At the auction of the London Stock and Share Company the following sales were effected:—Westminster Improvements Commission Bond, £500, at £8; London Glasgow Engineering and Iron Shipbuilding Company (Limited), £25 paid, at £5 10s.; Land Mortgage Bank of India, £4 paid, at £1 8s.; Rossa Grande Gold Mining Company, 12s. paid, at 8s.; South Wales Colliery Company, £11 10s. paid, 5s.; International Hotel Company, £5 paid, at 8s. 6d.; Guildhall Taverns Company, £10 paid, £3 15s.; English and American Bank, £10 paid, £4 15s.; and Rossa Grande Gold Mining Company, £1 paid, at 14s.

The creditors of the Empire Assurance Corporation (Limited) are required to send their claims to Mr. A. A. James (of the firm of Edwards,

Digitized by Google

James, and Stone), the official liquidator, by the 21st day of September, the 31st day of October having been apppointed by the Vice-Chancellor Stuart to adjudicate thereon.

Messrs. C. F. Kemp and H. Chatteris, the liquidators of the English Joint-Stock Bank (Limited), have issued a report to the present date of the progress of the winding up. It shows that the creditors' claims, which were originally about £600,000, have now, by the payment of dividends amounting in all to 16s. in the pound, been reduced to £143,768, exclusive of any amount for interest that may be claimed by depositors, while the assets remaining are estimated at £146,505. The latter include £17,421 in cash, and £34,000 as the value of the bank premises in Clement's-lane, at cost price. Every exertion will be made to realise the outstanding properties to the best advantage, and looking at the amount of the dividends already paid, a belief is entertained that the creditors will forbear for the present from urging a further call upon the shareholders, who have already suffered severely.

The report of the London and Glasgow Engineering and Iron Shipbuilding Company (Limited), to be presented on Wednesday, shows, after writing off £1,000 from preliminary expenses, and making reserves for depreciation, an available total of £9,098. A dividend of £1 per share, being at the rate of 4¼ per cent. per annum, is recommended, which will absorb £4,557, and leave £4,541 to be carried forward. The amount of the proposed dividend has been limited by the consideration that the present depressed condition of the trade is likely to continue for some time, and it is added that "the balance remaining, with the present available capital, will be sufficient to enable the directors satisfactorily to conduct the business of the company."

The report of the Northern Assam Tea Company (Limited), to be presented on the 30th inst., states that the directors, with a view to a reduction of expenditure and to institute a more efficient working of the estates, requested the managing director to proceed to Assam in October last, and that they believe he has succeeded, "by his presence on the spot at the most critical period of the past year, by his local influence, by the abandonment of unprofitable cultivation, reductions in expenditure, and a thorough reorganisation of the working operations of the company, in placing its affairs on a sound, effective, and economical basis."

The report of the Millwall Freehold Land and Docks Company states that the Docks will be ready for the admission of water by the 29th inst., and will be shortly afterwards fit for the reception of vessels. The stagnation of business has temporarily checked the great increase in demand for waterside premises which was anticipated when the works were commenced, and the board therefore recommend the appropriation of part of the docks for import and export trade, as well as for all the general purposes of commerce. This will necessitate the erection of warehouses and sheds, and in order to raise the money for the purpose it is proposed to put forth such portion of the preference shares as remain unissued and as the proprietors may think fit to sanction. Mr. G. R. Birt, who for ten years was superintendent of the Victoria Docks, has been appointed general manager. The total paid-up share capital of the company is £584,622.

The report of the Southampton Dock Company shows an available total of £10,062, including a previous balance of £1,037, and recommends a divvidend for thehalf-year at the rate of 5 per cent. per annum, which will leave £1,054.

The London Steam Collier and Coal Company (Limited), have declared an interim diidend for the last six months at the rate of 10 per cent. per annum.

EXPORTS TO THE FAR EAST.

We have received Mr. Sam Mendel's tables containing the quantities and value of Cotton Yarns and Goods exported from London, Liverpool, Southampton and the Clyde, to Hong Kong, Shanghai, Japan, the Straits Settlements, Batavia, Manila and Ceylon, during the month ended 16th August, 1867, and the eight months ended 16th August of the years 1865, 1866, and 1867:—

To Hong Kong.—For the month ended 16th Aug., 1867: Plain Cottons, 1,775,861; Coloured Cottons, 168,410; Printed Cottons, 800 yards; Cotton Yarn, 367,090 lbs.; total value of Cotton Goods, £69,238. For the eight months ended 16th Aug., 1867: Plain Cottons, 22,585,695; Coloured Cottons, 1,462,307; Printed Cottons, 389,347 yards; Cotton Yarn, 3,598,466 lbs.; total value of Cotton Goods, £871,971. Decrease in value for 1867 against 1866, £211,933. For the eight months ended 16th Aug., 1866: Plain Cottons, 27,285,801; Coloured Cottons, 2,918,868; Printed Cottons, 508,110 yards; Cotton Yarn, 3,433,788 lbs.; total value of Cotton Goods, £1,083,904. For the eight months ended 16th Aug., 1865: Plain Cottons, 17,170,133; Coloured Cottons, 1,670,576; Printed Cottons, 333,336 yards; Cotton Yarn, 1,090,555 lbs.; total value of Cotton Goods, £537,301.

To Shanghai.—For the month ended 16th August, 1867: Plain Cottons, 6,057,465; Coloured Cottons, 352,951; Printed Cottons, 170,602 yards; Cotton Yarn, 113,800 lbs.; total value of Cotton Goods, £140,596. For the eight months ended 16th August, 1867: Plain Cottons, 59,293,868; Coloured Cottons, 7,421,466; Printed Cottons, 3,218,716 yards; Cotton Yarn, 264,932 lbs.; total value of Cotton Goods, £1,438,839. Decrease in value for 1867 against 1866, £595,445. For the eight months ended 16th August, 1866: Plain Cottons, 71,661,892; Coloured Cottons, 8,594,169; Printed Cottons, 3,256,521 yards; Cotton Yarn, 48,800 lbs.; total value of Cotton Goods, £2,034,284. For the eight months ended 16th August, 1865: Plain Cottons, 50,505,692; Coloured Cottons, 3,746,143; Printed Cottons, 1,061,071 yards; CottonYarn, 72,580 lbs.; total value of Cotton Goods, £1,219,748.

To Japan.—For the month ended 16th August, 1867: Plain Cottons, 1,101,250; Coloured Cottons, 78,539; Printed Cottons, 68,000 yards; Cotton Yarn, 220,596 lbs.; total value of Cotton Goods, £89,491. For the eight months ended 16th August, 1867: Plain Cottons, 12,071,645; Coloured Cottons, 2,594,637; Printed Cottons, 600,302 yards; Cotton Yarn, 1,646,949 lbs.; total value of Cotton Goods, £456,085. Decrease in value for 1867 against 1866, £245,736. For the eight months ended 16th August, 1866: Plain Cottons, 19,085,196; Coloured Cottons, 2,202,703; Printed Cottons, 2,087,431 yards; Cotton Yarn, 1,177,410 lbs.; total value of Cotton Goods, £701,821. For the eight months ended 16th August, 1865: Plain Cottons, 8,328,894; Coloured Cottons, 789,213; Printed Cottons, 765,768 yards; Cotton Yarn, 212,100 lbs.; total value of Cotton Goods, £250,767.

To Singapore and Penang.—For the month ended 16th August, 1867: Plain Cottons, 4,585,924; Coloured Cottons, 681,085; Printed Cottons, 298,961 yards; Cotton Yarn, 168,190 lbs.; total value of Cotton Goods, £121,302. For the eight months ended 16th August, 1867: Plain Cottons, 37,680,274; Coloured Cottons, 6,376,496; Printed Cottons, 3,036,573 yards; Cotton Yarn, 1,360,807 lbs.; total value of Cotton Goods, £1,086,798. Decrease in value for 1867 against 1866, £5,598. For the eight months ended 16th August, 1866: Plain Cottons, 33,477,162; Coloured Cottons, 4,732,418; Printed Cottons, 2,870,015 yards; Cotton Yarn, 1,083,113 lbs.; total value of Cotton Goods, £1,092,396. For the eight months ended 16th August 1865; Plain Cottons, 24,084,481; Coloured Cottons, 3,313,259; Printed Cottons, 1,227,347 yards; Cotton Yarn, 960,485 lbs.

To Manila.—For the month ended 16th August, 1867: Plain Cottons. 2,150,890; Coloured Cottons, 1,448,500; Printed Cottons, 91,696 yards; Cotton Yarn, 13,600 lbs.; total value of Cotton Goods, £88,309. For the eight months ended 16th August, 1867: Plain Cottons, 11,231,654; Coloured Cottons, 11,401,864; Printed Cottons, 726,464 yards; Cotton Yarn, 100,626 lbs.; total value of Cotton Goods, £581,475. Increase in value for 1867 against 1866, £265,002. For the eight months ended 16th August, 1866: Plain Cottons, 5,097,418; Coloured Cottons, 6,526,744; Printed Cottons, 105,593 yards; Cotton Yarn, 33,750 lbs.; total value of Cotton Goods, £316,473. For the eight months ended 16th August, 1865: Plain Cottons, 8,331,311; Coloured Cottons, 9,051,934; Printed Cottons, 871,472 yards; Cotton Yarn, 66,952 lbs.

To Ceylon.—For the month ended 16th August, 1867: Plain Cottons, 1,326,612; Coloured Cottons, 39,533; Printed Cottons, 295,271 yards; Cotton Yarn, 74,500 lbs.; total value of Cotton Goods, £39,000. For the eight months ended 16th August, 1867: Plain Cottons, 11,996,433; Coloured Cottons, 1,003,157; Printed Cottons, 1,921,190 yards; Cotton Yarn, 167,995 lbs.; total value of Cotton Goods, £348,522. Decrease in value for 1867 against 1866, £129,540. For the eight months ended 16th August 1866: Plain Cottons, 10,847,523; Coloured Cottons, 1,183,451; Printed Cottons, 3,376,607 yards; Cotton Yarn, 614,857 lbs.; total value of Cotton Goods, £478,162. For the eight months ended 16th August, 1865: Plain Cottons, 4,901,105; Coloured Cottons, 1,009,691; Printed Cottons, 737,032 yards; Cotton Yarn 142,349 lbs.; total value of Cotton Goods, £187,591.

ARTICLES OF IMPORT.

Tea.—We have still a very great depression to report, the great reduction going on in our stocks being more than neutralised by the very heavy shipments reported from China. The pressure to sell has continued, and at the public auctions and privately a further decline has been established in nearly all kinds, the trade still only buying for immediate wants. Congous: Siftings show but little change, and the demand is limited. Fair to good common have sold at 11½d. to 11¾d. per lb., being rather lower. Fair to good flavory kinds have sold at a further reduction of ½d. to ½d. per lb. Good Kaisows have sold ½d. to 1d. per lb. lower; fine to finest meet with a slow sale at a similar reduction. Pak Lings, much as before. Common blackleaf Congous have sold from 11½d. to 11¾d. per lb., being ½d. per lb. decline. Fair to good have sold ½d. to 1d. lower. Fine to finest have sold at 1d. per lb. reduction. In new-make Cantons prices show but little change. Common to fair Oolongs have been difficult of sale, but fine continue in demand. In Souchongs but few transactions, and prices as before. In Flowery Pekoes nothing new. Scented Capers unaltered. Foochow Scented Orange Pekoes have been firm, but Canton kinds difficult to move. In Uncoloured Japans no alteration. Green Teas: The principal portion of the cargo of the John Bellamy has found buyers at full prices for both Ping Suey and Moyune kinds, but the Japan kinds have not

Digitized by Google

been so readily taken, as they came to hand when a good portion of those of direct import, per Rifleman, were still on the market. Canton kinds show no material change, there being no fresh supplies. The public sales, which began on the 20th inst., comprised 23,691 packages, of which 22,938 packages were sold, the whole being offered without reserve.

SILK.—The tone of the market is still depressed, with a further reduction in prices, the best No. 3 Tsatlee having been sold at 28s. In Japans a few forced sales have been made. Deliveries from 1st to 23rd inst.: China, 1,753 bales; Japan, 661 bales.

COTTON.—The market continues dull and quotations are again ¼d. lower. The sales have been extremely limited.

COFFEE.—Although the supplies brought forward have not been excessive, and the report of the Company's sale in Holland is favourable, the sales of Plantation Ceylon have passed off without spirit, and prices in some cases are again easier. A small business has been done in Native privately at the previous value, and 1100 bags Singapore have been placed at steady prices. Of Ceylon 1210 casks 235 barrels and bags Plantation, sold, ordinary to fine fine ordinary 67s. to 74s. 6d., low middling to middling 75s. to 79s., good middling 80s. to 85s.; 117 bags Native were withdrawn.

COIR YARN.—Since our last report 28 bales 44 tons Ceylon Yarn chiefly sold at abont previous rates, very fine £51 5s.; fine, £38 5s. to £42 15s.; good middling to good, £30 10s. to £34 15s.; common to middling, £26 5s. to £28, and 69 cwt. Ceylon Fibre, good, £30 to £32 15s., ordinary coarse, £20. 560 coils Ceylon Rope withdrawn and 8,697 pieces (19 tons) Ceylon Junk bought in at £22 10s. to £23 10s. per ton.

GUM BENJAMIN.—Of 39 cases Sumatra 18 cases middling to good middling seconds sold at £8 10s. to £8 15s., 2 cases fair brown thirds at £6 and 8 cases fourths at £2 11s.

JAPAN WAX.—At auction 32 bags mealy saucers partly stained realised 70s.

MANILA HEMP.—For arrival 500 bales June shipment per Sarah Scott from Zebu have been sold at 47s. per ton.

PLUMBAGO.—33 barrels Ceylon sold at a further advance; good middling lump 27s., chips 17s., small chips 12s. 6d., dust 11s. per cwt.

PEPPER.—The demand for Penang continues, and about 2,000 bags have been sold privately at 2 15-16d. to 3d., also 1,098 bags in public sale at 2¾d. to 3d.; 278 bags Singapore were only partly sold at 3¼d. per lb.

RICE.—The tone of the market has of late been more decidedly quiet, and sales could only be effected on rather easier terms. In auction 77 bags cleaned Java bought in at 27s. Privately, for arrival 550 tons middling Ballam, August and September shipments, at 11s., and 300 tons white at 13s. 3d. to 15s. 9d. A cargo of 1,300 tons Rangoon arrived off the coast has been sold at 11s. 6d. for the Continent; one of 700 tons Necransie, sailed the middle of April at 11s. 3d., also for the Continent.

SUGAR.—Considerable stagnation continues to prevail in the market; buyers still hold back, and sellers rarely seek to increase business by accepting lower offers, so that transactions have again been small, but rather more disposition to treat for low qualities at easy prices has become apparent. Floating cargoes have continued to be but little inquired for, and the few sales effected have been on rather easier terms. No public sale of East India has been brought forward, and inquiries on the spot have applied almost exclusively to Manila, of which 1,300 bags clayed (duty 9s. 7d.) have been sold at 30s., and 8,500 bags unclayed at 25s. per cwt.

SPICES.—Cloves: 15 cases Penang sold at lower prices, good bright 11¾d. to 1s., middling 11½d., low middling 11d. Mace: 17 cases Penang chiefly of fresh import sold readily at advanced prices, fine pale 3s. 9d., good reddish 3s. to 3s. 2d., good middling 2s. 8d. to 2s. 9d. Nutmegs: 8 cases Penang of fresh import sold at a further advance, 65's at 3s. 11d., 84's 1s. 9d. to 1s. 10d., 88's 1s. 8d., 8 cases Penang and 5 boxes Singapore in second hands sold, ordinary small at 1s. to 1s. 3d., middling 1s. 9d., and 1 cask Java at 1s. 5d. There has been a good demand privately, and about 50 cases have been sold at a further advance, 107's at 1s. 4½d., 85's at 1s. 9d., and 80's at 1s. 11d. short prompt.

SAPANWOOD.—At auction 15 tons Siam sold—mouldy at £10 15s. to £10 17s. 6d, sea-damaged £10 2s. 6d. to £10 10s.; 42 tons Manila bought in—slightly dirty at £11, second pile at £9 10s.

TIN.—A decidedly upward movement has been established in this article, especially in Straits produce, in which extensive sales have been daily effected at rising prices, principally on speculative account, the week's contracts amounting to fully 600 tons, the prices on the spot advancing from £86 cash to £87 10s. and £88 with short prompt, with sales for arrival at £87 10s. up to £88 10s. Banca quoted £92 to £92 10s. per ton.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5 15s. to £6; nail rods, £7 10s. to £7 15s.; hoops, £8 10s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 10s. to £7 15s.; rails, £6 5s.

STEEL.—Swedish kegs, £15 to £15 10s.

COPPER.—Sheet and Sheathing, £82 to £83 per ton; yellow metal, 7d. to 7¾d. per lb.

LEAD, &c.—English pig, W.B., £21 15s.; shot, patent, £23; sheet, £20 15s.; spelter, £20 17s. 6d. to £21; zinc, English sheet, £26 to £26 10s.; quicksilver, £6. 17s., in bottles of 75 lbs. each.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

Silver in Bars	0 5 0½
Mexican Dollars	0 4 11½

MANCHESTER MARKETS.

The market has again relapsed into a very depressed state, and sales are difficult even at the low rates quoted. Quotations are:—Grey Shirtings, 7 lbs., 8s. 4½d. to 8s. 9d.; 8½lbs., 11s.; Cotton Yarn, Nos. 16-24, 1s. 2d. to 1s. 3d.; Nos. 28-32, 1s. 3d. to 1s. 4d.; Maddapollams, 3s. 9d.; Long Cloths, 9s. 9d.; T-Cloths, 6s; White Spot Shirtings, 11s. 10½d.; Damasks, 21s.

Messrs. Jorss and Co.'s Circular, dated Leeds, Aug. 26, says:—The slightly improved tone of the last fortnight continues, though no advance in prices could be established; buyers continue to act with great caution, and only cover their immediate wants. The general opinion prevails that Wool has reached its lowest point, though no one seems to have sufficient confidence to make purchases to any extent. For Yarns there has been some inquiry by export buyers; however, the prices offered were generally too low to tempt spinners to accept of them. The demand for the Continent is still below the average.

Shipping Intelligence.

FREIGHTS AND CHARTERS.

Coal freights from the northern outports rule somewhat lower.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear of Tyne per keel.—For Hong Kong: £46. For Singapore: £36. For Shanghai: £55. For Saigon: £50. For Yokohama: £50. For Batavia: £27. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 13s. For Shanghai: £2 12s. 6 l. For Saigon: £2 8s. For Yokohama: £2 10s.

The Admiralty have invited tenders for the conveyance of 7 tons naval masts and 36 tons naval stores, from the Thames to Trincomalee; also of 8 tons (weight) small arm ammunition and 1 ton (meast.) handspikes, &c., to Hong Kong.

CASUALTIES.

The Helena, Hedger, from Manila, arrived at New York, Aug. 6, with loss of maintopsail, &c.

The Spanish ship, J. A. U., which arrived at Havana from Macao, July 19, was discovered to be on fire; she was towed from her anchorage at the town of Casa Blanca to the the flats of Santa Clara, where she burned to the water's edge. The cause of the fire is unknown.

A telegram from Hong Kong, July 29, states that the Agamemnon, str., from Shanghai to London, with new teas, had put back with main shaft broken.

The Hinda (s.), Swainson, which left Southampton Aug. 13 for Japan, arrived at Falmouth 23rd with foremast sprung.

Advices from Capetown, dated July 20, state that the Galilei (Dutch ship), from Banjoewangie to Amsterdam, was towed out of Algoa Bay on the afternoon of July 11, but about dusk she cast off the tow-line and returned to the anchorage, the cause of which had not been explained, rainy and squally weather having prevented communication with the shipping.

MISCELLANEOUS.

At Ascension.—July 5, George Lee, from Batavia and sailed for Belle Isle.

Off Ascension.—July 24, Twee Cornelissen, from Java for Rotterdam; Cesambre, from Colombo for London; Aug. 1, Balmacarra, from Ceylon for London.

At St. Helena.—July 16, L. J. Enthoven, Koens, from Batavia; 17, Verdandi, Lofquist, from Sourabaya and sailed for Falmouth; 18, Stad Leyden, v. d. Poll, from Batavia and sailed for Amsterdam; Albrecht Beyling, v. d. Bey, from Batavia and sailed 19 for Schiedam; 19, Maria Catharina, Westenenk, from Batavia and sailed for Amsterdam; 20, Her Majesty, Seymour, from Manila and sailed 22 for London; 22, Niphon, Vuyck, from Batavia and sailed for Rotterdam; 25, Suzanne, Nadeau, from Singapore and sailed for Bordeaux; 27, Willem Poelman, Hoogenstraaten, from Batavia.

At Simon's Bay, July 6.—Royalist (s.) Halksworth, from Glasgow, for Singapore; 7, Island Queen, Dickson, sailed for Singapore.

At Pernambuco, July 26.—Europa, Hansen, from Manila, and sailed, 27, for New York.

At Mauritius, July 16.—Herald, Gardner, sailed for Manila.

The Adeline, Finlay, from London, put in at Rio de Janeiro, July 20, for provisions, and sailed, 21, for Singapore.

PORT OF AMOY. CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful centrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c.

Apply at the Offices of Messrs. PATERSON, SIMONS, and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

CHINA STEAMSHIP & LABUAN COAL COMPANY (LIMITED).

AT a MEETING of the CHINA STEAMSHIP and LABUAN COAL COMPANY (Limited), held at the London Tavern, on THURSDAY, the 15th August, 1867,

Sir JAMES H. D. ELPHINSTONE, Bart., in the Chair,

the Reports of Mr. J. Spencer Price and Mr. Morel, and the other letters from the Company's Agents in the East, having been read, and the chairman having made a detailed statement of the position and affairs of the Company,

Proposed by Mr. MILLER, M.P., seconded by Dr. CAMERON, and resolved,—"That this Meeting heartily congratulates the shareholders on the most satisfactory statements contained in their reports, and on the excellent prospects which now seem undoubtedly in store for the Company."

Proposed by H. H. LINDSAY, Esq., and seconded by the Hon. J. DRUMMOND, and resolved,—"That the Liquidators be requested, and they are hereby authorised and empowered to carry out the requirements and recommendations referred to, and made in their reports and letters, in such manner as they deem expedient, and it is the opinion of this Meeting that no further call ought to be made until the ships are sold."

Proposed by Dr. CAMERON; seconded by W. BLOUNT, Esq., and resolved,—"That this Meeting having confidence in the present liquidators, requests them to continue their services."

Proposed by Mr. ETLINGER; seconded by Mr. BENNETT, and resolved,—"That the best thanks of this Meeting be given to the Chairman for his courteous conduct in the chair."

JAS. H. D. ELPHINSTONE, Chairman.

'LONDON AND CHINA EXPRESS," ON SALE.

HOLLOWAY'S OINTMENT and PILLS.—INSTANT RELIEF.—Sores which are daily extending, ulcers which are hourly deepening, may be arrested in their torturing progress, and induced to take a healthy action by applying this healing Ointment, and taking these purifying Pills. It soothes all distempers of, and extracts all morbid humours from, the skin. Old ulcers of the legs, inflammations caused by varicose veins, and cramps of the lower limbs can sensibly be eased and shortly cured by Holloway's never-failing Ointment which represses excessive and stimulates sluggish vascular and nervous action. In constitutions breaking down under piles, fistulas, and other similar painful maladies, a few applications of this cooling Ointment will give comfort, and a persistence in its use will effect a cure.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, RED BULL WHARF, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

Orders executed on receipt of 10 per cent. of the amount in cash, the balance being drawn for through a Banker.

DYSENTERY, CHOLERA. FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any ervice in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT, from SOUTHAMPTON and MARSEILLES. — The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and RECEIVE CARGO and PARCELS for GIBRALTAR, MALTA, EGYPT, ADEN, CEYLON, MADRAS, CALCUTTA, the STRAITS, CHINA, and JAPAN (YOKOHAMA), by their steamers leaving Southampton on the 4th and 20th of every month. For GIBRALTAR, MALTA, EGYPT, ADEN, and BOMBAY, by those of the 12th and 27th of each month; and for KING GEORGE'S SOUND, MELBOURNE, and SYDNEY, by the steamer leaving Southampton on the 20th of every month. The steamers leave Marseilles on the 5th, 13th, 20th, and 28th of the Month.

N.B. Extra Steamer from Suez, for Aden, Ceylon Madras, and Calcutta.

It is the intention of the Company to dispatch an EXTRA STEAMER from Suez to Calcutta, in correspondence with the vessels conveying the Mails, &c., leaving Southampton on the 20th, and Marseilles on the 28th of October.

This arrangement will afford additional facilities for the conveyance of Passengers and Cargo.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C., or Oriental-place, Southampton.

OVERLAND ROUTE VIA MARSEILLES.

SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

* Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles.

INDIA AND CHINA VIA ITALY.

SHORTEST SEA PASSAGE FROM EUROPE TO EGYPT

BRINDISI to ALEXANDRIA—Contract Passage, 82 hours

It is frequently done in 72 hours.

THE Società Anonima Italiana di Navigazione Adriatica Orientale, under contract to carry the Direct Mails despatch as under their first-class English-built steamers CAIRO, BRINDISI, PRINCIPE DI CARIGNANO, or PRINCIPE TOMASO, between BRINDISI and ALEXANDRIA. The vessels of the Company sail as follows:—From Brindisi for Alexandria on the 7th, 14th, 22nd, and 30th of each month, at 2 P.M.; Alexandria for Brindisi, on the arrival of the mails, about the 5th, 12th, 20th, and 29th of each month. The arrivals at and departures from Alexandria are in coincidence with those of the steamers of the Peninsular and Oriental Company, with the Calcutta, China, and Bombay Mails.

Fares:—Brindisi to Alexandria, including provisions 1st class, 275f.; 2nd class, 200f.; third class, 90f., and *vice versa*.

For further particulars apply to the Company's offices at FLORENCE, via Montebello, 42; PARIS, Rue de L'Universite, 108; LONDON, Messrs. PALMER, 44, Eastcheap, E.C.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN *en route* thence to YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month. Passengers by this route are less than ten days in the tropics.

The next departures from San Francisco are:—

GREAT REPUBLIC, 5,000 tons, September 3rd.
CHINA*, 5,000 tons, October 14th.
COLORADO, 4,000 tons, November —.

For particulars of Freight, through passage rates, &c., &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

* Name changed from "Celestial Empire."

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

NEW OCEAN MAIL ROUTE to CHINA and JAPAN, via the Isthmus of Panama and San Francisco. THE WEST INDIA AND PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the Panama Railway Company and the Pacific Mail Steamship Company for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

The next departure will be

From LIVERPOOL on the 20th August,

intending to connect, at San Francisco, with the steamer leaving on the 14th October for Japan and China. The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

For rates of Freight and Passage apply to the agents, J. M. CURRIE, Havre and Paris; or at the Company's Offices, The Temple, Dale-street, Liverpool, and 117, Leadenhall-street, London, E.C.

ARTHUR B. FORWOOD, Managing Director.

JAPAN AND CHINA, by Mail Steamers throughout.—GOODS for YOKOMAMA, Nagasaki, Hong Kong, and Shanghai can be shipped under through bills of lading, via Panama, by the ROYAL MAIL STEAM PACKET COMPANY'S STEAMERS, leaving Southampton on the 2nd of September, 1867.

Apply to J. M. LLOYD, Secretary.
Royal Mail Steampacket Company, 55, Moorgate-street, London, E.C.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world. Baggage collected and shipped, insurances effected, &c.

The present mail was 19 days from Galle to Suez, which accounts for the late arrival. Telegraphic advices from Japan, via San Francisco, to about the 25th August, are due in London on the 14th inst. Telegrams have been received from Shanghai to the 3rd, and Hong Kong to the 12th August. This mail will probably be in about the 28th inst.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Massilia, from Southampton, September 4.—To Hong Kong Mr. and Mrs. G. W. Caine and child. Miss M. Middlemist, Mr. T. Woodfield, R.N., Mr. Lucas, Mrs. Davies, Lieut. Coates, Mr. F. H. Moore, R.N., Mr. F. W. Bower. To Ceylon: Mr. Everard, Mr. L. H. Pierce, Mr. W. C. Johnson. To Singapore Mr. Isemonger, Mr. E. Armstrong. To Shanghai: Mr. E. Price, Mr. R. Bristow, Mr. C. M. Ford, Miss Partridge, Mr. C. W. Everard. To Yokohama: Mr. J. J. Quin, Mr. G. G. Hodges. To Calcutta: Col. and Mrs. Lewis, Miss Barrow, Mrs. Blechynden and two daughters, Miss Graves, Mr. P. Swaries, Mrs. Z. Mathews, Miss Fallon, Mr. J. L. Robertson, Mrs. A. Sneddon, Captain W. Strahan, Staff Assist.-Surgeon Hale, Staff Assist.-Surgeon Major, Staff Assist.-Surgeon Gardner, Mrs. Gardner, Lieut. and Mrs. Oldham, Mrs. Cleworth, Lieut. A. J. Wallace, Mr. P. Maitland, Mr. T. Higham, Mr. H. Joll, Mr. E. W. Oates, Mr. T. F. Mackenzie, Mr. W. B. Bromley, Mr. J. Stewart, Mr. Beresford, Mr. A. Grant, Mr. T. Beatty, Mr. J. Heinig, Mr. W. A. de Crettes, Mr. D. Wallace, Mr. R. From Marseilles, October 28.—To Singapore: Mrs. R. Little and child. To Hong Kong: Mrs. J. Haffenden, Mr. T. Pyke, Mr. F. Rowett. To Yokohama: Dr. and Mrs. Jenkins. From Gibraltar to Hong Kong: Miss Burton. From Suez to Penang: Mr. E. Fredericks.

Per P. and O. steamer, from Southampton, Nov. 4.—To Ceylon: Mr. and Mrs. J. M. Vanderspar and four children, Mr. Malcolm, Miss Malcolm. To Singapore: Mr. and Mrs. J. McLachlan, Mrs. Dunman and two daughters.

From Marseilles, Nov. 12.—To Ceylon: Mr. J. F. Dickson.

Per P. and O. steamer, from Marseilles, Nov. 28.—To Singapore: Mr. J. D., Mrs., and Miss J. Almeida, Miss Reneaud.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The P. and O. mail of 10th May arrived out on the 29th June; the French mail of the 17th on 10th July. Dates are now down to the 14th July. The regularity in the arrival of mails is specially noticed.

The political intelligence by this opportunity is extremely meagre.

On the 2nd July one of those dastardly and cowardly attempts at assassination for which the Japanese have rendered themselves so famous occurred at the Dutch Legation in Yedo. H.E. the Dutch Minister, Mr. Van Polsbroek, was sitting in his verandah, when a Japanese deliberately pointed a pistol at him and fired. Happily the aim was imperfect, and Mr. Van Polsbroek escaped without injury. Although, it is asserted, every effort has been made to find the villain who thus made the attempt it has been ineffectual.

The new admiral, Sir Henry Keppel, has arrived in H.M.S. *Salamis*. He made no stay in Yokohama, but started at once for Yedo, where he was the guest of the British Minister. He returned to Yokohama on the 11th July. H.M.S. *Perseus* left on the morning of the 6th for Hakodadi, with Mr. and Mrs. Eusden as passengers. About the 18th the admiral proposes to visit Hakodadi and the inland sea; H.E. Sir Harry Parkes intends to make an official visit.

Much satisfaction is expressed at the prospect of having so fine an ironclad as the *Ocean* attached to the China fleet. The Admiralty have done well in selecting a powerful one whilst they were about it; as although no one anticipates trouble in these waters to an extent to call for ironclads, still there is no knowing what may turn up.

The American Fire Company have received from San Francisco, per brig *Brewster*, their new fire engine, the Volunteer, and gave her a preliminary trial. The weather was very unfavorable for showing what she could do, the wind blowing strong at the time, notwithstanding which she threw an inch stream horizontally nearly 150 feet, and perpendicularly about seventy feet. Her cylinders are 6½ inches diameter, with 15 inch stroke.

The American celebration of the 4th July was duly performed. At noon a salute of 37 guns was fired by the men-of-war, Kanagawa Fort, and at the U.S. Consular grounds, and sunset was marked by a parting salute from an American ship in the harbour. Falling as it did on one of the days of a great Japanese holiday, on which every man, woman, and child seemed to be out of doors, all in gala costume, the day appeared more gay and holiday-like than has been witnessed here for some time.

Messrs. Hansard and Black, the proprietors of the *Japan Herald*, it is stated, have been declared bankrupts, and the

Digitized by Google

paper will be continued by Messrs. Scott and Co. as the *Japan Chronicle.*

The rifle match between the officers of the 2nd 9th Regiment and the members of the Yokohama Rifle Association took place on Thursday. The weather was, compared with most we have lately experienced, exceptionally fine; in fact, until about half the 400 yards shooting had been gone through, it was quite perfect for the purpose. A bright clear atmosphere with a cloudy sky was accompanied by just enough wind, blowing from behind the marksmen, to carry off the smoke. At the last the clouds broke, and gleams of bright sunshine interfered with these conditions in some measure. Under these circumstances a heavy score might have been expected, but, as will be seen below, this was hardly the result :—

Two rowing matches took place on the afternoon of Thursday, 4th inst., the first between the pinnaces of the *Perseus* and *Basilisk*, in which the former won by two lengths; the second between a boat pulled by sailors belonging to the *Ganges* and one pulled by Japanese belonging to Capt. Mason, of the *Tiptree*. The Japanese crew came in first, winning by any distance they liked.

The *Dragon* sailed from Glasgow March 15, arrived at St. Vincent, 28, sailed the 1st, and arrived at Cape of Good Hope April 25, sailed, 30, arrived at Singapore June 5, sailed, 13, and arrived at Hong Kong evening 27th ultimo. Light airs and calms to Van Dieman's Straits; June 3 and 4 encountered strong gales with high sea running, since calms. The *Dragon* has performed what has not been done before; the last place she coaled at being the Cape of Good Hope, and having actually been at sea only eighty-nine days. Taking into consideration that she is heavily laden, she has completed a wonderfully quick passage. Her engines are of the most modern construction, embracing latest improvements, being high and low pressure, with four cylinders. She condenses sufficient water for all purposes, and can run ten knots an hour with the consumption of six tons of coals a day—or eight knots an hour upon four tons per twenty-four hours.

COMMERCIAL.

The following is the report of the *Japan Herald* :—

We commence a new year from the 1st July, as the old Tea and Silk season closes on the 30th June, and the new crops thenceforward claim the greatest attention. The export of both Tea and Silk during 1866-7 compare favourably with the preceding year, and although the average range of prices has been somewhat lower, yet the difference of exchange between dollars and native coin (314 boos against 255 boos per 100 dollars) has left a large advantage with the native sellers. It may be expected that this will bear fruit in increased supplies; and as both the Teamen and Silk merchants speak of good crops we have no doubt that the export of 1867-8 will show a considerable advance.

In imports the exchange has very materially interfered with operations. The buyers have striven hard against paying more boos—the sellers against taking fewer dollars; but although both have had to give way in order to do business the buyers have done so in less degree than the sellers. The low rate of boos, however, has rendered business very heavy; and more than once during the year, when there seemed a likelihood of some improvement, the Japanese Government have had to throw lacs and lacs of boos into the market to buy dollars to obtain the means of paying for purchases of ships, dockyard materials or other things which they had ordered in Europe, the payments for which fell due.

IMPORTS.—Grey Shirtings and Cotton Yarn more inquired for, and good sales are expected when dollars are more plentiful. Velvets, White Shirtings, Lawns, are all lower and difficult of sale. Camlets: Small parcels of very good assortments are saleable at quoted rates. For Metals a small inquiry exists.

EXPORTS.—The New Season Silk has opened at $800 for Maibash; the quality is not first-rate. The Japanese freely admit that the crop is larger and the cocoons of better quality than last year. At the same time they state that silk is held in the interior at prices which give them no inducement to bring it to this market. In fact, arrivals, both of old and new silk do not amount since the beginning of the month to more than 80 piculs. Tea: About 700 piculs new have arrived, and sold at $22 to $32. The Havelock, for New York, takes 299,217 lbs. tea and a few packages silk.

NAGASAKI.

The following is from Messrs. Alt and Co.'s Circular, dated July 1 :—

IMPORTS.—Our markets, as is usual during the rainy season, are in a very depressed state; native merchants, however, assure us that in a few weeks a more active demand will set in for manufactured goods. Camlets: Small sales have been made at quotations. Turkey Red Prints: Large patterns wanted. Grey Shirtings are in heavy stock, with little demand. Cotton Yarn in small demand; stocks light. Lustre Orleans are also wanted, at quotations. Tientsin Cotton: Prices quoted can be realised of Shanghai, however, there are heavy stocks. Metals show a slight improvement. Nail Rod Iron: Small sizes are wanted; as also is Round Bar and hoop. Lead: A demand is again springing up. Coal (English) None in the place.

EXPORTS.—We have again to report a dulness in our produce markets. Only a few sales of Tobacco have been reported; stocks are small and prices firm. There have been a few settlements at advancing rates. Galls have been taken only in small quantities, and are in fair supply. In Tea we hear of no purchases for cash, nor are any settlements of new crop leaf reported. The parcels of new Tea which have so far been offered are only of indifferent quality, no fine Teas having apparently arrived from the country.

CHINA.

PEKING.

In the *Peking Gazette* of 28th June there is an edict relating to the famine in the North of China, but more particularly in this province of Chihli. It orders the Governor-General and prefects to find out the distressed families, and give them rice or money to keep them from starving to death. We are going to see dreadful times this year in the north. The rebels hitherto in Honan province have come into the Shantung province and into the south of this province, causing great alarm in Chefoo and to the Tientsin mandarins. The steamer *Shanse* took 564 men of the Chinese Rifles to Chefoo (leaving here on the 2nd) to protect that place. I fear the whole of the north of China is likely to be in a disturbed state by starving people and rebels.

A late number of the *Peking Gazette* contains a very severe reprimand to Li-hung-chang, because of his want of success against the Nien-fei. His negligence is represented as a crime against the Government, and he is ordered to exterminate them at once if he does not wish to be proceeded against. The Futai of Hu-peh, and the Fantai of Shangtung have lost their buttons for similar reasons.

At Chefoo H.M. gunboat *Insolent* and French *Mirage* were in harbour, and the U. S. corvette *Wyoming* had visited *Tengchow*, a place were American missionaries reside, to protect the foreign inhabitants. Parties of rebels had advanced as close as forty-five li to Chefoo, and the native inhabitants were in the usual state of funk. At this port Mr. Alabaster, late Acting Vice Consul at Shanghai, has assumed the reins of office as Acting Consul, and is distinguishing himself by endeavouring to reassure the people and bolstering up the courage of the officials. He is, as he formerly was at Shanghai, a most determined anti-rebel and believer in the infallibility of the Manchu authorities, by whom he has been *decorated.*

The latest arrival from these northern ports is the *Nanzing*, on the 17th July; Sir Rutherford Alcock, in the *Argus*, arrived at the outer anchorage of Taku on the 7th; from there he was conveyed on his way to Tientsin in the *Manila.* This vessel managing to get ashore, his Excellency and suite had to disembark and perform the remainder of their journey, some twelve miles, on ponies, arriving at H.M. Consulate Tientsin on the night of the 8th, and departing for Peking on the succeeding day.

SHANGHAI.

The P. and O. mail of 27th May arrived out on the 8th July. Telegraphic advices via Galle reached to the 14th June, and *via* Kiachta to the 18th. The *North China Herald* has the following summary of news dated 19th July :—

We have very little local news to record since our last issue. Perhaps the occurrence which has excited most interest has been the trial and conviction of a broker named Reuben on a charge of forging and uttering a false opium delivery order on the

Digitized by Google

Ariel. He was sentenced to two years' imprisonment in Hong Kong and subsequent deportation.

The well-known Fuh-ho property, covering about 5½ mow of land, a portion of which is unlet, and the remainder bringing in a rental of 3,470 taels per annum, has been sold for 20,400 taels. Five shares in the Shanghai Gas Company have realised 60 taels each; and three shares in the General Hospital 25 cents each! Two lots of Chinese house property in Tientsin Road have also been sold; a lot measuring 5m. 5f. 3l. 1h., for 7,400; and another, measuring 7m. 5f. 1l. 1h., for 11,600 taels.

The Taotai has collected 500 taels from the villages on the Woosung Road, 300 taels from the Pao-shan, and 200 taels from the Shanghai districts, towards the expense of repairing the bridges.

The Taotai has officially notified the various money dealers that, after the 6th instant, the restrictions regarding the sale of dollars on time bargains, by people without capital, will be strictly enforced.

Wang-tsung-lien, who has long been an incubus in the post of Che-hsien of Shanghai, has been superseded by Yeh Tung-chun, who is favourably known to foreign officials as one of the Chinese police committee. The Fantai, we learn, has discharged Wang for not properly restraining his constables. The head constable was lately summoned to Soochow, and instead of sending him the Hsien took him in his train, to show that he partly identified himself with the man's case and meant to shield him. The Che-hsien was politely treated by the Fantai and asked to take a seat "on the bench," as we would say. The case was investigated, and being found proved, the man had 300 blows there and then administered in his master's presence. This was taken by the Che-hsien so much to heart that he shut himself up and refused food for two days. His attempt to use his influence on behalf of his constable has proved his ruin. Yeh, the new man, is well known among the natives as a sort of Haroun Al Rashid, who goes about in disguise and finds out grievances.

The French Consul-General has notified that a Custom-house exists at Woo-sueh at which foreign vessels have to stop and have their papers examined, with a view to prevent contraband trade in arms and munitions of war.

A serious accident occurred to the steamer *Fenella* on her way to Ningpo. One of the boilers burst, badly injuring the engineer and several Chinese. The injuries sustained by the former have since proved fatal. The steamer is not much damaged.

The sailor who committed the assault on Captain Winchester, of the *Coral Nymph*, has been sentenced to one year's imprisonment with hard labour at Hong Kong.

Difficulties continue in selling cargoes of bean cake from Newchwang by foreign vessels.

The P.M.S.S. *Costa Rica*, a description of which we gave in our last issue, arrived from Hong Kong on July 8, and left for Yokohama *via* Nagasaki. This company has fixed the rate for the round voyage at the really moderate figure of $150, an example which we trust the other steam companies will not be slow to follow.

The failure of Messrs. Mackellar and Co., of Hankow, has caused more excitement in Hankow and Shanghai than has been known in the commercial world for some time past.

Writing on this subject a contemporary says:—

"We are informed that the failure of Messrs. Mackellar and Co., of Hankow, caused very great excitement in the Settlement. The Chinese tea dealers, who had sold their goods to the house shortly before the suspension was announced, manifested the utmost hostility, and invaded the private dwellings of the bankrupts, saying that they had come to dinner, that the house and all about it belonged to them. The Taotai of Hankow, it is also stated, has suggested the punishment of the insolvents, and has identified himself with the tea merchants in a similar manner to that in which the Shanghai Taotai took up the cudgels respecting the Chuquai silk business. Mr. Myburgh has left for Hankow, we understand, in connection with this business, and the whole of the matter may, therefore, be expected shortly to be brought before the Court at that port."

The losses likely to accrue from the failure are reported to be from 200,000 to 300,000 taels, all or nearly all of which will fall upon the native merchants, who naturally speak rather strongly on the subject. We have heard a touching account of the behaviour of the teamen who crowded the *Fire Queen* on her last passage from Hankow, sitting disconsolate on their own tea chests, their own yet not their own, bought and shipped, but not paid for, before the failure was announced.

The Shanghai New Dock is to be roofed in to form a swimming bath; the water to be frequently changed and cleansed with alum. A platform five feet deep is to be constructed in part of it for the benefit of non-swimmers. The outlay of 1,000 tls. required to complete this is to be raised by an entrance fee of 10 tls. each member, and the annual subscription will not exceed $3. The lease of the building known as the Shanghai Club is, by order of the mortgagees, to be sold by auction on the 10th August.

The steamer *Island Queen* has been sold at auction for 10,000 tls.—purchaser, Capt. MacFarlane.

The new seaman's church at Pootung is now nearly completed. It will be a very handsome little building and form a pleasing spectacle to the promenaders on the Bund and Consular mud flat.

We understand that there is a deficiency in the church funds of about Taels 15,000, and that the new building must come to a stand unless a loan is arranged by the trustees.

Sir R. Alcock is professing to want all suggestions with reference to the revision of the treaty and tariff, but the all-important want is the bonding system; though probably some houses prefer things as they are, and don't mind a lock-up of duties so long as it will exclude others from the trade; and perhaps they are right from past experience. New ports will be asked for, but the extension of branches must cease, and new agencies will be established if honest men can be found.

IMPORTS.—Grey Shirtings are being returned from Tientsin to this port. There has been a fair business done during the fortnight at rates slightly higher than those current last mail. Sales from first hands, however, have not been large, and the deliveries for re-export have been only on a moderate scale. Prices now are taels 2.75 to 2.82 for 8.4 lbs., and taels 2.35 to 2.45 for 7 lbs. T-Cloths: The demand has fallen off for all but the best makes, and prices show a fall of 7 cents per piece. White Shirtings: Considerable sales of the lower counts are reported at improved prices, and 2.50 per piece has been willingly paid for 56 reed (best). Woollens: Camlets continue very dull of sale, with no change in price. Long Ells: The demand remains steady at about former prices. Stocks are not large, and firmly held. Spanish Stripes have advanced in value, and fair assortments have met with a ready sale. Figured Orleans: Some holders have pressed sales, and considerable transactions are reported at the decline noted last mail. Metals: The market remains without change of importance. The Titania brings some 300 tons of iron. Nail Rods may be quoted at tls. 2.52. Lead has been sold at tls. 4.90, and Malacca Tin at tls. 19. Coals: The arrivals caused rates to decline; the demand on Chinese account has also abated. Cardiff, from ship's side, tls. 15, nominal; North Wales, do., tls. 14, nominal; English, do., tls. 14 to 15 nominal; Anthracite, do., tls. 13 to 13.50; Sydney, do., tls. 11, sales; Japan, do., tls. 7.50 to 8, sales; Formosa, do., tls. 5.50 to 6.50, sales.

EXPORTS.—*Tea*.—We have had an active business in Congous since the last mail left, some 30,000 chests having been settled. Prices may be quoted nearly two taels higher for fine and one tael higher for medium teas, but since the receipt of the Kiachta telegrams, quoting an active business in Congous at one shilling, there has been less demand, and the market closes with a decidedly easier feeling. The stock has slightly decreased, arrivals from the river having fallen off owing to the panic among the Hankow teamen, consequent on Mackellar and Co.'s failure, and we now hold not more than 50,000 chests. The bulk consists of common Oonahms, such as the tea quoted above as active at a shilling, for which 18 tls. or 1s. 1½d. has been offered, teamen being firm for 19 tls. or 1s. 2d. The stock in Hankow was about 40,000 chests at date of last advices. Business in Pingsueys has continued to a moderate extent, and prices since the departure of the steamer are rather lower, though still above the equivalent of last London rates. Of the fine Moyunes from Chinkiang, two chops have been settled at 39 taels—all round, an extreme price considering the near approach of the new teas, and of which an unusually plentiful crop is expected. Silk: Early in the fortnight but few transactions took place in this market, owing to the unfavourable telegraphic advices received via Kiachta from England, quoting chop No. 3 Tsatlee 30s. 6d. per lb. Subsequently, however, as the natives evinced a desire to accept much lower rates for their silks, a large business took place, and the settlements are estimated at fully 1,400 bales, chiefly common to medium Tsatlees and Taysaams at prices which show a decline of fully taels 20 to 35 per picul on rates paid last mail. The Chinamen appear very anxious to realise their stocks, and are willing to submit to even lower rates to induce purchasers. Of the settlements made fully 700 to 800 bales are going forward on native account, or joint account of foreigners and Chinamen. The unsold stock has increased to 7,000 bales, only a small proportion of which are chop silks, the chief part being composed of market and common descriptions.

FOOCHOW.

There is no political or general news. The dates are down to the 6th July.

The ship *Pakwan*, bound from Foochow with a cargo of tea for London, met with an accident while being towed out. To avoid several wood junks which were lying at anchor she kept too much to one side of the river, got into the chow-chow water, and had to let go an anchor. In swinging to the tide she struck on a rock, and had to be towed back to Foochow leaking badly. She will have to go into dock and discharge cargo.

IMPORTS.—Sales reported are:—Grey Shirtings, 8¼lbs., 4,500 pieces,

Digitized by Google

at $3.70 to 3.75 per piece. T-Cloths, 7lbs., 1,000 pieces, at $3.55 per piece.

EXPORTS.—Congou: After the departure of last mail the market became less active, and prices showed a weakening tendency. This quiet tone has continued, and latterly prices have given way from 1 to 2 taels. The greater portion of the settlements are for the colonies. Souchongs: Continue to be taken, at prices on a par with opening rates. Pekoe: A few parcels of mixed leaf kinds have been settled for England. The fine Panyong Teas have not yet arrived. Scented Teas: Have been in very full supply, and a large business has been done in them at a fall of 1 tael.

HONG KONG.

The dates of this mail are down to the 25th July. The following one, with dates to 29th, per P. and O. Company, is expected on the 12th. The P. and O. mail of 10th June had arrived out, and the French mail of 17th was hourly looked for. Notice of attachment has been issued on behalf of the Mercantile Bank on Smith, Kennedy, and Co., for $48,959, balance due on bills of exchange on Robert Smith and Co., London.

The *Shanghai Recorder* states that Mr. Gibson, H.M.'s Acting Consul at Hankow, was violently struck in the Court-room of the British Consulate at that port by three Chinese, some seventy or eighty being present with three foreigners at the time. The *N. C. Daily News* modifies the statement into one Chinaman having struck the Acting Consul, and being immediately and most properly floored by "a well-directed facer" from that gentleman.

A meeting of the Legislative Council was held on the 23rd July.

Present—The Governor, the Chief Justice, the Acting Colonial Secretary, Judge Ball, Treasurer Forth, and Hon. Messrs. Ryrie and Parry. Messrs. Phineas Ryrie and Francis Parry, having taken the oaths, took their seats as members of Council, in place of Messrs. Dent and Gibb.

The ordinance concerning contagious diseases was then passed, as No. 10 of 1867.

The chief subject of debate—or rather conversation—was the mode of collecting the police and lighting rates.

After a somewhat lengthy discussion, an important alteration was made in the mode of collection. The objectionable summary process of execution by warrant before summons was abolished, and the ordinance was amended to the effect that a formal notice of assessment should be issued at the commencement of the quarter, and should the person assessed fail to pay within a time named, a summons would be issuable for the recovery of the same, four days' notice of the intention to issue such summons to be given to the defaulter. Rates recovered by summons to bear a charge of 12 per cent. per annum from the commencement of the quarter. The question as to whether the old mode of procceding should be retained was supported by the Chief Justice and Mr. Forth; the other members advocating the amended process.

The Governor then said that, as there was some local difficulty in the way of the immediate constitution of the High Court for the Suppression of Piracy, he laid before the council a short ordinance extending the jurisdiction of the Supreme Court in dealing with confederates of pirates, outfitters, and those guilty of offences provided against in the Piracy Ordinance of last year. This jurisdiction, it was distinctly mentioned, would not extend beyond what was consistent with the practice of the court; and the main point of last year's ordinance—viz., to dispense with trial by jury, would, of course, be perfectly inapplicable to the Supreme Court.

The council then adjourned.

The following bankrupts have been announced for examination in July:—

Alexander] Christian Friederich Bielfield, Reuben Solomon, Leonard Barnes, William Henry Hornholtz, and Frederick Major.

The following has been issued by the Hong Kong and Shanghai Bank. We believe that the dividend announced at the July meeting was at 12 per cent. per annum, after allowing for all losses by Dent and Co. and others:—

"The new deed of settlement of the corporation, having received the sanction and approval of his Excellency the Governor, in conformity with the provisions of the ordinance of incorporation, is now ready for signature by the shareholders."

The following is from the *Daily Press*, in reference to Mr. Pollard and the Judge, noticed in our last:—

The details of an exciting personal quarrel between the Chief Justice and Mr. Pollard, Q.C., will be found further on in the course of various reports of proceedings in the Supreme Court. Mr. Pollard was thought by the Chief Justice to have been guilty of contempt of court on a certain day, and, after some delays, a solemn "decision" was given, in accordance with a previous announcement, owing to which the court was as full as it could hold, by which Mr. Pollard was adjudged to pay a fine of $200, or be suspended from practice for fourteen days. The amount of the fine as inflicted on a man who constantly receives more than twice as much as the fee for a single day's practice in court gave the sentence an air of absurdity, but its real sting lay in the insulting manner in which it was delivered, accompanied by a lengthy harangue, during which Mr. Pollard was compelled to stand. To say that the current of public opinion in the affair sets strongly against the judge would be to express the fact in language of so mild a character that it would disguise the truth. The community was disgusted and indignant. The fine was paid by a subscription signed by more than a hundred persons, most leading men of all classes being amongst them. Mr. Pollard, after addressing a letter containing the most serious charges against the judge to the Governor, has been recommended by his Excellency, who declines to interfere, to send in a petition to Her Majesty (no direct appeal to the Privy Council being open in law), accompanied by affidavits as to what took place in court on the occasion referred to, which Mr. Pollard declares to be totally at variance with the statement of the judge. This course he has adopted, and affidavits by persons of undoubted respectability, and corroborating Mr. Pollard's statements in the most striking manner, will, it is believed, be sent home with the petition. The affair cannot end where it stands now, the allegations contained in his letter to the governor being of a nature which, considering his position as a Queen's Council, can hardly be passed over, and must be either withdrawn or substantiated.

The following report of a meeting of the Union Insurance Company is from the *China Mail*:—

Minutes of a meeting of shareholders in the Union Insurance Society of Canton, held on the 29th June, Mr. Keswick in the chair. The shareholders present were Messrs. Foster, Parr, Pestonjee, Arnhold, Ryrie, Nissen, Sassoon, Ghandy, Camajee, Duncanson, Eimbcke, Andre, W. Lemann, Rozario, Pallanjee, Parry, Still, Taylor, Helland, Bosman, Heard, and Ede.

The Chairman read the advertisement calling the meeting and the first clause of the articles of agreement to which the advertisement referred.

Mr. Ryrie proposed, and Mr. Parry seconded, "That the Union Insurance Society of Canton for 1865 to 1867, which, according to clause No. 1 of articles of agreement, terminates on 31st December, 1867, shall not be continued after that date. That Messrs. James Duncanson, N. H. Foster, jun., W. Keswick, W. Nissen, and A. Sassoon, who constitute the present committee of management, be empowered to frame new articles of agreement, with the view of starting a new society under the old title, and submit the same to a general meeting of shareholders within three months from this date."

Some discussion took place here as to whether the new society should be a triennial or an annual one.

Mr. Bosman moved, and Mr. Arnold seconded, as an amendment to Mr. Ryrie's proposition, "That the paragraph relating to the formation of a new society be struck out." The amendment was put to the vote and lost; the original proposition was then put and carried.

The Chairman called attention to an article which appeared in the *Daily Press* and *Overland Trade Report*, in which it was mentioned the financial statement of the society showed a very large deficit, and said he wished to contradict that report, which he need scarcely inform the shareholders present was altogether incorrect. It was true the society would lose through the unfortunate position of Messrs. Dent and Co., but it was satisfactory to know there were funds quite apart from those in Messrs. Dent and Co.'s hands which would admit of a fair dividend being declared at the proper time. The chairman further remarked that the Committee of Management hoped their endeavours to promote the interests of the society would be seconded by the shareholders giving it support by contributing as much business as they were able.

A question was put by Mr. Parry, whether the moneys in the hands of Messrs. Dent and Co. would not be considered trust moneys, and whether the committee had taken steps to ascertain if the society's claim could be considered a preferential one.

Mr. Keswick replied on behalf of the committee that the

Digitized by Google

affairs of the society had been in their hands for a few days only, and that all matters connected with it were being investigated.

The meeting was about to be dissolved, when Mr. Taylor rose and said that he thought they should not separate without considering that Messrs. Dent and Co. had managed the society faithfully and ably for a great many years. He proposed and Mr. Eimbcke seconded—"That this meeting thanks Messrs. Dent and Co. for their able management of the Union Insurance Society's affairs during many years, and regrets that circumstances have rendered the transference of its management to other hands necessary." This motion was put to the vote and carried.

(FROM OUR OWN CORRESPONDENT.)

July 23rd, 1867.

It may safely be anticipated that the majority of persons in England who are interested in Chinese matters (unfortunately they are so few!) will stand aghast with astonishment when they receive the news that the Colonial Government of Hong Kong, or rather the Governor, has departed from one of the most clearly established principles ruling wherever the British flag floats, and has licensed gambling of the most pernicious kind and on a scale of enormous magnitude.

This is, I think, the first occasion on which I have adverted to any official act of Sir Richard MacDonnell otherwise than in terms of praise, but all his laudable efforts for the moral regeneration of Hong Kong are likely to come to naught when counteracted by the extraordinary scheme he has now matured for the propagation of vice as a financial remedy for the embarrassments into which the colony has fallen. Hitherto, Hong Kong has at least, with all its defects, been an example, on the whole, of integrity as regards the intent of its Government to the adjacent empire; but the native authorities of Canton, who have during the last twelve months entirely eradicated gambling from existence within their jurisdiction, at an enormous pecuniary sacrifice, will justly reproach the Colonial Government with picking up their cast-off clothes of official iniquity, if Sir R. MacDonnell's scheme be sanctioned by the Colonial Office at home. Sir Richard, like many other capable but headstrong individuals, appears to be fond of ignoring his "constitutional advisers" and official assistants in favour of counsellors and instruments picked up in very odd bye-ways. For some time past it has been rumoured that Sir Richard's Chinese cook is his principal and confidential informant and guide, and in this gambling matter especially the cook has been consulted, much to his own profit. The scheme which Sir Richard MacDonnell has partially unfolded comprehends, so far as can be judged from the preliminary statements, permission to a gambling-contractor to establish gambling houses in all parts of Victoria and the remaining settlements on the Island, with an understanding that the law prohibiting gambling, though left unrepealed in the Statute book, shall not be enforced. In return for this privilege, the contractor engages to pay the Colonial Government no less than the enormous sum of two hundred and fifty thousand dollars per annum. In other words, the gambling house-keeper, in lieu of retaining half the police constables in the Island, by a fee of some per $20 mensem each, to wink at his proceedings, is allowed to extend his operations enormously, and to bribe the Government instead of the police, to leave the law unenforced. What the result of this extraordinary action will be every person cognizant with matters in Hong Kong and China can easily divine. An influx of the worst characters from Canton will instantly take place, making the gaming-houses to be established their headquarters for the planning and commission of every kind of crime, whilst every art will be used, under the cover of legal sanction, to entice the native residents of the place, the Chinese servants, clerks, and shop assistants, to wager their money at the "Government tables," and to procure by theft or fraud the means of supporting the system which is to produce so vast but so iniquitous a return to the Colonial Treasury. As a sop to public opinion, the Governor has held out the expectation that the receipt of so large a revenue from this source will enable him to continue the operation of the Stamp Act suspended; but people who have British interests and honour at heart are crying out, with little love for further taxes, that they would prefer a dozen Stamp Acts to so fatal a system as that about to be inaugurated. That the well-known connection of a domestic employé of Government-house with such schemes will expose the Governor's name to slander among the Chinese is certain; and the Governor will be lucky if he escapes unmerited blame more securely than a former Lieutenant-governor, whose easy-going license to his native servants brought serious troubles to his own good name.

Since I last wrote the bankruptcy of Dent and Co. has become, from a matter of confidential whispering, a subject of public discussion, and, although the precipitation of the Act of Bankruptcy is regretted, public opinion is not so completely favourable to the mode of procedure immediately prior to the catastrophe as might have been anticipated. As will have been learned by last mail's advices, the firm were driven to petition for an adjudication in bankruptcy, owing to the action taken by the Hong Kong and Shanghai Bank in endeavouring to sue out a judgment upon a claim of 100,000 taels. The bank was forestalled in this attempt to obtain the first pick of Dent and Co.'s assets by the declaration of bankruptcy made by the firm itself, and notwithstanding the protests of the bank, heard before the Supreme Court, Dent and Co. have received five months' protection from further action. A separate bankruptcy has been declared on the part of the Shanghai firm, a preliminary hearing in which is fixed for the 23rd of September. The Supreme Consular Court at Shanghai will shortly, also, be actively occupied with an extensive and fraudulent bankruptcy at Hankow, where a firm established for some few years past failed two or three weeks ago, its principal creditors being Chinese, whose teas have been obtained on credit, and hypothecated for their full value to banks in Shanghai, the proceeds being made use of in paying off pressing claims from other creditors. So much excitement has prevailed among the native traders on this subject that the acting British Consul at Hankow was mobbed in his own office by the enraged creditors.

The shippers of teas from Foochow have been somewhat enlivened by recent advices from home, but accounts are almost unanimous as to the injudicious nature of the dealings at that port during the present season no less than at Hankow. All over China the wet spring has deteriorated the quality of the leaf, notwithstanding which, with a precarious home market and short exchange, enormous prices have been given. The shipments from Canton are very languid.

COMMERCIAL.—The *Daily Press* of 24th July reports:—There is little change to report in the market for manufactured imports; in fact, goods of all kinds are in such short supply that there is in reality nothing to promote activity were the demand ever so pressing. It is seldom, perhaps, that this market has been so clean swept of all manufactured goods as it is at present, or that even the arrivals have been so numerously anticipated as to leave little or nothing that will actually add to stocks for several months to come. The cargo of the *Solent* is turning out badly damaged, consequent upon the heavy weather she encountered on her voyage hither, and this will in a few days place upon the market a quantity of goods to be placed at auction. As this is always a favourite mode of purchasing with the Chinese, it would not be surprising if remarkably good prices were obtained for these, and the effect cannot be otherwise than beneficial upon the market. Sales continue on a fair scale from second hands, and to-day a number of large transactions are reported by large native dealers at full market rates. There is still a fair demand for Raw Staple, which continues to be taken at slightly better prices. The inquiry for Metal is still noticed. Transactions reported to-day embrace 300 pieces 30 yds. American Drills at $4.20, 200 pieces Brocade Lustres at $8.10, 590 bales Bengal Cotton $19.80 to 23.45, 100 bales Bombay at $23.25, 50 bales Tientsin at $23.20, 500 piculs Flat Iron at $3.35, and 300 bars Malacca Tin at $21.50. There has been nothing doing in shares, and, with the exception of hotel shares, which are to-day quoted at $65 per share discount, quotations remain.

THE RIOTS AT PENANG, &c.

(FROM A CORRESPONDENT.)

The riots that were raging in Penang when the last mail left, between the Ghi Hiu and Toh Peh Kong Hoeys, will afford Sir Harry Ord's Government an early opportunity of dealing effectually with the secret societies in the Straits Settlements. The present feud originated at Junk-Ceylon, an island situated more than a hundred miles to the north of Penang, showing how the ramifications of these secret combinations extend over the settlements and neighbouring States. The late Government was from time to time pressed to interfere, but to the last persistently neglected to do so, and consequently these associations, that might have been rendered innocuous or extinguished at the outset, have gradually assumed such dimensions that there is scarcely a Chinese left in either station who is not a member of one of them. The Malays and Klings also join them, and even have secret societies of their own. In 1854 serious riots occurred in Singapore, during which much property was destroyed, and several hundred persons perished; they were only quelled by the military on martial law being proclaimed. For the last ten years both Singapore and Penang have been incessantly disturbed by party fights, involving bloodshed and death, and yet not a movement has been made to coerce the Hoeys. If I remember rightly, Sir James Brooke publicly expressed the opinion that the outbreak of the Chinese at Sarawak was, to some extent, brought about by the lax system pursued in Singapore towards the Chinese.

The frequent outbreaks in the Straits are indubitably regarded by the natives of the surrounding States as a sign of weakness, and tend to lessen our *prestige* considerably. Hitherto the rioters have never turned their arms against the authorities, but how soon they may do so, if allowed to revel in their lawlessness, it is impossible to say. The only attempt made to restrain

Digitized by Google

them through themselves is by forcing the heads of the Hoeys to patrol the streets as special constables with the police whenever disturbances occur. It has been suggested that the best course to pursue would be to force these societies and their office-bearers to be registered, just as friendly societies are in England, and to declare all meetings of more than ten men with closed doors illegal. The plan would do good, but I fear would not prove effectual. I would go further; I would make the registered office-bearers responsible for the misconduct of their followers, and fine them heavily, and if that would not suffice, deport them and suppress the offending societies *vi et armis*. At the same time, I would make the punishment against rioters excessively severe. Although it is a notorious fact that the heads of the Hoeys invariably side with the executive and openly assist to restore peace, I, and all who have had any experience of the Chinese character, can have little faith in their sincerity; and with such a people who, under strict rulers, are the most peaceful subjects, but under a lax system the most unmanageable, we know that arbitrary measures alone can keep them within bounds. Were such measures adopted the respectable members of society would be afraid to take office, and without respectable chiefs the societies would cease to exist; or, if they did, I feel sure they would contrive to keep their members from breaking the peace on the slightest occasion. The most trifling dispute between two men of rival societies is enough to lead to the most serious outbreaks, which cause the greatest alarm amongst all the inhabitants of the settlements, European and native, and for days seriously interfere with trade and business in general. The Legislative Council of India did not pass a single Act affecting the Hoeys, and the only remedy has been to arrest peace disturbers and have them indicted for riot, unlawful assemblies, &c. To do this the police are nearly powerless, for the offenders take good care to keep within doors so long as an officer is in sight; but the moment he disappears, out they come and fight to the death in the most crowded thoroughfares.

The Hoeys (Triad Society) were originally formed in China with intent to overthrow the Manchu and restore the native or Ming dynasty. When our settlements were formed in the Straits, doubtless some of the Triads came too, and they started the society there for mutual protection and eleemosynary purposes; ostensibly the latter is still their object now. I have always been of opinion that the high officers of Government might, by keeping up a proper intimacy and influence over the heads of the Hoeys, lead them to do much good. Instead of wasting their funds on riots, public displays, &c., they could be easily led to subscribe to alms-houses and lazarettos. Instead of this the secret societies and their chiefs are always regarded with distrust, except when outbreaks occur, and then the authorities are too glad to avail themselves of their influence. Although the enrolment of the chiefs as specials leads them often to patch up a peace, to run the course has always carried with it a sense of weakness. The rabble are very apt to conclude that we call in the aid of the chiefs because we cannot restore order ourselves. I quite hold with those who think the Chinese should be allowed every indulgence just so long as they conduct themselves properly, for to them may be attributed, in a great measure, the present prosperity of the settlements—do away with the Chinese and the decline of the colony would be inevitable. I would indulge and encourage them to the utmost; and I think nothing would conduce to their happiness more than the destruction of the Hoeys. Were they declared illegal and put down by force the consequences might be dangerous, but I would rather do that than permit them to maintain their present baneful attitude. Without exception they are the source of all the disquietude we suffer in the colony. I think, however, my suggestion to hold the office-bearers responsible, and punish them, would eventually lead to the destruction of the Hoeys, or make them instruments of real good. The success which attended the rioters of 1854 and the immunities since enjoyed by public disturbers of the peace have culminated in chronic outbreaks. They have been incessant in Penang and Singapore for the last ten years, and the sooner the Legislative Council takes the subject into consideration the better for the future welfare of the new colony.

TOWSE—On the 31st August, at Fishmongers' Hall, the wife of William Beckwith Towse, Esq., of a son.

MARRIAGE.

BAKER—EASTHER.—On the 27th August, at St. Andrew's Church, Chilcomb, by the Rev. J. Delasaux Simmonds, M.A., rector, assisted by the Rev. Delasaux E. M. Simmonds, curate, Capt. Edmund J. Baker, P. and O. Service, sixth son of Capt. W. H. Baker, R.N., Grosvenor-park, Camberwell, to Ellen Hartley, eldest daughter of the late Edward Easther, Esq., of Winchester. No cards.

DEATHS.

IRVINE—On the 24th August, at Grangemuir, Fifeshire, William Doughas Irvine, Esq., of Grangemuir, formerly secretary of Her Majesty's Legation at Washington, in his 44th year.
LAY—On the 9th Sept., at Kelso, N.B., of whooping cough, Walter Alexander, infan son of Wm. Hyde Lay, Esq., H.B.M.'s Vice-Consul Taku, China, aged 6½ months.
PARKER—On the 2nd Sept., at Eythorne, Vice-Admiral John Parker, in the 76th year of his age.
RUTTER—On the 5th Sept., at Glebelands, Mitcham, Charles Campbell, youngest son of J. C. Rutter, aged 12 months.
ZAMBRA—On the 29th August, at Arreton, Isle of Wight, instantaneously killed through a carriage accident, Sarah Sophie, the beloved wife of Mr. J. W. Zambra, of Villa Careno, Tufnell-park, Holloway, aged 43, sincerely regretted by all who knew her.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Clyde, July 15, Coquette, str. (reported by telegram); from London, July 8, Philomela; from Newcastle, 7, Elentheria.

At SHANGHAI.—From Newcastle, July 14, Ocean Bride; 18, Salacia; from New York, 5, Pegasus; 7, Meteor; from Cardiff, 7, Fortuna; from Rio, 13, Titania; from London, Invincible; (reported by telegram).

At HONG KONG.—From Shields, July 23, Winfield Scott.

DEPARTURES.

From YOKOHAMA.—For New York, July 7, Havelock.

From SHANGHAI.—For London, July 16, Peter Denny; 9, Mary Whitridge; 10, Lennox Castle; 7, Coulnakyle.

From HONG KONG.—None.

VESSELS LOADING.

At SHANGHAI.—For London, Isles of the South, Elmstone, Coral Nymph, Dunmail, Fusiyama, Pegasus, Wild Deer, Anglo-Saxon, Hoang Ho, Jubilee, Sovereign of India, Star of China, Helen Nicholson.

At FOOCHOW.—For London, Argonaut, Pakwan, Burdwan, Thomas Bell, Caldew, Caller Ou, Maiden Queen, Queen of the Age.

At HONG KONG and CANTON.—For London, Alma, Wemyss Castle, Niphon, Passe Partout, Chalgrove, Falcon; for Hamburg, Albatross, Baron Kellner, Maria Louise, Princess.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Sept. 6, at Liverpool, from Rangoon Mary Spencer; from Akyab, Corra Linn; Aug. 25, at New York, from Manila, Europa; Sept. 9, at London, from Colombo, Lady Bird; at Liverpool, from Rangoon, Lesbia; 9, at London, from Manila, Her Majesty; at Queenstown, from Rangoon, Eden Carroll (?); 5, at Bremen, from Bassein, Courier; from Rangoon, H. Upman; 6, Typhoon; 5, at Texel, from Tjilatjap, Catharina Maria; 7, Herm, Maria Elisabeth; 6, at Brouwershaven, from Akyab, Annie Fleming; 8, at Liverpool, from Manila, Silesia; 7, off the Lizard, from Singapore, John Staunton, jun.

DEPARTURES.—September 7, from London, for Galle, Mount Stuart Elphinstone, Colgrain; for Newport, Galle, and Shanghai, White Eagle. From Hamburg, for Hong Kong, Energie; 9, from London, for Hong Kong, Channel Queen.

LAID ON.—At London, for Yokohama and Nagasaki, Evelyn; at Liverpool, for Shanghai, Magellan; for Singapore, Maraquita, and Seawfell.

SPOKEN.—Jane Blyth (barque), Clyde to Singapore, Aug. 10; Kandanghauer, Batavia to Amsterdam, July 1; Sea Witch, Shanghai to New York, June 16, 30 S., 35 E.; Ocean Rover, Sunderland to Galle, Aug. 10, 50 N., 7 W.; Gazelle, Cardiff to Singapore, Aug. 29, 44 N., 15 W.; Richard, Cardiff to Galle, Aug 15, 12 N., 21 W.; Maria, Cardiff to Hong Kong, Aug. 7, 5 N., 23 W.

CASUALTIES.—The Krimpenerwaard, Kluit, from Batavia to Rotterdam, which was towed into Port Elizabeth 22nd July, had experienced very severe weather off that coast on the 12th, 15th, and 20th; had decks swept, and bulwarks, boats, &c., carried away; she had to throw overboard part of her cargo, and the remainder was being discharged at Port Elizabeth more or less damaged. The master, Hewitt, and ten of the crew of the Spirit of the Deep, of Liverpool, from Penang to London, which was wrecked on Pulo Malara, were landed at Port Elizabeth by the Princess of Wales, Dark, from Maulmain to Queenstown, 29th July; the rest of the crew were put on board the ship Staffordshire at Ackeen Head.

The Salatiga, Ketteler, from Batavia, to Rotterdam, which put into Port Elizabeth leaky, 23rd July, had experienced very heavy weather off Cape Agulha on the 13th and 16th, and had seven feet of water in her hold. She threw overboard a portion of her cargo and pumped up a considerable quantity of sugar; the remainder was being discharged at Port Elizabeth, more or less damaged.

MISCELLANEOUS.—At Simon's Bay, July 28, Royalist (s.), Halksworth, left for Singapore.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, SEPT. 8.

Since the *kermesse* was held here (Aug. 12), 388 cases of cholera have occurred, of which 245 proved to be fatal. In the last days of the past month the cholera spread so much in the neighbourhood, and took such an epidemical character, that the Council of Amsterdam thought it its duty to forbid the *kermesse;* the lower class of people are, however, so much infatuated with this most horrible amusement, that it is judged necessary to send a considerable military force to our capital, and nevertheless I fear much for the disturbance of the public order. Her Majesty the Queen paid a visit to Rotterdam and visited the cholera hospital; she spoke with several of the sufferers and made the best impression.

In a former let er I showed you by statistics that our insurance societies made very bad affairs; not only they were not capable to give dividends, but most of them sustained very heavy losses. These facts caused the managers of the societies to discuss several measures to augment their income, and proposed to raise the premium upon several articles, and in the first place on Java rice. In the meantime a combination was formed by them, which took the most extreme measure, viz., to exclude henceforth the ships of Messrs. van Zeylen and Decker. This house, for some years past of no importance at all, is now sustained by very powerful capitalists; many ships of great charter were built for account by this house, but some of them had much misfortune. The well-known steamer *Gravenhage* (with auxiliary steam power) sailed with a large number of passengers and three hundred soldiers. This ship was averaged and obliged to go into Rio Janerio. Jealousy and animosity seems to have caused this resolution, that for this firm is *la mort sans phrase.* Our companies of insurance were not content even with their measures, but made it known in London, Hambro, and everywhere. I am not acquainted with this firm, but I know that all the losses insured for were paid until now, which proves that there is no question of dishonesty.

Mr. de Lesseps held some days ago a conference in this town. He has given a highly illustrated account of the works of the Suez Canal, ascertained that it should be opened on the 1st of October, 1869, and urged the necessity that our capitalists should subscribe liberally for the amount of 100 millions of francs still wanted for the construction. This speech was much applauded, but no money furnished. *C'est triste.*

At last there seems to be any chance that our newspapers will be made free of the stamp duty, that horrible tax upon the knowledge. The Dutch Literary Congress, which was held some days ago in Ghent, forwarded an address to the Minister to abolish this tax. An anti-stamp duty bond was organised, and even the Conservative paper published the communication that the Minister intended to lay a Bill before the Second Chamber to abolish at last this miserable duty.

COMMERCIAL.

COFFEE.—The market remains firm since the last sale of the Dutch Trading Company, which will offer on the 18th inst. 127,800 b. Java and Macassar. There was much demand for Menado, Padang, specked qual., unclean Malang and some sorts of W. I. of the late sale, but the stock of these sorts is very unimportant. Of private imports no sales took place, except at Amsterdam of 1,000 b. Triage. The imports only included 1,359 pie Java, per Tjilingsie. The deliveries in August amount to 59,837 b., against 90,096 in 1866, and 62,877 in 1865. Since the 1st of January to the 1st of August 544,537 b., against 448,493 in 1866, and 533,707 in 1865. For the Dutch Trading Company 182,300 b. are floating, and for private account 7,700 b. Total stock 487,200 b., against 498,900 b. in 1866.

SUGAR (RAW).—The Dutch Trading Company will offer in sale on the 25th July here 30,800 baskets Java, while in September, 1866, were offered 35,888 baskets. The market is very dull at 7¾d. under the price of the July sale. 719 bags Tagal, imported per Anna, and 117 bags Sourabaya, per Jannetze, were sold at former prices. Stock in first private hands 55,889 bags and 1,730 mats. Unsold stock of the Dutch Trading Company 38,863 bags, against 59,994 bags in 1866. Total stock on the 31st August 50,448,756 kilos., against 50,453,818 kilos. in 1866. The market closes somewhat firmer, but the transactions are of no importance, whilst trifling quantities only are offered.

RICE.—1,000 b. good white Java, per Marie Elise, were sold at 9¼f., whilst at Amsterdam 7,500 b. white Java have been brought into the market. Imported were—per Trevanion, 7,763 b. Bassein; per Tjilingsie, 8,629 pic. Java, which were sold at 7f.; besides 22,000 b. Bassein, per Marietta.

SPICES.—In the sale of the Dutch Trading Company, which was held on the 28th August, the prices paid were about at par to the valuations, viz.—549 casks Nutmegs: No. 1, at 100c.; No. 2, 93c. to 96c.; No. 3, 67c.; and No. 4, at 42c. No. 1, Maccassar, at 89c.; No. 2, at 84c.; No. 3, at 51c. 538 casks Mace, E, 109c. to 114c.; and F, 106c. to 108c. 238 c. Amboina Cloves, Nos. 2 and 3, at 30c. 189 b. Java Cinnamon, No. 3, from 152c. to 161c.; and No. 4, from 135c. to 136c. 1,462 b. Black Pepper at 17c. Since the auction the market is very firm, with some demand for Macassar Nutmegs and Mace E. Deliveries in August: 46 casks Nutmegs, 131 do. Mace, 22 do. Cloves, 96 b. Cinnamon. Stock on warrants: 5,175 casks Nutmegs, 1,071 b. Mace, 3,227 b. Cloves, 738 b. Cinnamon, and 1,645 b. Pepper.

TOBACCO.—Of the quantity offered in auction on the 12th inst., 278 b. Java, VR, were sold at former prices. At Amsterdam were imported 887 b., A. J. Watter (Blitar), per Tjilingsie, and several small parcels. The market is very quiet in anticipation of the public sales, which are to be held on the 10th and 12th inst.

DRUGS.—Camphor, 82c. for China, and 84c. for Japan. Of cubebs, 374 ch. were sold. Cassia Lignea scarce; the nominal quotation is 68c. Cassia Vera, with some transactions, at 38c. Oleum Cassiae unaltered, at f. 4½. Oleum Anisi Stellati scarce, and higher in price, at f. 7¾ to f. 8. Of Sumatra Gum Benzoe, 258 pic. were sold at Amsterdam, ex Aletta Augusta. The stock of Japan wax is unimportant, and the nominal quotation is f. 45 to f. 58, according to the quality. Of Bourbon Vanille, 15 ch. were sold on the 4th inst. Gutta Percha without transactions. Gum Damar with some demand, at 41c. to 42c. for first quality.

RATTANS with little demand; 150 pic., ex Princess Amalia, were sold.

ARRACK.—At Amsterdam, 60 casks Sourabaya, ex Anna Sophie, and 50 do. ex Surat, were sold at former prices.

COTTON, with a trifling demand, at lower prices; for manufactures the market was dull, and prices somewhat lower. The quotation is—for 6-4 Madapollams and Calicots f. 4.80 to f. 5; No. 28 Warps, 13½d.; No. 14 do., 12¾d. to 13d.; No. 30 Cops, 11½d. to 12d.; No. 16 do., 11d. to 11½d.

KAPOK.—On the 5th July 449 c. unclean East India were sold at Amsterdam; imported ex County of Lanark, from Java. The valuation is 18c. per half kilo. The prices paid at the auction were from 18 to 22c.

BANCA TIN.—The Dutch Trading Society will offer at auction on the 26th 65,000 slabs Banca and 400 do. Billiton. The market is now very firm; 9,700 slabs Banca were sold at f. 53¾ to f. 55; and for 1,000 slabs of the coming sale f. 55¾ was paid. Deliveries in August 12,199 slabs; from Jan. 1 to August, 74,280 do. Stock on warrant 126,306 slabs; unsold do., 64,416; and floating, 15,000 do.

HIDES.—For private account 13,011 ps. Calcutta were offered for sale on the 29th August, of which 7,690 were sold from 19 to 51c.; 4,509 ps. were bought in from 22½ to 34c., and the others retired; 981 dry Singapore Cow hides, of which 563 were sold from 26 to 84c., and the rest bought in from 26½ to 30½c. Besides the following parcels were sold:—

460	St. Soerabaya	Cow hides	5½ à 5½	Ko. ex	Dageraad.
106	„ do.	do.	ca. 5½	„ „	do.
873	„ Padang	do.	„ 5½	„ „	Aletta Augusta.
262	„ do.	do.	„ 3¼	„ „	do.
637	„ Samarang	do.	„ 5½	„ „	County of Lanark.

TEA.—The market is very quiet; the quotation is for good ordinary China Congou 90 c., and ordinary ditto 80 c.; Java good ordinary 70 to 75 c.; and ordinary 65 to 68 c. The Java Congou in auction on the 18th July at Amsterdam is valued at 55 to 95 c., the Souchong 60 to 110 c. The Dutch Trading Campany will offer on the 10th Oct. 3786 ¼ and 107 ½ ch. Java.

SHIPPING INTELLIGENCE.

ARRIVALS.—August 28, at Texel, from Batavia, Tjilingsie; 29, Rota; Sept. 4, Stad Leyden; 5, at Zeriksee, from Batavia, Robertus Hendrikus; 6, at Texel, from Sourabaya, Johanna Hendrika: from Tjilatjap, Katharina Maria; 7, at Brouwershaven, from Batavia, L. J. Enthoven; at Texel, from Sourabaya, Montrose; from Tjilatjap, Hermanus, Maria Elizabeth.

DEPARTURES.—Aug. 24, from Hellevoet for Sourabaya (via Birkenhead), Macassar; 26, from Texel for Java (via Sunderland), Maassluis; 31, from Brouwershaven for Batavia, Nestor; for Sourabaya, Marie; for Singapore, Isaac da Costa; from Texel for Batavia, Josephina Bernhardina; Sept. 3, for Sourabaya, Bantam; for Sourabaya, Christina Maria; from Hellevoet for Batavia (via Newcastle), Sumatra; from Texel for Sourabaya, Bellatrix.

PASSENGERS INWARD.—From Java: Per Anna, Messrs. Van Beek, Belunrid and family, Harwyn and family. Per Stad Leyden: Messrs. F. E. K. Stoelman and family, J. M. Admiraal and family, C. N. Gorter, Misses Kiel and Krabbe.

PASSENGERS OUTWARD.—For Java: Per Bellatrix, Messrs. Baggenhagen and family, F. Korthuns, F. von Gebause, H. Crommelin; Miss S. J. Schuphoven. Per Hollands Trouw, Mr. J. Salomonson, and A. J. Brouwer. Per Marie, Mr. Boon.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, September 6.

The Commercial Tribunal at Bremen was occupied one day last week with adjudication on the following case:—Messrs. F—— Brothers had insured their ship *Alexander II.* with several Bremen assurance companies for the space of one year. At the expiration of policy the vessel was on her voyage from Nicolayefsk to Chefoo, and according to the conditions of the insurance the risk was prolonged till the arrival of the ship at the nearest port, Chefoo. On this voyage, however, she struck on a rock near the island of Obi, and suffered some damage, but proceeded from Chefoo to Swatow uninsured, and thence to Singapore, insured against total loss only. At the latter port the damage was repaired, a survey having been made at Swatow by experts, who drew up an official report. The owners demanded indemnification for the expense of the repairs. The defendants denied that the average was the consequence of the ship running on Obi Island, but from a subsequent accident; at all events, the damage had been much increased by the continuation of the voyage without having undergone repairs, which should have been performed at Chefoo. The defendants further pleaded their non-liability on the ground that no estimate of the pecuniary amount of the average had been made, as required by Section 60 of the Bremen Regulations for maritime insurances. The plaintiffs admitted that to be the case, but justified themselves for the omission by stating that from the absence of dock accommodation, both at Chefoo and Swatow, they had no opportunity of fulfilling the conditions required. The Court found for the defendants, though the plaintiffs did not lose their claim to compensation for want of surveys and repairs at Chefoo or Swatow, yet the amount of the damage suffered on the subsequent voyage had not been ascertained, and estimated as provided for by Sections 60 and 61 of the Bremen Regulations, and as it was now too late to produce such proofs, they had lost all claim on the underwriters by their own neglect.

COMMERCIAL.

The pacific assurances given by the Emperor Napoleon have made a favourable impression and caused a greater feeling of confidence in the produce markets generally. About 5,000 chests of cassia lignea have been sold at 11½ sch. bco., and this has cleared off the remaining stock in importers' hands. An improvement is noticeable in the value of spelter, though the dealings have been but of limited extent; still the sales amounted to about 5,000 centners, 14 mks. 1 sch. having been paid for common quality, and 14.4 for special marks in loco. Money continues plentiful, and discount without alteration. In shipping nothing to report.

LONDON: TUESDAY, SEPT. 10, 1867.

THE FAILURE OF LYALL, STILL AND CO.

THE indignation felt by the public in England against the conduct of Chief Justice SMALE, has taken a practical shape in the form of a despatch from the Manchester Chamber of Commerce to the SECRETARY of STATE for the COLONIES. This is a very proper step, and we are glad to find that the comments on the subject, made in our issue of the 17th ult., have received such an efficient endorsement. A reference to our commercial column will show that it is highly necessary for the general good, that such measures should be adopted as will deter others from committing such flagrant violations of honor and integrity. It has hitherto been the experience of merchants in the China trade that their *honor* could always be relied on, and how this has been done in the case before us will appear from the following extract from Mr. MACLEAN'S letter to Mr. LYALL, of the 26th February:—

Your two telegrams have been safely received, and I hear from two or three sources that the £20,000 on C. G. and Co. have been refused. Holliday W. and Co., on behalf of Smith K. and Co., and Mendel representing Hendersons, have received long telegrams, and have applied for the goods. We have consulted Paunceforte, who tells us that we may as well be quite frank, and say what has become of the goods, and then if the Manchester people really can make good their lien, their attorneys can tackle the banks. Enclosed you will find copies of what correspondence has taken place. Paunceforte's opinion will be to the effect that we should decline to part with documents still in our hands to anyone at present, and that, as we considered the goods were our own till after the dishonouring of the G. L. and C. F. S. drafts at home against the cost, we had a right to do what we liked with them in the meantime. In fact, as I wrote you from the commencement of our disaster, I have acted under legal advice, and, of course, *we* continue to do so. If the Manchester people can make their lien on the goods stand, it matters little where they may be. As Pounceforte says, it would be a different thing if we had parted with documents to some party who was likely to make away with them, but they are in the hands of substantial people.

I believe that Jacson and Fussell will both try and up set that assignment on the plea that after we refused payment of B. H. and Co.'s draft on the 14th December we were to all intents and purposes insolvent. I know this is Jacson's opinion, as I confess it is partly mine, and any time within a year is soon enough to dispute it. The headings on all the Manchester invoices seem to me positive that the goods are bought on our account. Hendersons seems to rely on their B. lading, saying to L. S. and Co. they are not made out to L. S. and Co., or *their assigns*. I confess I never noticed this, nor do I think the banks did, but in the O'land bills of lading the assigns is left in which I daresay escaped Hendersons' notice. We shall hold on to the 1,000 pieces long ells just arrived; the others are all sold, but not all delivered.

Still is writing you at length with regard to a further assignment here, so that if possible we may force the people at home into it as the best thing to be done for their interests, and we may thus possibly avoid the Bankruptcy Court.

As I write the 1,000 pieces long ells are being landed, and if S. K. and Co. had only kept a bright look out they might have attached them perhaps; I should think Hendersons will be down upon them. The telegrams present we read as follows:—

(January 26). "Your message of first received; Manchester alarmed; all shipments stopped; orders going out, to hand our books and documents; be careful." (No date). "Deliver to Holliday Mendel 200 bales per *Min*; if not arrived deliver bills of lading and policy, Mendel guarantee return bills."

As Paunceforte says Mendel would be only too glad to guarantee bills if he got the goods, but getting them or not he will have to take up the bill. The only documents we hold free are Lieberts' 5,000 pieces per *Pakwan* and jeans per *Sir Lancelot*, 1,000 pieces long ells and Cotesworths' *Shun Lee* and *Canadian* goods. All the other accounts are paid for, and proceeds have passed into our books. We have not replied to H. W. and Co. or S. K. and Co., but we told them we should hand a copy of the Attorney-General's opinion when we received it, but that in the meantime we thought it very unlikely that we should be advised to part with anything to the detriment of the general body of creditors.

The following is a copy of the memorial:—

Chamber of Commerce, Manchester,
Sept. 3rd, 1867.

MY LORD DUKE,—The board of directors of this Chamber has recently had under consideration certain transactions in connection with our commerce with China, which in their nature are so directly subversive of all right principles of commercial integrity as to justify the strongest expression of condemnation. The circumstances, however, which are the immediate occasion of this communication have arisen out of subsequent proceedings in the Court of Bankruptcy at Hong Kong, when the affairs of the parties implicated in the transactions, viz., Messrs. C. F. Still and George Maclean, partners, and representatives of the firm Lyall, Still, and Co., of that place, came before the court as bankrupts on an application for discharge.

His Grace the Duke of Buckingham and Chandos, &c., &c.,
Her Majesty's Secretary of State for the Colonies.

In order fully to apprehend the bearing of this case, it may be needful to give a concise narrative of the dealings of these parties, when the unwarranted expressions made by the judge on that occasion, and to which we desire to call your particular attention, may then have a fuller signification and appreciation.

The particulars to which we would now advert are as follows:—

Messrs. Lyall and Still, of London, ordered goods from firms in Manchester, for shipment to Messrs. Lyall, Still, and Co., Hong Kong, the London firm, Lyall, Still, and Co. giving their acceptances for such goods, on conditions which were engrossed on the invoice, as follows:—

"Invoice of 170 bales forwarded to Killick, Martin, and Co., London, for shipment per *Ariel*, and consigned to Messrs. Lyall, Still, and Co., Hong Kong, for realisation, proceeds to be remitted specially to meet Messrs. Geo. Lyall and C. F. Still's acceptances against the shipment."

These conditions were assented to by the firm at Hong Kong, who, under date Dec. 14, 1866, write thus:—

"We have the pleasure to acknowledge your favour of 24th October, in which you refer especially to the arrangement entered into between your good selves and Messrs. Geo. Lyall and C. F. Still for the remittance from this side of cost of four shipments of goods purchased on our account. These arrangements we have now to say will be carefully attended to by us, and remittances will be made in the form appended to your letter. Copies of our letters advising remittances to our friends will be sent to you regularly."

On these terms it will be seen a lien is established on the goods or proceeds of sale. Nevertheless, about the date of this letter the shipping documents of the goods, then afloat, were made over to certain banks by Geo. Maclean, and on the 30th Nov. and 22nd Dec. assignments were made to the banks of all or nearly all the property held.

That Maclean at the time was aware that his firm was insolvent is shown by the following extract from his letter under date Dec. 27th, addressed to his partner, Mr. Lyall; he says:—

"As I told you in my last, I had a long chat with Paunceforte, the Attorney-General, and his great idea was that Kayser and Kaye should be kept quiet here, so as to give every chance at home, as so much depended upon that. Pollard, who was consulted two or three days after the mail left, by the two above-mentioned bankers, came to talk the matter over in a friendly way, and see what could be arranged, so that these two banks might say they had made satisfactory arrangements with Lyall, Still, and Co. Paunceforte and Pollard eventually came to the conclusion that the best thing that could be done would be to give these two banks a lien on such property as I could muster up. The two lawyers both considered that Kayser and Kaye were first entitled—the one legally, the other morally—to be satisfied even at the expense of other creditors hereafter; and if things came to the worst, and if the document which I have signed is proved to be illegal by the other creditors, —as to all interests and purposes we were insolvent at the time—then Kayser and Kaye have no advantage, and would not retain their lien. Kayser is supposed to hold his as security for acceptance of the drafts by Chalmers, Guthrie, and Co., I having been unable to give documents, and Kaye for balance of account, in both cases hard cash having been paid; one in consideration of my promising to do something which afterwards I was unable to carry out."

Messrs. Lyall, Still, and Co. stood in the relation of assignors in trust to the Manchester firms, and on this part of the case judicial proceedings have taken place in order to establish the lien on the goods by the Manchester firms, which having proved unsuccessful, steps are now being taken to appeal against the verdict to the Privy Council.

This brings us to that stage where Lyall, Still, and Co., being insolvent, a statement of their affairs is made to their creditors, when, according to the report of the official assignee, the total assets of the firm are stated to amount to $2,000, against $635,935 of debts and liabilities.

Under this condition of their affairs, Messrs. C. F. Still and Geo. Maclean appear before the Bankruptcy Court at Hong Kong for examination and discharge.

The whole of the particulars as above related were known to Mr. Chief Justice Smale, who presided, and they would doubtless have had a wider publicity through the examination of the bankrupts, but on Mr. Whyte, who represented the firms in Manchester, rising for that purpose, he was informed by the Judge that if he examined either of them, "as to any of the debts due to them by the bankrupts he would consider it to be a proof of those debts, and an election by him to proceed in bankruptcy, and so to waive any right to stop in transitu that was already claimed, or to avail themselves of the benefit of any lien or legal remedies."

Under these circumstances a full disclosure of the nefarious practices of the bankrupts was at that time prevented.

His Lordship then, in the course of his remarks, and after expressing his satisfaction at the statement of the accounts, added, "That the books told the whole tale, and as that was the first merit in any bankruptcy, both bankrupts were entitled to that credit in this case. They would leave the court without the slightest imputation, except that certain want of

Digitized by Google

prudence which characterised almost everyone who traded largely in China. There were, however, different interpretations of what constituted a want of prudence in the legal meaning of the term. That which in a place like London or Liverpool would be nothing extraordinary, would, in a small town, be looked upon as an excess of speculation quite incompatible with fair business. The bankrupts had breathed a China air and formed China habits; they had played for high risks and lost, and he thought that those who had supplied them with the means of such extravagant speculation had the least cause to complain."

The Directors of this Chamber cannot allow these remarks of the Judge to pass without the strongest expression of disapproval, tending as they do to encourage or palliate commercial immorality.

1. The fact of the hypothecated goods being handed over to cover other parties is an act of the grossest dishonesty.

2. The fact of debts being contracted to the extent of $635,935, with assets of only $2,000, shows a recklessness of trading which should have received the censure of the Judge instead of his eulogy.

3. The sneer from the bench on the unfortunate firms that had trusted to the good faith of the merchants was a gratuitous insult, and perfectly uncalled for.

The Directors of this Chamber have felt it their duty to lay this matter before you, in the hope that such remarks from a Judge under such circumstances may have the disapproval of Her Majesty's Government.—I have the honour to remain your Grace's obedient very humble servant,

(Signed) MALCOLM ROSS, President.

THE ALLEGED PERSECUTION OF CHRISTIANS AT NAGASAKI.

IN these days, when the rapid spread of religious toleration has gone far to eclipse the recollection of those atrocities that beset the progress of Christianity from its first existence until a comparatively late period, we have come to regard religious persecution quite as a thing of the past; and the pomp and solemnity with which certain of the Japanese martyrs were last year canonised at Rome came upon us more as a memory of the olden time than as a reminder that what has been may again be, and that martyrdom, in one form or another, will probably continue so long as the world has as many religions, and its inhabitants the same passions, as now. It seems but the other day that we were twitting the Holy See with its tardy acknowledgment of the sufferings of those poor victims who perished in defence of their faith, by making Saints of them some two centuries afterwards; and this, perhaps, not without a covert sneer at the inutility of reviving at the present time such an old-world story, *apropos*, apparently, of nothing at all. Yet to-day we take up our *Times*, and learn through the prosaic medium of Reuter's telegrams that some seventy native Christians are even now undergoing imprisonment in Nagasaki on account of their religion; and startling as the news may be, there is no reason whatever to doubt its accuracy. Although the determined warfare waged against the Christian religion and the relentless persecution of its adherents had to all outward appearance succeeded in entirely suppressing its practice throughout Japan, it is difficult to believe that all vestiges of it were totally annihilated in the minds of the people. The faith slumbered, but was not extinct. So stringent were the laws against it, that no Japanese subject dared to have in his possession any object resembling, however distantly, the sign of the Cross; or to mention the Holy Scriptures, even in a whisper. And even the missionaries who have settled in Japan have been, and are still, prohibited from interfering with the religion of the natives—or, in other words, from making any attempt to proselytise—by the terms of the several treaties; and are obliged to content themselves for the present with studying the language, literature, and character of the people, in order to fit themselves for more active work when the proper time comes. But notwithstanding these difficulties, there is no doubt that of late years many thoughtful Japanese (and they are a more thoughtful people than superficial observers are willing to believe) have diligently studied the Scriptures. It must be remembered that the New Testament has been long since translated into Chinese, that Chinese books are largely imported into Japan, and that every educated Japanese is able to read the Chinese character, and that they have availed themselves of the opportunity thus offered, we have evidence in the fact that many students have from time to time visited the missionaries to seek explanations of such passages in the Chinese version as they have found difficult to comprehend. From this it will be seen that the existence of a native Christian congregation in Nagasaki is by no means an impossibility, and that such members of it as might fall under the suspicion of the Government are not likely to be leniently dealt with. Should they be converts to the Romish Church, they have doubtless been made acquainted with the canonisation above referred to, in which case that ceremony, although of doubtful benefit to the deceased recipients of the honour, may still be useful—*pour encourager les autres*.

In adverting to the peculiar position in which the missionaries in Japan are at present placed, by their inability to preach the gospel freely among the natives, we should be careful to guard them from the imputation of being insufficiently or unprofitably employed. The two resident American missionaries in Nagasaki (one of them representing the Episcopal, and the other the Baptist Mission) are both men in the highest degree worthy of their sacred office, and have won golden opinions from both natives and foreigners. Unfortunately there has, up to this time, been no English missionary there, and the British community has not been sufficiently numerous to support a chaplain, although a church, commodious enough for the requirements of the place, was built some years since. From the time it was first opened one of these gentlemen has regularly performed Divine service, while the other has officiated as organist and directed the choir—both giving their services gratuitously, and this besides working very hard at their own avocations. There is also a Roman Catholic Mission at Nagasaki, and the zeal of the priests of this church so often outruns their discretion that it may possibly be some imprudence on their part, or that of their converts, that has led to this renewed persecution. In such a case the French Government may think fit to undertake a new crusade in defence of the Church—and it is easy to see what troubles may arise from such a quarrel if once begun. Further surmises on the subject are hazardous until we are in possession of some more precise information. In the meantime we can only hope that a peaceful solution of the difficulty may be found, so that instead of leading to more bloodshed it may result in the abolition of the existing intolerant system.

THE TELEGRAPH TO INDIA *VIA* RUSSIA.

WE hear from St. Petersburg that the Russian Council of State has granted the concession asked for by Messrs. SIEMENS BROTHERS for their proposed new line of telegraph to India, through Prussia, Russia, and Persia. The Russian Government agrees to give a right of way free of cost, with a concession for working the new line for twenty-five years; also to yield to the company their right of forwarding messages to and from India upon the Imperial Telegraph lines, and to hand over to the company all such messages touching Russian territory for transmission over its lines. The company is to work the line by means of its own officials. In return for these privileges the Russian Government exact a royalty of less than one-third of the existing internal tariff—that is to say, a royalty of five francs per message, subject to future modification. An equally favourable concession has been procured from the Prussian Government, who engage to construct and to maintain two special lines through North Germany at their own expense, and to hand them over to the company for the period of twenty-five years. For these services, and for the privileges mentioned in the concession, the Prussian Government charge 2½f. per message, to be reduced (as in the case of Russia) in the event of the through tariff being reduced. The right to land cables on German territory is also conceded, and as there are no private telegraph lines in Russia or in Prussia, the company will enjoy a complete monopoly of al the through messages. The Electric and International Company has agreed to lease two wires of the cable lately laid to Hanover to the new company, and negotiations are in progress with the Persian Government for an independent line in the company's hands between the Russian frontier and Teheran. The British Government, we understand, has engaged to assist the undertaking and afford every facility in their power; and by means of these several arrangements an English Company will hold and work an uninterrupted line of telegraph throughout. The name of the new company is not yet announced.

THE accounts received by the last few mails of the scenes in the Supreme Court at Hong Kong between Judge SMALE and Mr. POLLARD, the barrister, indicate a state of disorganisation which is totally subversive of all proper discipline and the usual respect paid to the occupant of the Bench. It would be unprofitable for us to go through all the particulars of the case, but the conclusion we arrive at is that Judge SMALE committed a grave error in simply fining Mr. POLLARD $200. Such a paltry sentence was incompatible with the alleged offences; and in pronouncing it, the Judge was further insulted by the friends of Mr. POLLARD paying the sum for him. To convey a proper

Digitized by Google

impression of the dignity of the Court, the Judge should not have hesitated in suspending Mr. POLLARD from practice, pending the pleasure of H.M. Government. The case would have been properly investigated here, and the tribunal would certainly have given the Judge the fullest possible support.

IN another column will be found a communication on the subject of the riots at Penang, which have assumed considerable importance, in consequence of the local Government not having adopted proper precautionary steps. The Governor, Major Ianson, appears to have pursued a most puerile course, disarming the police, &c. The course suggested by our correspondent was we believe urged by the late Governor, and he was finally allowed to submit a Bill for the better regulation of societies, which would have been passed three years ago had it not been for the intended transfer, which induced the Supreme Government to put it with several others on one side, but the drafts are no doubt all in the archives of the [Government at Singapore, and it is to be hoped that they will draw them to light, and turn them into law at once.

ANOTHER gunboat intended for the Japanese Government, called the *Assunta*, has been launched by Messrs. Dudgeon on Thames. The trial on the 7th inst. was satisfactory in all respects, the speed attained with steam and sail being 14 knots. The armament of the vessel consists of one 6-inch muzzle loading rifle, one 40-pounder breech loader, and two 24-pounder howitzers. The rig is that of a three masted schooner, spreading a large area of canvas for the size of her spars.

THE screw steamer *Ajax*, with the first of the new season's Moning tea, arrived from Shanghai at Gravesend on the 2nd inst. and docked on the 3rd, having made the passage in 76 days, and from Hong Kong in 67 days. The clippers from Foochow are expected to arrive during this week. It is stated that the *Ariel* passed Anjer on the 9th, not the 4th July.

THE Postal authorities will, we understand, make up mails for China and Japan by the San Francisco route, so soon as the U.S. Government notifies that the service is established as a monthly one. As already intimated, we believe that is now *un fait accompli*. No further progress has been made in making up mails for China *via* St. Petersburg and Kiachta.

IT appears that the project of laying a direct telegraph cable between San Francisco and the Sandwich Islands, thence to Japan and China, is again being canvassed. The *Fenimore Cooper* some fifteen years ago surveyed and sounded most of the ground, and these reports will now be useful.

Literature.

The Desk Hong List, a General and Business Directory for Shanghai. North China Herald Office, 1867. The Desk Hong List has been designed to take the place of the sheet hitherto published, the increased size of the latter having rendered it in some instances inconvenient. Besides the List of Hongs, it contains under the title of the "Who's who" column a complete alphabetical list of the foreign residents at Shanghai, and in addition a variety of useful information, such as postal arrangements, rates of freight and passage, movements of steamers, &c., is given in its pages. A street plan of the foreign settlement precedes the title page. The general "get-up" of the book is very creditable both to compiler and printers.

We have received the fifth and sixth numbers of *Notes and Queries on China and Japan*, and must record our admiration of the great progress already made by this useful periodical. The more intimate relations we have lately established with China and Japan afford scope for investigation and research of both a scientific and literary character, such as in former times were quite impracticable, and the results of such inquiries, which would be lost to the world if not published, and cannot be appropriately recorded in the columns of an ordinary newspaper, find a fitting place in the columns of *Notes and Queries*. Even in these six numbers, before the journal can be said to have had a fair opportunity of proving its utility, many valuable contributions to our knowledge of China have already appeared, although, so far, but little information has been elicited concerning Japan. These last two numbers contain numerous interesting notes of an extremely varied nature—topographical, ethnological, etymological, numismatic, &c. As the publication becomes more popular and widely known—which, from its intrinsic merits it cannot fail to do—its roll of contributors, and consequently its scope of usefulness, will necessarily be greatly enlarged. In size the sheet has increased, since its commencement, from eight to sixteen pages.

We have received a copy of a new soria! published at Foochow, entitled the *Missionary Recorder*, which we have no doubt will prove of much service to the cause.

The energy of the Japanese in adopting Western civilisation is curiously illustrated by some facts noticed in the American papers. It appears that the first Japanese embassy to that country took back with them a number of school-books, one of the consequences of which was the instruction of the commissioners now in the United States to procure large quantities of standard works. Mentioning the matter in the State Department at Washington, they were referred to an accomplished agent in the selection and purchase of books, who selected for them in all some ten tons of books, worth about five thousand pounds sterling. They were of all grades, from simple spelling-books to Webster's Unabridged, including also text-books in arithmetic, geography, chemistry, natural philosophy, physiology, history, &c., and wall maps, magnetic globes, and other school apparatus, besides sample copies of nearly all of those standard school-books which were not sent in sufficient quantity for present use. It is said to be the intention of the Japanese Government to make English the language of their public schools; and a writer in the New York *Round Table*, with a pardonable bias towards his own country, adds his belief that the Japanese intend "to rely on America for English books until they make them for themselves." This certainly seems hard. Will no British minister or other English patriot at Jeddo put in a word for Paternoster Row?

Naval and Military.

The twin-screw gunvessel Ringdove, one of those building specially for service in the seas of China and Japan, was launched from No. 4 building slip of Portsmouth dockyard on the top of high water. The principal dimensions of the vessel are as follows:—Breadth between perpendiculars, 170 ft.; length of keel for tonnage, 157 ft. 7 in.; breadth extreme, 27 ft.; ditto, for tonnage, 28 ft. 8 in.; ditto, moulded, 28 ft. 2 in.; depth of hold, 12 ft. 5 in.; burden in tons, 662 65-94. The propelling power of the ship will consist of two independently working screws, each driven by engines of 80-horse power, nominal, manufactured by Messrs. Maudslay, Sons, and Field. The hull of the vessel is built of wood, with iron beams supporting the decks. In the application of the twin-screw principle to the ship the plan followed by the Messrs. John and W. Dudgeon, the expositors of the twin-screw principle on the Thames, and the constructors of the engines of Her Majesty's ship Waterwitch, has been pretty closely adopted, but these gentlemen are not likely to copy in return the semi-circular mass of timber which projects from the hull under each quarter of the Ringdove to support her screw shafting. The Ringdove class is, however, a great improvement upon the previous and first attempt of the Admiralty with twin-screw vessels in the Viper and Vixen. The Plover, the first completed of the Ringdove class, was tried light a few days since, over the measured mile, at the Maplin Sands, and realised a mean speed of 11.3 knots. This rate is in excess by half a knot of the rate obtained by any other vessel in Her Majesty's navy of similar tonnage and power; but her real test of speed will be at load draught in Stokes Bay.

A detachment of the 1st Division, Depot Brigade, Royal Artillery, has been placed under orders to embark at Gravesend for Ceylon, as soon as the necessary tonnage has been taken up for their conveyance.

Staff Assist. Surg. F. Maddin, attached to the 3rd Depot Battalion at Chatham garrison, has been placed under orders to proceed to Ceylon. Staff-Surg. C. M. M. Miller, M.D., has joined at Chatham, for service at that station.

Her Majesty's iron screw storeship Hesper, 2, Staff-Commander J. G. H. Thain, from the China station, has arrived at Woolwich, last from Plymouth, and was inspected by Commodore Edmonstone, C.C., and Paymaster Francis J. Lory, secretary. The hands were mustered and congratulated on their cleanly appearance. After discharging her war stores she is under orders to go up to the dockyard.

The paddle-wheel steam frigate Valorous, 16, Captain Charles C. Forsyth, which arrived in Plymouth Sound, left the Cape of Good Hope on the 4th of July, touched at St. Helena on the 19th, at Ascension on the 24th, and at St. Vincent on the 8th of August. The Valorous was put into commission on the 15th of April, 1863.

The Tamar, screw troopship, Captain Sullivan, C.B., is ordered to have her defects made good at Portsmouth yard, and to be ready for proceeding to China and Japan by the 10th of October next.

The screw steam corvette Rattlesnake, 19, at Devonport, of 1,705 tons, with engines of 400-horse power, will be commissioned in a few days for a second-class commodore to relieve Commodore Hornby on the West Coast of Africa.

Commodore Caldwell, C.B., has arrived in England in Her Majesty's troopship Orontes, and we are gratified to find that during the run home from the Cape of Good Hope his health sensibly improved; but, from the nature of his complaint, we fear that he must give up all hope of being again able to serve on active duty.

The foundation-stone of a building designed by the Royal Engineer Department as a gymnasium for the use of the troops in garrison at Portsmouth was laid by Major-General Sir George Buller, K.C.B., the Lieut.-Governor of Portsmouth, and general officer commanding the troops in the south-west military district. The General, accompanied by Lady Buller, and the officers comprising his personal staff, arrived at the enclosed space where the building is to stand about three P.M., and was received by Colonel Hadden, R.E., commanding the Royal Engineer Force in the south-west district, and the contractors for the work, Messrs. Simms and Martin. Admiral Sir Thomas S. Pasley, Port-Admiral and Naval Commander-in-Chief, accompanied by Lady Pasley, and attended by Flag Lieutenant Boger, was also present, as were the commanding officers and others of Royal Artillery and regiments in the garrison. The gymnasium will be 125ft. long by 50ft. wide, and 28ft. from floor to ceil-

Digitized by Google

ing. It will contain the usual officers', instructors', and dressing-rooms, with also a gallery for spectators. The piece of ground on which it is being built is part of the glacis of the fortifications (now about to be razed) between the towns of Portsmouth and Portsea; it, therefore, holds a central position in relation to the large barracks of both towns.

Lieutenant Brand, who had a principal part in putting Mr. Gordon, of Jamaica, to death, has been restored to active service, and appointed to the coastguard-ship Irresistible.

The following Royal Warrant, dated the 1st instant, has been promulgated:—

"Victoria R.—Whereas it has been represented to us that it is expedient to amend the regulations under which furlough and money in lieu of furlough are granted to soldiers on re-engagement, our will and pleasure is that articles 563, 564, and 565 of our Royal Warrant of the 3rd of February, 1866, be cancelled, and that from and after the date hereof the following revised articles be the sole and standing authority on the subject:—563. Soldiers who shall re-engage for a second term of service while serving at home shall be entitled to a furlough for two months, the furlough commencing from the date of their re-engagement. 564. Soldiers re-engaging at home after their corps has been placed under orders for foreign service shall be allowed a gratuity of £2, in lieu of furlough, subject to a deduction of 8d. a day for any furlough which may have been granted to them between the dates of the re-engagement and embarkation. But should a soldier so receiving a gratuity be prevented from embarking through circumstances under his own control, our Secretary of State shall be empowered to cause such gratuity to be refunded by the soldier. 565. European soldiers re-engaging for a second term of service while serving at the undermentioned foreign stations, and not being under orders to proceed elsewhere, shall be allowed the following gratuities in lieu of furlough:—India, China, Japan, Ceylon, the Mauritius, the Straits Settlement, Australia, or New Zealand, £5; the West Indies, West Coast of Africa, Bermuda, Honduras, St. Helena, the Cape of Good Hope, and the Canadian Provinces, £3; Gibraltar and Malta, £2. These gratuities shall not, however, be granted to soldiers re-engaging after the receipt at the station of the order for their regiments or corps to return home; in such cases furlough will be granted as soon after the arrival of the regiment in the United Kingdom as circumstances will permit. 565a. European soldiers re-engaging at a foreign-station while under orders to proceed to another foreign station shall be allowed the gratuity of £2 in lieu of furlough."

Notice is given that the distribution of the amount awarded for services against pirates on the 4th of November, 1865, by Her Majesty's ship Leven, will commence on Friday, the 13th inst., in the prize branch of the department of the Accountant-General of the Navy, Admiralty, Somerset-house. The following are the shares due to an individual in the several classes:—Lieutenant commanding, £22 13s.; fourth class, £13 9s. 4d.; sixth class, £6 14s. 9d.; seventh class, £4 9s. 10d.; eighth class, £2 4s. 10d.; and ninth class, £1 9s. 11d.

The following flag promotions have taken place, consequent on the death of Rear-Admiral Thomas Hope on the 31st of August, and they are to date from the 1st of September, 1867:—

Captain Edward Southwell Sotheby, C.B., to be a Rear-Admiral in Her Majesty's Fleet. Retired-Captain Thomas George Forbes to be a Retired Rear-Admiral under Her Majesty's Orders in Council of August 1, 1860, and July 9, 1864. Retired-Captain William Newton Fowell to be a Retired Rear-Admiral under Her Majesty's Orders in Council of April 24, 1847, June 25, 1851, and June 26, 1867.

An appointment of naval aide-de-camp to the Queen is placed at the disposal of the First Lord of the Admiralty by the promotion of Captain Sotheby, C.B., who commanded the Pearl in China, to flag rank, in consequence of the death of Rear-Admiral Thomas Hope.

Captain Randolph has been appointed Commodore of the 2nd class, at the Cape of Good Hope, in succession to Captain Caldwell.

Monetary and Commercial.

The bidding for £270,000 in bills on India were held at the Bank of England. The minimum price was fixed at 1s. 11½d. on Calcutta and Madras, being an advance of 2 per cent., and at 1s. 11¾d. on Bombay, being an advance of 3 per cent., and no tenders at these prices were received. As the terms thus demanded were almost prohibitory, it is to be presumed that Government did not wish to draw. Such a course should be openly stated, and not put merchants to the trouble of tendering to no purpose.

In consequence of the increased adulteration of Gambier in the Straits Settlements, it is intended by the merchants to again bring the matter to the notice of the local Government, with a view to passing a Bill in the Legislative Council at Singapore, making it an offence punishable by the magistrates with imprisonment, &c. It is to be hoped that the Bill will pass, as the loss to merchants has been very heavy, some of the importations being almost entirely composed of spurious matter.

It is stated that the difficulties connected with the affairs of Messrs. Trantmann and Co., which have been currently spoken of lately, are in course of arrangement, and that the firm will be enabled to continue its business. Mr. Trantmann, who is now in London, will we understand proceed to Shanghai to carry out these arrangements. The liquidator of the Commercial Bank, who are creditors, has we believe given every facility.

Salting invoices has been practised to some extent, and a clear proof is said to have been lately shown in an invoice made out by Archibald Campbell, late of Fletcher and Co., the bills for which were drawn on one of Barings' credits, and bought by Holliday, Wise and Co. Truly the China trade has come down to the level of California, but with proper efforts on the part of those houses who have preserved their character we do not despair of seeing it regain its *prestige*. The wrongdoers, however, must be exposed unflinchingly by Chambers of Commerce and the press. Publicity is the best antidote against dishonourable trading, and it will be seen in another column that the Manchester Chamber of Commerce is aiding in this respect. The new Bankruptcy Bill, which enacts that a certificate shall not be granted until the bankrupt has paid 10s. in the pound, will, when passed, also serve as a check to over-trading.

The amount of bullion by the P. and O. Company's steamer *Massilia*, from Southampton on the 4th inst., was—In gold, to Galle, £530; in silver, to Hong Kong (H.M.'s Government), £24,583.

The directors of the Agra Bank have issued a very satisfactory report, from which we extract as follows:—

"With reference to the bank itself they are happy to state that the success which has attended upon the business since its re-opening, both in London and at the branches, has been in all respects most gratifying. They are likewise able to add that the result of its operations during that period has been such as would admit of the payment of a dividend to the A shareholders, who, in accordance with the terms of the Resuscitation, are alone at present entitled to participate in any immediate distribution of profits. Under these circumstances it might be warranted that they should, according to old practice, and as they hope to do hereafter, declare a half-year's interim dividend, but after mature deliberation—considering the fact that the Indian branches re-opened for business in the beginning of March, so that up to the 30th June they had only been in practical working about four months—considering likewise that subsequent to the re-opening, both at home and abroad, some time was necessarily taken up in re-organising and developing the business after its temporary suspension—the directors have come to the conclusion that it will not be expected that they should, on the present occasion, divide the profits which have been realised; but that they will act more in accordance with the wishes and judgment of their proprietary by deferring a declaration of dividend until the accounts have been made up to the end of the year. When that time arrives they have every reason to anticipate that it will be in their power to submit a statement of accounts, and to sanction a division of profits which will be encouraging to the shareholders.

"With respect to the promissory notes representing the remaining instalments of 2s. 6d. in the pound each, due respectively in London and India on the 15th March and 15th July, 1868, it will be gratifying to the shareholders to know that already funds are on hand from the old assets which will, to a great extent, provide for the former of these payments, and the directors have no doubt they will soon be in a position from the same source to anticipate the discharge of the promissory notes in question, in like manner as they have been able to do with the others falling due at a previous date.

"With regard to the ultimate outturn, and the surplus assets which will remain to the old shareholders, the directors cannot yet venture to speak with precision. If the remaining assets, however, work out as satisfactorily as they have reason to hope, under good management, they look to the result confirming former anticipations."

The business of Messrs. R. L. Southern and Co. will from this date be conducted under the style or firm of Southern, Quilty, and Co., at 34, Fenchurch-street, London.

The half-yearly meeting of the Merchant Banking Company of London (Limited) was held at the London Tavern. It is not usual for this company to issue a half-yearly account, but the chairman (Mr. J. A. Smith) gave an estimate of the probable result of the working of the company for the year ending December next, based on the business of the past six months. He was of opinion that the gross profits of the year would amount to £56,000, which, with the balance of £4,139 carried forward from last year, would amount to £60,139; of this the payment of current expenses and the dividend of 5 per cent. would absorb £29,000, leaving about £30,000 to be devoted to the reduction of the amalgamation account and the augmentation of the reserve fund, which now stands at £20,000. An interim dividend of 5 per cent. for the half-year ending 30th June was declared.

A circular has been issued announcing the formation of a "Licensed Victuallers' Tea Association," to compete with the grocers in return for their having entered into the retail wine trade under the Act passed by Mr. Gladstone in 1860. The argument is that this Act was a direct interference with the business of the licensed victuallers, "the most highly taxed body of traders in the kingdom;" and that as the grocers were not slow to avail themselves of the new field thus thrown open to them, and have cultivated it with assiduity, the licensed victuallers have been driven to consider how they may best protect and indemnify themselves. An association, it is alleged, has accordingly been formed for this purpose, "which, strong by its connection with gentlemen of long residence in China, and large experience as tea-tasters, can undertake to dispense with intermediate profits, and to supply tea at a lower price than the purchasing retail grocers pay."

The failure of a firm in Coventry in the silk trade, and rather largely indebted to the London silk brokers and others, is announced.

The official liquidator of the Blakely Ordnance Company (Limited) has notified that the stock in trade of that company, not having been sold in one lot, pursuant to the advertisement for tenders recently issued, he is prepared to sell it in such separate portions as may suit individual buyers.

The purchase by the United States of the Bay of Samana, in the coloured Republic of St. Domingo, for the sum of £1,000,000, now alleged to have been finally arranged, is in harmony with steps taken by some active New York adventurers fifteen years ago.

Digitized by Google

ARTICLES OF IMPORT.

TEA.—A considerable quantity of tea has changed hands; importers, to close shipments prior to the arrival of new season's, offered the remnants of some of the best chops of season 1866-7 at public sale without reserve, and in most cases, owing to depreciation in quality from imperfect curing, they realised but 1s. 8d. to 1s. 9d. per lb., and second class from 11½d. to 1s. 4½d. per lb. The chief feature of interest has been the arrival, on the 2nd inst., of the Ajax, with the first cargo of new season's Monings and Wopaks, with an assortment of new-make Congous and Scented Teas. Of the Moning and Wopak Congous about half the quantity has been sold at from 1s. 7d. to 1s. 11d. for fair to good, and from 2s. to 2s. 4d. per lb. for fine to finest; Scented Capers, 1s. 5d. to 2s. 5d. The quality on the whole is not good, but it is understood that the finest chops are not on board this vessel. We hear of 2s. 5½d. being offered for the best chop for export to Russia; one parcel was announced for public sale, but afterwards withdrawn, being sold privately. Congous: Siftings remain much as before, the demand being still limited. Broken-leaf kinds are firm, being scarce. Fair to good common remain as last quoted, namely, 11½d. to 11¾d. per lb. Fair to good Flavory kinds show no change. Good to fine Kaisows and Pak Lings have sold rather lower. Common black leaf Congous remain without alteration. Fair and good have sold to a small extent at about previous prices. Fine to finest, of old import, have sold to a small extent at the reduction last quoted. New season's have sold at 1s. 7d. to 1s. 11d. for fair to good, and 2s. to 2s. 4d. for fine to finest. In new-make Canton kinds a few sales have been made at fair prices; those ex Ajax have not yet been sold. In Oolongs, Souchongs, and Flowery Pekoes, there have been but few transactions, and prices show no material variation. Some common Scented Capers have been sold at 1s. per lb., which was a good price for the quality; fair to fine have been taken to some extent at from 1s. 5d. to 2s. 2d. per lb. Foochow Scented Orange Pekoes show no change. Canton kinds move off slowly; a few fine have found buyers. In Uncoloured Japans there has been nothing of consequence to report. Green Teas: The market for these has been steady, and the further arrivals have met with attention. Prices show scarcely any quotable alteration, the finer kinds still commanding a preference, some invoices yielding 20 to 30 per cent. profit. Canton-made gunpowder teas remain much as before. Japan Leaf: In consequence of the small stock of China kinds, more attention has been given, and rather large sales effected in fine to finest at a slight advance. Uncoloured has been taken at the improved prices established the commencement of the month. The stock in the United Kingdom on the 31st ult. was estimated at 74,500,000 lbs., against 85,500,000 lbs. last year, and the quantity afloat at 37,083,750 lbs., against 34,804,730 lbs.

SILK.—We have to report another month of extreme quiet in silk. The fourth steamer with new silk has arrived and still no business upon any than the smallest possible scale—still apparently the same determined limitation of purchase to the absolute requirements of the day. The prices of China and Japan Silk show an unusual margin in comparison with European Silk, but even this failed to induce business. The deliveries from the 1st to 6th inst. have been 433 bales China and 73 Japan. The quotations are:—

	s.	d.		s.	d.
CHINA:—Tsatlee, No. 1 & 2	29	0	to	30	0

No. 3	24	0	to	25	0

COTTON.—There has been no relief from the dulness previously observable, and prices have again shown a slight decline. The total sales amount to 4,950 bales on the spot and 1,800 bales for arrival.

COFFEE.—The market for Colonial sorts has been much depressed, and in order to clear off the liberal supplies which have been brought forward, easier prices have in many cases been accepted. Native Ceylon is still dealt in very sparingly, while the supply of colory East India in public sale has gone off with spirit. By private contract 300 casks Plantation and 1,000 bags Native Ceylon have been sold. At the public auctions the sales have comprised 2,850 casks 1,340 barrels and bags Plantation Ceylon, which realised, ordinary to fine fine ordinary, 64s. to 72s. 6d.; low middling to middling, 73s. to 78s.; good middling, 80s. to 85s. 6d. Of Native the sales have been limited to about 50 casks, 2,000 bags common good ordinary to good ordinary at 56s. to 58s., fine ordinary at 64s., and bold at 68s. 6d. per cwt. Of Manila, 891 bags, 174 mats were bought in at 62s. Of Java, 100 bags were withdrawn at 63s.; and of Singapore, 385 bags realised, good Bonthyne, 68s., and Bally 47s. 6d. per cwt. The stock of coffee in the United Kingdom on the 1st inst. was 19,200 tons, against 17,800 tons last year, and 18,300 tons at the same period of 1865. The amount on hand in the five leading ports of the Continent was 59,060 tons, against 59,860 tons in 1866, and 61,450 tons in the preceding year. The Dutch Trading Company have announced a public sale of 127,500 bags for the 18th inst.

COCOA NUT OIL.—The market has been without animation, but moderately firm. The offers of Ceylon at auction have amounted to 270 casks.

CAMPHOR.—The market is firm at £6 15s. to £7 for China and £6 17s. 6d. to £7 for Japan. There is a good inquiry, but with a limited trade.

EBONY.—Market quiet, and of 42 tons Ceylon offered a portion sold at £7 2s. 6d. per ton.

GALLS.—There is a slight reduction for China, a small private sale having been effected at 58s. Of Japan 980 boxes sold at 48s. to 51s. 6d. for fair to good. The market at the close has an upward tendency.

HORNS.—Quotations for East India have slightly declined, and of 56 tons Calcutta, 52 tons Madras, 4 tons Penang, 5 tons Rangoon, 9 tons Manila, and 13 tons Bombay Horns at auction, about two-thirds sold at 44s. to 45s. per cwt. for 2½ to 4 lbs. average, and 22s. 6d. to 33s. for 1¼ to 2½ lbs. average.

JAPAN WAX.—There is a steady market, and about 130 boxes realised 88s. per cwt. for good saucers, and 82s. 6d. for fair slabs.

MANILA HEMP.—The market is extremely quiet, and business very limited, with lower rates. Of 1,221 bales at auction a small portion only sold at £48 to £50 5s. per ton for common to good roping.

PEPPER.—Black: A fair inquiry has prevailed; 2,500 bags Penang have been taken privately at 2⅞d. to 3d., and about 1,000 bags Singapore at 3⅛d. to 3¼d. At public sales 368 bags Penang were mostly sold, West Coast at 3d.; Trang, 3⅛d. to 3¼d; of 1,000 bags Cochin, 600 bags sea-damaged realised 3⅛d. to 3⅜d., the sound being held for 3½d. White: 200 bags Singapore have been placed by private treaty at 4 15-16d. to 5d.

RICE.—During the week ended the 30th ult. a good inquiry existed, and several sales were made of soft grain, amounting to 16,000 bags, Nakrenzie at 10s. 10½d., Rangoon at 11s., ex ship. For arrival 500 tons Rangoon have been sold at 11s. 9d., 500 tons Bassein at 11s. 6d., and 500 tons Nakrenzie at 11s. 3d. At auction, 1,046 bags Nakrenzie were taken at 11s. to 11s. 6d. Subsequently the market has had a quiet though steady tone, and transactions have been less numerous than in the previous week, viz.,—500 tons Nakrenzie, in course of landing, at 10s. 10½d., 600 tons Rangoon at 11s., and 100 tons Ballam at 12s. 6d., ex ship, also 1,000 tons Bassein (arrived) at 11s. 4½d. landed terms. At auction 702 bags Nakrenzie were sold at 11s. to 11s. 6d.

SUGAR.—Since our last report there has been an active market, and useful medium classes have been taken readily at an improvement of fully 6d. per cwt. on the prices at which sales were made last week. Out-ports refiners, by avoiding curtailing their manufacture, have been compelled to purchase more freely, so that as near ports were still buyers at steady prices, and the number of cargoes available was small, competition was observable, which gave a tone to the market in general, and led to the improvement reported. Of East India the sales, by private contract, have been 30,300 bags clayed Manila duty 8s. at 29s., duty 9s. 7d. at 30s. to 30s. 6d., and 9,300 Muscovade Manila, at 25s. to 25s. 6d. per cwt. No East India has been brought forward at the auctions.

SPICES.—Cinnamon: The following are the quotations for Ceylon.—1st quality, 1s. 9d. to 2s. 9d. per lb.: 2nd, 1s. 5d. to 2s. 6d.; 3rd, 1s. 3d. to 2s. 1d.; 4th and Jungle, 10d. to 1s. 8d. Market firm, and the bulk of 81 bales at auction sold at fully previous value. Mace: At auction 3 cases Singapore sold at 1s. 10d. per lb. for dull red; and 9 cases Batavia, two-thirds sold at 1s. 10d. similar quality. Nutmegs: Are again rather dearer, with moderate business privately; but of 13 cases Penang at auction, only one sold at 2s. 2d. per lb. for very good medium.

SAPANWOOD.—The market is steady, and of 57 tons Ceylon at auction one-third sold at £9 15s. to £10 15s. per ton.

TERRA JAPONICA.—Large supplies have reduced quotations, and of 1,705 cases, and 1,535 bags Pegue at auction, more than half sold at 31s. 6d. to 35s. per cwt. for middling to very good, and 35s. 6d. to 36s. 6d. for a few boxes of fine red.

TIN.—This market has been subject to considerable excitement; strong demand and large operations caused a further advance in prices of fully £2 per ton; one-half of this rise was subsequently lost, but the market closes very firm. Latest quotations: Banca £93 per ton cash; Straits £89 per ton cash; and for arrival £90.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 7s. 6d. to £6 10s.; nail rods, £7 10s. to £7 15s.; hoops, £8 10s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 10s. to £7 15s.; rails, £6 5s.

STEEL.—Swedish kegs, £15 to £15 10s.

COPPER.—Sheet and Sheathing, £84 per ton; yellow metal, 7d. to 7¾d. per lb.

LEAD, &c.—English pig, W.B., £21 15s.; shot, patent, £23; sheet, £20 15s.; spelter, £21 to £21 5s.; zinc, English sheet, £26 to £26 10s.; quicksilver, £6. 17s., in bottles of 75 lbs. each.

The following is from the circular of Messrs. French and Smith:—Since our last monthly circular a decided improvement in the trade has been experienced, with some advance in prices.

IRON.—Scotch Pig has advanced to 55s. No. 1 ordinary brands. Warrants, 54s. For Welsh the demand is steady. Staffordshire is in good demand for shipment to the East.

COPPER during the last fortnight has become much firmer. Chili Bars have realised £73 spot, which is to-day's price, and to arrive £75 has been paid. There is also improvement in English qualities. Ores have advanced from 14s. per cwt. to £14 10s., which is about the present value. Burra £85; Wallaroo £84; English Tough £80 to £81.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton rom the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

In outward freights to the eastern ports previous quotations are well maintained; we have no change to note in coal freights from the northern outports.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear of Tyne per keel.—For Hong Kong: £46. For Singapore: £36. For Shanghai: £55. For Saigon: £50. For Yokohama: £50. For Batavia: £27. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 13s. For Shanghai: £2 12s. 6 l. For Saigon: £2 8s. For Yokohama: £2 10s.

The Admiralty have invited tenders for the conveyance of 1 ton, meast., weighing machine, 9 tons, meast., carriages, &c., and 8 tons small arm ammunition from the Thames to Hong Kong.

CASUALTIES.

The Panama (American ship), Soule, from Bangkok to Queenstown with rice, put in at Bahia, Aug. 4, leaky, with eight feet of water in her hold; the advices, dated Aug. 17, stated she was then discharging, and that about three-fourths of her cargo was found to be damaged.

The Almonde, Pyl, arrived at Rotterdam, reports having spoken the ship Jane Pore (? Juanpore), from London to Shanghai, which vessel reported having experienced heavy weather, May 27, in lat. 38 S., lon. 40 E., during which she shipped a sea which carried over master and two men, who were drowned.

The Salatiga, from Batavia, to Rotterdam, arrived at Algoa Bay, July 25, leaky and for repairs.

The Krimpenerwaard, from Batavia, to Holland, was towed into Algoa Bay by the Celt (s.), July 24, leaky, and would have to repair.

The Saturnus, Diedrich, from Hamburg to Shanghai, which arrived off Margate, Sept. 3, had struck on the Long Sand, but got off after throwing overboard 3,000 barrels of powder, 800 of which have been picked up and landed at Brightlingsea.

The St. Jan, from Batavia, to Schiedam, arrived at Simon's Bay, July 31, with damage to rudder, bulwarks, &c.

MISCELLANEOUS.

At St. Vincent, C.V., Aug. 2, Osaca (s.), Maddison, from London, and left 4th for Yokohama.

At Simon's Bay, July 31, St. Jan, from Batavia, for Schiedam.

At Algoa Bay, July 24, Krimpenerwaard, from Batavia, for Holland; 25, Salatiga, from Batavia, for Rotterdam.

PORT OF AMOY. CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful entrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenter's Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c

Apply at the Offices of Messrs. PATERSON, SIMONS and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

W. CLOUGHTON, Managing Director.

PATENT IMPROVED ICE-MAKING MACHINES,

FOR THE

MANUFACTURE OF ICE ON A LARGE SCALE.

TEN TO TWENTY POUNDS OF ICE MADE AT THE COST OF ONE PENNY.

SINCE the first introduction of these Machines to public notice, the Manufacturers' long experience has enabled them to effect many important improvements, largely increasing their simplicity of management and solidity of construction.

The materials employed in the production of ice are used over and over again without appreciable loss. There is no danger attending the process.

A trial of each Machine to produce the quantity of ice stated is made when so desired by the purchaser.

Hospitals, Hotels, Barracks, or other Buildings may be cooled to any temperature.

These Machines produce from ten hundredweight to twelve tons per diem, and are numerously established in all parts of the world.

Her Majesty's Government of India employ this apparatus (see official report thereon).

The Peninsular and Oriental Steam Navigation Company possess SIEBE's large Machines at their principal Indian stations. Copies of reports upon the working of these Machines, and testimonials, will be sent on application.

SIEBE BROTHERS desire to say that an undertaking of this nature is not to be regarded as a mere speculation, but as the purchase of tried and valuable machinery, constituting a lucrative business, returning exceedingly large profits upon the amount invested.

For terms and other information apply to the Manufacturers, or to Messrs. SMITH, ELDER, and Co., 65, Cornhill.

SIEBE BROTHERS,

General Engineers, Coppersmiths, Manufacturers of all kinds of Air and Water Pumps, Diving Apparatus, Steam Engines, &c.,

'LONDON AND CHINA EXPRESS," ON SALE.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, RED BULL WHARF, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

Orders executed on receipt of 10 per cent. of the amount in cash, the balance being drawn for through a Banker.

HOLLOWAY'S OINTMENT and PILLS.—GOOD NEWS.—Honours, wealth, or station may be desirable posessions, but they are not, like health, necessary to man's happiness. The former may be difficult of acquisition, the latter is almost always to be had at little cost, with moderate perseverance and fair attention to the directions wrapped round every pot and box of Holloway's remedies. With these in hand we may advance fearlessly through many dangers that beset us, and we may feel confident that when used early these preparations will restore those afflicted by disease to health, strength, and soundness. These noble medicaments will cure sores, bad legs, enlarged joints, and release the victim from the painful present and a hopeless future.

DYSENTERY, CHOLERA. FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by th Vice-Chancellor

No. 22, Great St. Helen's, E.C.

Regular line of Packet Ship.
To follow the "Tweed."

FOR HONG KONG and WHAMPOA, the nearly new clipper-ship ALBERT VICTOR, A 1 13 years, 858 tons register, newly metalled; DAVID MUIR, Commander: lying in the East India Docks. This fine ship, built by Messrs. Steele, of Greenock, offers a favourable opportunity for shippers of fine goods at this season.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

With Quick Despatch.

FOR SHANGHAI, the splendid clipper ship, MAITLAND, A1 12 years, 799 tons register, WILLIAM COULSON, Commander; to load in the East India Docks. This vessel has proved herself to be equal to the fastest of the clippers; will be despatched in twenty days after arrival from Foo-Choo.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Has a large portion of her cargo engaged, and will meet with quick despatch.

DIRECT for MANGALORE, Cannanore, Calicut, and Cochin, the fine, fast-sailing British ship, STAR OF THE MERSEY, A1, 254 tons register; E. THOMAS, Commander; London Docks. This magnificent clipper, built under special survey in 1863, is strongly recommended to shippers of fine and season goods.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To sail August.

DIRECT for COLOMBO, the splendid Dundee clipper SEAFIELD, A1 10 years, 616 tons register; J. TOUGH, Commander; West India Docks. This magnificent vessel has just returned from Colombo, and from the good order in which she invariably delivers her cargoes offers the most favourable opportunity to shippers desirous of despatch.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

A regular trader. To follow the "Seafield."

DIRECT for COLOMBO, the splendid British-built ship, GRANVILLE, A1 15 years, 696 tons register; G. GALLICHAN, Commander; West India Docks. This magnificent high-classed vessel, well known in the Ceylon trade, offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

COLOMBO DIRECT (to follow the "Thames"), the clipper PALESTINE, AA1, 608 tons register; T. PARK, Commander; loading in the West India Dock. Has unrivalled accommodation for passengers.

For Passage apply to W. H. TINDALL, 5, Tokenhouse-yard,; and for Freight or Passage to F. TALLACK, 23, Birchin-lane, E.C.

To follow the "Bebington," and will meet with the usual quick despatch.

FOR BOMBAY DIRECT, the fine British-built clipper-ship PEGASUS, A1 (owned by J. K. Welch, Esq., of London), 1,183 tons register, THOMAS CORNWALL, R.N.R., Commander, East India Docks. This splendid vessel, built in 1862, is noted for her fast-sailing qualities, is confidently recommended to shippers, and has a great portion of her cargo engaged.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

LINE of PACKETS for YOKOHAMA, Japan.—To meet the wishes of several shippers the vessel is detained till the 10th proximo, when she will positively be despatched. Loading in Salthouse Dock, Liverpool, the splendid iron clipper barque RECIFE, 465 tons, A1 at Lloyd's for 12 years, and 20 years in the Liverpool book. Sails very fast, is well known in the trade, and as a conveyance for fine goods cannot be surpassed.

For terms of Freight or Passage apply to Messrs. J. NAPIER and Sons; or to E. C. FRIEND and Co., Liverpool.

From Hong Kong: Messrs. Guerin and Schelhass, Westall, Beck, Stewart, and Nissen. From Batavia: Messrs. Schakher, Frolke, Andre, Van Eyk, Segelberg, Van Vetten, Traan, Tauton, R. Paillard, B. Paillard, and Steinitz, Mr. Kohman and family (four), Mr. Larentz and two children. From Saigon: Messrs. Sorbe, Lafour, Laage, Villemoz, Auzias, Zattand, and Jung, Mdlles. Eulalie and Therese. From Singapore: Messrs. Read and Mesmakers. From Galle: Messrs. Schultze, Kelly, and Rayband.

By this mail, to Marseilles, per P. and O. steamer Ceylon, arrived Sept. 10.—From Galle: Lieut. Randall, Mr. Cheyne, Mr. Cocq, Mrs. Bawa and two children, Mr. Fenwick, Mr. Mills. From Singapore: Capt. Bell, Mr. J. Higgins, Mr. and Mrs. Vanderberg. From Shanghai: Mr. Wright. From Hong Kong: Mr. T. Andrews, Mr. McClean, Mr. Ede, Mr. Kindersley, Mr. Heaton, Mr. Walkinshaw, Mr. Conders, Mr. Charles de Vera, Rev. Carlo Uhede, Mr. J. Veras, Rev. F. Gotor, Mr. McCallan, Mr. Dalrymple, Mr. Kean, Mr. and Mrs. Pollard, Mr. H. B. Gibb.

To Gibraltar.—From Hong Kong: Mons. R. Rubion.

To Suez.—From Hong Kong: Mr. B. Lotz, Mr. F. Kitching, Mr. H. Algar.

To Southampton, per P. and O. steamer Tanjore, expected to arrive Sept. 18.—From Galle: Ensign Ross, Lieut. Shirley, Lieut. Fisher, Mr. Bomgan. From Singapore: Mr. and Mrs. Milne and child, Capt. and Mrs. Janssen, Capt. R. Webber. From Hong Kong: Mr. Odell, Mr. Roche, Mrs. Coventry, Mr. R. F. Frazell, Mr. Mortimer (remained in Egypt), Dr. Morgan, Mr. Jones, Mr. Firman. From Yokohama: Mr. Richards.

By last mail, to Marseilles, per P. and O. steamer Delta, arrived Aug. 26.—From Hong Kong: Hon. Mr. Paunceforte, Mrs. Paunceforte and child, Miss Cubitt.

By last Bombay mail, to Southampton, per P. and O. steamer Bangalore, arrived Sept. 7.—From Ceylon: Mr. Gower. From Hong Kong: Capt. Aplin.

Summary of News from the Far East.

CHINA.

SHANGHAI.

The dates are down to the morning of the 23rd July. The P. and O. mail of 10th June arrived out on the 22nd July with telegrams to the 26th June; but dates to the 25th had been received some days in advance *via* Kiachta. Since the departure of the French mail nothing of importance had transpired. The case of Mackellar and Co. continued to be canvassed, and the following extract from the *Recorder* describes the scene at the Consulate noticed in our last:—

From Mackellar and Co.'s failure have sprung complications which threaten very serious consequences unless his Serene Excellency, the Taoutai of Hankow, withdraws his threats and apologises to the merchants for his recent proclamation forbidding all Chinese from selling to the foreign merchants unless for sycee on delivery. Our Chamber of Commerce have held a spirited meeting, and the Consuls will present a solid front when appealed to. In connection with the affairs of the old house another difficulty has arisen, such as in the old China days, before England changed her policy, would have led ere this to another war, if ample indemnity for the future had not been promised. It seems that a gentleman from a Shanghai house, with whom Mackellar and Co. had large connections, happened to be at Hankow, and the Honan teamen, exasperated by their late losses, demanded without the slightest reserve that he should be arrested. This Mr. Gibson, H.B.M. Acting Consul, very properly declined to do, as there was not the shadow of a proof that he had done anything of a criminal nature. The Chinese, numbering seventy to eighty, attacked H.B.M. Consul in his own judicial hall! They knew perfectly well who he was, as he was in full uniform. Mr. Gibson is still suffering from an arrow wound he received near Tientsin in 1863, while putting down an insurrection against the Imperial Government; and yet these wretches struck him in his enfeebled state, one levelling a blow at his heart, and two other miserable scoundrels striking him from behind. The Tingchais (messengers) of the Consulate, like abject cowards, did not lift a finger in their master's defence; the constable was absent, and not until Mr. Allen, the assistant, returned were the two gentlemen able to drive off their cowardly assailants. Here we see a representative of Her Britannic Majesty attacked in open day in his hall of office by men who have hitherto been looked upon as terribly in dread of the foreigner. The blow levelled at the British Consul at Hankow is a blow hurled, not only at all the Consuls of all the Treaty Powers, but it is an insult planted full in the face of every subject or citizen of each and every treaty Power, and it is an outrage that ought to be dearly atoned for.

The following on Lyall, Still, and Co.'s affairs is from the *Court and Consular Gazette*:—

"The report of the termination of the bankruptcy proceedings in the case of the firm of Lyall, Still, and Co., of Hong Kong, is pregnant with matter for reflection. The compliments which the Chief Justice, the official assignee, the bar, and the secured creditors all united to pay to the bankrupts were, we have no doubt, sincere; but what the particular conduct of the latter may have been to have given rise to them we have not the faintest conception, unless, indeed, the charmingly clean appearance of the bankrupts' books elicited these marks of approval. We decline to echo the word 'satisfactory,' used by the bench, the bar, the assignees, Messrs. Jardine's bookkeeper, and by the creditors, because we fail to appreciate the applicability of the expression to the books of a merchant which show a deficiency of $635,935, against assets of $6,054 in unrealised, and perhaps unrealisable property, and $2,000 in cash. If this is the Hong Kong notion of what amounts to 'satisfactory,' we are afraid that the credit of that little gem of the Southern Seas will not stand very high for the future in English or foreign markets.

Digitized by Google

"We have no wish or desire to make the downfall of the house of Lyall, Still, and Co. more painful to the partners and those connected with them than it is likely to prove. They have lost all, and some of them at least are of an age when it is weary, heart-breaking work to struggle against the difficulties of an attempt to begin the world again; but in the interests of commercial morality we must protest against the dictum of the learned Chief Justice when he granted the discharge of the bankrupts, to the effect that want of prudence in China was a very different thing to want of prudence in England. We confess that we are unable to recognise any distinction between the two. But is it simply want of prudence that brought the firm of Lyall, Still, and Co. into bankruptcy? It is true we are told that the report of the official assignee was most satisfactory, but in what particulars it was so the newspaper report is silent. It would have been interesting to know up to what date the books of the firm showed a balance to its credit, or the last date at which it was actually solvent. There is no mention of the private drafts on the firm, or of the private expenditure of its different members; and above all there is no explanation afforded of the reasons by which Mr. Maclean justified to himself the handing over to the creditors of the firm the property of their English constituents to satisfy clamourous bank managers, when he knew that the proceeds of this property was to be specifically remitted to England to meet the bills drawn in respect of it. As between the firm of Lyall, Still, and Co. and their Manchester friends at least, we may from the recent case decided in the Supreme Court of Hong Kong conclude this was the understanding upon which the goods were entrusted to their care and sent out from England, and it is not very easy to understand how the conduct of the bankrupts was in this respect satisfactory. We are at all times inclined to think that complimentary expressions to litigants from the bench are uncalled for; but they are peculiarly so in a case like that under our consideration. We have no right to presume, after the evidence offered by the parties in the '*Min*' case, that Mr. Maclean did not know when he handed over the bills of lading of the Manchester goods in the bank that they were not the goods of his firm, because the presumption is that he knew perfectly well they were not; and if this presumption is well founded then Mr. Maclean was wrong, no matter the pressure to which he was exposed, in parting with the goods of A to pay B, and he was not therefore entitled to the panegyrics so lavishly bestowed upon him and his firm on the occasion of the grant of his discharge."

The premises of the Agra Bank are offered for sale or rental.

Mr. Alabaster has collated a series of interesting notes upon Chinese commercial law, both as it may affect transactions with foreigners and as relating solely to the Chinese themselves. It is singular, however, that while Chinese law is extremely full in criminal matters, "numerous collections of cases rendering it an easy matter for a judge to decide on almost any variety of circumstances that may come before him, the same care does not appear to have been bestowed upon the common law." And naturally where the law is thus meagre as a whole, it is specially so in those matters which bear more particularly on transactions between Chinese and foreigners, in which we are most interested. Indeed, it is doubtful, Mr. Alabaster says, whether there be "anything equivalent to our common law in England; for although the judges profess to be guided by certain principles of justice, decisions are greatly affected by local custom, and even more so by the particular circumstances of the case under consideration, such decision standing entirely by itself, and not, as in Europe, professing to form a portion of one harmonious system." The present notes bearing upon the subject are therefore offered as the nucleus of a volume, which it may be hoped, others will enlarge and complete.

In an action by Lowe, Crawford and Co. against A. Campbell for $591 for goods sold and delivered judgment was given for the plaintiffs.

In the Bankruptcy Court before Mr. Goodwin, *in re* C. Treasure Jones adjudged bankrupt on his own petition, filed in the Court at Amoy on the 13th of May and on the 29th May it was ordered by that Court that this bankruptcy be prosecuted in the Supreme Court. Dr. Winchester claimed $1,200, originally secured by mortgage in favour of E. F. Duncanson, and by him assigned to the claimant—admitted. Farr and Co. claimed on promissory note dated Oct. 15th, $229,—admitted. W. H. Tapp claimed Tls. 1,750 on a judgment debt—admitted. The meeting adjourned to the 19th September.

In re Maitland, Bush, and Co., adjudged bankrupts on their own petition, filed in the Court at Newchwang on the 28th day of August, 1866. Presentation of the petition removed to the Supreme Court by order dated 29th day of June, 1867. The bankrupts both appeared and surrendered. The allowance of 150 taels per month for Mr. Bush was confirmed by the creditors present. Mr. Booth suggested the desirability of the matter being taken out of bankruptcy; and this being approved by the creditors present at the time the proposal was made (some had left previously), the Court decided to refer the question whether this proposal could be acted upon under the 10th section of the Act to the Chief Judge. Failing this being carried out, the meeting was adjourned to August 15.

From the following notification it appears that a special application has been made to the Court by the partners in Shanghai of Messrs. Dent and Co., independently of Hong Kong:—

"Shanghai, 11th July, 1867.

"Whereas a petition for an adjudication of bankruptcy was, on the 9th day of July, 1867, filed in Her Britannic Majesty's Supreme Court for China and Japan at Shanghai, by Alexander Turing and Hans Peter Hanssen, under which John Dent, Francis Chomley, Henry William Dent, Alexander Turing aforesaid, and Hans Peter Hanssen aforesaid, lately trading in copartnership at Shanghai and elsewhere in China and Japan within the jurisdiction of this Court, under the style or firm of Dent and Company, have been adjudged bankrupt.

"Notice is hereby given John Dent, Francis Chomley, Henry William Dent, Alexander Turing, and Hans Peter Hanssen that they are hereby required to surrender themselves to Charles Wycliffe Goodwin, Esq., registrar in bankruptcy, at the first meeting of creditors to be held before the said registrar, on Monday, the 23rd day of September, at eleven o'clock in the forenoon precisely, at Shanghai aforesaid, and also to the court at the public sitting to be appointed by the court for the said bankrupts to pass their last examination, of which sitting due notice will be given. At the first meeting of creditors the registrar will receive the proofs of the debts of the creditors, and the creditors may choose an assignee or assignees of the bankrupts' estate and effects. At the public sitting proofs of debts of creditors will also be received, and the bankrupts will be required to submit themselves to be examined and to make a full disclosure of all their estates and effects, and to finish their examination.

"Notice is also hereby given to all persons indebted to the said bankrupts or that have any of their effects not to deliver the same, but to R. A. Mowat, Esq., acting law secretary, whom the court has appointed official assignee.

The circular of Messrs. Fogg and Co. states:—

Business is now more than usually depressed, and sales of any class of merchandise hard to effect. A large number of Chinese shopkeepers have been compelled to sell out their stocks for want of business, and prospects for a large trade are not bright. We quote, in most instances, asking prices, but sales at auction are only made with large loss. A few invoices oilman's stores have been offered at auction, and in most cases sold without reserve, realising losses to shippers. Stocks are now, however, becoming lighter, and we are in hopes of an improvement soon. Most of the stores at present on the market are now held by the original importers, and are held for invoice cost.

The following mercantile notices have been issued:—

We, the undersigned, have re-established ourselves from the 1st July as merchants and commission agents at this port, under the name and style of Dow and Co.—James Dow, James H. Wright, Wm. S. Maclean.

We have opened a branch of our business at Hankow, under the name and style of Dow, Aitken and Co., in which Mr. James Aitken is a partner.—Dow and Co.

Mr. Charlton Conyers Rainbow has this day been admitted a partner in our firm, which will in future be carried on under the style and firm of Evans and Rainbow.—J. H. Evans and Co.

HONG KONG.

The present mail brings dates down to the 29th July. The French mail of the 17th June arrived out on the 27th July, with telegrams to the 6th. The gambling licence was the chief topic of interest. Our correspondent, in his letter of 23rd July, published in our issue of the 10th, has condemned the measure freely, but according to the *Daily Press* the majority of the community is in favour of the measure. The following remonstrance has been addressed to the Governor by the gentlemen connected with the London Missionary Society, which, it is asserted, contains grave misstatements. We subjoin the documents in question that our readers may judge the matter:—

London Mission House, Hong Kong,
24th July, 1867.

SIR,—After the recent interview of Messrs. Warren, Morris, and Turner, with your Excellency, when you were so good as to listen to some arguments against the proposed system of licensing gambling houses in this colony, and you intimated your intention of putting that system into operation; we desire respectfully to lay before your Excellency the following objections, to which we venture to beg your earnest consideration.

We object to, and feel in conscience bound to protest against, this scheme, for the following reasons:—

1. Because it has been introduced in an underhand, and un-English way.

It is included in an Ordinance for "the Maintenance of Order and Cleanliness," a title under which no one would look for such a measure.

Digitized by Google

The clause affecting gambling is worded ambiguously; but any plain honest man would interpret it as meaning the very contrary to licensing the evil. It looks as if every care had been taken to blindfold the public on this subject. There has been no opportunity of eliciting public opinion here; no opportunity of memorialising the home Government in opposition to it.

2. Because licensing gambling houses will certainly lead to a large increase in gambling.

The fear of the law, which is now a partial check, will be removed. The publicity of the licensed houses will ensnare many, who do not now go out of their way to search for them. Sailors, and other Europeans, will be tempted into them. The proprietors will surround the "hells" with every attraction. But argument is needless here. The bare mention of the vast sum offered, and it is said, accepted for the licence, indicates an immense increase of gambling.

3. Because licensing gambling houses will never lead to the "ultimate suppression" of the vice.

To pretend the contrary would be the most barefaced hypocrisy. Every one who argues for the licensing, your Excellency included, does so on the ground that suppression is hopeless. The licensing will bring a large revenue which the Government will not easily resign. But if at any time the Government does withdraw the licences, the illegal gambling will then be harder to put down than ever. Yet by your own ordinance, your Excellency is pledged to aim at the "ultimate suppression" of gambling!

4. We believe that a large proportion of the Chinese population of this place are opposed to this measure. Its introduction will have a seriously demoralising effect on the Chinese resident in the colony.

5. Gambling is at present equally illegal by British and by Chinese law, in every part of the two empires. Only last year the Governor of Canton took stringent measures for the suppression of gambling in that city. The proposed measure will degrade both our civilisation and our Christianity in the eyes of the Chinese people.

6. We believe that the Government has no right to countenance and sanction vice.

By licensing gambling houses the Government will not only do this, but will actually protect and patronise that class of sharpers who make gambling their regular profession, and live by preying on the community, and (which is still worse) will itself take a share of their ill-gotten gains.

For the above reasons we are compelled, though with much personal reluctance, to enter our solemn protest against this proceeding. We again thank your Excellency for the patient hearing you gave to arguments opposed to your policy; and are sorry to be constrained to announce to you that we cannot but take every possible measure, both here and in England, to obtain the reversal of this scheme.—We are, with great respect, your Excellency's obedient humble servants,

(Signed) CHARLES J. WARREN, C.M.S.
JOHN PIPER.
RUDOLPH LECHLER.
JACOB LOERCHER.
DAVID B. MORRIS.
F. S. TURNER.

(REPLY.)

Colonial Secretary's Office, Hong Kong, 29th July, 1867.

GENTLEMEN,—1. I am instructed by his Excellency Sir Richard Graves MacDonnell to say that pressure of business has prevented his earlier acknowledging receipt of your letter of the 24th inst.

2. His Excellency is obliged to you for bringing before him once more your reasons for condemning the policy of licensing gambling houses in this colony. At the same time he cannot help remembering that three of your number, at a recent interview, quite failed to give any satisfactory answer to his arguments in favour of that policy, and appeared entirely unprepared with any suggestions to meet acknowledged existing evils.

3. The Governor does not feel called on again to discuss the question at length, but is bound to give a direct denial of your assertion that "the measure has been introduced in an underhand and un-English way." Such a statement is as untrue, as it is unreasonable to assert that a law for the "maintenance of order," is a title under which no one would look for such a measure,"—*i.e.*, for a measure designed to suppress illegal gambling—the present most fruitful source of disorders in the colony.

4. The Ordinance No. 8 of last year was introduced publicly in Council, discussed publicly before reporters of the press, and contained the very same words as the amended Ordinance passed on the 17th of last month, viz.: "to frame such rules and regulations and conditions, as may be deemed expedient for the total suppression, or in the meantime, for the better limitation and control of gambling in this colony."

5. The Ordinance of last year, like that of the present, contemplated if possible the suppression, and, failing that, the limitation and control of gambling. The Governor had then hopes that by increased exertions gambling could be put down, hopes which, after the greatest personal efforts, aided by equal exertions on the part of several officers of the police, he has been obliged to abandon, as he found the attempt only led to the continued corruption of the police on whose efficiency the security of the lives and property of the community mainly depends.

6. Those efforts, moreover, drove the incorrigible and numerous Chinese gamblers of the colony to resort to secret lairs, to live in a perpetual defiance of the law, and thus established numerous rendezvous of the worst classes, where nine-tenths of the burglaries and daring crimes perpetrated were planned.

7. His Excellency might of course have left matters in that state, which he presumes is what you would advise, or he might resort to the other alternative of the Ordinance for "the better limitation and control of gambling," which is the policy that he considers most consistent with his duty to maintain "order."

8. Last month the colonial press gave extensive publicity to the Governor's declaration in Council of his opinion that it would be wise to regulate what we could not suppress, and if publicity be un-English, and "calculated to blindfold the public," you will find it *in extenso* in the reported proceedings of the Legislative Council of the 17th ultimo.

9. His Excellency would have expected from the deep interest which you feel in the question that you would then have avowed your opinions. It may be a satisfaction to you, however, to know that members of Council, at least all the non-official members, so far back as the passing of the Ordinance last year, were well acquainted with and entirely approved of the alternative given to the Executive, if the suppression of gaming proved impossible. Such also is the opinion of the most experienced residents here, men whose opinions are entitled to equal weight with yours, for his Excellency presumes that you do not claim a monopoly of either sagacity or virtue.

10. You allude to the "large revenue" which gambling licences will bring in, and some of your number have published letters imputing to the Government the most sordid motives. Your imputing such motives, when disavowed by the Government, gives them neither truth nor even increased probability.

11. The Governor simply wishes to free gambling from its present illegality so far as to break up the gangs of illegal gamblers, whose cliques are now the schools and nurseries of crime, the continuance of which you advocate. He would do so if he saw his way to such a result, without adding a cent to the public treasury.

12. He cannot, however, make the Chinese aid in putting down illegal gambling otherwise than by rendering it essentially their interest to do so, nor can this be effected unless they have a large interest at stake with which illegal operations would interfere. The larger that interest, the greater and more effective must be their co-operation with the Government, and the more stringent the power of the latter to enforce obedience to its regulations, because that co-operation and obedience must be proportioned to the sums invested and risked by want of co-operation and disobedience.

13. Nevertheless, when the amount paid is sufficient for the above purpose, a point that can only be settled by experience, it is not desirable to increase it for mere purposes of revenue, and for that reason his Excellency has refused offers exceeding the amount accepted by more than $100,000. He will even be glad to find hereafter that a less sum than that now tendered will enable the Government to attain the principal legitimate objects sought, as above stated.

14. In this small colony, situated within a mile of the mainland, there has been between the latter and this island an interchange to and fro of 200,000 persons in the last six months, and his Excellency despairs of producing a moral impression against gaming on a community formed of such changing elements, and the individuals composing which are in the aggregate notoriously addicted to gaming.

15. He prefers addressing himself to the practical question of protecting property by suppressing meetings of illegal gamblers and retrieving the efficiency of the now corrupted police. He does not believe that vice ceases to exist when he shuts his eyes and refuses to see it—and if that, which is a sin of deeper dye, is, from the necessity of the case, submitted to regulated sanction with the approval of the wise and good in England, for the prevention of disease, his Excellency cannot admit the distinction, without a difference, which would forbid his endeavouring, with a view to the suppression of crime, to control that which was not illegal by English common law, and his not denounced as a sin by the sacred law.

16. He believes that under the new policy there will be more gaming, but by removal of its illegality the consequences will be far less pernicious to individuals or the public than its present more limited practice. His opinion on the probabilities of the case is at least founded on information as accurate and extensive as yours—though it may not be so offensively or discourteously expressed as in some of your recent publications.

17. One system has been tried and failed. Therefore another is now about to be tried. Should it also fail, the Governor has reserved complete powers to terminate the experiment at a moment's notice.

18. Finally, his Excellency desires me to add that he does not believe there is any individual amongst you so reluctant, personally, as he is himself to introduce a system the object of which it is so easy for irresponsible declaimers to misrepresent in general appeals to morality, for which there will ever be a ready audience too indulgent to suspect that the morality advocated is but a lazy acquiescence in the same vice under more revolting and dangerous conditions.

19. Argument would be useless with those who can see no difference between the special and exceptional circumstances of Hong Kong and Heligoland. What might be an unjustifiable policy in England, or in a colony inhabited by a European race with an efficient police, may be, in the cause of order and general security, an absolute necessity in a small community of 2,000 foreigners amongst 130,000 Chinese, whose co-operation in the suppression of illegal gambling, the source of so much crime, can only be expected by giving them an interest in limiting its practice to a few fixed places under Government surveillance.—I have the honour to be, Gentlemen, your most obedient servant,

(Signed) CECIL C. SMITH, Acting Colonial Secretary.

The following comments on the gambling licence question are from the *China Mail*:—

"The 'case' is this:—The Governor proposes to raise a revenue from Chinese gambling tables, by licensing them, and he estimates the revenue derivable from that source at from $250,000 to $300,000 per annum. The memorialists object to licensing at all. There is a third party, including ourselves, who advocate licencing in order to give the power of regulating and controlling, but without any view to deriving pecuniary profit from the vices of Chinamen. His Excellency Sir R. Graves MacDonnell thinks, however, that it is perfectly consistent with the honour of the Crown which he represents that the expenses of its administration in Hong Kong should be partially defrayed by what can be obtained from the public gaming tables of the Chinese. There is no social or pecuniary necessity for such a very objectionable mode of raising money for the use of Government here. His Excellency has committed a blunder. The Stamp Act is available honestly, and would yield more money than Sir Richard requires. Why he has preferred to trade upon the vicious propensities of Chinamen, instead of carrying out a law to which Her Majesty has assented, has yet to be satisfactorily explained. It will be seen that Sir Richard, in his reply, mildly insinuates that it is not his intention to aid the general revenue by such means, and this may, perhaps, be regarded as a sign of repentance."

And the following from the *Daily Press*:—

"The conventionally religious views of the intention of the Government with respect to Chinese gambling, has been put forward with much pomp

Digitized by Google

and parade of superlative virtue by Mr. Morris, the successor of Dr. Legge, in a letter addressed to the *Evening Mail*, and it is perhaps desirable to notice the arguments or assertions made use of, even if they have received up to the present time only a limited publicity. That, as the groundwork of the highly moral lessons in his letter, he has found it necessary to commence with a monstrous misrepresentation of what it is which is really being done, will be in itself a sufficient answer for many people to the irrelevant denunciations of the crime which he lays at the door of the Government. All who have any means of arriving at the real motives with which the Government has been actuated, and which have influenced those who have previously advocated the step about to be taken, will know it is directly calumnious to assert that the issue of gambling licences has been determined on because 'money is needed.' It is simply nonsense to talk of 'legalising, and hence participating, in gambling,' in order to 'filch $300,000 out of degraded heathen.' After vain efforts to put a stop to gambling amongst the Chinese altogether, after pushing those efforts a great deal further indeed than they ever ought to have been carried, after it was found that persistence in the course of regarding gambling as an offence against the law led simply to the wholesale corruption of the police and a variety of other evils, without reforming the Chinese themselves in the slightest degree, the Government finally came to the conclusion that the only rational course left was to accept the gambling houses as an inevitable necessity in an island mainly inhabited by Chinese, and it reluctantly decided on the legalisation of a limited number of such establishments as the only means of putting the numberless illicit houses, each of which was far more injurious and demoralising to the people than by any authorised house, watched by the police, could possibly be. Then the question of licence fees came up, the principle of granting licences being acknowledged as inevitable, and crowds of people came forward, bidding one against another, as we have already explained, for the privilege of holding these licences. What motive except that of deliberate hypocrisy, could the Government then have for refusing the large offers and leaving in the pockets of some favoured private speculator, the enormous profits to be made out of the gambling licences? In the hands of the Government the profits will be turned to useful public purposes; in the hands of individual contractors they would be, indeed, a simple payment for pandering to a vice. Perhaps people who are so indignant with the Government for accepting something like the real value of the licences it has determined to issue, are not aware that one of the first uses of the comparatively large pecuniary resources which will be put in its hands by the introduction of the licences, will be the erection of a new Civil Hospital, which has long been so urgently needed."

Her Majesty's gunboat *Janus* left Hong Kong on the evening of the 17th instant having on board a mandarin and the Chinese who have given information respecting pirates. The *Janus* anchored that night, and next morning arrived at Deep Bay, where she fell in with a fishing junk whose master furnished some valuable information. According to him a pirate junk had been there the day before, having on board a heavy armament and some 80 men. This man was retained on board as pilot, and the commander of the *Janus* endeavoured to take the gunboat up to Shami, the place to which he had been instructed to proceed. While searching for a passage the masts of a junk were seen over the land, she having been run on shore and deserted by her crew. Efforts were made to get the *Janus* within gunshot, and she managed to get within half a mile of the junk when the shoal water stopped her. Lieut. Lloyd now called away his boats, and pulled for the junk, taking care that his approach was covered by the gunboat. A sharp fire of musketry and jingalls was opened on the advancing boats from parties stationed on the shore and the surrounding hills, and Lieut. Lloyd made for the cover afforded by the junk. As soon as he had boarded her with his men the natives on the beach were quickly dispersed by the fire kept up from their rifles, and this effected, the boats took the junk in tow, and although a heavy fire was kept up on them by the Chinese who had returned to their position, no casualty occurred and the junk was safely got out of gunshot.

A few hours after capture of the junk, Lieut. Lloyd landed a party to search for the guns of the junk, which search proved unsuccessful. While it was going on a large party of pirates in small junks made a dash to recover the captured junk, but their attempt was defeated by a party of small-arm men advancing into the water covered by the marines on the beach. Two of these small junks were captured and subsequently burnt.

The next day the *Janus* proceeded up to Shami, but unfortunately took the ground for nearly twenty-four hours, while searching for a passage. The charts of this neighbourhood are very defective, and it is not to be wondered at that Her Majesty's vessels occasionally use their keels as sounding leads. The *Janus* managed to get to within two miles of Shami, and the mandarin on board having communicated with the authorities, Lieut. Lloyd destroyed, with their consent, two houses known as piratical haunts. The services rendered by Lieut. Lloyd in this expedition will, we trust, meet with due recognition in the proper quarter.

The *Prince Albert*, a steamer belonging to a Chinaman of Hong Kong, named Quok-Acheong, which was illegally seized by the Canton authorities last year, under circumstances which were amply detailed in these columns at the time, has been finally given back within the last few days to her owner, on payment by him of $4,000. This result has been brought about by the determined intervention of the Governor of Hong Kong, and the case, which is one of great injustice, is not over yet.

The Liverpool steamer *Agamemnon*, which left Hong Kong on the 9th July, for Mauritius and England, broke her main shaft on the 13th, in lat. 9.38 long. 105.56 E. She had to return to Hong Kong under sail, and came in on the 26th. The Calcutta steamer *Lightning* also had to put back in consequence of a less serious accident to her machinery.

A shocking and unintelligible tragedy has been enacted on board a Portuguese barque, called the *Jeddo*, which arrived here on the 15th July. She was on a voyage from Singapore to Hong Kong with a cargo of Straits produce, and about seventy Chinese passengers. On the night of the 4th inst. a number of the natives rose and murdered the captain, mate, second mate, and two of the Chinese sailors, badly wounding the other Europeans. Having committed this deed, however, they relapsed into a state of complete inactivity, and suffered the boatswain to take command of the ship, shape a course for Hong Kong, and finally, when another ship, the *Veritas*, hove in sight, to make signals of distress and call assistance. The captain of the *Veritas* came on board, and learning what had taken place put his chief mate and four men in charge of the *Jeddo*, which was brought into this harbour without further difficulty. The coroner's inquest, which has been adjourned two or three times and is still sitting, has as yet failed in unravelling the mystery which envelopes this extraordinary occurrence, or in discovering any motive for the conduct of the murderers.

A meeting of the Hong Kong Hotel Company was held on the afternoon of the 17th, Mr. G. Overbeck in the chair. The chairman stated that 1,984 shares had been allotted, of which 86 had been forfeited; a sum of $30,550 still remained unpaid on the calls on shares, and the chairman much regretted that such was the case. Persons who had forfeited their shares would, the chairman said, have to pay up, else steps would be taken to that end. The directors still looked hopefully upon the success of the company.

The *Caledonia* gunboat has been launched by Messrs. Riach and Co., and is the third vessel of that class launched by them.

In the case of the Comptoir d'Escompte and the Chartered Bank in the matter of certain goods per *Min* made over to the banks by Lyall, Still, and Co., Mr. Pollard (instructed by Mr. Caldwell) moved that judgment be signed, and the money be paid. Security would, of course, be given, so as to provide for the appeal. Mr. Whyte (instructed by Mr. Sharpe), made some objections; when Mr. Pollard suggested that it would perhaps be best to compel payment, as his learned friend did not seem willing to do so. The Court then rose.

The report of the case of Liebert against the official assignee of Lyall, Still, and Co., is as follows:—

Mr. Whyte, instructed by Mr. Sharp, for the plaintiffs; and Mr. Pollard, Q.C., instructed by Mr. Hazeland (Crown Solicitor), for the official assignee. The judgment of Chief Justice Smale was as follows:—

Mr. Whyte appeared on behalf of Mr. Liebert, and submitting to the jurisdiction of this Court in Bankruptcy he moved under Sec. 96 of the Bankruptcy Ordinance, 1864, that 100 bales of grey shirtings lately arrived at Hong Kong by the ship *Pakwan*, consigned to the bankrupts, and now in the possession of the official asssignee of the bankrupt's estate, might be ordered to be given up to Mr. Liebert. Mr. Liebert's case is supported by the affidavits of Mr. Still, one of the bankrupts, and Mr. Parry, of the firm of Wilkinson and Co., the agent in Hong Kong of Mr. Liebert, with certain exhibits to these affidavits, and by an affidavit by Mr. Sharpe, solicitor. The motion is resisted by Mr. Pollard, Q.C., for the official assignee. Memorandum of admission signed by the solicitor for each party was put in, the principle of which admitted that the circumstances of the order for and transmission of the goods now claimed to Hong Kong were identical with those which appeared on my notes in the action in the *Min* case, subject only to a question whether the letters and documents in this case, not identical with those in evidence in the *Min* case, affect the question. I am of opinion that these letters and documents do not so alter the circumstances, which I have fully reconsidered as to induce me to differ in the present case from my decision in the *Min* case; and I am upon the facts in this case, as I was in that case, of opinion that the transitus of the goods now claimed had not terminated until after the demand made in the harbour of Hong Kong, and as it is admitted if the transitus had not terminated, properly made by agents here on behalf of Mr. Liebert, and as against the bankrupts themselves, a proper and sufficient stoppage in transit was made according to the contention of Mr. Whyte.

Again, Mr. Whyte contended that the heading of the invoice created an equitable lien on the goods in the hands of the bankrupts in favour of Mr. Liebert, as a charge to secure the due payment of the bill of exchange for £3,468 9s. 2d., the price of the goods. I held in the *Min* case that as the bankers took the bills of lading for value without notice of the invoice, the

Digitized by Google

equitable lien on trust did not affect them. I am in the present case however, on the whole, of opinion that the terms expressed in the heading to the invoice created either an equitable lien on the goods themselves, or otherwise that a trust attaching on the goods in the hands of the bankrupts to have the proceeds of sales applied up to the amount of the bill, £3,468 9s. 2d., in duly honouring that bill, but that any surplus would accrue to the bankrupts. It is agreed that probably the proceeds of sale of these goods will be more than £3,468 9s. 2d. I am of opinion on this branch of the argument that as between Mr. Liebert and the bankrupts he is entitled to the proceeds of the sale of the goods up to the amount of the acceptance for £3,468 9s. 2d., but that the proceeds subject to that payment would have belonged to Messrs. Lyall, Still, and Co.

At the hearing a question arose whether Lyall and others having become bankrupts before the termination of the transitus, and also before the act of stoppage in transitu occurred, the bankrupts were not then in possession with the consent of the true owners under what is called the order and disposition clause, Sec. 97, of our Bankruptcy Ordinance, 1864, equivalent to Sec. 125 of the English Bankruptcy Act of 1849. Mr. Whyte denied that the clause applied, but Mr. Pollard argued very ably that it did. It is clear that both grounds of the right of stoppage in transitu and the equitable lien or trust would be as good against the assignees in bankruptcy as against the bankrupt himself, but for this clause, for the assignee, not being assignee for value but only assignee for open action of law, without such clause can take only what the bankrupt had and subject to all charges which affected him. I am of opinion that whilst in transit the goods were not in the order and disposition of the bankrupts within the meaning of the clause and could be stopped in transitu after the order and disposition clause became law, and as much as in cases before that law was introduced. Ellis v. Hunt 3 T.R. 465 was a case before the present law created by the order and disposition clause in a case which by great promptness the assignee in bankruptcy, merely by putting his mark on goods which up to that time had been in transitu, terminated the transitus and reduced the goods into his possession, defeating the right of stoppage in transitu which it was assumed otherwise existed. In that case, p. 467, Lord C. J. Kenyon said that Lord Hardwicke had established a very wise rule that the vendor might resume the possession of goods consigned to the vendor before delivery in case of the bankruptcy of the vendee. That the law thus stated has not been changed by the introduction of the order and disposition clause is clear from the language of Mr. Baron Parke (now Lord Wensleydale) in Gibson v. Carruthers (in 1841) 8 M. and W. 334. "In cases of bankruptcy and insolvency the law founded on an equitable principle permits the unpaid vendor at any time before the arrival of the goods at their place of destination or the vendor's actual possession to resume possession." I do not see that the point has been actually raised in any case, but there are some principles of law so plain that they are not raised, and I believe this is one of them. I think Mr. Pollard said all that could be said in favour of his client, rather on my own suggestion than because he relied on it. I am also of opinion that in the circumstances of this case the trust having *ab initio* attached would have continued attached to the goods in the hands of the assignee if the stoppage in the transitu had not prevailed.

On the whole I decide firstly, Mr. Liebert, having in my opinion, clearly established a good stoppage in transitu, is entitled to have the goods given up to him. I need proceed no further, but in case this view should be held erroneous I proceed. Secondly, Mr. Liebert has established a trust in the goods in his favour to have the proceeds of sale applied to honouring the acceptance for £3,468 9s. 2d. and interest and commercial expenses, but any surplus beyond that purpose belongs to the estate of the bankrupts. The goods must therefore be given up to Mr. Liebert's agents here for sale, they giving security as shall be arranged to keep and render an account of sales, so as that in case of an appeal Mr. Liebert shall fail to sustain his title under the stoppage in transitu it may be known what, if any, the surplus is. It is admitted at the bar that by proceed is meant but proceeds after recouping to the bankrupt's estate the expenses of transit and freight and insurance, &c., for which the estate will have to be credited in the first place, in case of Mr. Liebert's failing in the stoppage in transitu question, should be held to succeed on his title under this his equitable lien. As to costs, I think the usual course on such motions as the present is that the costs of Mr. Liebert, as between party and party, should be paid out of the bankrupts' estate. The official assignee's costs, as between solicitor and client, must also be so paid.

Mr. Pollard said that the Chief Justice should bear in mind that the case was one involving the finest legal distinctions of almost any cause which could arise. It was also the first time that a decision had been given on such a heading as that of the invoice. Mr. Liebert, he thought, might be very well satisfied with what he had got. Mr. Masson, as official assignee, had simply done his duty in opposing on behalf of the general body of creditors; and he thought it would be unfair to allow the costs to fall upon the estate.

The Chief Justice said that he could not but say that Mr. Liebert had done quite right in coming into court, and thereby saved the estate much more heavy costs; he might have kept this court at arm's length, and proceeded in another and much more expensive way. He thought the usual rule held good, that the costs be paid out of the fund, in the case where both parties had behaved properly.

Mr. Pollard remarked that, of course, that fund was the goods.

Chief Justice: No, the estate, the fund from which the creditors are paid.

Mr. Pollard then said that at least Liebert ought to pay for the freight and insurance premium; they could surely not take possession of the goods carriage free, and not pay the expenses due upon them.

The Chief Justice replied that his opinion as given in the instructions to the jury in the *Min* case was opposed to Mr. Pollard's opinion. He might be wrong, but that was his opinion.

Mr. Whyte applied for an order for the delivery of the goods.

Mr. Pollard said that such might be done on security. He would move for an appeal at once, and he would give his consent to the execution of the decree, subject to the security. The value of the goods, he was informed, had been enhanced considerably during the stoppage; they would now fetch $3.60, while the price at the time of the stoppage was only $3.20.

Chief Justice: No doubt Mr. Liebert will thank you for the delay. (Laughter.)

The *Gazette* contains the following notifications :—

His Excellency the Governor has been pleased to appoint Mr. C. H. Hordon, 3rd clerk in the Colonial Treasury, to be joint valuator, with Mr. Collins, under the provisions of "The Police and Lighting Rate Ordinance, 1863."

Cecil Clementi Smith, Esq., to be Acting Colonial Secretary of Hong Kong until further notice.

The Hon. Henry John Ball to be Acting Attorney-General of Hong Kong until further notice, vice the Hon. Julian Pauncefort, absent on sick leave.

Phineas Ryrie, Esq., is appointed member of the Legislative Council in place of John Dent, Esq., resigned, and Francis Parry, Esq., vice the Hon. H. B. Gibb, absent on leave.

His Excellency has been pleased to appoint provisionally John Clarke, Esq., to be Acting Assistant Surveyor General, vice Shearman G. Bird, Esq., absent on sick leave. Mr. Clarke will at the same time perform the duties of Assistant Engineer in the Surveyor General's department.

The following is an abstract return of the average circulation of notes and of specie in reserve, by the undermentioned banks, for the month ending 29th June :—

Bank.	Notes.	Specie
Oriental	$585,000	... $300,000

	$2,022,257	$1,030,000

STRAITS SETTLEMENTS.

SINGAPORE.

Dates are to the 7th August. The London Mail of the 26th June arrived on the 27th July, with telegrams to the 13th July.

The subject of the riots at Penang, &c., which has been noticed in the *Straits Times*, has received the attention of the Executive Council, and two Bills have been laid before the Council, one for the registration of societies, and the other for the better preservation of the peace, which, operating conjointly, will, it is to be hoped, meet the necessities of the case. The provisions of the first secures the disclosure of the constitution, officers, and place of meeting of every lawful society; and the latter gives power to the Government in cases of disturbances to impress into their service special constables from any of the population, and doubtless the selection would fall upon the headmen of the societies whose members were at feud with one another.

The expedition which started for the Nicobars, with a view to ascertain the truth of the rumour that several Europeans were held in bondage there, and, if the rumour proved true, to endeavour to effect a rescue of them, had not yet returned, but was expected in a few days. A serious catastrophe occurred in the Straits of Malacca; the steamer *Bombay Castle*, bound hence to Bombay, left Singapore on the 30th ult., and about twelve hours after starting ran down the native trading brig *Black Diamond*, which had about sixty people on board; the brig sank a few seconds after being struck, and about 20 of her passengers and crew perished, the others having been rescued by the boats of the steamer. The escape which the colony made a month ago from the purchase of a steamer at a cost of some £22,000 has proved to some extent only a respite, and a vessel of half the size, and less than half the worth, has just been added to the public property of the colony for the sum of £13,500. The Executive had its own way in this matter, and it is to be hoped it will accomplish with this new purchase something worthy of the money.

The *Straits Times*, in its notice of an article on the "Straits Government," which appeared in the *London and China Express* of the 26th June, has the following remarks :—"Our object in noticing the article in the *China Express* is not altogether to consider the public questions it moots. It contains animadversions against our late Governor, General Cavenagh, which every honest man here must read with regret. We were never blind to nor silent over General Cavenagh's errors of judgment, and we have had many differences on public questions; but even his worst enemies, if indeed he really had any, could not say of him that he shirked his work, or the responsibility of his position. His hands, it is true, were in a great measure tied, but so far as he could act he acted promptly and fearlessly; indeed, too promptly, according to the opinions of some, as in the Tringanu case, and others. The spectacle of General Cavenagh going home by the P. and O. steamer, to which the writer of the article, with questionable taste, refers, was the spectacle of a worthy officer unostentatiously retiring, with but scanty reward, from the service of a country which

Digitized by Google

will continue to bear the good fruits of his indefatigable industry."

In another column two correspondents' letters will be found on this subject also.

By the steamer *Chow Phya*, from Bangkok, we learn that the King's eldest son died about the 26th July.

The British schooner *Stella* was put up for sale by public auction, and realised $3,900.

COMMERCIAL.—IMPORTS.—We have had an active demand for Grey T cloths and low numbers of yarn, chiefly for the China markets, and a fair amount of business has been done in Grey Shirtings for export to Siam. Most holders are willing to sell, and no change of importance has taken place in quotations. There is no speculative feeling in our market, and any demand existing is for actual consumption or for export. Grey Shirtings, 39 in.:—There has been a good enquiry for 8¼ lbs. at from $3.25c. to $3.20c. per piece; prices gave way a little on the arrival of supplies from home, and though stocks are reduced, there are still sellers at our lower quotation. 7 lbs. move slowly at $2 60c. to 62½c., and 6 lbs. at $2.35c. to 40c. per piece.

EXPORTS.—The export market has shown rather more activity, and the value of some of our principal staples has slightly advanced. The improvement is doubtless to be attributed to the downward movement in exchange, and to the increased quantity of homeward shipping which has been available. Gambier has been moving pretty freely at $2.77½ to 80 per pic. (15s. 5¾d. to 15s. 7d. per cwt. f.o.b.) There are still buyers at our lower quotation, but dealers are holding firmly for the recent advance. Black Pepper is not plentiful, and the few transactions reported are chiefly at $5 15-20 per pic., which is the present value of the article.

The question of freight per steamer *Ajax* has not been settled yet by some of the consignees. The owners claim to have performed the passage to Gravesend in seventy-five days, by an hour, while the consignees contend that she must be in dock in seventy-five days or submit to the reduction of 30s., as per agreement. The consignees are justified in their view but it should have been stated on the bill of lading.

COMMERCIAL REPORT.

CHINA AND JAPAN IMPORTS.

HONG KONG.—Arrivals with general cargo comprise the steamer Thales and barque Veronica from Liverpool, on 16th and 17th July respectively, and the Northfleet and Solent from London on the 16th July. These large arrivals have, for a time, completely checked operations in Grey Cotton Goods. The Northfleet and Solent have experienced very severe weather, and it is expected that their cargoes are sea-damaged to a considerable extent; the Chinese, therefore, hope to supply their wants from the large auction sales on underwriters' account which are expected shortly to take place, and in the meanwhile are not disposed to make offers for sound goods. Small sales reported of Yarn, prices unchanged, with limited inquiry. T-Cloths are still scarce, and rates tolerably firm. White Shirtings continue neglected, and only a slight improvement is noticeable in Fancy Cotton Goods. Raw Cotton has continued to come forward from India in very large quantities since July 1st. An improvement in the demand for Woollens is at length noticeable, as the time of year is approaching when the attention of the dealers is turned to these goods. With the exception of Long Ells, quotations are slightly advanced "all round." Large sales of Nail Rod Iron are reported, at an advance of 5 to 10 cents. Bar and Hoop Iron have also been in fair demand. The arrival of the London ships, although bringing large supplies, has not weakened rates, as nearly all the iron they bring has long since been sold to arrive. Lead remains firm, and stocks are rapidly decreasing. The market for Coals has been much weakened by large arrivals from home, chiefly of Newcastle coal. Rates may be quoted about half-a-dollar to a dollar lower. It would now be very difficult to obtain 15 dols. per ton for Welsh coal ex ship, and for Newcastle 13½ dols. to 14 dols. is about the highest price for Coal afloat.

CANTON.—Very little business has been transacted during the fortnight. Rates for cotton are unchanged. Lead has still an upward tendency. Considerable sales of quicksilver have been made at about former prices.

SHANGHAI.—Grey Shirtings: There has been a great demand for these goods; in 8lbs. 4 oz. best makes, prices have advanced to Tls. 2.90, and sales are reported of 70,000 to 75,000 pieces at from Tls. 2.75 to 2.91. T-Cloths: The demand has fallen off for all but the best makes, and prices show a fall of 7 cents per piece. White Shirtings: The demand for these has also improved, and sales are more freely made at quotations. Woollens: Camlets continue very dull of sale, with no change in price. Long Ells: The demand remains steady at about former prices. Stocks are not large, and firmly held. Spanish Stripes have advanced in value, and fair assortments have met a ready sale. Figured Orleans: Some holders have pressed sales, and considerable transactions are reported at the decline noted last mail. Metals: We can simply repeat our last remarks. Nail Rods are Tls. 2.52. The Titania increased stocks of Iron some 300 tons. Lead has been sold at Tls. 4.90, and Malacca Tin at Tls. 19. Coals: Recent arrivals have caused rates to decline, and demand on Chinese account has abated.

YOKOHAMA.—We lower our quotations slightly for 7 lbs. Grey Shirtings, for 16 to 24 Yarn, for Black Velvets, Lawns, and Alpacas; almost the only articles in which business has been done.

CHINA AND JAPAN EXPORTS.

TEA.

SHANGHAI.—Black Tea: We have to report one of the largest fortnight's business on record here since the opening of the river ports. The experience of last year, and the heavy advances under which they hold, have led the Chinamen to accept lower rates, with unusual readiness, notwithstanding the firmness they appear to have exhibited in dealing with the same teas up the river; this, combined with the daily increasing scarcity of good tea, has led buyers to enter the market freely, and a firmer feeling is the result. Ningchow teas (Monings) of quality have commanded some competition, and their value had advanced one to two taels, other kinds remaining much as before. Arrivals from the river, though somewhat less plentiful than during the previous fortnight, have sufficed to maintain our stock at 50,000 chests, and unless business should continue on the same large scale, we may expect a farther considerable increase before the next mail leaves. A great portion of the stock both here and in Hankow consists of common Oomms, worth 1s. to 1s. 1d. in London, which holders refuse to sell at the equivalent of these prices. Green Tea: The high rates asked for the new Pingsueys have curtailed business, only five settlements having been made during the fortnight. Prices show a decline of one or two taels from last mail's quotations, leaving the cost still much above the London value. As supplies are now coming in more rapidly, we may hope for an easier market henceforth. Moyunes: Two chops of last season's crop—fine teas held over from Chinkiang—have been settled at 39 taels all round, an extreme price, considering the near approach of the new crop. We hear from Teenkai that the packing of the New Fychows was being rapidly pushed forward, and that considerable arrivals may be expected in August, the yield being nearly a fortnight in advance of last year. A large crop is confidently expected, for the province of Ngan-hui is fast recovering from the disastrous effects of the rebel occupation, which terminated in 1864, and unless the seasons prove unfavourable, a steady annual increase in the supply may be looked for.

KIUKIANG.—Black Teas: Nearly 14,000 chests tea had arrived during the fortnight, the whole of which had gone forward to Shanghai on native account, the teamen being firm in demanding considerably above the equivalent of Shanghai rates, which buyers would not concede. There were thus no settlements, and only about 3,000 packages remained in stock. Green Teas: Earliest arrivals of new teas were looked for about the end of August. The crop is likely to be large and the quality good. Finest chops are said to cost the teamen 28 taels laid down in Kiukiang.

Digitized by Google

HANKOW.—The business done in teas had been small, settlements only amounting to about 9,000 chests, the teamen generally preferring to accept the decline at which buyers were prepared to operate. The few purchases of fair to medium Oopacks and Oonfas show a decline of 2 to 3 taels per picul; but prices generally are above either Shanghai or London values, and business is not likely to be extensive except at the equivalent of the latter. The further arrivals of second crop teas confirm the former opinion as to its indifferent quality.

FOOCHOW.—Congou: There is no change to advise in the market during the fortnight; a large business has been done chiefly for Australia, and the cargoes of some sixteen vessels for that market have now been provided. Teas have been coming down freely the last few days, and the arrivals are slightly in excess of last year. The poor quality of the first arrivals of the second crop has not been borne out, the higher country teas being very fairly made, and particularly strong and pungent in the cup. The market closes quiet, with teamen willing sellers. Souchong: The balance of the stock has been nearly all cleared off, at about former quotations. Pekoe: One or two chops of true black and white feathery leaf have been taken for England. Oolong: Nothing doing. The miserable accounts received from New York will probably retard the opening of the market. Scented: The stock is very heavy, and we look for a drop in prices.

CANTON.—A moderate business prevailed during the early part of the fortnight, but teas being really cheap the demand increased, and considerable settlements of Scented Teas have been effected during the past week, the market closing decidedly firmer. Of the seven chops of Country Congou at market three have been settled at prices which lay them down at home a little below home rates. There has at length been some movement in Country Greens. Moderate settlements continue to take place in Canton-made Greens.

SILK.

SHANGHAI.—Early in the fortnight many intending purchasers, alarmed at the unfavourable telegraphic advices then to hand, remained out of the market, and but few transactions took place; subsequently, however, the market, acted upon by the home news of the 18th June, caused prices to decline considerably, which induced operators to commence purchasing, and a fair business has been the result. The settlements are estimated at 2,500 bales, 1,000 bales of which are settled on joint account with the silkmen. Owing to the small proportion of chop silks on offer, the majority of the settlements consist of medium and common descriptions. Prices have declined taels 20 to 30 per picul for Chop Tsatlees; taels 25 to 40 for common and market Tsatlees; 30 to 40 per picul for Karshing Taysaams; and taels 45 to 50 for Hainings, and the market closes weak.

CANTON.—Throughout the fortnight the market has continued inactive, transactions having been limited to best selected parcels of both Short and Long reels, for which very high rates have been paid. The usual market Tsatlees have been rather neglected. It is said that the third crop will produce about 700 bales of fine silk.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From Newcastle, July 30, John and Jeannie; from New York, 31, Thomas Brown.

At HONG KONG and CANTON.—From London, July 16, Solent, Northfleet; from Liverpool, 16, Thales str. (via Mauritius and Singapore); 17, Senator Weber, Veronica; from Newport, Johanna Mathilde; from Sunderland, 18, Ettie; from Cardiff, 17, Lochnagar; 26, Southern Bell; from Shields, 21, Kelso; from Newcastle, 26, Princess of Wales; from Hamburg, 24, Kali-maas; from Boston, 24, Sooloo; from New York, Midnight.

At MANILA.—From Cadiz, July 11, Concepcion.

At SINGAPORE.—From Glasgow, July 26, Lochleven Castle; from Liverpool, 27, A. H. Wille; 28, Bella; from Newcastle, Aug. 5, Johanna; from Monte Video, July 27, H.M.S. Zebra; from Clyde, 26, Pei Ho (str.).

At PENANG.—From Liverpool, Condor.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None.

From FOOCHOW.—For London, July 2, Shun Lee; 4, Amadine; 10, Argonaut; 19, Burdwan.

From HONG KONG and CANTON.—For Falmouth, July 14, Albatross; for Hamburg, 17, Princess; 10, Maria Louisa.

From MACAO.—For London, July 29, Passe Partout.

From MANILA.—For London, July 10, Lady Agness Duff; 15, Odulia (via Cebu); for Cork, 16, Evangeline.

From SINGAPORE.—For London, July 21, Admiral de Winter.

From PENANG.—For London, Benvenue.

VESSELS LOADING.

At YOKOHAMA.—None.

At SHANGHAI.—For London, Isles of the South, Elmstone, Anglo-Saxon, Hoang Ho, Jubilee, Sovereign of India, Star of China, Helen Nicholson, Dunmail, Coral Nymph, Fusiyama, Pegasus, Wild Deer; for New York, none.

At FOOCHOW.—For London, Pakwan (in dock), Maiden Queen, Queen of the Age, Caldew, Caranjah, Maggie Leslie.

At HONG KONG and CANTON.—For London, Alma, Niphon, Chalgrove, Chanticleer; for Continent, Peiho; for Falmouth, Baron Kellner (completing at Macao); for New York, none.

At MANILA.—For London, Napoleon, Neptune; for Liverpool, Ogono, Trinidad; for Falmouth, Chalmers; for Hamburg, Voladora; for Pernambuco, Sir H. Parkes; for New York, Galatea, Melrose.

At SINGAPORE.—For London, Corneille David, Meg Merrilies; for Liverpool, Bella, Huntley Castle, Lochleven Castle.

At PENANG.—For London, Coleroon, Benvenue, D. Gungadhur.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—There is no vessel on the berth for either London or the United States; the rate quoted for the former port is £3 to £3 10s. per ton for Cotton and Tea; Silk, £4 to £4 10s.—to the latter, £2 10s. to £3.

The steamer Far East has been chartered by the Japanese to carry rice and stores at £3,000 per month.

At SHANGHAI.—Tonnage for London has been more inquired for, at £3 for favourite ships. The Anglo Saxon is accepting freight at £2 10s.

At FOOCHOW.—To London, £2 10s. per ton.

At HONG KONG and CANTON.—To London, £3 to £2 10s. per ton. To the northern ports tonnage is wanted, and paying rates may be obtained by suitable vessels. To Saigon, 30c. per picul is offered, and to Bangkok 45c., but vessels will not accept these rates. The circular of Geo. Holmes estimates the number of disengaged vessels in harbour (exclusive of Japanese) at 25, representing 15,564 tons.

At MANILA.—Vessels continued to arrive, and tonnage requirements not being large, the Sugar rate has slightly declined, the Neptune having accepted £2 15s. per ton for London direct. The following settlements have also been effected for London:—Napoleon, 1,000 tons wet Sugar at £3 5s.; 300 tons Hemp at £3 10s.; 1,000 quintals Tobacco at £3 15s. per 50 feet measurement. Neptune, 250 tons dry Sugar, £2 15s.; 1,100 bales Hemp at £3 10s.; 2,000 quintals Tobacco at £4 per 50 feet measurement; and for Liverpool, Ogono, Spanish, 350 tons dry Sugar at £3.

At SINGAPORE.—There is no apparent changes to note. Rates homeward remain firm at £3 10s. per ton all round.

At PENANG.—The Dewa Gungadhur, 596 tons, has a full cargo engaged, and the Coleroon, 804 tons, has 700 tons engaged for London. Both vessels get £3 5s. for tin, pepper, tapioca, and sugar, and £3 10s. for measurement.

VESSELS PASSED STRAITS OF SUNDA.

COMMERCIAL POSTSCRIPT.

The P. and O. Company have this day received information that the *Surat*, having on board the mails and passengers for India, China, and Australia, which left London on the 26th August and Sues on the 4th inst., grounded on a reef about ninety miles from the latter port at 2 A.M. on the 5th; operations are in progress for lightening the ship, and in the meantime the mails and passengers have been transferred to the *Nubia*, which vessel was to have left Suez at midnight on the 11th inst.

The Admiralty have invited tenders for the conveyance of 7 masts (16 to 48 feet long), 2 spars (25 feet long), 93 tons light and 4 tons heavy naval stores, &c., from the Thames to Trincomalee; also of 10 tons light and 8 tons heavy small arm ammunition, carriages, &c., from the Thames to Hong Kong.

ARRIVALS NOT IN THE TABLES.—Sept. 10, at Falmouth, from Akyab, Scindian; 9, off Falmouth, from Akyab, Rushing Water; Aug. 18, at Havana, from Manila, Jose Maria; 19, from Macao, Ariosto; Sept. 10, at Liverpool, from Akyab, Palmas; from Singapore, Mataura; 8, at Queenstown, from Rangoon, Wm. Carvill; Aug. 28, at New York, from Shanghai, Sea Witch; Sept. 11, at London, from Bassein, Thames; from Colombo, Spirit of the North; at Deal, from Manila, Dilkhoosh.

DEPARTURES.—Sept. 8, from Newport, for Galle, Charles, Hiawatha; 11, from London, for Batavia and Sourabaya, Couranto; 9, from Liverpool, for Shanghai, Emily Flinn; 10, Leon Crespo.

LAID ON.—At Liverpool: For Mauritius, Penang, Singapore, Hong Kong, and Shanghai, Ajax (str.); for Shanghai, Adriana Petronella, Magellan; for Singapore, Maraquita, Scawfell; for Manila, Abnegacion; for Onrust, Java, Macassar.

SPOKEN.—Vice-Admiral May, Amsterdam to Batavia, Sept. 2, 42 N. 11 W.; Jacoba, South Shields to Batavia, Aug. 28, 46 N. 7 W.; Cornelia Hendrika, Rotterdam to Batavia, Aug. 11, 6 S. 29 W.; Avon, Havana to Macao, Aug. 16, 7 N. 20 W.; Nieuland (barq.), for Sourabaya, Aug. 22, 41 N. 14 W.; Varuna, Sunderland to Singapore, Aug. 10, 13 N. 28 W.; Birch Grove, Canton to London, July 10, 35 S. 21 E.; Eugene and Adele, Marseilles to Hong Kong, Aug. 10, 12 N. 25 W.; Gatineau Meyer (?), Batavia to Rotterdam, Aug. 13, 19 N. 29 W.; Castleton, Liverpool to Japan, July 14, 6 N. 22 W.; Bogota, Liverpool to Singapore, Aug. 13, 18 N. 27 W.; Bahia (barque), Colombo to London, July 6, 32 S. 13 E.; Niphon, Batavia to Rotterdam, Aug. 24, 35 N. 37 W.; Loyola, Manila to London, Aug. 27, 32 N. 37 W.; a French brig, Singapore to Bordeaux, Aug. 29, 37 N. 37 W.

LONDON: THURSDAY, SEPT. 12, 1867.

THE REVISION OF THE CHINA TREATY.

As the time approaches for a revision of our treaty with China, public attention naturally turns to the possibility of carrying into effect such alterations and amendments as experience has shown to be desirable; and in making a tour of the open ports to collect information and receive opinions on the subject, Sir RUTHERFORD ALCOCK has taken the first step towards the fulfilment of an important duty. Many and various are the suggestions already put forth. A further modification of the tariff, permission to work coal mines and construct railways, liberty to navigate the inland waters, an improvement in the system of transit dues, and protection from Mandarin "squeezes," are some of them; and all that we have here enumerated are doubtless more or less feasible. Indeed, we have already blamed the British Minister for his want of zeal in endeavouring to secure a concession for the "China Railways Company" last year. Railways once introduced would soon become popular, the telegraph would follow as a matter of course, and the two combined would do far more towards developing the resources of the country than the opening of fifty new ports. The use of steamers on the lakes and rivers would have the same effect in a less degree, and (as has been ably pointed out by the *North China Herald*) neither would materially interfere with existing interests; for, as old methods of traffic are gradually superseded, new sources of industrial prosperity would be created. A change in the transit dues system is indeed urgently needed, for at present Article XXIII., which provides that imports or produce the property of British merchants may be conveyed to or from an inland market by payment of a single charge of not more than 2½ per cent. is practically a dead letter. Goods in charge of natives are not allowed the benefit of the clause, and experience has shown that the lives of foreign supercargoes so employed are not always safe. As for the "squeezes," we suppose they can never be entirely avoided; but some check upon them is absolutely necessary, and must be practicable, more especially at Amoy, where (as we recorded in a recent issue) the black mail levied on some descriptions of goods has actually reached ninety per cent. The importance of these things can hardly be exaggerated, and it is unfortunate that Sir RUTHERFORD ALCOCK, when they are urged upon him, seems to think it incumbent upon him rather to check than to encourage the enterprising spirit which manifests itself in a desire for such increased facilities.

But there is one concession that rumour says will be required in the revised treaty, the necessity of which we cannot endorse; we allude to the opening of a new port on the Yangtsze. By all means let us demand free ingress into the interior; let us strive to develop trade at the ports already open to us, by connecting them by railway and telegraph with the great inland marts; but until this has been accomplished, and the trade has been restored to a thoroughly sound and healthy state, *let us have no more ports opened*, either on the Yangtsze or elsewhere. There are too many of them already, and we are even prepared to assert, at the risk of provoking denunciations from many quarters, that the opening of the Yangtsze ports was a mistake from the beginning. We do not mean to impute any blame to the merchants who so strongly urged the measure on Lord ELGIN, nor to his Lordship for acceding to what doubtless seemed a not unreasonable requisition; but the experiment has undoubtedly resulted in a total failure, and we do most unhesitatingly condemn any attempt at a repetition of it. Look at what Shanghai was before Hankow was opened, and what it is now! *Then* Shanghai was a rising place; its trade was sound and profitable; property was valuable, but not extravagantly so; and the increasing prosperity of the port was the theme of general admiration. After the opening of Hankow came a brief period of unnatural inflation, and then one of rapid decadence—the course of which we need not trace, for its unhappy details are but too familiar to all our readers—ending in a total collapse. We have not a moment's hesitation in fixing on the opening of the Yangtsze ports as the primary cause of this disaster. Instead of creating a new trade, it only diverted into fresh channels that which already existed, and on which the prosperity of Shanghai depended. The enormous and costly establishments of the Shanghai merchants, their houses, godowns, and numerous assistants had still to be maintained, and (owing to the inflation we have alluded to) at a heavier expense than before; while the trade that these appliances were designed to carry on was actually being transacted elsewhere—and at what a cost! They had now either to sink large sums in founding branch establishments at Hankow, or to pay commissions and charges to agents there; to support a fleet of large steamers to keep up the communication, necessitating new wharves, more godowns, and a hundred other items of expenditure, all of which had, directly or indirectly, to be borne by the trade—and all this for what? To sell their imports at Hankow for much the same prices as they formerly fetched in Shanghai, and to buy tea there at prices averaging ten taels per picul more than had ever been paid before! The sudden access of a large steam traffic, the demand for land having water frontage for the building of wharves, and the general activity stimulated by the "opening up" of a new field for enterprise, combined to produce a delusive appearance of prosperity; but such a state of things could not last long without its inherent defects becoming manifest. The extra charges on produce bought at Hankow, the great cost of steam transit or towage, and the high additional rates of insurance, would all have been a heavy burden even if a saving had been effected in the first cost; but this was very far from being the case. New firms sprung up—new speculators appeared in the market, and an era of ruinous competition ensued, in which even old-established houses were drawn into the vortex, and contested the palm of superlative recklessness with those who had all to gain and nothing to lose in the struggle. The career of DENT and Co. in Shanghai is a grand and yet a terrible example. Ranking, but lately, as one of the two first and greatest houses in China; renowned for wealth and stability; esteemed for its liberality and public spirit—what has it now become? And, though "a triton among minnows," is it not a fair type of many others?

Had the decadence of Shanghai been balanced by an accession of prosperity to the river ports, there might be less cause for regret; but this is clearly not the case. Hankow is no better off than Shanghai. In fact, in a vast number of cases the same firms are equally interested in both ports, and yet have been promoting a destructive rivalry between the two; playing, as it were, a game between the right hand and the left, *but both losing*, for "a house divided against itself cannot stand." This brings us back to our original argument, that the true way to develop the trade is not to open new shipping ports, which will merely split it up into still smaller sections, but to endeavour to connect each existing port, by means of railways, with the principal inland cities near it. We will even go further, and suggest—in all humility—this question for consideration: The opening of Hankow and Kiukiang having proved a failure, would it not be an act of prudence to retire from them altogether? The first loss is sometimes the best, and Shanghai, where so much wealth has been sunk and such vast interests are at stake, would then have a better chance of being restored to its former position.

THE KING OF SIAM.

THE King of Siam having been much plagued by persons who have availed themselves of his known anxiety to obtain information as to foreign countries, to intrude their correspondence and their claims upon his attention, has published a "Notice," to the effect that very erroneous ideas exist as to his own power and opulence, and that there is a great disposition

Digitized by Google

to practise on his supposed credulity and vanity, in order to extort money or obtain favours. From the multitude of letters which are addressed to him by every mail he is led to suppose that an opinion prevails that his country is barbarous and that he is an easy victim to adventurers who flatter him with their compliments and their correspondence. He desires to be relieved from such importunities. Growing age and many family sorrows counsel him to withdraw from unnecessary cares. He states that whatever may be the opinion as to his authority the prices of the Siamese markets are regulated, as elsewhere, by the supply and demand, as are the rates of wages and the cost of work; that the collection of taxes is settled by his Ministry; that his supremacy is recognised by his nobility and people, protected by whose opinion he lives happily with his family; that it is not only by his personal authority that the country is ruled; but that the power of the Sovereign cannot be greater than that of the commonwealth of this country. His Majesty states that he is compelled to be silent in consequence of the numerous communications he receives, and to which it is impossible he could devote his time and attention; and he requests that foreigners will abstain from troubling him with unacceptable epistles. We are ourselves well aware of the manner in which aspirants for patronage have forced themselves upon the notice of the King of Siam, and perhaps they have been too much encouraged by the courtesy and urbanity of his Majesty. The following notification also betokens a great breach of etiquette, to say the least of it:—

BANGKOK, July 1, 1867.

The attention of the Government has been lately called to the abuses which have been introduced into some of the Consulates by the sale of protections to foreigners, especially to Chinamen, who have no claim whatever to the immunities which have been granted to the subjects of the Sovereigns or the States having treaties with Siam. These irregularities have we know been checked by the representatives of the Great Powers, who value the rights of citizenship too much to allow them to be disposed of and trafficked in by Consular authority; not only to the detriment of the Siamese revenue, but to the injury of those to whom alone the immunities have been by treaty accorded. It is reported that the Portuguese Consul has for a certain price paid to himself given to some hundreds of Chinamen certificates, as Portuguese subjects, of exemption from Siamese taxation, thus making his own irregularities a matter of profit to himself. In remote regions it is too often the case that, in the hope of escaping notice, which would assuredly bring with it the censure of the superior authorities, acts are sanctioned which are wholly unwarranted by international law, and which naturally create feelings of dislike and distrust towards foreigners, who forget the conditions under which they are allowed to trade and to locate themselves in other lands.

During the month of February, 1868, the Company for Promoting the opening of Mines in Netherlands India will sell, subject to the approval of Government, the concession for working coal mines in Banjoe-Wang, Borneo, together with the works erected by the company. Information on the subject may be obtained of Messrs. Van Heekeren and Co., of Amsterdam.

THE STRAITS GOVERNMENT.

(To the Editor of the *London and China Telegraph.*)

SIR,—We are always glad when you take notice of what is passing in this remote spot, and your article on the Straits Government, in your paper of 26th June, whilst correct as to general issue, is so faulty as to details that I trust you will allow me to state the true bearings of the case.

There is no doubt that the late Government did not seek to give British influence its due weight with the native chiefs, and consequently a vast deal of misrule exists in the peninsula, "The rajahs in which, it is notorious, are constantly at warfare with each other, and jeopardising, if not actually injuring, British property and interests."* Your remarks in this respect are both just and cogent, and merit the attention of our Government, but with respect to both Klang and Kessang you have been misled, and as what I shall now state is derived from undoubted authority, you may place full reliance on it, and I will make my narrative as concise as possible.

The Rajah of Klang, prime minister of the Sultan of Salangore, finding that he had been considerably defrauded by people who were collecting his revenues, proposed to some merchants of Singapore to farm them. This was approved by the Sultan, who set his seal to the contract. The arrangement was for two years from March, 1866. The immediate consequence was that proper persons were placed in various parts of the province to administer a rude but impartial justice, punish crime, and encourage trade. The revenues were derived from opium, spirits, and gambling farms, a tenth of the tin produced, and some other trifling items. The result of the experiment in the space of nine months was a large increase to the industrial population, the miners increasing from 3,000 to 7,500; a revenue doubled, without any complaint from the people; and an increased export of tin from 12,000 to 22,000 piculs, which would this year have probably exceeded 30,000 piculs but for the events which took place in January and February last. The success which had crowned the efforts of the farmers created much jealousy among the Salangore chiefs, and these were aided, underhand, by some of the Malacca Chinese, whose profits had been curtailed by the prevention of smuggling, &c. Towards the end of last year Rajah Mahlie, a nephew of the Sultan, having borrowed some money and purchased opium and other goods, come to Klang, and refused to pay any duties, whether on imports or exports. The matter was referred to the Sultan, who returned an evasive answer. About this time also, in a quarrel between the Bugis and Battu Baras (a tribe from Sumatra), one of the latter was killed, and this gave rise to a vendetta between the two races. Mahlie cunningly availed of this feud and intrigued with the latter, making them all sorts of promises. The tranquillity of the country was soon disturbed, but still no outbreak took place. On being informed of the state of affairs, one of the farmers left this for Klang to try and settle matters, and, on arrival, sent for all the various chiefs to consult as to the best steps to insure peace. The Sultan was also asked to assist. From the 11th February to the 1st March every attempt was made to ensure peace, but the Sultan, or the chiefs, or Mahlie, found some fresh cause for delay. Meanwhile the natives were becoming more and more excited, arms and ammunition freely circulated through the country, and finding that nothing could be done, it was resolved to leave them to their own "wicked devices." No sooner had the Europeans left, than a fight took place, and several of the combatants were killed and wounded. Since then the farmers have not attempted to interfere, except by representations to the Straits Authorities, and General Cavenagh was so fully sensible of the justice of these, that he recommended vigorous action to his successor. It subsequently became known that the Sultan of Salangore had all along given underhand assistance to Mahlie, and intrigued to prevent a peaceful settlement of the matters in dispute. The result of this treachery is, that nearly all the Chinese, numbering at one time nearly 8,000, have left the mines; the export of tin has fallen off to something very small, and it will take years before confidence can be restored and trade attain its former lead. The chiefs of the country (Klang) were all in favour of the system introduced by the farmers; they were paid monthly and regularly, and were better off than ever they had been. They are sorry for the change, but few have dared to oppose the Sultan. So much for that—now for Kessang. Many years ago, in the time of the Hon. E. Blundell, an offer was made to the Sultan of Johore to sell Kessang to the English, and the sum offered was $40,000, which was declined. The Kingdom of Johore having since been transferred by the English to the Tumongong (K.C.S.J.), the Sultan retired to Kessang, and having little or nothing to live on, he is undoubtedly hard up, and so, lately, it was endeavoured to seduce him with the sum of $10,000. This he declined, but I have good reason to believe that he would gladly accept $40,000, and it would be a cheap acquisition for us, and would probably repay itself in five years. By all means let the Government establish British influence, and annex where we can do so with justice, and without running violently counter to "rights established," private or public.—Your obedient servant,

FREE TRADE.

Singapore, August 1, 1867.

* An official report, dated 22nd June, 1867.

(To the Editor of the *London and China Telegraph.*)

DEAR SIR,—Your article upon "The Straits Government," just to hand in your issue of the 26th June, calls for a few remarks from some one on the spot who is in a position to prove that the late Government does not deserve the "supine" character you give it in the two cases you instance of its relations with the adjacent native States.

I have been at some pains to get at the exact facts of the cases you allude to, because, as it has been represented to you, it would appear that the late Government had studiously neglected to attend to the dissensions amongst the different petty rulers in the Malay peninsula, whereas, from some experience here, I have always found that to the extent of its power, which I grant was limited, the local Government was always ready to prevent "misery and suffering" amongst the natives, to protect British interests, and to prevent any injury whatever from being done to the trade and commerce of the settlements.

In the case of Klang, or rather Kallang, the facts are as follows:—

On the 16th of last March General Cavenagh, then on his way to Penang to meet the Calcutta mail, previous to his embarkation for Europe, touched at Malacca, where he received a deputation from some of the most respectable members of the Chinese community, who represented that in consequence of the dissensions between two petty native chiefs, Rajah Mah Ali (a relative of the Sultan of Salengore), and Rajah Dowlah, the chief entrusted with the charge of the district of Kallang (who had farmed the collection of the revenue to an English and a Chinese merchant conjointly). A large quantity of tin, British property, for which the duty had been only paid to the officers deputed by the Sultan to receive it, had been detained in the Kalling River, no other steamer being available. General Cavenagh at once determined to proceed in the *Pluto* to the scene of contention for the purpose of protecting British interests, and making himself personally acquainted with the circumstances of the case.

On the 17th of March the *Pluto* steamed up the Kallang River, and passed the stockades of the contending parties. It was found that Rajah Mah Ali had taken up a position below that occupied by the officers of Rajah Dowlah, and prevented any boats from passing down, whilst desultory fighting was being carried on between the two.

Rajah Mah Ali was at once informed that although the British Government had no wish to interfere with respect to the internal administration of the country, yet that the only ruler it would recognise was the Sultan of Salengore, with whom a treaty existed, and who was the acknowledged sovereign; and, as an intimation had been received from the Sultan of his having made over the charge of the district to him, he would not be allowed to obstruct British trade nor levy duties in addition to that already paid to the Sultan's nominee, consequently the blockade could not be permitted, and British subjects would be at liberty to remove their property under the protection of the steamer.

After the lapse of a sufficient interval to admit of the whole of the tin belonging to British subjects being placed on board country boats, these boats were taken in tow by the *Pluto*, and escorted down the river, past the stockades, and well out to sea, clear of all dangers; General Cavenagh then proceeded to the mouth of the Langat river, leading to the residence of the Sultan of Salengore, and late at night despatched a letter to the Sultan, reminding him of his treaty obligations, pointing out the unsatisfactory state of affairs in the Kallang river, and requiring him to take active measures to prevent any further interference with British subjects.

Digitized by Google

In the course of the morning of the 18th a verbal message was received from the Sultan to the effect that he was prevented by illness from coming off to the steamer to pay his respects, that the contents of the letter would receive due consideration, and he hoped soon to forward a satisfactory reply.

As the Sultan would have to consult his advisers, and possibly to enter into some negotiations with Rajah Mahali, his answer could hardly be expected to be received in time to allow any orders to be passed upon it during General Cavenagh's tenure of office. Nothing, therefore, could then be done, and General Cavenagh continued his voyage to Penang, at the same time, with the view of giving Colonel Ord, the present Governor, the benefit of his local experience, he immediately furnished him with a detailed report of his proceedings, and, to enable him to act upon the receipt of the Sultan's letter, pointed out that, if the Sultan recognised the authority of Rajah Mah Ali over Kallang, in supersession of Rajah Dowlah, then, under the terms of the treaty, he would himself be responsible for any unjust demands made by the former upon British subjects. If, on the contrary, the Sultan disowned Rajah Mah Ali, then the Rajah would be treated as a mere freebooter, and his stockade should be destroyed and the river opened, for which duty two armed steamers would be sufficient.

Although the Sultan's decision was known early in April, no decision was taken upon it until May. In the meanwhile, a blockade had been established at the mouth of the Kallang River by Rajah Dowlah, by means of an *English* steamer, the *John Bull*, engaged at Singapore. This steamer was ordered away, and a man-of-war sent up to enforce the order, but as the blockade was renewed by two native gunboats, matters may be said to have been left in *statu quo*.

The second case you mention is Kassang, but you are evidently alluding to the district of Moar, which is the property of the *quasi* Sultan Ali, of Johore, who, as you observe, is much in want of money, and is bound by treaty to give our own Government the refusal of it. But, in all fairness, how could you expect the late Government of India to make a large advance in the shape of cash down on account of possessions which were so soon to pass from its hands to the Colonial-office. There is no doubt that this case would have otherwise received attention, because, as you say, added to Malacca, it would be converted into a valuable province.

I should not have troubled you with these details but that I feel sure your sense of fairness would not have induced you to charge the Government of General Cavenagh as a "*laissez faire* system" had you had an opportunity as I had of observing the constant care and attention that he always devoted to everything that could in any way advance the interests of the Straits Settlements during his seven years, tenure of office.—I am, dear Sir, your obedient servant, FIAT JUSTITIA.

Singapore, Aug. 1st, 1867.

THE BRINDISI ROUTE.

It has been stated that the Italian Government have agreed to a contract with the Egyptian Azizieh Company for the conveyance of the Italian mails from Alexandria to Brindisi, Ancona, and Venice, for the sum of £50,000 per annum. We understand that negotiations have been entered on, but not approved by the directors. *The Times*, on the subject of the conveyance of the mails, &c., by this route, has the following comments, from which it will be seen that the French Government are not disposed to facilitate the present communications between France and Italy which retard the mails, &c., some twenty-four hours *en route* to Brindisi. *The Times*, while pointing out the eagerness with which merchants avail themselves of any faster route, loses sight, apparently, of the difference between a few mail bags as at present, and what the bulk would be if our postal authorities substituted Brindisi for Marseilles. The average number of bags and boxes by each mail to and from India, China, &c., carried by the P. and O. Company, amounts to no less than 700, measuring about 100 tons. Now the question is, whether it would be safe or practicable to convey such a vast and important quantity of correspondence over Mont Cenis by the railway which has just accomplished a trial trip, especially when we have lately had the experience of inundations washing away the road. We think it would be a capital mistake on the part of our Postmaster-General to abandon Marseilles for Brindisi, which has only a single line of rail. In the new contract the time from Alexandria to London will be considerably reduced in consequence of the steamers proceeding viâ the Straits of Messina, instead of calling at Malta. There is no reason, however, why we should not avail of the route, so long as the Italian Government maintain a line between Brindisi and Alexandria; but as we have before said, it should be treated as a light service, and subject to a higher scale of postage. It would be very unwise for our Government to give any subsidy for the line, seeing that it could not be trusted to supersede Marseilles.

The following is the article in *The Times*:—

Although the French and Italian authorities declined to accede to the arrangements recently suggested for the transmission of the Indian mail through Italy, an opinion seems to be gaining ground among the mercantile body that the natural force of commercial operations will before long compel the adoption of this route, especially under the influence exerted by the success of the Mont Cenis Summit Railway. In a statement lately transmitted by Mr. Semenza to the Italian Minister of Public Works it is pointed out that for letters, parcels, and travellers despatched from London, Brussels, and Amsterdam, to India *via* Brindisi, a gain of three days might be effected, and for those from Lyons and Genoa two days, besides other advantages, but that the heavy portion of the homeward mail will continue to be forwarded by the old route for a long time to come. This portion is chiefly composed of Indian, Chinese, and Japanese silk, both raw and manufactured, which the steamers of the Peninsular and Oriental Company and the French steamers carry from Alexandria to Marseilles, the former at the rate of 3,000 to 5,000, and the latter at the rate of 2,000 to 3,000 bales and packages per month. Neither, it is said, will the route be altered for those parcels of specie and costly merchandise which are now forwarded eastward from Southampton. The more convenient rate of freight by steamer than by rail will always in these cases secure an undisputed preference to that service. Thus, goods are transmitted from London to Alexandria, and *vice versa*, at a far less charge *via* Southampton than they would be *via* Brindisi, although the distance is considerably diminished in the latter instance; because by the Southampton route, out of a passage of 5,618 kilometres only 130 are performed by rail, whereas by the Brindisi route, much shorter as it is, there are no less than 2,000 kilometres by rail. As regards the lighter traffic, however, it is urged the saving of a day, even of an hour, is of such consequence in the competition of business as to render it certain that the slower line must always succumb to the more speedy one; and an illustration of this tendency is cited in the fact that the merchants who have a commercial connection with Asia are already receiving, *via* Trieste, a duplicate of the correspondence usually transmitted *via* Marseilles, as it often happens that the duplicate reaches London a few hours, in some instances a day, in advance of the original. To attain the desired acceleration *via* Brindisi, the following conditions are stated to be requisite:

"1st. That an arrangement should be entered upon with the French Post-office to the effect that the outward mail on reaching Paris at 7.30 A.M., should be promptly forwarded by express train to Susa, where it could arrive at 7 A.M. on the following day—namely, after a lapse of 23 hours 30 minutes. Under the present arrangement, after being unnecessarily detained 13 hours in Paris, the mail in question takes no less than 33 hours to go thence to Susa, while the corresponding journey from Susa to Paris, slowly as it is performed, takes only 28 hours.

"2nd. That the Italian railways should transmit the Indian mail as well as passengers from Susa to Brindisi, and *vice versa*, within a lapse of about 24 hours.

"3rd. That the journey from Brindisi to Alexandria should be performed in about 70 hours, which can be easily effected by employing steamers of a speed of 14 knots an hour."

THE MONT CENIS RAILWAY ON THE BRINDISI ROUTE.

In our notice last year of the Brindisi route we noticed the erection of a railway to supersede the old Diligence over the mountain between St. Michel and Susa. We noticed in our last that the first train had passed successfully over the ground, and we now give some further interesting details from *The Times*:—

The line of railway which has been in the course of construction for the last eighteen months over this pass, and which follows in the main the great road of the First Napoleon, was successfully traversed over its whole length of 48 miles by a locomotive engine. A train, composed of an engine and two carriages, left the St. Michel station at 6.30 A.M. There were present the Duke of Vallombrosa; Mr. Fell, the inventor of the system; Mr. Brogden, a director of the company; Mr. Brunlees, the engineer, and his assistant, Mr. Bell; Mr. Blake, the agent of the company; Mr. Alexander and Mr. Barnes, locomotive engineers; Signor Copello, chief engineer for the Modane section of the tunnel; Captain Beaumont, R.E., Mr. James Brogden, Mr. Jopling, Mr. Morris, and Captain Tyler, R.E., on the part of the British Government.

Mr. Fell's system consists of the application of a central double headed rail placed on its side in the middle of the way, and elevated about 14 inches above the ordinary rails. There are four horizontal driving wheels on the engine, under the control of the engine-driver, which can be made by pressure to grasp the central rail so as to utilise the whole power of the engine, and so enable it to work up incredible gradients without slipping. The carriages also have four horizontal wheels underneath, which, with the central rail, form a complete safety-guard. In addition to the ordinary break there are breaks upon the central rail. It would appear, therefore, impossible for the engine or carriage to leave the rails where the central one is laid.

The morning was admirably adapted for the trip, the sun shining with great brilliancy upon the Alpine peaks and the numerous glaciers which are visible in different parts of the route. After leaving the deep valley in which St. Michel is situated, the line passes by a gradient of 1 in 30 to the Pont de la Denise, where an iron bridge spans the River Arcq, near the site of that which was carried away by the inundations of last year. As the little train passed the village of Fourneau, the workmen of the grand tunnel of the Alps turned out *en masse*, and, as at all other parts of the route, they were observed stooping down, and even endangering their lives, for the purpose of inspecting the unusual mechanism of the engine for working on the central rail. The first very steep gradient of one in twelve was seen in passing Modane, and, foreshortened to the view, appeared on the approach as if impossible to surmount; but the engine, the second constructed on this system, had already proved equal to the task on the experimental line, and, clutching the central rail between its horizontal wheels, it glided quickly up under a pressure of steam not more than 80lb. to the square inch without apparent effort. The progress was purposely slow, because no engine or carriage had previously passed over the line, and also to give opportunity for examining the works. The damages to the road on which the line was chiefly laid were found to be substantially repaired by the French Government. The magnificent scenery around and the waterfall near Fort Sessaillon were much admired, as the sharp curves afforded different views while passing on the edges of the deep

Digitized by Google

ravines. The train entered Lanslebourg station under a triumphal arch, having accomplished twenty-four miles of distance, and attained an elevation of 2,100 feet above St. Michel.

From this point the zigzags of ascent commence, and the gradients over a distance of four miles were for the most part 1 in 12. Looking down from the train near the summit, as if from a balloon, four of the zigzags were visible at the same instant to a depth of 2,000 feet. The power of the engine was satisfactorily tested in this ascent, and the summit was reached under salvoes of artillery from an improvised battery, and amid the cheers of French and Italians who had gathered to welcome the English on the frontier. The engine again came to a stand under a triumphal arch, at an elevation of 6,700ft. above the sea. Flags of the three nations, and a silk flag specially presented by Signor Ginaoli to Mr. Fell, waved over a sumptuous breakfast, also provided by that gentleman. The hospice, the lake, and the plateau of the summit, surrounded by snow-clad peaks and glaciers, rising to an elevation of from 10,000ft. to 13,000ft. were passed, and the portion of the descent commenced from the Grand Croix. The railway here follows the old Napoleon road, which was abandoned long since for diligence traffic on account of the dangers from avalanche. Masonry-covered ways of extraordinary strength had here been specially provided for the railway.

The descent to Susa was a series of the sharpest curves and steepest gradients, on which the central rail had been continuously laid. The Valley of the Dora, with Susa and the convent of San Michel, and even the Superga above Turin, visible for thirty miles in the distance, presented a magnificent panorama, as the train wound through a clear atmosphere round the mountain side. The confidence of the party on a trip which would under ordinary circumstances have been so dangerous was manifested by their crowding round all parts of the engine, from which, under a feeling of the security afforded by the central rail, they thoroughly enjoyed the ever-changing scenes as they passed round the edges of the various precipices. Susa was entered amid the acclamations of multitudes of spectators, and the party adjourned to dine at the Hotel de France. Thus was completed a journey unexampled in its character both as respects the steepness of gradient, the elevation of the summit level, and the difficulty with which the curves and precipices were overcome.

BOARD OF TRADE RETURNS.

The Board of Trade returns for the month and seven months ended 31st July do not exhibit a progress commensurate with what might have been expected, taking the returns for the six months into consideration. The total value of the Exports from this country for the month of July amounts to £15,562,430, which is an increase of 4 per cent. upon the value for July, 1866, the return for that month being £14,957,834. The value of the Exports for the seven months presents a decrease, when compared with the corresponding period of last year, of 4 per cent., the figures showing the value for 1867 to have been £103,175,914, and for 1866, £107,815,664.

The Imports for the month of June show a total value of £20,054,958, and for June, 1866, £23,243,939, there being thus a decrease of £3,188,981, or 13 per cent. For the half-year ended 30th June last the value of the Imports into this country was £103,496,351, and for the corresponding period of last year, £115,274,651, showing a decrease for the present year of £11,778,300, or nearly 10 per cent.

The following is a summary of those figures relating to our Export and Import trade with China and the countries in the Far East:—

IMPORTS.

The total quantity of Raw Cotton imported during the month and seven months ended 31st July, and the value to the 30th June, are thus given:—

From	1865.	1866.	1867.	
	Quantity for the Month ended 31st July.			
China	46,043	13,496	—	cwts.
British India	275,454	509,942	318,883	,,
Egypt	134,448	70,729	81,848	,,
Total from all parts	585,209	1,075,244	748,898	,,
	Quantity for the Seven Months ended 31st July.			
China	256,928	13,496	4,707	cwts.
British India	1,411,296	2,888,141	1,257,869	,,
Egypt	904,319	690,267	784,679	,,
Total from all parts	3,694,062	7,932,986	6,396,104	,,
	Value for the Month ended 30th June.			
China	£21,767	—	£10,964	
British India	1,191,970	£2,670,660	£1,531,527	
Egypt	869,993	446,142	327,424	
Total from all parts	3,295,685	8,951,007	6,483,927	
	Value for the Six Months ended 30th June.			
China	£957,866	—	£20,965	
British India	5,880,04	£11,737,547	3,821,721	
Egypt	6,193,841	5,466,635	5,141,476	
Total from all parts	20,478,572	47,348,759	32,367,199	

The quantity and value of the Raw Coffee imported into the United Kingdom from British Possessions are thus shown:—

From	1865.	1866.	1867.	
	Quantity for the Month ended 31st July.			
Ceylon	3,350,253	6,049,254	9,024,366	lbs.
Other British Possessions	2,112,007	3,178,995	2,178,824	,,
	Quantity for the Seven Months ended 31st July.			
Ceylon	38,259,126	37,637,536	45,127,631	lbs.
Other British Possessions	9,125,492	7,458,111	6,658,506	,,
	Value for the Month ended 30th June.			
Ceylon	£264,456	£344,446	£380,990	
Other British Possessions	29,075	22,541	14,256	
	Value for the Six Months ended 30th June.			
Ceylon	£1,023,562	£1,003,138	£1,236,488	
Other British Possessions	219,994	138,540	134,450	

The following quantities were entered for Home Consumption:—

	1865.	1866.	1867.	
	In the Month ended 31st July.			
Ceylon	1,411,460	1,923,922	1,566,982	lbs.
Other British Possessions	541,683	375,339	369,493	,,
	In the Seven Months ended 31st July.			
Ceylon	11,424,405	13,536,134	12,415,598	lbs.
Other British Possessions	4,804,152	3,412,160	3,691,884	,,

Returns are given of the quantity and value of the Unrefined Sugar imported from Java and the Philippine Islands:—

	1865.	1866.	1867.	
	Quantity for the Month ended 31st July.			
Of 2nd quality	—	3,828	—	cwts
Of 3rd quality	26,628	859	—	,,
Of 4th do.	4,060	69,376	22,844	,,
Total, all qualities	30,688	74,063	22,844	,,
	Quantity for the Seven Months ended 31st July.			
Of 2nd quality	2,117	3,830	—	cwts.
Of 3rd do.	116,447	51,186	63	,,
Of 4th do.	334,961	208,153	174,238	,,
Total, all qualities	453,525	263,169	174,301	,,
	Value for the Month ended 30th June.			
Of 3rd quality	£36,689	—	—	
Of 4th do.	43,821	£23,470	£5,295	
Total, all qualities	80,510	23,470	5,295	
	Value for the Six Months ended 30th June.			
Of 2nd quality	£2,214	£3	—	
Of 3rd do.	88,864	46,612	£63	
Of 4th do.	324,220	117,507	123,326	
Total, all qualities	415,318	164,122	123,389	

The following were the quantities entered for Home Consumption:—

	1865.	1866.	1867.	
	In the Month ended 31st July.			
Of 2nd quality	886	—	—	cwts.
Of 3rd do.	6,995	5,537	511	,,
Of 4th do.	16,066	7,457	21,452	,,
Total, all qualities	23,947	12,994	21,963	,,
	In the Seven Months ended 31st July.			
Of 2nd quality	2,606	4	191	cwts
Of 3rd do.	117,294	32,296	65,828	,,
Of 4th do.	127,038	87,764	208,502	,,
Total, all qualities	246,938	120,064	274,521	,,

The Hemp imported from the Philippine Islands during the month and seven months presents the following figures:—

	1865.	1866.	1867.	
Quantity for the month ended 31st July	41,231	985	7,035	cwts.
Quantity for the seven months ended 31st July	145,562	26,312	49,598	,,
Value for the month ended 30th June	£22,475	—	£29,468	
Value for the six months ended 30th June	£149,177	£59,517	£108,497	

The following is a return of the total quantity of Raw Silk imported into the United Kingdom:—

From	1865.	1866.	1867.	
	Quantity for the Month ended 31st July.			
China	—	4,400	2,406	lbs.
British India	—	3,928	—	,,
*Egypt	214,046	150,589	242,184	,,
Other Countries	105,392	65,771	61,706	,,
Total	319,438	224,688	306,296	,,
	Quantity for the Seven Months ended 31st July.			
China	90,564	83,695	26,957	lbs.
British India	4,260	61,199	—	
*Egypt	1,971,732	1,604,624	2,039,224	,,
Other Countries	789,997	794,741	1,021,794	,,
Total	2,856,553	2,544,259	3,087,975	,,
	Value for the Month ended 30th June.			
China	£7,543	—	—	
*Egypt	73,311	£179,708	£212,181	
Other Countries	134,325	88,003	86,729	
Total	215,179	267,711	298,910	
	Value for the Six Months ended 30th June.			
China	£111,559	£92,608	£31,266	
British India	4,047	64,430	—	
*Egypt	2,116,268	1,686,975	2,306,787

Total	3,094,219	2,830,360	3,689,259	

* In transit from India, China, and Japan.

The total quantity of the several Imports named brought into this country from all parts during the month and seven months ended 31st July, and their value to the 30th

Digitized by Google

June of the years 1865, 1866, and 1867, together with the quantities entered for Home Consumption during the month and seven months ended 31st July are returned as follows :—

	1865.	1866.	1867.
Quantity for the Month ended 31st July.			
Coffee (lbs.)	14,052,141	13,200,875	16,020,078
Hemp (cwts.)	137,433	151,935	73,364
Thrown Silk (lbs.)	372	2 329	16,871
Tea (lbs.)	4,651,677	1,539,669	2,825,267
Unrefined Sugar (cwts.)	1,382,850	1,455,611	1,084,406
Quantity for the Seven Months ended 31st July.			
Coffee (lbs.)	61,410,355	58,788,530	69,661,425
Hemp (cwts.)	387,172	432,847	262,572
Thrown Silk (lbs.)	12,569	24,701	75,684
Tea (lbs.)	71,303,281	76,974,195	65,121,405
Unrefined Sugar (cwts.)	5,696,325	6,309,097	6,693,266
Value for the Month ended 30th June.			
Coffee	£393,190	£414,470	£511,338
Hemp	100,630	173,962	115,119
Thrown Silk	4,782	3,534	36,016
Tea	737,778	1,425,488	210,430
Unrefined Sugar	1,277,101	838,732	1,230,602
Value for the Six Months ended 30th June.			
Coffee	£1,546,062	£1,405,752	£1,693,829
Hemp	381,903	505,096	356,244
Thrown Silk	23,567	45,646	128,322
Tea	4,745,783	5,784,773	4,525,325
Unrefined Sugar	4,511,603	5,069,028	6,009,631
Entered for Home Consumption in the Month ended 31st July.			
Coffee (lbs.)	2,374,616	2,660,861	2,645,798
Tea (lbs.)	7,704,182	8,766,623	9,268,884
Unrefined Sugar (cwts.)	911,478	947,610	947,444
Entered for Home Consumption in the Seven Months ended 31st July.			
Coffee (lbs.)	17,850,292	18,493,686	18,867,039
Tea (lbs.)	57,134,055	58,807,548	62,502,711
Unrefined Sugar (cwts.)	5,976,510	5,796,417	6,704,419

The following were the quantities of the undermentioned articles remaining in the bonded warehouses of the United Kingdom on the 31st July, 1867, compared with the two previous years :—

	1865.	1866.	1867.
Coffee (lbs.)	26,499,736	34,078,900	38,676,415
Tea (lbs.)	101,092,945	97,720,786	84,729,842
Unrefined sugar (cwts.)	3,470,886	3,865,849	3,137,361

During the three months and six months ended 30th June of the present and two previous years the value of the merchandise imported into the United Kingdom from the undermentioned colonies and foreign countries was as follows :—

Imported from	1865.	1866.	1867.
For the Three Months ended 30th June.			
China (exclusive of H. Kong)	£3,067,951	£3,241,563	£1,332,053
Hong Kong	183,947	48,680	49,405
Japan	286,668	108,260	106,022
Singap. & Straits Settlements	451,682	440,629	332,210
Ceylon	807,955	868,047	1,115,921
Philippine Islands	306,641	202,214	251,205
Borneo	12,229	10,008	18,744
Siam	7,274	6,540	—
For the Six Months ended 30th June.			
China (exclusive of H. Kong)	£5,108,789	£5,554,151	£4,233,414
Hong Kong	499,608	96,576	138,290
Japan	415,510	180,748	197,132
Singap. & Straits Settlements	863,088	718,792	567,138
Ceylon	1,255,170	1,228,912	1,431,937
Philippine Islands	790,730	306,140	281,174
Borneo	19,842	10,008	27,970
Siam	9,372	7,929	—
Java	—	—	3,063

EXPORTS.

The Exports to China and Hong Kong during the month and seven months are returned as follows :—

	1865.	1866.	1867.
Quantity for the Month ended 31st July.			
Cotton yarn	3,840	388,080	833,900 lbs.
Cotton manufactures	12,910,816	16,191,591	13,138,302 yds.
Worsted stuffs	1,767,961	1,373,773	1,423,910 ,,
Woollen & worsted cloths	221,105	139,922	65,360 ,,
Lead	107	102	426 tons.
Quantity for the Seven Months ended 31st July.			
Cotton yarn	872,702	2,912,506	3,843,548 lbs.
Cotton manufactures	68,354,658	101,973,487	80,579,498 yds.
Worsted stuffs	10,008,406	12,276,389	14,706,474 ,,
Woollen & worsted cloths	1,015,499	1,097,659	822,975 ,,
Lead	1,037	4,185	1,804 tons
Value for the Month ended 31st July.			
Cotton Yarn	£708	£30,160	£61,493
Cotton manufactures	270,644	378,941	260,103
Worsted stuffs	135,795	85,705	88,382

Java	455,190	824,188	679,516
Siam	15,204	4,088	—

MANCHESTER MARKETS.

Prices continue in favour of buyers, and rather induce purchases. Quotations are :—Grey Shirtings, 7 lbs., 8s. to 8s. 3d. ; 8¼ lbs., 10s. 3d. to 10s. 6d.; Cotton Yarn, Nos. 16-24, 1s. 2d. to 1s. 3d. ; Nos. 28-32, 1s. 3d. to 1s. 4d. ; Maddapollams, 3s. 8d. ; Long Cloths, 9s. ; T-Cloths, 6s 1d.; White Spot Shirtings, 11s. ; Damasks, 20s.

The following is from the circular of Messrs. Jorss and Co., Leeds :—It is generally believed that we have passed the lowest point, and that during the ensuing months business will revive, as a demand is likely to spring up for the American, Continental, and home trade. The money market is very quiet. The supply of money continues large, and the rates of discount remain easy. The best bills are taken at 1¼ per cent. to 1⅝ per cent. The Wool trade does not present any new feature ; the business has been confined to meet pressing wants for a brief period. Prices are on the whole unchanged, though in a few instances rather in the seller's favour. Of Yarns small quantities were purchased, and a slight improvement in the demand manifested itself at old rates. The Piece market, like the other two branches of the trade, remains unchanged ; no orders have yet been given out by the home trade, but a fair business was done in the warehouses, buying from stock. The reports from America are more favourable, some orders for quick delivery were placed, but prices have not yet been influenced by the better prospects of the future.

PORT OF AMOY. CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful entrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c

Apply at the Offices of Messrs. PATERSON, SIMONS and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

PATENT IMPROVED ICE-MAKING MACHINES,

FOR THE
MANUFACTURE OF ICE ON A LARGE SCALE.
TEN TO TWENTY POUNDS OF ICE MADE AT THE COST OF ONE PENNY.

SINCE the first introduction of these Machines to public notice, the Manufacturers' long experience has enabled them to effect many important improvements, largely increasing their simplicity of management and solidity of construction.

The materials employed in the production of ice are used over and over again without appreciable loss. There is no danger attending the process.

A trial of each Machine to produce the quantity of ice stated is made when so desired by the purchaser.

Hospitals, Hotels, Barracks, or other Buildings may be cooled to any temperature.

These Machines produce from ten hundredweight to twelve tons per diem, and are numerously established in all parts of the world.

Her Majesty's Government of India employ this apparatus (see official report thereon).

The Peninsular and Oriental Steam Navigation Company possess SIEBE's large Machines at their principal Indian stations. Copies of reports upon the working of these Machines, and testimonials, will be sent on application.

SIEBE BROTHERS desire to say that an undertaking of this nature is not to be regarded as a mere speculation, but as the purchase of tried and valuable machinery, constituting a lucrative business, returning exceedingly large profits upon the amount invested.

For terms and other information apply to the Manufacturers, or to Messrs. SMITH, ELDER, and Co., 65, Cornhill.

SIEBE BROTHERS,

General Engineers, Coppersmiths, Manufacturers of all kinds of Air and Water Pumps, Diving Apparatus, Steam Engines, &c.,

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

Orders executed on receipt of 10 per cent. of the amount in cash, the balance being drawn for through a Banker.

HOLLOWAY'S OINTMENT and PILLS.—SCALD HEADS, INFLAMED NIPPLES, SORE BREASTS.—There is no medical preparation in the world that can be depended on so thoroughly in the treatment of the above ailments as Holloway's invaluable Ointment, and scarcely a day passes in which authentic testimonials to its extraordinary efficacy are not received from all parts of the globe. Nothing can be simpler or work more safely than the manner in which they are applied, or its action on the body both locally and constitutionally. The Ointment rubbed on the part afflicted enters the pores just as salt enters meat, and not only gets rid of the local evil but penetrates to the source of it, and drives it from the system.

DYSENTERY, CHOLERA. FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by th Vice-Chancellor

SUPERFINE PERFUMERY & TOILET SOAPS.

ED. PINAUD, CHEMIST-PERFUMER, Rue St. Martin, No. 298. **PARIS.**

ED. PINAUD, whose House we specially recommend, is distinguished by the strictly hygienic and tonic quality of his productions, and for this reason his articles are in high favour with the *beau monde*

HIS Establishment is the only one of its kind in which the recent Discoveries in Chemistry and the Arts have been put into practice. The proof is that ED. PINAUD obtained the Medal at the last London Exhibition.

The Productions of this House may be obtained at the Chief Perfumers in France and Abroad.

EMOLLIENT POMADE FOR PRESERVING AND BEAUTIFYING THE HAIR.

ELASTIC  BOOTS.

W. SPARKES HALL & CO. beg to call attention to their PANNUS CORIUM BOOTS which are peculiarly adapted for India or any warm climate. They have the appearance of leather, and are cleaned with ordinary Blacking, but the material is much softer than any leather ever introduced. Pannus Corium Boots are now coming into general use in India, and will be found a great luxury to Ladies and Gentlemen in any climate with tender feet.

Printed Circular, with full particulars of Prices, forwarded free to any part of the world.

W. SPARKES HALL & CO.,

BOOTMAKERS TO THE PRINCE AND PRINCESS OF WALES,

310, REGENT-STREET, LONDON.

N.B.—SELF-MEASUREMENT—Stand on a sheet of paper and mark round the outline of the foot. Take the size of the foot in the places marked in the above drawing.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painte

Each Cask of Pure White Zinc is stamped "HUBBUCK, LONDON, PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships, and Buildings exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to al the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard, and certain drier for White and Light Coloured Paint.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

PEACOCK AND BUCHAN'S COMPOSITIONS FOR KEEPING OFF BARNACLES, WEEDS, &c.

THIS is now established as the BEST and CHEAPEST known for protecting ships bottoms from galvanic action or fouling. It is used on the ships of the "Peninsular and Oriental," "Royal West India," "Panama and New Zealand," "Pacific Steam," and other Royal Mail Companies; also on foreign ships of war, and in H.M.'s Royal Dockyards. Apply to the Manufacturers direct, SOUTHAMPTON, or to their accredited Agents at all the seaports of the world.

Extract from the "Standard" of October 18th, 1866

"COMPOSITION FOR IRON SHIPS' BOTTOMS.—It appears that the iron turret ship 'Huascar,' on Captain Cowper Coles' plan, and fitted with his patent tripod masts, &c., belonging to the Chilian Government, before leaving England was coated on her bottom with Messrs. PEACOCK and BUCHAN'S last Improved Composition for protecting the plates and rivets, and keeping off shell fish, &c., and which has given such entire satisfaction that they, the said Government, have just ordered *five* tons of the material to be sent out to the Arsenal at Valparaiso for the use of their Iron Fleet in the Pacific. The Spanish Government have also ordered a considerable quantity of this composition for the use of their Iron Fleet."

Extract from the "Greenock Advertiser" of October 11th, 1866.

"ANTI-FOULING COMPOSITION.—The ship 'Ceres,' of Greenock, lately reached this port after a two years' voyage, and has been put into Dock to receive a fresh coating of Messrs. PEACOCK and BUCHAN'S (of Southampton) Patent Composition. The vessel was coated with it at London, in 1863, and sailed thence to Melbourne, Calcutta, Bombay, and Greenock, and on her arrival here the copper was quite clean and clear of barnacles, and has thus saved a very heavy per centage of wear and tear. We understand that the local agents, Messrs. Macallister and Fyfe, have received a letter from Captain M'Kenzie, of the "Hooyland," of Glasgow, stating that on his ship's return from a voyage to Surinam the copper, which had also been coated with this Cmposition, was perfectly clean"

STEAM ENGINES, SCREW AND PADDLE STEAMERS, &c.

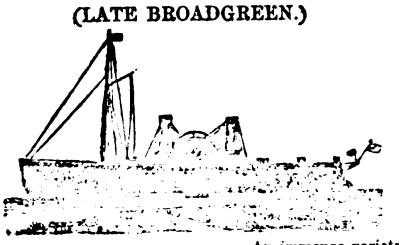
Elegant, Useful, and Instructive Presents

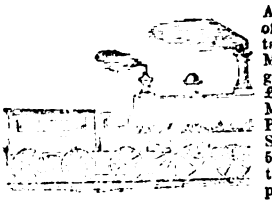
Catalogue free on application to

GEO. RICHARDSON & CO.,

Central Chambers, 17, South Castle-street, LIVERPOOL.

(LATE BROADGREEN.)





An immense variety of Vertical, Horizontal, Locomotive, and Marine Steam Engines from 6s. 6d. to £5 each. Metallic Model Screw and Paddle Steamers and Sailing yachts from 5s. to £20 each. All thoroughly tested previous to despatch.

TESTIMONIALS.

From LORD BROUGHAM.

I think very highly of your Telescope as a powerful Instrument, and am quite astonished at the very moderate price you have put upon it.

From D. CRIGHTON, Esq., Forfar, N.B.

I have thoroughly tested your £2 2s. Model Steam Engine, with which my boys are highly delighted, the material and workmanship are excellent, and being quite safe, I don't know of a more useful and instructive mechanical gift for young lads.

From the Hon. F. G. WYNNE.

The Hon. F. G. Wynne is highly pleased with the 17s. 6d. Vertical Engine; it is remarkably cheap, and well worth its price. He gives Mr. Richardson great credit for it.

From A. COURT, Esq., H.M.S. Cumberland.

Your Telescope and Microscope are both admirable and wonderfully cheap.

TELESCOPES.

The Lord Brougham Telescope.—This splendid Telescope will distinguish the time by a church clock five miles, a flagstaff ten miles, windows ten miles off, landscapes thirty miles off, and will define the satellites of Jupiter and the phases of Venus, &c. This extraordinary cheap and powerful glass is of the best make, and possesses Achromatic lenses, and is equal to a Telescope that costs £5. No Schoolboy or Tourist should be without one. Price 7s. 6d.; will be sent free by rail or post for 8s. 6d.

THE NEW MICROSCOPE.

This highly-finished Microscope is warranted to show the animalculæ in water, eels in paste, &c., magnifying several hundred times. The Microscope is mounted on a brass stand, and has a compound body with Achromatic Lenses, Test Objects, Forceps, and spare glasses for mounting objects, &c., &c. The whole contained in a highly polished mahogany case, price 7s. 6d., or will be sent carriage free (by rail) for 8s. 6d.

ILLUSTRATED CATALOGUE.

G. RICHARDSON and CO. have published a Catalogue of 80 pages, illustrated with 8 full page engravings of Steam Engines, 8 Lithographed Drawings, beautifully printed in colours, of Screw and Paddle Steamers and Sailing Yachts, and 12 Views of Magic Lanterns and Slides describing upwards of 1,500 Slides embracing every subject; also full particulars of Microscopes, Telescopes, &c., &c. G. R. and Co. earnestly invite every one to procure a copy, as it gives an extended view of the various articles which cannot be put into an advertisement. It will be sent free on receipt of ONE Stamp for postage.

P. O. Orders payable to George Richardson and Co. Liverpool; Cheques crossed Alliance Bank, Liverpool.

No. 22, Great St. Helen's, E.C.

Has a large portion of her cargo engaged, and will meet with quick despatch.

DIRECT for MANGALORE, Cannanore, Calicut, and Cochin, the fine, fast-sailing British ship, STAR OF THE MERSEY, A1, 254 tons register; E. THOMAS, Commander; London Docks. This magnificent clipper, built under special survey in 1863, is strongly recommended to shippers of fine and season goods.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To sail Sept. 14.

DIRECT FOR COLOMBO, the splendid Dundee clipper SEAFIELD, A1 10 years, 616 tons register; J. TOUGH, Commander; West India Docks. This magnificent vessel has just returned from Colombo, and from the good order in which she invariably delivers her cargoes offers the most favourable opportunity to shippers desirous of despatch.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

A regular trader. To follow the "Seafield."

DIRECT for COLOMBO, the splendid British-built ship, GRANVILLE, A1 15 years, 696 tons register; G. GALLICHAN, Commander; West India Docks. This magnificent high-classed vessel, well known in the Ceylon trade, offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Bebington," and will meet with the usual quick despatch.

FOR BOMBAY DIRECT, the fine British-built clipper-ship PEGASUS, A1 (owned by J. K. Welch, Esq., of London), 1,183 tons register, THOMAS CORNWALL, R.N.R., Commander, East India Docks. This splendid vessel, built in 1862, is noted for her fast-sailing qualities, is confidently recommended to shippers, and has a great portion of her cargo engaged.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Regular line of Packet Ship.

To follow the "Tweed."

FOR HONG KONG and WHAMPOA, the nearly new clipper-ship ALBERT VICTOR, A 1 13 years, 858 tons register, newly metalled; DAVID MUIR, Commander: lying in the East India Docks. This fine ship, built by Messrs. Steele, of Greenock, offers a favourable opportunity for shippers of fine goods at this season.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

With Quick Despatch.

FOR SHANGHAI, the splendid clipper ship, MAITLAND, A1 12 years, 799 tons register, WILLIAM COULSON, Commander; to load in the East India Docks. This vessel has proved herself to be equal to the fastest of the clippers; will be despatched in twenty days after arrival from Foo-Choo.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

COLOMBO DIRECT (to follow the "Thames"), the clipper PALESTINE, AA1, 608 tons register; T. PARK, Commander; loading in the West India Dock. Has unrivalled accommodation for passengers.

For Passage apply to W. H. TINDALL, 5, Tokenhouse-yard,; and for Freight or Passage to F. TALLACK, 23, Birchin-lane, E.C.

From Marseilles, October 5.—To Hong Kong, via Bombay: Mr. and Mrs. Hertmans. To Singapore: Mr. Pope Hennessey. To Yokohama: Mr. W. Strahan, Mr. L. Fletcher.

Per P. and O. steamer, from Southampton, October 4.—To Ceylon: Rev. C. Mersom Mr. Amyaud Elliot, Mrs. Scott.

From Marseilles, October 12.—To Ceylon: Viscount Downe, Earl of Gosford, Sir Samuel Hayes, Bart., Mr. J. Murdoch, Mr. and Mrs. Armitage. To Hong Kong: Mr. F. Porter.

Per P. and O. steamer, from Southampton, October 20.—To Ceylon: Mr. P. D. Millie, Mr. Blackston, Miss Gladding, Mr. C. W. Pardoe. To Hong Kong: Miss Caldwell, Dr. C. M. Jones. To Singapore: Mr. C. B. Twindale. To Penang: The Hon. C. C. Plunkett. To Yokohama: Mr. C. G. Dunlop. To Shanghai: Mrs. Lewis, Mrs Evans, Mr. Alfred Genth.

From Gibraltar: To Hong Kong: Miss Burton.

From Marseilles, October 28.—To Singapore: Mrs. R. Little and child, Mr. Greenshields, Mrs. Waterhouse. To Hong Kong: Mrs. J. Haffenden, Mr. T. Pyke, Mr. F. Rowett. To Yokohama: Dr. and Mrs. Jenkins. To Ceylon: Mr. W. N. Duckworth.

From Suez.—To Ceylon: Mrs. Bloomstrand, Miss Von Eberstein. To Penang: Mr. E. Fredericks. To Shanghai: Mr. J. Mackellar.

Per P. and O. steamer, from Southampton, Nov. 4.—To Ceylon: Mr. and Mrs. J. M. Vanderspar and four children, Mr. Malcolm, Miss Malcolm. To Singapore: Mr. and Mrs. J. McLachlan, Mrs. Dunman and two daughters, Mrs. Willans and two children, Miss Willans. To Yokohama: Capt. and Mrs. MacDonald, children and servant.

From Marseilles, Nov. 12.—To Ceylon: Mr. J. F. Dickson, Mr. and Mrs. Donman, Mr. W. E. Miller.

Per P. and O. steamer, from Marseilles, Nov. 28.—To Singapore: Mr. J. D., Mrs., and Miss J. Almeida, Miss Reneaud. To Hong Kong: Mr. Tait. To Ceylon: Mr. and Mrs. Gunter.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present mail brings our advices from this port down to the 27th July. The P. and O. steamer *Singapore*, which should have brought the London mail of May 26, arrived on the 16th, but without the mails, as the postmaster at Shanghai had put them on board the P.M.S.S. *Costa Rica*, which, going round by Nagasaki, was not in until the 20th—four days after the regular mail steamer *Singapore*. The P.M.S.S. *Colorado*, that was to leave San Francisco on the 3rd inst., was about due, and was anxiously expected. London telegrams extended to June 14. The following is from the *Japan Times*:—

"This incident ought to induce our countrymen here to join with the China merchants in petitioning Government to grant a proper subsidy to the P. and O. Company. The directors' last report shows how the competition of the Messageries Imperiales has diminished their profits, and they will soon cease running steamers for nothing or less, and then a trade which brings in seven millions sterling to the English treasury in duties, and seventy times seven millions in value to the English trade returns, will be dependent for the intelligence which is its life on French or American post-offices and mail packets. Is it not strange that, at the very time when the American Government—recognising the evil done to its commerce by English shipowners having taken from American much of their carrying trade—should be doing everything in its power to encourage and foster their merchant service, our own should not only refuse extension of subsidies to such an enterprising and important company as the Peninsular and Oriental, but absolutely proposes reduction?"

Our account of the recent political crisis at Osaka (says the *Times*) is confirmed in all material points from various sources. The Gorojiu's proclamations which we published last mail indicated, as we observed, a tendency on the part of the Shiogoon to admit the Daimios to share in the foreign trade. Proclamations by the Mikado, issued about three weeks since from Miako, ratify the Shiogoon's late arrangements with the foreign Ministers, and order the cessation of hostilities against Chiosiu. The authenticity of our information is now, we think, set beyond a doubt.

Digitized by Google

However, it may be now accepted as certain that there has been a serious *emeute* at Osaka, apparently only prevented from assuming the proportions of a revolution by the good temper and statesmanlike exertions of the Shiogoon and four old Daimios. We are sorry that we cannot yet assure our readers in Europe that the vexed question of the Daimios' claims is altogether set at rest. But it is much to have settled the Chiosiu difficulty, and we may rely with some degree of confidence on other points of difference being adjusted as amicably. The trade with foreigners can no longer be confined to the Kuanto—the eight provinces immediately under the rule of the Shiogoon—and kept up, as now, almost as a monopoly for his benefit. The foreign Ministers see this, the Shiogoon himself is awake to the fact, and, most important of all, the Daimios are convinced of it, and ready to use "the last argument of princes," if need be, to gain their ends. We can but conclude that their just demands will be very soon conceded, and then, but not till then, will become possible the realisation of those golden dreams of a rich and enormous trade with this country which have floated before the eyes of every traveller since the days of Antonio Mota and Francisco Zeimoto.

The *Japan Times* gives the following account of the gross fraud practised on the Japanese Government by certain United States citizens:—"Four years ago America] was represented, most unworthily, by General Robert H. Pruyn. Accustomed as the Japanese had been to the fair dealing and honourable conduct of his predecessor, Mr. Harris, the Government gave Mr. Pruyn credit for the same qualities—and for three ships of war to boot. They paid him, in 1863, $637,000 in clean Mexicans, and early in 1866 arrived one of the two smaller vessels bargained for—the *Fusiyama*. The Japanese were much disappointed with their purchase, averring that she was not sufficiently strong for a vessel of war, that her machinery and armament were by no means what they expected, and that she was, altogether, "a clock that wouldn't figger." Our readers may remember an incident, related in our chronicle of the war in the Inland Sea, which would seem to justisfy the native estimate of the *Fusiyama*. A little double screw steam yacht of eighty tons, the *Otentosama*, armed with Blakeley steel guns, which had been sold to Chiosiu, ran up alongside the *Fusiyama* in Shimonoseki Straits, fired her diminutive broadside into her—spun round and gave her the other and passed on without the Shiogoon's ship returning a shot. She was in fact, a hopelessly bad bargain. After waiting in vain for a long time for their ships or the balance of their money, the native Government, advised what course to pursue in New York by an American house of high standing in Yokohama, and accredited to Messrs. Low Brothers, sent an Embassy whose appearance has created, according to the *New York Herald*, no little surprise and much conjecture as to its object. Meanwhile Mr. Pruyn and his partners, to use no harsher word—Mr. Thurlow Weed and Mr. R. L. Lansing—had the use of the $637,000 or the bulk of it—an enormous sum in United States currency, all through the war. When Mr. Pruyn left Japan to exercise his talents in a larger sphere, he "ran" for the office of Lieut.-governor of New York (which for the credit of the city we may state he did not obtain), and it was not supposed at the time that his election expenses, which, from undiscovered causes were singularly heavy, had been saved out of the modest salary which the United States allows its Minister in far Japan. After the Japanese had been presented to the President, the *Herald*, we observe from the issues of the 3rd and 5th of May, obtained the necessary information, and having called attention to the visit of the Embassy by stating, with grave humour, that England had requested the Shiogoon's mediation in the matter of the *Alabama* claims, exposed the whole of this most nefarious transaction, and called emphatically for strict and searching inquiry, pointing out with great truth how much the better policy is honesty, and how American interests must suffer from such deception, which had driven the Japanese Government to France and Holland to be better served. The discomfiture of Mr. Pruyn and his friends will follow of course, for the facts and figures are known and are in good hands, and thus 'the whirligig of time, brings about its revenges."

We turn with cordial pleasure to the record of worthier work by an American of a different stamp. Our story of the events of the past fortnight would indeed be incomplete without honourable mention of a dictionary of Japanese and English, just given to the world by Dr. J. C. Hepburn, of the American Presbyterian Mission to China and Japan. We hope to be able, in our next, to review this valuable work; meanwhile a few words upon it here will not be out of place. Dr. Hepburn has dedicated some years of his life expressly to the study of the Japanese language with a view to translate the Scriptures into that tongue. There may be many who regret that Dr. Hepburn's time, for much of the rest of his life, should be dedicated to what the experience of a century has shown us to be a hopeless task—the attempt to alienate the sensuous and imaginative Oriental from his own gorgeous and outwardly attractive religion, and to induce the adoption of our pure and simple faith. But his labour has produced already a noble fruit in the book we have just received, and if he does no more, he may be well content that he should have associated his name with so useful and so enduring a monument to his toil.

We alluded in our last (says the *Times*) to the bankruptcy of Messrs. Hansard and Black, and commented on the impropriety of hurrying on the sale of the *Japan Herald*, without giving bidders in China and elsewhere an opportunity of competing for that valuable property, stated, on the authority of the official assignee, to be working at a clear profit of $12,000 per annum. Mr. P. B. Walsh, of the English Consulate, who officiates in that capacity, afterwards postponed the sale till the 1st of August. This is simply, as we have pointed out in the *Japan Times*, paltering with the creditors and the late Mr. Hansard's heirs. The sale, up to the present date, could not legally have taken place, for no statement of the bankrupts' accounts has yet been laid before their creditors, and, judging from the time which has been consumed in making them up since the date of the bankruptcy—June 21st—it is presumable that they will require rather a sifting examination before they are passed. That interests of such magnitude—for the liabilities are very much larger than could possibly be expected—should be jeopardised thus by an amateur assignee, is a very strong argument in favour of the change which we shall not cease to advocate until we see it accomplished—the substitution, for the imbecile system of Consular jurisdiction, of a properly qualified Court in Japan. Here is an income of $12,000 a year offered for sale at a few days' notice to certainly not more than three local bidders, in a place where capital is by no means plentiful—offered without any advertisement in China or America, whence bidders might reasonably be looked for—and offered, moreover, before the bankrupts' accounts are made up, accounts apparently so confused that it is by no means impossible that the bankruptcy might prove to be only a temporary suspension.

Another case of some interest has been the subject of consular jurisdiction during the fortnight, in which Mr. Robert Brett, late of the Chartered Mercantile and Hong Kong and Shanghai Banks, moved that the former institution should be restrained from appropriating certain moneys of his, deposited as security for his good conduct while in the bank's employ as manager, until the rightful owner thereof should be ascertained. An injunction was granted, but though the case was of importance—other interests than Mr. Brett's being involved—we give no report of it in full, as it must be tried over again when whoever thinks himself the rightful owner asks for the money.

A report has been received to the effect that the remains of a ship, supposed to be the *Camilla*, have been found on a reef on the west coast. The *Salamis* has gone out to verify the statement. The *Camilla*, it will be remembered, was the last of those brigs known in H.M.'s service as "coffin brigs," and was lost in 1861.

Sir Harry Parkes has left Yokohama for Hakodadi in the *Basilisk*. He will, it is believed, meet Admiral Keppel in the *Salamis* and Captain Bullock in the *Serpent*, at Hakodadi, and thence proceed in company to examine the harbours on the west coast recently surveyed. Lady Parkes remains in Yokohama.

Mr. Abel A. J. Gower, recently promoted from the Hakodadi Consulate to that of Nagasaki, arrived here on the 24th inst. on his way to Europe on leave before taking up his new appointment. Mr. Marcus O. Flowers acts for him at Nagasaki till his return, and then goes on to Hakodadi as Consul at the northern port, where Mr. Eusden at present fills the post as Acting Consul. The retirement of Captain Howard Vyse from the service is the immediate cause of these changes, and others are expected on the opening of Osaka.

On the 25th July (says the *Japan Herald*) took place an

Digitized by Google

event that may rank among political affairs, inasmuch as it arose out of recent diplomatic agreements with the Japanese Government, and is opening a door that has hitherto been strictly closed by the Japanese. Europeans residences are no longer confined to the limits of the settlement, but no less than 125,000 tsuboes (36 sq. ft.—1st.) of land on the hills to the east of Yokohama were offered by the Japanese Government for sale to foreigners at an upset price of 25 cents per tsubo, bearing an annual rental of $12 per 100 tsuboes; the greater part found purchasers, in spite of the high rental, at prices varying from 26 cents to $1 per tsubo. In the course of a few months we may expect to see suburban villas all over the bluff, and the beauty and healthfulness of Yokohama will be greatly enhanced.

NAGASAKI.

We hear from Nagasaki that there is considerable excitement in that port consequent on the arrest of a large number of native Christians, report says several hundred in number. There is no doubt some exaggeration in the accounts that have reached us, both as regards the severity of the Japanese authorities towards its dissenting subjects, and as to the number of Christians who are subject to this new persecution. These are not recent converts, but descendants of the Christians of the 17th century. In view of the intimate relations that subsist between the Government of the Tycoon and the French Defender of the Faith, this conduct on the part of the Nagasaki officials is not a little remarkable.

A correspondent gives the following, under date July 19:—"There is likely to be some trouble here in consequence of a number of villagers having petitioned the Government to allow them to embrace the Roman Catholic religion. This has given great offence to the Japanese officials, who have arrested and imprisoned some sixty to seventy people. For the last six days the officers with a body of soldiers have been searching for those suspected of being of foreign religion, who, when found, were carried off to prison. Thus the native town has been in a great state of excitement for several days. I hope it will not lead to some foreigner being cut down by a Japanese fanatic when arresting those who signed the petition. A French priest dressed as a Japanese was discovered preaching. Him the soldiers carefully avoided, well knowing he was intentionally in the way, and would for his cause sake suffer himself to be cut down, so as to be vaunted amongst the holy army of martyrs. He, however, was so alarmed he did not come home for one night, but slept on the mountain, thus making fine capital for his religion. So high was the fear of being suspected as of the proscribed religion, that Mr. Lindau could not prevail upon any of his Japanese coolies to carry two bags of rice he gave as a present for the relief of some poor children living in the vicinity of the Roman Catholic Chapel. Doubtless, this trouble has been courted by the priests so as to bring the French Consul to take the matter up. A few French men-of-war may be expected here shortly, and an explanation or satisfaction demanded. If not given, or if there should be undue hesitation, then threatenings, and probably a suspension of trade for a few months, all for what? for nothing but to satisfy the religious vanity of some half-a-dozen useless, lazy, priests—ever mischief making."

CHINA.

PEKING.

The *Recorder* publishes the following items from Peking:—Instructions have been issued from Peking to the provincial authorities for the raising of a loan of one million taels, of which 100,000 taels is said to be for the purpose of supplying rice to the people, in view of the famine which is anticipated in consequence of the severe drought. Li, Footai of this province, has been called upon to contribute no less than taels 30,000 to 40,000, and this is to be raised out of the taxes upon trade, so that we may look to additional imposts being placed upon foreign commerce, both locally and also in the form of transit dues. The utter absurdity of the stipulations in the Treaty as so duties could not be more clearly shown, seeing that here is an order emanating not from the local authorities, but from Peking, which directly sanctions duties in addition to those stipulated for.

We hear that the Chinese officials at Peking have expressed some curiosity concerning Mr. Wade's prolonged stay at Shanghai, and are disinclined to attribute it simply to a desire to bring out the Tsu Erh Chi. They surmise that he is engaged in matters connected with the revision of the Treaty; and, we are told, are endeavouring to obtain some information on the subject by giving instructions that his movements be watched. It would seem that there is a regular system of espionage adopted in reference to foreign officials of importance; and if we may judge from the accurate manner in which the natives obtain particulars of all commercial matters, we may conclude that they contrive to keep themselves pretty well *au-fait* as to the diplomatic movements and intentions of our officials.

The following is from a correspondent who is accompanying the Imperial forces:—"As far as I can ascertain Li Futai has got the rebels in a nice fix in the Shantung province, where the main body of them is now assembled near some seaport. In order to prevent them from escaping, Li is sending two columns to guard the main roads; and to prevent them from taking a seaport he has sent despatches to Tsen-kwo-fan, at Nanking, to guard the seaports of the Shantung province. Li Futai would have pushed the rebels more, but he is awaiting orders from Peking. The country people, however, are very much afraid of Li Futai, and are quite astonished to see him with so many foreigners attached to his army. The country around here is also more cultivated than in Honan, the latter being a perfect desert. Nganhwny is also very fertile'; plenty of tobacco is grown there. Li Futai has commanded his generals to build a line of fortifications 1,000 to 1,800 li long, so as to keep the rebels in the Shantung province, and as soon as these breast-works are finished he will inspect them personally, and then begin to fight the rebels in this small compass."

TIENTSIN.

A letter from this port, dated July 20, says:—

"The long expected wet weather has not yet appeared, and this region is in consequence suffering dreadfully from drought. On the 13th inst. we had a heavy thunderstorm with rain at Tientsin, but 48 hours later clouds of dust were flying along the Takoo-road, proving how little influence the shower had had on the ground. On the 15th instant the *Peking Gazette* informed its readers that the Emperor would visit the temple to pray for rain. His Majesty has bestowed half a month's extra pay on the Manchows in Peking, owing to the dearness of food through the drought.

"Large bodies of mounted rebels are roaming over this province. On the 16th instant they attacked the distict of Jinkew, and robbed and plundered the rich people, besides killing some sixty or seventy people said to be officials. Since then the Governor-General has placed 300 soldiers at Kaou-yang district to protect it against any attack by the rebels, and to keep them back from Peking. These rebels appear to go about in bodies of 800 or 1,000 strong, and being all mounted, keep moving over an extensive tract of country. I hear that on the rebels appearing in Anping district, the four gates of the provincial city of this province called Paouting-foo were closed for over thirty hours, and were not opened till four mandarins had been appointed to guard them and search the people entering the city to find rebel spies. At Anping the Imperialists had a fight with a body of mounted rebels, and according to Yamen, *i.e.* imperial, reports, slaughtered over 400 and caused the rest to fly to the westward. All these reports show a very unsettled state of things as existing even in this province, so well provided with Imperial forces; and I fear the country is disturbed by rebels and starving people in Shansc and Shense. Business in imports is completely stagnant so far as the Shanse traders are concerned. In fact there are now scarcely any Shanse traders in Tientsin, they having nearly all left for their homes, seeing no prospect of doing any business profitably in consequence of the famine and rebels. A local dealer has been buying some grey shirtings for the Peking market at taels 2.70 to taels 2.73, but the quantity has been trifling. Otherwise I do not hear of any operations in other manufactures.

"Just at noon, on the 17th instant, Tientsin was thrown into considerable alarm by the explosion of a quantity of powder stored at the parade ground store, outside the West Gate of the city. Even at Tszechuhlin, where the foreign community reside, three miles from where the powder exploded, the concussion was so severe that the venetians of the windows of my house were thrown open. It has since been stated that some 94 persons were killed and injured by the explosion, and that some 300 packages of gunpowder had been exploded. It appears a fire burst out in a building adjoining the depot, which communicated with the powder store in a few minutes, and caused the explosion."

HANKOW.

A correspondent of the Shanghai *Recorder* says:—"The tea

Digitized by Google

season has come to a somewhat premature termination, and might be said to be at its last ebb. Some few small parcels have been settled for cash, but no settlements of any consequence have taken place for some time,—in fact the native dealers are so preposterous in their demands that the foreign merchants cannot be prevailed upon by the middlemen to purchase. Some fourteen or fifteen packages of Russian teas have been settled, and are being shipped off by the *Rona*. Business still remains in *statu quo*, as when last I wrote to you ; little or nothing doing.

"The excitement caused by Mackellar and Co.'s failure has all but subsided, and the affair is now spoken of only as a 'nine days' wonder,' and almost forgotten—except by the teamen, who are still clamorous not to close any sales but for cash payments. Notwithstanding the quantity of tea that is constantly arriving from up country they still hold out, and prefer storing their produce to trading with foreigners on a more liberal basis.

"A large quantity of tea has been stored in foreign godowns, and the teamen have got advances on it from the banks. This I am very glad to see, as it will no doubt have a tendency to bring about a new state of things, for when their bills fall due they will be sure to sell at a much lower figure than the foreign merchants are now willing to pay rather than not take up their drafts. The present state of things cannot last, and I am in hopes in a very short time to see a reaction in business. The green tea season will open in about three weeks ; perhaps this will bring them to their senses, and all future settlements, I have no doubt, will prove more remunerative than those for some years past.'

A meeting of the Chamber of Commerce has been held, at which it was proposed that cash payments should in future be insisted on in sales of imports to Chinese, but the resolution was negatived on the principle that its tendency would be to throw business still more into the hands of native merchants. Resolutions condemnatory of the Taotai in issuing the proclamations he has done subsequently to Messrs. Mackellar and Gordon's failure were proposed and adopted. The British, United States, and French Consuls have written replies to a letter from the Hankow Chamber of Commerce, unanimously condemning the action of the Taotai. The letters are characteristic of the nations from whose representatives they respectively emanate. The British Consul says nothing as to his intended line of action ; the French Consul states generally that the Chamber may rely on his support in this as in all cases when redress of grievances has to be obtained ; while the United States Consul states without reservation that he will take measures in concert with his colleagues to show his Excellency Wang that his ground is absolutely untenable.

We learn from Hankow that "the chief of the Mahommedan rebels in Yunan has proclaimed himself Emperor, under the title of Tsin-lin."

SHANGHAI.

The present mail brings Shanghai dates to August 6. The French mail of June 19 arrived out on the 31st of July, with London telegrams to July 6. The following items of news are from the *North China Herald*:—

A meeting of the Volunteer Corps has been held, at which its finances were shown to be 300 taels to the bad. It was resolved to sell sufficient rifles to cover this deficit, and to call another meeting in September, to decide on any further measures in respect to the corps.

We are glad to learn that the last year's working of the Kiachta line has been sufficiently remunerative to enable Mr. Grant to repay the old shareholders the first instalment of their capital at the time fixed.

A special proclamation from Peking has recently been issued by the Che-hsien of Shanghai, and by the Chinese authorities of places near the means of water communication, to the effect that, on account of the scarcity of provisions occasioned by the protracted drought in the North, no duties will be levied upon rice sent by Chinese merchants to Tientsin and the northern ports.

The East India Telegraph Company appears to have deferred for the present its scheme of introducing telegraphs into China, convinced of the difficulties attending the task. By the last mail the directors announced this fact to their commissioner in China, saying however that they hoped to resume their relations with him at no very remote period. "A due regard," they add, "for the economical administration of the affairs of the company, for the change in their plans of laying down cables first, and the evidence you furnish that nothing can be done at present in China to promote the original plans of land lines, either by obtaining concessions or in securing a part of the capital necessary, all being taken into careful consideration, have determined the company on this line of action."

The barque *Zodiac*, bound to this port from Newchwang with a cargo of beancake, got on shore on the North bank, on her way up the river with a Chinese pilot on board. She has since been got off, but had to be towed up to Shanghai and beached on the Pootung side, to prevent her sinking.

Everyone has known for some time that the Church finances were embarrassed, but very few are aware of their complete exhaustion. It was known that sufficient funds did not remain to complete the building according to the design, but no one anticipated the deadlock which has actually come to pass. No one thought, when the foundation-stone was laid twelve months ago, with such elaborate ceremony, that the walls would be stopped half way. Yet such, we believe, is the present position of affairs ; every dollar is expended, the contractor is barely paid for work done, and the church is little more than half finished. 12,000 taels are required to enable even a temporary roof to be put on the building, besides some 3,000 taels for extra charges, and 26,000 taels are wanted to enable its perfect completion according to the design. Two schemes have, in this emergency, suggested themselves—the raising a loan, or the sale of a slice of land sufficient to raise the required sum. Tentative negociations have, we are told, been entered into for a sale of land, and a *quasi* promise of advancing the necessary funds on mortgage, has been received. It will be well that the matter should be fully discussed, and the difficulty thoroughly appreciated, before a final expression of opinion is asked from the community as to the course to be pursued. The plans first received from Mr. Gilbert Scott involved an outlay of tls. 90,000 ; and a resolution for their adoption and for the commencement of the work, was actually passed at a meeting of subscribers held in February, 1865. At that time, too, the trustees had only 25,000 taels in hand ; and it is characteristic of the sanguine disposition which then pervaded Shanghai that a proviso attached to the resolution, that an additional 20,000 taels should be collected before the building was commenced was thought a comparatively trifling restriction. Fortunately, a technical objection led to delay, after which a more sober view was taken. Gilbert Scott's plans had been much altered by Mr. Kidner, and in deference to a prevailing wish the trustees sent them for his approval before acting on them. The delay involved in this reference enabled a clearer perception of the Church's monetary prospects to be arrived at. And, twelve months later, when a new meeting was called to hear Mr. Scott's approval of the alterations, this feeling had so far grown that a reduction of tls. 30,000 was made in the estimates, by the substitution of a wooden for a vaulted brick roof, of brick for granite arches, and by the abandonment of a spire. These amended plans, the trustees were authorised to commence carrying out with tls. 30,000 only, of the tls. 60,000 needed, in hand. The present dead-lock is a result of this reliance on the future. The impecuniosity, however, from which Shanghai has lately been suffering, was then only beginning to be felt, and the collection of even tls. 30,000 did not seem a hopeless task.

Considerable excitement has been caused in the settlement owing to the deaths of two Europeans by hydrophobia. Both of them were bitten some time since. The Municipal Council have since taken steps to suppress the great number of dogs which are always to be found loose in the streets. A notice has been issued saying that all dogs found unmuzzled in the streets would be taken by the police, and if not owned within forty-eight hours, would be destroyed. The French Municipal Council has been invited to take joint action in the matter.

Two lots of land with houses thereon, situate between the Tientsin and Ningpo roads have been sold. The one containing about three mow seven fun, for taels 10,500, and the other of about two mow brought taels 4,000.

The P. and O. steamship *Malacca* ran down the British barque *Tientsin* from Penang, near Woosung. The barque was in tow of *Titan*. In attempting to cross each other's bows, the *Malacca* struck her amidships and sank her instantly. The *Titan* narrowly escaped being dragged down with her. No lives were lost,

An officer of the United States ship *Supply* was seen to quit the shore a few nights ago in a sampan for that vessel. As he

Digitized by Google

has not since been heard of, it is probable that he fell overboard and was drowned; no boatman can be found who is willing to admit any knowledge of the circumstance. At Hong Kong, where those boats have several hands each, a case of this kind would give rise to a suspicion of foul play, but no Shanghai laudah, nor even a couple of them, could very well manage to cast a foreigner overboard.

Messrs. Oppert, Scharfenort and Co. have declared themselves insolvent before the Prussian Consul, and the Agra Bank made an application to set aside the adjudication in bankruptcy of Messrs. Dent and Co. The rule was refused.

FOOCHOW.

A meeting has been held at Foochow to consider certain modifications that may be deemed necessary when the Tientsin treaty is revised; but very little interest seems to have been shown. Twelve persons only were present, and elected four of their number to consider the subject, and draw up a report.

The wreck of the *Taewan* has been sold for $1,700.

HONG KONG.

Our advices from this port are to the 12th August. The English mail of June 26th was delivered on the 2nd Aug. with telegrams to July 13th. The *Norna* (extra steamer from Bombay) subsequently arrived with telegraphic dates from India to the 19th July. The following items of news are from the *Overland China Mail* :—

Much discussion has continued on the subject of licensing gambling in Hong Kong. There is no public announcement of any change in the proposed policy of adding to the revenue of the colony by the sums to be paid for licences.

The twelve Chinese who, by the singular construction placed upon the law governing mercantile shipping, are held to be the only parties implicated in the mutiny on board the *Jeddo* —the passengers, dear souls, being asleep and unconscious while the whole affair came off—were on the 7th Aug. handed over to the Portuguese Consul, who sent them on board the steamer *Principe Don Carlos II.*, Mr. Douglas of the jail providing a guard. The efforts made to elucidate the particulars of the massacre have unfortunately, despite the efforts of Mr. Stewart, the Coroner, to arrive at some tangible statement of fact, been unsuccessful, and the legal proceedings taken here have resulted only in the establishment of one fact—that passengers on board a vessel where mutiny occurs are not held in any way responsible for such an occurrence. We trust that the Macao Government will take proper steps to carry out justice, now that Hong Kong has done more than half its work in ascertaining who are the most guilty of the scoundrels it is about to take charge of. We shall await with much interest the conclusion of the trial. The only misfortune is that they don't hang at Macao, or in any way violently take life—a fact which is possibly fortunate for others than the mutineering murderers now handed over to its officials.

The collapse of the China telegraph scheme will be a source of lively regret to all who indulged in hopes of seeing Hong Kong and Shanghai connected by the mysterious wire. We were not among the number of those who believed that the time had quite arrived for the introduction of the telegraphic wire into China, although we strenuously advocated submarine telegraphic communication between the open ports. The abandonment of the scheme conclusively shows, however, that even for this the time has not yet come. And Dr. Macgowan may console himself with the reflection that, even had he succeeded in overcoming all physical obstacles, and in being able to announce to the foreign public in China that everything was ready for the commencement of the enterprise, it would have been no nearer completion than it now is. Had the idea been cordially endorsed by foreign merchants, the company would long since have received such assurances of support as would have justified it in at once commencing operations. We are inclined to question the truth of the statement which appeared in the *London and China Express*, as to orders for the manufacture of the cable having been already given, and the doubts we then expressed have been perfectly justified by the result.

Considering the non-reliability (as now proved) of the reports of Dr. Macgowan's successful efforts in the north which have already reached us, we naturally hesitate before giving too much credence to the published rumours of his partial success in Japan. So long however as a gleam of hope exists in that direction, we trust he will not relax his efforts towards bringing the intelligent people of that country into telegraphic communication with the Western world. Should he however find that circumstances are not yet sufficiently favourable to justify extended attempts in that direction, there is still a field open for the exercise of his experience and ability in the proposed route from Singapore to Hong Kong, and which moreover possesses the additional advantage of having been the subject of public discussion and official approval by Her Majesty's Government. Before, however, again devoting a considerable amount of time and trouble to the task of opening a way for the telegraph to Eastern Asia, we would advise the zealous but somewhat over-sanguine doctor to thoroughly canvass the foreign communities at each point, and to draw up and widely circulate a programme of his intended operations. Let him first of all clearly ascertain to a fraction the amount of guaranteed support he is likely to get from the mercantile community, and then calculate how much may be expected from those who casually, but with tolerable regularity, are likely to avail themselves of the line when it is once established. Despite a good deal of writing and talking on the subject, this, the first and most practical necessity before commencing a novel and expensive undertaking, seems to have been comparatively overlooked.

The report of the Hong Kong and Shanghai Bank, to be presented at the meeting of shareholders called for the 13th August, is highly satisfactory. After making every provision for contingencies and setting aside $75,000 for the reserve fund, the directors are enabled to declare a dividend equal to 8½ per cent. on the paid-up capital, leaving upwards of $14,000 to be carried forward. In the face of the present untoward condition of the China trade such a result could hardly have been looked for.

A preliminary meeting of the Hong Kong Chamber of Commerce has been held to discuss matters connected with the approaching revision of the treaty, but time was taken for deliberation.

At a meeting of shareholders in the Hong Kong Hotel Company it was explained that there had been 2,124 shares originally subscribed for, and 1,984 shares allotted (the total number of shares of the company being 2,000); that 86 shares had been subsequently forfeited, leaving at present 1,898 valid shares on the register. A satisfactory sketch of the company's prospects was drawn by the chairman.

Sir Rutherford Alcock, we are told, has succeeded in setting at rest the much vexed question of the rice trade at Taiwan. A positive and definite promise has, it is said, been given that the embargo shall be immediately removed, and a notification will shortly be published by the foreign and Chinese authorities to that effect. In confirmation of this announcement the *China Mail* mentions that a ship has arrived at Amoy with a cargo of rice from Takao. The same paper is informed that Sir Rutherford has promised to do his best to put an end to the obstructions in the way of foreigners exporting camphor from Tamsui.

STRAITS SETTLEMENTS.

SINGAPORE.

Dates hence are to the 20th August. The outward mail of July 10 arrived out on the 11th August, another quick transit of a few hours over 31 days. The French Mail, with dates from London to the 17th July, came to hand on the 18th August, by which opportunity telegraphic dates were received to the 8th August.

At the time of the despatch of our last *Overland Journal*, says the *Straits Times*, the riots which had prevailed at Penang for some weeks previous were understood to be at an end; but a few days afterwards intelligence reached us that disturbances on a much greater scale, and attended with much more serious consequences, had again broken out. On intelligence of this second outbreak arriving here a meeting of the Legislative Council was called, and the Preservation of the Peace Bill, which confers very peremptory powers on the Governor in Council was read a second and third time and passed. After this his Excellency the Governor proceeded himself to Penang in the newly-purchased steamer *Peiho*, together with H.M.'s ship *Rifleman*, with the view to adopt very strenuous measures for the suppression of the disturbances. These vessels left this on the 14th, and arrived at Penang on the 16th instant; but by that time the riots had subsided of themselves, the rioters either having satisfied their belligerent propensities or being alarmed at the decisive steps adopted by Government and the English residents. It is said that the Governor has imposed very heavy fines upon the two Hoeys which principally maintained the disturbances; but

Digitized by Google

however desirable such a proceeding might be, it is difficult to conjecture how these fines are to be levied. The *Rifleman* returned from Penang on the night of the 18th, and the *Peiho*, with his Excellency the Governor on board, is expected to-day.

The expedition to the Nicobars, undertaken with the view to test the truth of the rumours which had been circulated to the effect that a number of Europeans were confined there in bondage, and if such proved to be true to endeavour to rescue them, has been brought to a close. H.M.'s steamers *Wasp* and *Satellite* proceeded there in company, having on board the Chief Commissioner of Police of the Settlement, and a brother of Maharajah's to act as an interpreter. On arrival off the islands, boats were lowered and parties despatched in the direction of the villages along the shore; on their arrival on the beach however they found all these deserted, the natives having seemingly on the appearance of H.M.'s vessels decamped into the interior. To penetrate the in-lying jungle, if it had been possible, would have been a most dangerous task on account of the advantages it afforded to the natives for concealed attack, so it was not attempted. One girl of apparently European descent was discovered, and has been brought back; but with the exception of this, and the burning of a few villages, we suppose meant, and which it is to be hoped will be received as a warning, the expedition has been without result. What the Government are to do with the interesting maid is a question not very easily answered.

PENANG.

Advices from this port to the 23rd of August are of a satisfactory nature, the riots having come to an end. The followiug interesting account of the riots was unfortunately shut out of our last issue:—

The principal items of news have reference to the riots in Penang and the immediate neighbourhood, which reached to such an alarming pitch, that on the 3rd of August a public meeting of the inhabitants was held, and the following resolutions passed:—

"That from what the members of this meeting have themselves witnessed to-day, they are confident that the public peace cannot be kept without the aid of the military, and the police under arms as they are at present."

"That the Justices of the Peace be called out, and be stationed at convenient points, with a force of police and troops; to carry out the Riot Act, if it be necessary to be proclaimed, with European inhabitants aiding."

"That the European inhabitants do tender their services in support of the authorities during the present disturbances, to be distributed as the authorities may direct."

"That till the Lieutenant-Governor takes the direction, the magistrate with the commanding officer do fix the position for the location in different parts of the town of justices of the peace with European inhabitants, the police and troops in aid."

Notwithstanding all these precautions the riots increased every day. On the night of the 3rd of August the military took possession of the town, the principal posts at which they were stationed being the new market, opposite Messrs. A. A. Anthony's godown, the Ujong Passir one, on the Prangin road commanding the bridge, one of the principal entrances into town from the Jelutong district, and the Pitt-street one commanding the scene of Saturday's conflict. At each of these stations there were two justices of the peace keeping alternate watches day and night. During the night the town was comparatively quiet, the streets occupied by the Chinese being all well lighted to guard against a surprise. The whole of the 4th of August was occupied in the removal to a place of safety of a number of Ghi-Hin people with their valuables. The first alarm of fighting was given at nine o'clock on the evening of the 5th of August in Beach-street, where Bishop-street joins it. At first the men in Bishop and Church streets were easily controlled and sent back to their houses, all was then quiet for a few minutes. The sound of musket firing was however soon heard and the rush of the Ghi-Hins up Beach-street became general; the small party of special constables and volunteers who were on the spot went along with Mr. Nairne, the Justice of Peace at that time on the station, towards the scene of conflict, which was chiefly confined to that part of Beach-street where it is joined by Chuliah-street. The fire was kept up with great energy by the Chinese, who were further stimulated by the waving of their faction flags; a brisk fire was also kept up from the windows of the houses adjoining; from one house a shot was fired which struck down the havildar of the company the order was given to fire, and the military, after firing several vollies, advanced and drove the rioters into their houses; the house firing, however, still continued, although not so frequent as before. Shortly after this a 12-pounder gun was brought up, and being loaded with canister shot was fired up the street by which the Chinese had retreated; this timely and forcible lesson produced quiet for a short time, and the gun was advanced to the next street, to a spot which commanded Chuliah-street and Penang-street on both sides. Time was thus got to bring up some more guns, which were immediately put into position so as to rake the principal streets up and down, advantage being taken as much as possible to place the guns on the cross roads, by which means the control of four distinct lines was obtained.

On the 6th inst. it was impossible to say that anything would occur, as the whole town seemed quiet. Rumours and reports were, however, going about concerning a settlement of the dispute between the two principal Kongsis, all very contradictory. At the Pitt-street station there was some fighting, chiefly about the house adjoining the Toh-peh-kong Kongsi-house, and from the mosque behind that there was round shot fired from a gun placed on the top of the mosque. A twelve-pounder gun was run up China-street to the corner of Pitt-street, and a gradual advance was made on the Kongsi-house, under cover of this gun. Shortly after this a charge was made on the house, and it was taken, the windows and doors were then destroyed, and the place rendered useless for further mischief; a number of arms of various kinds was found inside, but the house was quite deserted. In another direction, at the head of Chuliah-road, near Love-lane, there was a stiff fight with the military, and the officer commanding the detachment was obliged to put his men under cover; the fire from the Chinese being very heavy, they were only able to advance step by step under cover of fire from the gun. In about half an hour the Chinese were silenced, and quiet was again restored. The rest of the day was occupied by again consolidating the defences in town and keeping down fires. The roads were covered with fugitives coming into town, being either burned out of their houses, or threatened with it. Every European house along the Northern-road was filled with men, women, and children, and their goods; every tree which afforded a shade was made use of by these unfortunates, and a heavy shower of rain in the afternoon did not improve their condition. The Chittys and Klings all removed their goods into the European godowns, or wherever room was to be had.

The *Rainbow* cruised about the harbour, intercepting junks and sampans carrying arms and men, and did real good service. Captain Webb, in charge of the police-boat, also intercepted several sampans carrying arms, and a buffalo-cart full of arms was seized in the province, on its way to be sent across.

The two succeeding days, the 7th and 8th August, passed off quietly enough, although some fighting was going on, and houses were set on fire. Two guns were captured by a body of special constables from Chow Rasta, and one of the principal Malay headmen taken prisoner with two of his sons; they were marched to town under charge of Captain Chevalier and a body of armed police, the guns were afterwards taken to the fort. The same morning a body of 1,500 Ghi Hins attacked Jelutong, but were repulsed by some 3,000 Toh Peh Kongs, and from 30 to 50 men killed. A body of Ghi Hins with two guns, 3 pounder howitzers, were coming down the road past St. George's Church, on arriving at the corner they were met by the military on one side, and by the specials and police on the other. The Chinese, abandoning their guns, fled in two parties, one escaping round by the Court-house and another rushing forward, found themselves hemmed in by the military. A number of the latter party rushed into the compound of the house occupied by Mr. Pasley and the sheriff; most of these managed to escape by a tree over into the adjoining Chinese houses. One man was shot dead; another, after being wounded, was bayoneted to death by the sepoys. Three prisoners were taken, one of whom was wounded both by shot and bayonet. The guns and prisoners were brought to town, and quiet was again restored as far as any serious fight was concerned; there was, however, continual firing going on from the houses, and many were killed and wounded. The loss of life was very considerable; at the very least computation one hundred were killed in the fight and numbers wounded; the dead were left behind in some instances, but most of them and the wounded were always picked up and carried away, so that it is quite impossible to arrive at anything like a conclusion as

Digitized by Google

to the number killed. The fires went on extending; all the houses on both sides of Titi Papan were burned down; there was also a very extensive fire behind the mosque from which the guns had been fired.

The *Penang Gazette* in reference to this subject says:—We must not omit to say that every one in the Settlement has been doing his utmost to preserve order, and we are most especially indebted to the assistance of Captain Chevalier, of the ship *Dewa Gungadhur*, and his crew who really behaved well, and were particularly thanked for their services by the Lieutenant Governor and Colonel Man.

Captain Alexanderson has also worked well night and day, and the crew of the *Coleroon* were on shore also doing duty in guarding the barricades and guns, in fact every one had to do his work. How long this is to last we cannot say; we have not force enough to put it down with a strong hand, and as yet no settlement has been made. We are safe enough in town, the fort is held by the sepoys, the head-quarters of the regiment being removed from the lines to the fort, which is now full of ladies and children.

The men-of-war have been anxiously expected, and it is to be hoped they will soon arrive.

A meeting of the members of the Penang Exchange has been held at the Exchange-rooms, to consider the matter of numerous letters having gone astray passing through the Penang post-office. Several of the gentlemen belonging to most of the firms here gave in a list of letters which had been lost, and in some instances the loss was very inconvenient. After some discussion it was proposed by J. Buttery, Esq., that a letter should be forwarded by the Chamber of Commerce to the Lieutenant-Governor in reference to the above complaints, in order that he may institute such inquiries as he may see to be necessary under the circumstances.

By the mail just received, we learn that on the evening of Aug. 14 the colonial steamer *Peiho* arrived with his Excellency the Governor, the Attorney-General, and his Excellency's private secretary on board. The *Rifleman* came in at the same time. On board the *Peiho* were twenty-five artillery men under the command of Lieut. Hickson, who immediately proceeded to the Fort and took their quarters there. The next day the *Satellite* arrived from the Nicobars viâ Acheen. There was no longer much danger of a renewal of the riots with such a force at our disposal.

The next day an Armstrong gun was landed and placed at one of the barricades under a guard of the sailors of the *Wasp*, but as tranquillity seemed to be entirely restored, it was withdrawn the day after, and the barricades also removed, thus giving free transit through all the streets.

During the few days at the beginning of the week the police and special constables were occupied in endeavouring to arrest the heads of the various Kongsis Chinese and Malays, and the result has been that nearly all of them have been safely lodged in the Fort, pending a settlement of the dispute which has brought about these late riots. There have been several arbitrators appointed, but as yet no satisfactory arrangement has been come to.

Quiet is now restored, and trade appears to go on as before, the various tradespeople are pursuing their avocations as usual, and we have no doubt that there is an end of any more fighting for the present; for the future, the Government, by means of legislation must be looked to for protection; we trust it will be short and sharp.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

ANTROBUS—On the 15th Sept., at Eaton Hall, Congleton, the wife of J. Comtte Antrobus, Esq., of a son.

BIRLEY—On the 25th Sept., at Highfield, Standish, near Wigan, the wife of Frederick H. Birley, of a daughter.

BARING—On the 18th Sept., at Bath House, Piccadilly, the Hon. Mrs. Baring, of a son.

BOWMAN—On the 22nd Sept., at 1, Belgrave-square, Monkstown, Mrs. Robert Ker Bowman, of a daughter.

CAMPBELL—On the 23rd Sept., at Ellerslie, Streatham, the wife of Patrick Campbell, Esq., of a son.

COOPER—On the 15th July, at Swatow, the wife of W. Cooper, H.B.M.'s Acting Consul, of a son.

DISTANT—On the 17th August, at Penang, the wife of Captain Distant, of a son.

ELLES—On the 12th Sept., at Wimbledon-common, the wife of Jamieson Elles, Esq., of a son.

FITZROY—On the 27th July, at Shanghai, the wife of George H. Fitzroy, Esq., of a daughter.

FITZROY—On the 27th July, at Shanghai, the wife of George H. Fitzroy, Esq., of a daughter.

FLOWERS—On the 27th July, at the British Consulate, Nagasaki, the wife of Marcus Flowers, Esq., H.M.'s Consul, of a son, stillborn.

HUGHES—On the 7th July, at Yokohama, Japan, the wife of Emilius Hughes, Deputy-Assistant-Commissary-General, of a son.

IRVING—On the 8th August, at Singapore, the wife of the Hon. C. J. Irving, Auditor General, of a son, still-born.

LANCASTER—On the 22nd Sept., at 67, Kensington-gardens-square, Bayswater, W., the wife of J. Locke Lancaster, Esq., of a son.

LOCOCK—On the 10th July, at Yokohama, Japan, the wife of Sydney Locock, Esq., First Secretary of Her Majesty's Legation, of a son.

NEWLANDS—On the 12th August, at Helston-lodge, Singapore, the widow of the late A. Newlands, Esq., of the S.S. Filipino, of a posthumous son.

SANFORD—On the 20th Sept., at Grove Villa, Stockwell-park-road, the wife of Heaume Sanford, Esq., of a daughter.

SMITH—On the 21st Sept., at Goldings, Hertford, the wife of Robert Smith, Esq., of a daughter.

STILL—On the 17th Sept., at Hillside House, the wife of E. A. Still, Esq., of a son.

WEIR—On the 15th August, at Mount Carey, Singapore, the wife of J. Weir, Esq., of a daughter.

MARRIAGES.

DENT—MARSHALL.—On the 18th Sept., at St. Hilda's Church, South Shields, by the Rev. T. H. Chester, M.A., incumbent, assisted by the Rev. T. R. Green, M.A., incumbent of Byker, Newcastle-on-Tyne, brother-in-law of the bride, and others, the Rev. Charles Dent, M.A., eldest son of Thomas Dent, Esq., of Hyde-park-gardens, London, late curate of the parish, to Marion, fourth daughter of William Marshall, Esq., of Westoe, South Shields.

MCDOUALL—HUTTLESTON.—On the 1st August, at Christ's Church, Canton, by the Rev. John Henry Gray, M.A., Consular Chaplain, John McDouall, Esq., of China, to Adeline Gibbs, youngest daughter of the late Henry Huttleston, Esq., of Fairhaven, U.S.A.

PYKE—CAMPBELL.—On the 24th Sept., at Tunbridge Wells, Thomas Pyke, Esq., of Hong Kong, to Florence Elma, youngest daughter of the late W. A. Campbell, Esq., barrister-at-law, and granddaughter of the late Hon. Sir William Campbell, Chief Justice of Upper Canada.

TALBOT—TALBOT.—On the 3rd Sept., at Northampton, Mass., U.S.A., by the Rev. F. D. Huntington, D.D., of Boston, Geo. W. Talbot (of China) to Violetta, daughter of Charles N. Talbot, of New York, formerly resident at Canton.

DEATHS.

BOECKER—On the 28th July, at Shanghai, of hydrophobia, Rodolphus Boecker.

DANIELS—Lost, with all on board the ship Fy Chow, which sailed from New York on the 15th March last, aged 20, Stanley Herbert, second son of Arthur Daniels, Esq., of Fellows-road, Eton-park.

GOODRIDGE—On the 20th Aug., at New York, Ezra R. Goodridge, Esq.

GUNDRY—On the 20th Sept., at Weymouth, Walter Eustace Gundry, Esq., late of Bridport, Dorset, aged 71, deeply regretted.

Digitized by Google

JAMESON—On the 27th September, at 60, Milton-road, Gravesend, Captain Charles Jameson, of Hong Kong, aged 51 years.
MARSHALL—On the 28th August, at sea, on passage home from China, Edward Marshall, Esq., aged 48.
PREVOST—On the 25th Sept., at Cotmandene, Dorking, Surrey, Isidore Prevost, aged 74.
VINCENT—On the 19th Sept., at Seaford, Sussex, Harry Vincent, son of Capt. Thomas Vincent, late of Shanghai, aged 5 months.
WAKEFIELD—On the 31st July, at Shanghai, of hydrophobia, William G. Wakefield, aged 23.
WITHERS—On the 12th Sept, Lieut. William Withers, R.N.R., of Cranfield-road, Wickham-park, New-cross, late of China.
YOUNG—On the 2nd August, at Shanghai, William Young, late master of the barque Belle.

COMMERCIAL REPORT.

CHINA AND JAPAN IMPORTS.

YOKOHAMA.—Quite a revival has taken place in our market for a variety of woollen goods, many of which had for some time been exceedingly dull. In our staples—plain Cottons and Yarn—we have to note on the contrary rather a falling off in demand, and though we make no change in last mail's quotations, we should have to do so had much business been done. For 16 to 24s and 28 to 32s holders of the latter staple would have to submit to a reduction of perhaps $0.50 to $1 to effect sales. 38 to 42s are an exception to our general remark, being saleable at previous rates. The arrival of the Barracouta and Caractacus have increased the stocks of Grey goods, and buyers appear to be holding off for a fall. SS Camlets, on the other hand, are in better demand, $16.50 to $16.75 can be got for best. Scarlet we can quote at $20, and Black at $17; but SS only are saleable, and other qualities are nominal, at our reduced quotations. Black Velvets are again lower, but in fair demand, and at the figure in our tables sales have been made. For best, holders have to give way $0.25 and for inferior, $0.50. Coloured Velvets are not wanted and quotations are nominal. The large arrivals have much affected Lawn, which has dropped $0.10. Good Lastings and Crapes have gone off in small quantities at the prices we give, as have also blankets. Dyed Brocades, Spots and Chintzes are heavy in stock, and we see no sign of an early improvement. Lustres and Orleans, plain and figured, are in the same state, and of Taffachellas the stocks are enormous, with no demand. Metals are without change. Sugar and Rice have again fallen in value, and stocks of the former are now left almost unsaleable in the holders' hands. The weather being most favourable for the native Rice crop, and everything promising a large out-turn, it is to be feared that the great quantities of foreign grain now in our market will soon be in the same position.

SHANGHAI.—Grey Shirtings: The business done in these goods has been limited, and prices have gradually weakened. The latest news from the north does not seem as yet to have produced any better feeling; 7 lbs. Cloth maintains its value. White Shirtings have also been less active at reduced prices. T-Cloths: There are more sellers than buyers, and rates tend in favour of the latter. Long Ells have been in steady inquiry, and higher rates are looked for. Camlets are still very dull; one sale of HH assorted is reported at as low as tls. 13 per piece. Spotted Stripes are without change. Metals: The Juanpore adds to stocks of Iron and Lead; Nail Rod quoted at tls. 2.50 to 2.55. Coals: Without further arrivals of moment, the market remains pretty much as last noted; the turn continues in favour of buyers. Cardiff, from ship's side, tls. 15 nominal; English, tls. 14 do.; Sydney, tls. 10.25 sales; Japan, tls. 7 do.

CANTON.—A decline of $1 is noticeable in Yarn, and 10 cents in Lead. Quotations for other articles of import remain unchanged.

HONG KONG.—The market for Cotton and Woollen manufactures has been in a state of stagnation, owing to the large sales by auction of damaged goods ex Solent and Northfleet on underwriters' account, which have fully supplied the immediate wants of the dealers, as well as taken up all their ready money, it being the custom to pay cash for goods thus disposed of. In consequence of the absence of demand for sound goods, nearly all quotations are nominal. In some instances holders are disposed to be firm, but the market has been decidedly weakened, and to effect sales some reduction would in most instances be submitted to. The small sales of Grey Shirtings and T-Cloths (sound goods) reported show a marked decline. White Shirtings remain utterly neglected. The slight demand for fancy cotton goods, reported last mail, has subsided, and there are no settlements to note. Woollens: The fortnight's demand has been supplied at the auction sale of damaged goods, but the market remains firm, and rates have an upward tendency. Metals: Nail Rod Iron continues in good demand at about former currencies. Reported sales are all "to arrive," showing that stocks are inadequate to the demand. There are no sales to report of Bar or Hoop Iron. Lead is in some request here, and stocks must now be getting low. In Canton, on the other hand, a decline of 10 cents is noticeable. Coals: Continue to arrive steadily from all parts, and the market is consequently still further weakened. In many instances holders will not submit to the low offers which simultaneous arrivals always prompt, and prefer to land and store—ample supplies are now probably near at hand, and a return to the high rates lately ruling cannot be expected for many months.

CHINA AND JAPAN EXPORTS.

TEA.

YOKOHAMA.—In this market there has been more activity, and prices have slightly advanced. Purchases have been almost wholly on American account. The quality of what we have yet seen of the new crop is inferior, but all native reports agree in promising improvement. Settlements are about 2,100 piculs, and stocks 2,500. With these we do not include 1,000 piculs of unsaleable old Tea. The Pauline is loading for New York, the Brewster for San Francisco.

SHANGHAI.—Black: We have had a moderate but steady business doing throughout the fortnight at slightly easier rates. Holders of Oonam teas having submitted at last to the offers made them, several chops have been settled at 18 taels, a price nearly on a par with the London value. Good Ningchows have been scarce, and have sold readily at taels 27 to 29. Of Oopacks only a few chops have been offered on this market, but the prices paid for them have been fully up to last mail's quotations. The really good second crop teas are mostly withheld from the market being stored under advance in Hankow. Arrivals from that port have been very small in consequence; but from Kiukiang the second crop of Ningchows are beginning to come in freely, and our stock has been maintained at about 40,000 chests of all descriptions. The settlements comprise 2,500 chests Oopack fair at taels 22 to 26; 9,000 chests Ningchow fair to fine at taels 22 to 29; 12,500 Oonam common to fair at taels 18 to 22. Green: The fortnight's business has been confined to twelve chops, which have been settled at rates which show little change from former prices. The new Teenkais have begun to arrive nearly one month earlier than usual; at present about 5,000 half-chests are on offer. The quality is greatly inferior to that of last year, the colour being dull and much mixed. Teamen are asking last year's prices for these teas, but we have not heard of any offer having yet been made. As stocks accumulate, the teamen will be glad to accept lower rates, and we shall probably be able to advise the opening of the market in our next. The fortnight's settlements comprise:—9,000 half-chests new Pingsuey, fair to good, tls. 32 to 40; 2,800 do. new Hoochow, fair to good, tls. 32 to 33; 200 do. old Fychow, good, tls. 29.

HANKOW.—Teamen were not anxious sellers during the early part of the fortnight, having generally succeeded in getting advances on their Teas, but latterly there has been more disposition to do business, and settlements amount in all to 19,400 chests, to which is to be added 1,700 chests contracts, and 4,300 native shipments. Prices generally were five mace to a tael below last mail's rates. Very few of the second crop Oopacks had found buyers, the demand chiefly running on the Oonam kinds at tls. 16 to 18. Quotations are:—Oopacks, fair to medium, tls. 17 7.5 to 24; Oonams, fair Oonfa, tls. 16 to 17 7.5; ditto, common to fair, tls. 10.5 to 18.5.

KIUKIANG.—Black Teas: The teamen continue to prefer taking the chance of the Shanghai market to accepting the prices offered them on the spot, and only one chop has been settled out of the 44 arrivals. This was a small parcel of 357 half-chests Ningchow at taels 21.5. Some 2,000 packages remained in stock. Quotations were—Ningchows, common to fair, nominal; Hohows, nominal. Green Teas: The season turns out to be earlier than usual, and the new Teas may be expected in ten days' time. The cost is still said to very moderate.

FOOCHOW.—Congou: An active demand has continued for shipment to the United Kingdom and the Colonies, but the unsold stock gradually increasing on their hands, the teamen have submitted to slightly easier rates for all grades offering on the market. The second crop generally is poor, but some of the teas from the upper districts stand out well from the rest. The first of the teas of the third crop are expected to come forward shortly. Souchong: Settlements have been almost entirely confined to the common and medium kinds, the finer grades having nearly all gone forward in earlier ships. Oolongs: Considerable quantities have arrived during the past fortnight, including some of the well known finest chops. Three small cargoes have been despatched for San Francisco. Flowery Pekoe: Several parcels have been settled at full prices, a portion being probably intended for the coast trade. Scented Teas: There has been considerable demand for these descriptions, and the teas that are left being generally of inferior quality, the bulk of present settlements do not show as good value as earlier shipments.

CANTON.—Three more chops of Country Congous have been settled at slightly advanced rates and two fresh chops have arrived at market. Holders are firm. Scented Teas: At the commencement of the fortnight the teamen raised their rates for both Capers and Orange Pekoes, but finding little or no demand they were obliged to submit to a reduction, and the market closes at about the same rates which were ruling a month since. A further decline may be expected in view of the large quantities gone forward. Quotations are as follows:—Country Congou, tls. 24.5 to 25.5; Country Greens, Gunpowder, tls. 34; do., Young Hyson, tls. 24; Canton Congou (new make), tls. 15 to 20; Young Hyson, tls. 19; Scented Orange Pekoe, tls. 24 to 32; Scented Caper, tls. 13½ to 26; Gunpowder, tls. 18 to 22.

SILK.

YOKOHAMA.—In our last we reported a very small business, owing to the scarcity of silk. The same cause acted against us until about a week after the departure of the steamers, when supplies began to come down more freely, and the weather being favourable and the crop promising well, we may now look forward to an active business, unless checked by home advices. The settlements for the mail consist chiefly of medium bank sorts, little of fine classic silk having yet come forward. For the best Mybash offering $820 is asked and paid: and a few bales of Shimonita are held for $870, a price not likely to be had, so long as the present cautious temper of buyers is maintained. Koshiu 1 and 2 is in the market at $780, the holder having refused $760. We have no other changes to make in our quotations. Arrivals for the fortnight are, 330 piculs and the unsold portion consists of about 100 piculs of old and 145 of new silk. Silk Eggs have come down to the number of 140,000 cards, of which 100,000 have found buyers at apparently extravagant prices, ranging from 4 to 9 boos per card. It must be borne in mind, however, that boos were laid in at 345 per $100, whereas last year they had only touched at this season 311.

SHANGHAI.—Business in Silk was resumed immediately after the departure of the last mail, notwithstanding the unfavourable telegraphic news of the Home market mentioned in our last report, and confirmed by later advices. The market when opened appeared somewhat firmer, owing to the bulk of the Silk being held by Chinamen, who were in a position to hold and not compelled to realise, and this firmness ruled throughout the greater part of the past fortnight; there were, however, some few exceptions, who were, owing to pressing payments falling due, desirous of realising their stocks even at a reduction on last mail's rates, and the parcels thus offered were quickly secured by the foreigners. As the mail is closing, the market appears somewhat easier, and the dealers evince anxiety to realise, owing to continued unfavourable advices of the Home market, just received, viâ Kiachta. Quotations show a further reduction of tls. 10 to 15 for chop and market No. Tsatlee; tls. 5 to 10 for 4, 5, and common Tsatlee; tls. 10 to 20 for Karshing Taysaams; and tls. 5 to 80 per picul for Hainings. The settlements are estimated 1,500 bales, and consist of 770 bales Tsatlees, 250 Taysaams, 250 Hainings and

Digitized by Google

Yuenfas, 150 Sewhings, 50 Laeyongs, 30 Hangchow Tsatlees: total, 1,500 bales. The majority of the purchases have again been confined to market and common Silks, and but few classic chops have found buyers, owing to the high prices still asked by the natives for these descriptions. The arrivals from the interior have been very small, and from Ningpo only 118 bales have been received, therefore our unsold stock is reduced to 4,600 bales. Prices: Tsatlee—Chop No. 1, tls. 580 to 590; ditto 2, tls. 555 to 560; Market No. 3, tls. 505 to 525; ditto 4, tls. 570 to 490. Taysaam—Chop No. 1, tls. 475 to 490; ditto 2, tls. 455 to 470. Yuenfa and Hainings, No. 1, tls. 485 to 500; ditto 2, tls. 465 to 480. Hangchow Tsatlee—Tls. 430 to 460.

CANTON.—Regardless of discouraging advices from home, and the heavy yield of China and Japan silk, holders remain very firm, and some of them continue to ask fabulous prices. The quotations below, however, fairly represent the rates paid for the bulk of Canton shipments per outgoing mail. The hopes held out of a great improvement in the new silk have not been realised, now that the whole of the third crop is on the market. The silk turns out to be full sized although rather better in colour than the preceding crops. Quotations are as follows:—Loongkong No. 1, $540 to 545; do. No. 2, $525 to 530; Kowkong, $490 to 500; Cumchuck Lucklow, $525 to 530; Rereeled Cumchuck, $600 to 610; Punjum, $140; Tsatlee No. 1, $570 to 580; do. No. 2, $555 to 565.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London, July 14, Caratacus; from Liverpool, 16, Barracouta; from Glasgow, Coquette (steamer); from New York, 19, Minnehaha.

At SHANGHAI.—From London, July 26, Polmaise and Invincible; 30, Juanpore, Weymouth (reported by telegram).

At HONG KONG.—From Glasgow, July 29, Lamont (steamer); from Newcastle, Aug. 2, Hyacinth; 7, Juanita; 9, Isabella; from New York, 6, Queen of the Sea.

At MANILA.—From Liverpool, July 27, Adan y Eva; from Glasgow, 24, Tio y Sobrino; from Cadiz, Aug. 2, General Echague.

At SINGAPORE.—From Liverpool, Aug. 12, Archos; 18, Achilles (str.)' from Shields; 9, British Banner, from Sunderland; 14, Antipodes; from Rotterdam, 12, Otto; from Hamburg, Bernhard Carl; from New York, 11, Fung Shuey (str.); from Tyne, Antje, from Liverpool, Bonnie Lassie: from Cardiff, Stad Delft, Maria Elizabeth (reported by telegram).

At PENANG.—From Liverpool, Aug. 14, Achilles (str.).

At BATAVIA.—From London, California; from Glasgow, County of Elgin.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, July 25, Sovereign of India; 27, Hoang Ho, Star of China; 30, Coral Nymph; Aug. 2, Anglo Saxon; 3, Dunmail.

From FOOCHOW.—For London, July 27, Caldew; 28, Queen of the Age; Aug. 1, Maiden Queen.

From HONG KONG and CANTON.—For London, July 25, Passe Partout, Wemyss Castle; 26, Niphon; 29, Atma; Aug. 5, Chalgrove; 7, Chanticleer; for New York, July 25, Jeanie.

From MANILA.—For Cork, July 28, Chalmers; Aug. 2, Flora (via Iloilo); for Pernambuco, July 24, Sir Harry Parkes.

From SINGAPORE.—For London, Aug. 16, Corneille David; for Liverpool and Glasgow, 11, Huntley Castle.

From PENANG.—For United Kingdom, none.

VESSELS LOADING.

At YOKOHAMA.—For London, none; for New York, Pauline.

At SHANGHAI.—For London, Fusiyama, Grenadier, Helen Nicholson, Invincible, Isles of the South, Jubilee, Pegasus, Sir W. Wallace, Wild Deer.

At FOOCHOW.—For London, Pakwan, Caranjah, Scawfell (all full), Maggie Leslie, Medina.

At HONG KONG and CANTON.—For London, Kelso, Hyacinth; for New York, Princess of Wales.

At MANILA.—For London, Napoleon, Neptune, Corea (*via* Cebu); for Liverpool, Trinidad, Ogono; for Hamburg, Voludoro; for New York, Galatea, Melrose.

At SINGAPORE.—For London, A. H. Wille, Meg Merilies, Simoon, for Liverpool, Bella, Lochleven Castle; for New York, Benvoirlich; for Boston, Alexander.

At PENANG.—For London, Coleroon, Gungadhur.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s.; Silk, £4 to £4 10s. To New York, per sailing vessel, £2 10s. to £3; per steamer, $45.

At SHANGHAI.—To London the rate is £2 10s. per ton of 50 cubic feet, at which rate all vessels on the berth are loading.

At FOOCHOW.—To London, £2 10s. to £3 per ton.

At HONG KONG and CANTON.—To London vessels on the berth are loading at £2 10s.

At MANILA.—FREIGHTS.—The demand for tonnage is weaker. Last rates for London are, dry sugar, £2 15s.; wet do., £3 5s.; and Hemp, £3 10s. per ton of 20 cwt. The following engagements are reported since last mail:—Flora, 400 tons, from Iloilo to Channel for orders, Sugar at £3 10s. for U. K., and £4 for Continent; Ethan Allan, 397 tons, from Iloilo with sugar to Sydney, £3 per ton; Corea, 451 tons, from Cebu to U. K. at £3 10s. for Sugar, and £3 15s. for Hemp.

At SINGAPORE.—Freights to London have suddenly declined to £3 per ton. The Simoon, after attempting, without success, to take the berth for London or Liverpool at £3 10s., has laid on for the former port at £3, and the loading ships are now accepting the same rate to enable them to fill up quickly. The rate to Liverpool is unchanged at £3 10s. The amount of available tonnage in the harbour is still extremely scarce, and we can only look upon this reduction in the home rate as temporary. Tonnage continues extremely scarce and rates have again risen, the present quotation to Holland being f.87.50 per last equal to about £4 8s. per ton.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—At Schelde, from Akyab, Penrith; at Queenstown, from Akyab, Leamington; 26, from Macao, Kosmos; 25, at Deal, from Batavia, Henrietta; 24, off the Wight, from Batavia, Albrecht Beyling; 13, at New York, from Hong Kong, Windward; 23, at Bremen, from Rangoon, Benares; 22, at Hamburg, from Rangoon, Malabar; 23, at Brouwershaven, from Rangoon, Emily Farnum; 24, at Belle Isle, from Akyab, Notre Dame de Bon Sort; 22, at Danzig, from Maulmain, Marine Minister von Roon; 26, off Dungenes, from Batavia, Minister Franzen van der Putte; 29, at London, from China, Serica; in the Downs from Rangoon, Suretta; 29, at Liverpool, from Rangoon, Royal Alfred; at Queenstown, from Akyab, Sydney.

DEPARTURES.—From Amsterdam for Padang, Padang Packet; from Cardiff for Shanghai, Phœnix; Sept. 24, for Singapore, Delft; 26, from London, for Cardiff and Shanghai, Robin Hood; 25, from Sunderland, for Colombo, Sea Snake; for Galle, Adele; 27, from London, for Yokohama, Hiogo, and Nagasaki, Hiogo; for Hong Kong and Canton, Avon; 22, from Shields, for Galle, Lady Cecilia; 28, from London, for Hong Kong, Carmarthenshire; for Shanghai, Devana; 26, from Liverpool, for Hong Kong, Arab; from Sunderland, for Batavia, Maasluis; 28, from Deal, for Galle, Mount Stuart Elphinstone, after repairing.

LAID ON.—At London, for Shanghai, Maitland; for Hong Kong, George Crowshaw; at Liverpool, for Hong Kong, Maria Louisa Antoinette; for Batavia and Sourabaya, Baron van Heemstra; for Galle, Pudsey Dawson; at Glasgow, for Penang, Salado.

SPOKEN.—Maria, Batavia to Amsterdam, Aug. 9, off Agulhas; Ocean Rover, Sunderland to Galle, Sept. 2, 13 N., 24 W.; Egmont and Hoorn, Clyde to Singapore, Sept. 17, 49 N., 9 W.; Red Riding Hood, London to Hong Kong, Aug. 10, 11 N., 25 W.; Templar, Boston to Galle, July 30, 3 N., 24 W.; Betty Perlbach (Hambg. barque), Manila to Queenstown, Aug. 3, 27 S., 5 E.; Nederland and Oranje, Java to Amsterdam, Sept. 2, 16 N., 30 W.; Abviza de Manila (?), Havana to Hong Kong, Sept. 9, 31 N., 35 W.; 3rd d.p., No. 5902 (Dutch barque), Batavia to Amsterdam, Sept. 10, 33 N., 35 W.; Sophia Konigender Nederlanden, Batavia to Amsterdam, Sept. 5, 14 N., 19 W.; Wyk-aan-Zee, Batavia to Amsterdam, Sept. 1, 16 N., 29 W.; Waterloo, Amsterdam to Batavia, Aug. 12, 9 N., 22 W.; Sea Star, Liverpool to Singapore, Aug. 12, 9 N., 22 W.; Esperanza, Cadiz to Manila, Aug. 21, 1 N., 24 W.; Ashburton, New York to Hong Kong, forty-two days out, 26 S., 29 W.

MISCELLANEOUS.—The Admiralty have invited tenders for the conveyance of 3,000 tons coals for Singapore.

CASUALTIES.—The Charlotte, Vincendeau, from Penang and Rangoon to Havre, which put into Algoa Bay, June 24, leaky, has been condemned there. The Phœnix, Cullen, from Cardiff to Shanghai, put in at Milford, Sept. 23. through stress of weather, and was hauled alongside the hulk to lighten, in order to stop a leak aft.

SIR FREDERICK BRUCE.—A telegram received on the 20th inst. by the Atlantic Telegraph from New York announces the death of Sir Frederick William Adolphus Bruce, G.C.B., Her Majesty's Minister at Washington Sir Frederick was the third and only surviving son of Thomas, seventh Earl of Elgin, and was born June 14, 1814. His Excellency, who had for the last twenty-five years been in the diplomatic service, was attached to the late Lord Ashburton's special mission to Washington in February,

Digitized by Google

1842; was Colonial Secretary at Hong Kong from 1844 to 1846, when in June that year he was appointed Lieutenant-Governor of Newfoundland. In July, 1847, he was appointed Consul-General in the Republic of Bolivia; in the following year was made Chargé d'Affaires; and in August, 1851, was appointed Chargé d'Affaires to the Oriental Republic of the Uruguay. In August, 1853, he was appointed Agent and Consul-General in Egypt. In April, 1857, he accompanied his brother, the late Lord Elgin, in his special mission to China, and brought home the treaty with China, signed at Tientsin in June, 1858, and for which service he was made a Companion of the Order of the Bath. Sir Frederick was appointed Envoy Extraordinary and Minister Plenipotentiary to the Emperor of China on the 2nd of December, 1858. He was appointed Envoy Extraordinary and Minister Plenipotentiary to Washington in 1865. The late Sir Frederick was made a Knight Commander of the Civil Division of the Order of the Bath in December, 1862, and a Grand Cross of the Order in 1864.

FRAUD ON MESSRS. BLAIN, TATE AND CO.—HOW TO TREAT MISAPPROPRIATIONS.—Yesterday, at the Justice-room of the Mansion-house, Mr. John Watson Grubb and Mr. Arthur Robinson, both of 29, Austin-friars, insurance brokers, attended before the Lord Mayor on a summons, which charged that they, being intrusted as brokers with securities for the payment of money to the amount of £2,000.—namely, certain policies of insurence, with directions in writing to pay the proceeds of such securities to a person specified in such directions, did, in violation of good faith, and contrary to those directions, convert to their own use and benefit the same securities and the proceeds thereof. Mr. John Blain deposed that he was a partner in the firm of Blain, Tate, and Co., merchants of London and Shanghai. They did certain repairs to a vessel called the Trebol, in the beginning of 1866, which belonged to Messrs. Wakefield, Nash, and Co., of Liverpool. A debt of £3,000 was due to witness's firm in respect of those repairs, and in consequence they placed themselves in communication with Messrs. Wakefield and Co., and afterwards with the defendants in reference to the collection of certain insurances. The defendants were then carrying on business as insurance brokers, and they were instructed by witness's firm to act as agents in the settlement of the affair of the Trebol. Subsequently witness saw both the defendants at their office, and told them that he had made inquiries of the Universal Insurance Company, and was informed that the money had been paid long since. They admitted that that company had paid, and that they had received the money. He then said that he had inquired at the ether insurance offices, and found that they had all paid except one. They admitted that also. He then asked for a check. They said they could not give him one, because they were afraid that they should have to suspend payment the next day. He said that that would make no difference, as they could give him the moneys they had received. They then stated that they had not got the money, that it was gone, and that they had to do things which they would not have done except in extremities. After that he wrote to say that criminal proceedings would be instituted against them. They had no authority whatever from him to apply the money in any way to their own purposes. Mr. Thomas William Harrison, a clerk to Messrs. Blain, stated that he had frequently called on the defendants in July and August last, and asked them whether the claim for the Trebol was settled. They invariably answered that it was not. The Lord Mayor said he should remand the defendants until the 1st of October, taking bail from them for £200 each, and one surety of £100 for each. The bail was immediately tendered and accepted, and the defendants were forthwith set at liberty. We think the conduct of Messrs. Blain, Tate and Co. calculated to set a wholesome example in the treatment of such cases.

NEW STEAMER FOR CHINA OR JAPAN.—Another new steamer, the *Sunrise*, has been despatched for sale in China or Japan. The *Sunrise* has been built by Messrs. Lawrence, Hill, and Co., of Port Glasgow. She is classed A A 1, and has been constructed under special inspection. Her length of keel is 140 feet, breadth of beam 21 feet, depth of hold 11 feet, builders' measurement 300 tons. Her measurement capacity in the hold is 335 tons of 40 cubic feet, equal to a capacity of 240 tons in dead weight including coals, which is carried at a draft of water 11 feet aft and 9½ feet forward. The engines, also by Messrs. Lawrence, Hill, and Co., are direct acting, with inverted cylinders of 45-horse power, with tubular boilers and three-bladed screw. It is anticipated that she will make 10½ knots per hour under steam, consuming about seven tons of coals per day. The vessel is schooner rigged, and round stern, with a full poop, capable of accommodating 18 passengers. The *Sunrise* has been built in a first-rate substantial manner, and in this respect is much superior to the class of vessels usually constructed specially for sale. She has left for Hong Kong under canvas, under the command of Captain Alexander Buchan, who has the necessary power to sell. Unless sold in China she will proceed under steam for Japan.

THE SAN FRANCISCO AND CHINA STEAMERS.—The outward-bound Pacific mail steamers are going to have a coaling station, it is said, on Brooks's Island, "midway between San Francisco and Japan." Is this the convenient island which was lately discovered in that same locality, right on the steamers' track, and which, to the chagrin of the discoverers, suddenly disappeared again, like that island of Gladys, sung by Jean Ingelow? "The mountain isle was gone; the careless sea had quite forgotten it, and all was even as it had been before." Such a rythmic epitaph might, at all events, be written on the island in "long. 150 deg. 50 m. W., and lat. 40 deg. 40 m. N." The schooner *Leah* has just returned to San Francisco, telling us that on that spot she found only a "tract of discoloured water," 250 miles long and 86 miles wide. Now, this is notably the same "tract of discoloured water" found previously by the *Caroline Mills* in the same place, and covering the same area. But, though little birds like "sandpipers," and big birds like "boobies," and Portuguese men-of-war were seen in vast numbers, no bottom was found with 150 fathoms of line. "Shallow soundings" are hoped for in the vicinity, but shallow soundings would not do for a coaling-station. Hence, if Brooks's Island means this terraqueous stretch of discoloured water, it can only be used in a metaphorical pleasantry for something fictitious, like "Brooks of Sheffield" in one of Dickens's novels. But we hope that the birds betoken a real *bona fide* island in existence near by, which future explorations may make known.

CHINESE CHILDREN AND THE PENNY POSTAGE.—When Sir Rowland Hill set on foot the penny postage he little thought that he was laying the foundation of a bridge over which tens of thousands of little Chinese boys and girls would toddle into heaven. A correspondent of the *Weekly Register*, by name John Good, writes to that paper, in answer to an inquiry as to the use to which defaced postage stamps can be put, to say that a good nun once told him that for every single defaced postage stamp collected and sent to China, a Chinese child is brought to baptism; and that ever since the good nun told him this, he has been diligently collecting defaced English postage stamps wherewith to save sinful little Chinese souls. Why the Chinese should bring their children to be baptized on receipt of a defaced postage stamp the good nun did not explain to Mr. John Good; but that gentleman says that if anybody wishes to know he will make further inquiry about the matter.

DECREASE OF THE CHINESE POPULATION.—Within the last six months many thousands of the Chinamen who spent years in the mines of California have gone away to Nevada, Montana, and Idaho. The placers of the Territories attract them, and in the Silver State they find work on the railroad. As for the number who have migrated, there is no record of it, but 5,000 would be a very low estimate, and probably 10,000 would be nearer the true figure. As many as 300 have left a single town (Chinese Camp, in Tuolumne County, for instance), and in more than one county the decrease in the Chinese residents is said to be at least 1,000. The certain pay of the railroad, $31 per month, is a great attraction to them, and many who remain in the mines say they too would go if the work were easier and the hours of labour fewer each day. Those who start for the Northern territories give as a reason the receipt of letters from friends informing them that there is no miners' tax, and in many places they can get water for washing without paying a ditch company. The foreign miners' tax, and the water tax, together absorb, in many instances, half of their total receipts, and a journey of 1,000 miles is willingly undertaken when there is a fair prospect of escaping from both. One of the results of this exodus will be a decided decline in the receipts of the State Treasury. A tax of $4 per month is levied on all foreigners who work in the mines, but by common consent, or at least without public objection, the tax is collected only from Chinamen, and they have in some years paid as much as $250,000. During the fiscal year ending June 30, 1863, the amount was $186,000; but there has been a slow decline since, not so much because of the decrease in the number of miners as because of their inability to pay. The tax collectors, who receive a proportion of the amount collected, and thus have a strong motive for studying the best method of managing the business, have found that by severity they would drive the Celestials away from their respective districts or counties, so they generally try to accommodate their demands to the ability of the companies. In those claims which pay well, the full tax is exacted for every man; in others the tax is exacted for one-half or one-fourth of the miners, according to circumstances. This mode of doing business gives great opportunities to dishonest collectors, who, it is said, accept $2 of Chinamen who demand receipts, and $4 from those who do not; and as Celestials are not permitted to testify in our Courts of "justice" against white villains, the swindle has the indirect sanction of the law. Probably not half, perhaps not a third, of the collectors are guilty of this dishonesty, although both Chinamen and white men complain of it as a common thing.

OUR TRADE FOR THE HALF-YEAR.

(THE TIMES.)

The official Trade Returns, just now completed to the end of last June, show that in the first six months of the present year we exported goods from these islands to the value of about £88,000,000 sterling. That is the first broad fact as it appears upon the new accounts; and the first deduction is that it represents a decline of about £5,000,000 compared with the trade of the corresponding period in 1866. That return, however, was exceptionally large, so that the reduction expresses no serious abatement of the national industry. If we now proceed to analyse the aggregate before us, we shall soon arrive at three or four principal divisions. Just one quarter of the whole business was transacted with our own colonies, and all but one-half of that amount is due to India. In fact, if we set down £10,000,000 to India, £4,000,000 to Australia, £2,000,000 to Canada, and £1,000,000 to Singapore, we shall have accounted at once for £17,000,000 out of the £22,000,000, while Hong Kong, the Cape and the West Indies will take nearly £3,000,000 more. The remainder is divided between 15 colonies or settlements, of which Gibraltar, Malta, and Ceylon are the most important and the Falkland Islands and Heligoland the least.

Assigning, then, £22,000,000 out of £88,000,000 to our colonial trade, we have £66,000,000 representing our business with foreign nations—that is to say, with the rest of the habitable world, for there is literally not a region which our exports do not reach. In round numbers, we may again distribute this total between the four quarters of the globe by giving £35,000,000 to Europe, £5,000,000 to Asia, £5,000,000 to Africa, and £20,000,000 to America. From this rough classification it will be seen that our Continental Trade is more than one-half of our whole foreign trade, and approximating to one-half of all our trade together. Indeed, during the particular period under review Germany alone was almost as good a customer to us as the United States. Our trade with France—£5,800,000—is little more than half that with Germany, but it is buoyant, and may be materially increased. With Holland a very large business is done considering the smallness of the country. The Netherlands, with a population of 3,500,000, take upwards of £4,000,000 worth of goods from us; Austria, with just ten times the population, takes just one tenth of the supply. Turkey deals largely with us, so does Italy, and so, for its size, does Belgium, though the commercial intercourse with that country, which once represented the most important branch of English trade, has lost its relative magnitude. Still Belgium is a better customer than Russia or Spain; though as regards the latter country it should be observed that we do a very considerable business with Cuba and the Philippines. The trade with Cuba in particular has been larger this year than the trade with Japan, and all but as large as that with Portugal. To Greece we actually send less than we do to the blacks of San Domingo.

Digitized by Google

Our Asiatic trade—that with British possessions excepted—is of course mainly with China, which takes upwards of £2,000,000 worth from us, while Japan figures for rather less than half that amount, and the Dutch East Indies for about £700,000. Our trade with Africa resolves itself practically into the trade with Egypt, and that, in reality, means our trade with the countries beyond. Egypt is the high road to India, and, consequently, the exports and imports set down to the account of that country are preternaturally large. Western Africa, however, does figure for nearly £500,000 in the total of £5,000,000. and a pittance of some £25,000 is contributed by "Eastern" Africa. Whether the Abyssinian expedition will bring any modification in these figures we cannot pretend to conjecture. As to Northern Africa, Morocco, Tunis, and Algeria find places in the list, beyond doubt—the former country counting for £100,000, but the great French colony buys little more from us than Madagascar.

In America—British colonies again excepted—we may say that our trade is pretty equally divided between North and South—that is, the several States of South America take between them British goods to about the same value as the United States alone. It must be remembered, however, that throughout these remarks we have been speaking only of the first six months of the present year, and that the Returns of the period have been affected by exceptional circumstances. Last year, for instance, our trade with the United States was above £15,000,000 instead of under £12,000,000, the difference being explained partly by the deficiency of the American harvest in 1866, and partly by the effects of the present prohibitive tariff. America, it may be hoped will one day resume her old transactions with us, but in the meantime there is something very remarkable in the commercial progress made by the States of the Southern Continent. Brazil, though her account has considerably fallen off in this last return, is still a better customer to us than Italy, and the little republic of Chili has been a better one than Belgium. Here, however, it should again be noticed that the figures are accidentally large. Last year the Chilian ports were blockaded by the Spanish squadron, and it is the natural rebound of trade since the opening of the harbours which has carried up the return from £570,000 in 1866 to £1,500,000 in 1867. Besides these States, the Argentine Republic, New Granada, and Uruguay are large dealers with us, and Venezuela and Ecuador add their quotas to the total. With Mexico, considering the capabilities of the country and the incredible wealth of its soil, we are, doing next to nothing, and perhaps the less we do the better.

The countries bringing up the end of the list exhibit some curious variations, all, no doubt, to be accounted for, but showing how capricious the demands of such places must be considered. Last year, for instance, the "Islands in the Pacific" bought goods to the value of £100,000 from us, whereas this year the item is under £20,000; Persia took £25,000 worth in 1866, and but £6,000 worth in 1867; while Siam, which had thrown off last year with orders to the extent of £4,000, has this year dropped out of the list altogether. On the other hand, Arabia has risen from £715 to £1,178, Bolivia from £408 to £3,074, and Madagascar from £1,612 to £3,319. Moreover, if Siam has disappeared from our books, two entirely new customers have presented themselves. The "French possessions in India" open an account with £2,074, and the "Northern whale fisheries" with £100.

Perhaps the most assuring features in these returns is the magnitude of the area over which the transactions extend. Forty-eight States and twenty-two colonies, covering between them the whole habitable globe, deal more or less with these islands. This division of risk, or multiplication of opportunities tends incredibly to the safety of our trade. When one door shuts another opens, says the proverb, and we have seventy doors to rely upon. The whole world cannot be in difficulties at once, and some customers are sure to make up for the backwardness of others. But to maintain this trade we must also maintain our own industry. We undertake it may be almost said, to clothe the world. Our exports represent, in the main, cotton, linen, woollen, and worsted manufactures; our imports are the raw materials required for this industry, and the food to sustain us in the work. What other countries grow we make up for use, taking at the same time the abundance of their harvests to compensate the insufficiency of our own. That, in a few words, is a description of the national trade which is expressed in the Returns from which we have here been quoting. We are keeping our position pretty well, but it should not be forgotten that our rivals are now more numerous, more energetic, and more confident than in former times, and that we must prepare ourselves for a competition far more severe than any we have hitherto experienced.

Naval and Military.

An interesting account of the Surveying Expedition in the Straits of Magellan, with Sketches, by Mr. Bedwell, of the Hydrographic Department, and formerly engaged in surveying in China, Japan, and Korea, has been published in the *Illustrated London News*.

A court-martial has been held on board the flag-ship Victory, at Portsmouth, for the trial of Mr. James Rogers, supernumerary engineer on board Her Majesty's troopship Urgent, lately arrived from China, on a charge of drunkenness. The prisoner pleaded "Guilty," and, having been previously convicted for a similar offence, the Court sentenced him to be dismissed Her Majesty's service. The Court was composed of Capt. F. B. P. Seymour, C.B., of the Victory, president; Capt. George Hancock, of the Duke of Wellington; Capt. M. S. Nolloth, of the St. George; Capt. Henry Boys, of the Warrior; Capt. John C. Soady, of the Serapis; and Capt. Henry Phelps, of the Orontes.

The men who came from China in Her Majesty's troopship Urgent have been paid off at Portsmouth. They were the crews of the Adventure, the Bustard, the Banterer, the Grasshopper, the Havock, the Haughty, the Slaney, and the Vigilant. The men were granted six weeks' leave. The Urgent was taken into dock at Portsmouth for necessary survey and repairs previous to further troop service.

It is announced at Woolwich that Captain Stirling's battery No. 9, 2nd Brigade, garrison Artillery, some time under orders for Ceylon, is to proceed to Penang.

Quartermaster Woon, of the Woolwich division Royal Marines Light Infantry, recently promoted, has been entertained by the commandant and officers of the division at dinner. Quartermaster Woon's service in the corps extends over a period of upwards of twenty-three years, including the Arctic expedition, in which he volunteered, in search of Sir John Franklin, and also the expedition in China, under Sir James Hope.

The death of Lieutenant-General Ward, R.E., promotes Major-General Montgomery Williams to be lieutenant-general, and Colonel Sir F. E. Chapman, K.C.B., Governor of Bermuda, to be major-general. By the same event Major Dillon, late of the 30th Regiment, becomes a lieutenant-colonel, and Captain G. H. Fraser, Royal Artillery, a major in the army.

Sir Robert Napier will no doubt become Colonel-Commandant of the Royal Engineers, in succession to the late Lieutenant-General Ward.

The whole of the squadron of iron mortar vessels built for service in the Black Sea during the war with Russia, and since laid up at Chatham Dockyard, are gradually being brought into use for service at the various ports. On Friday week an order was received at Chatham Dockyard directing four of the iron mortar vessels at the eastern end of the yard to be brought forward for harbour service at Portland. One of them is to be fitted at Chatham, and three at Portsmouth Dockyard, by hired hands, who are to be entered at both establishments for the work.

It has been usual on the occasion of trial trips for the makers of the engines to provide refreshments on board the vessel tried. The Lords of the Admiralty have issued an order directing that in future the custom be altogether discontinued.

The surveying vessel Hydra is not going, as was at first supposed, to sound the Red Sea in connection with the Abyssinian expedition, but is to be employed in taking soundings between Aden and Bombay, preparatory to the laying of the Anglo-Indian telegraph cable.

The Serapis, iron screw troop ship, Captain Soady, arrived at Spithead from Quebec, with the fourth battalion of the Rifle Brigade.

Nelson, screw line-of-battle ship, fitting for colonial steam guard and training ship at Victoria, Australia, is alongside the jetty of Portsmouth yard, receiving stores and general outfit. She will carry out muzzle-loading rifle guns, iron gun carriages and slides, and some large cast-iron guns fitted with steel tubes on Major Palliser's plan, and a quantity of shot and shell, besides a quantity of stores for use in the colonies. Great difficulty is experienced in getting seamen to man this ship, and it is uncertain when she will leave on this account. It is reported that special inducements will be offered to secure an efficient crew to take her to Australia.

St. George, 72, screw line-of-battle ship, Captain Matthew S. Nolloth, has left Portsmouth Harbour for Spithead. She will receive ammunition and proceed to Portland as coast-guard ship and training vessel for navigating cadets. This fine wooden man-of-war has been at Portsmouth since the grand naval review at Spithead, having had all her defects made good. The gun-room, cadets' school-room, and bath-room, have been enlarged, and many necessary alterations made. There are now twenty-three navigating cadets on board, the full complement being forty. The young gentlemen appointed to this ship remain on board twelve months, receiving practical instruction, and having passed an examination they are appointed to various ships in commission, as navigating cadets, a rank formerly known as masters' assistants.

Her Majesty's favourite yacht the Fairy is being internally demolished. Some time since an order was received that her stores be returned, which was equivalent to a direction to pull her to pieces, so far as her below deck fittings were concerned. The result was that this handsome yacht was stripped of furniture and ornaments. The looking glasses were removed, and even the glass door handles returned to store. The alleged reason of this work of demolition is that Her Majesty will not permit the yacht to be used, except as a Royal yacht, and as it is not deemed advisable to repair her at present, the stores or furniture and fittings were ordered to be returned to the dockyard. The Fairy is one of the fastest yachts afloat, even in these days of improved machinery. Her lines are admirable, and when in use she was a general favourite, going eighteen knots an hour. During the naval review she fouled a yacht and injured her stem, bending it round and breaking the plates. It was proposed to repair her at an estimated cost of between £200 and £300; but, on reference being made to a memorandum about her condition—that she be kept water-tight—the damage was temporarily repaired to comply with the order literally, and the estimate was reduced to about £5. Her engines are in excellent condition, and it is generally regretted that this favourite yacht of the Queen, Prince Consort, and Duchess of Kent, should be stripped, when she might be repaired and all her defects made good.

The distribution of the Banda and Kirwee prize-money will commence on the 23rd Oct. The first proportion will be in the ratio of £50 for each private's share.

THE troopship Urgent, Capt. S. Henderson arrived at Spithead on the 10th inst, and shortly afterwards went into Portsmouth harbour. She left Hong Kong on the 7th of June, calling at Singapore on the 20th, Mauritius, July 13; the Cape, August 1, Ascension 19, and St. Vincent 29, and has brought home the officers and crews of several ships paid off and re-commissioned. The list comprise:—Capt. Waddilove, Lieut. M'Laughlin, Navigating-Lieut. Brent; Mr. Vinal, paymaster; Mr. Pearce, assistant-paymaster; Mr. Ryan, navigating sub-lieut., from Her Majesty's ship Adventure; Commander Magnay and Navigating Sub-Lieut. Tarrington of the Bustard; Lieut. Singleton of the Dove; Lieut. Morrice of the Hardy; Lieut. Andoe and Navigating Lieut. Purvis of the Vigilant; Lieut. Moncrieff of the Argus; Lieut. Hammond of the Icarus; Navigating Sub-Lieut. Morrice of the Bantam; Dr. Hague and Mr. Street of the Rattler; Mr. Rowland, naval instructor, of the Pearl; Navigating Sub-Lieut. Barnes of the Havoc; Navigating Sub-Lieut. Kelly of the Grasshopper; Navigating Sub-Lieut. Clarke of the Manilla; Navigating Sub-Lieut. Scott of the Bristol; Assist.-Surg. Umberley of the Princess Charlotte; Mr. Brice midshipmen, of the Princess Royal; Deputy-Assist. Superintendent of Stores Baker; Mr. W. G. Marsden and Mr. Mackintosh, 17 engineers, 17 warrant-officers, 374 seamen, marines, and invalids, and 14 soldiers, invalids and time-expired men; the latter were disembarked at the dockyard, and the former sent to the flag-ship Victory, three invalids have died since leaving Hong Kong.

The old 60-gun steamship Meeanee, 2,591 tons and 400-horse power, brought up to Woolwich from Sheerness, having had her engines removed, was undocked. She is intended to be prepared for hospital accommodation on the China station.

LONDON: MONDAY, SEPT. 30, 1867.

THE HONG KONG GAMBLING ORDINANCE.

SIR RICHARD MACDONNELL has astonished the colony of Hong Kong by more than one bold and original measure, but the ordinance which may be briefly described as "the Gambling "Ordinance" is certainly the most remarkable of them all, and seems to have given rise to more excitement than even the much-detested Stamp Act. The matter now under discussion however involves various considerations that were not affected by the last-named measure; that was simply and purely a question of expediency, while this has to be considered as regards its religious, moral, and social consequences as well. It is quite natural that such a measure—coming so unexpectedly, and appearing at the first glance so entirely opposed to the traditional principles of English government—should be viewed with alarm and aversion by a large proportion of the colonists; and it is equally natural that the resident missionaries should take upon themselves the duty of acting as the mouthpiece of this party. At the same time it appears to us that these gentlemen, the purity and disinterestedness of whose motives no one can doubt, have nevertheless allowed their zeal in some measure to outrun their discretion. Their protest against the system is couched in spasmodic and vehement terms, instead of in the grave, earnest tone befitting their own position and the cause they advocate. Such phrases as "underhand and un-English," "blindfold "the public," "barefaced hypocrisy," are indicative rather of spleen and a spirit of party warfare than of a desire to convince by earnest argument or logical reasoning. And, moreover, the assertions put forward in these unpleasent terms are evidently exaggerated. We can see no satisfactory grounds for the assertion that the new system "will certainly lead to a large "increase of gambling." The Chinese population of Hong Kong is chiefly migratory, and consequently most difficult of control. Gambling is a vice inherent in Chinese nature. Mandarins and merchants are alike addicted to it—the very beggars in the streets with the alms bestowed on them gamble. We do not believe that any possible measure or regulation, on the part of the Government, could produce an *increased* amount of gambling. Every Chinaman, when the gambling mania is upon him, will indulge it to the utmost, whether legally or illegally. That the proposed system "will have a "seriously demoralising effect on the Chinese" we are equally disinclined to credit. Certainly, the Chinese population of Hong Kong *may* be capable of further degradation—but probably not in this particular way. Again, the dogma that "the Govern- "ment has no right to countenance and sanction vice" is altogether over-strained. What human Government that ever existed was capable of *abolishing* vice—and yet, what should we say of one that entirely *ignored* it? Such a Government would be practically worthless, for to mitigate an evil of any sort and to keep it in check we must recognise its existence. In short, although the efforts of the Rev. Mr. WARREN and his colleagues deserve our respect as a fearless and conscientious endeavour to perform that which they as a body consider their duty, we cannot admit the arguments adduced to be so logical and convincing as they seem to expect.

The GOVERNOR'S reply appears to be one of moderation. His Excellency succinctly replies to each of the objections *seriatim*—and, we must add, effectually demolishes them all. It is made clear enough that no evil can be greater or worse than the unlicensed gambling that now exists; and that the licensing system, by affording a means of regulating the vice, will permit of the many disorders attending it being suppressed, and will at a single blow destroy one great cause of the inefficiency of the colonial police. Sir RICHARD only distantly alludes to a fact that might well be urged as giving the strongest support to his scheme, namely, that a sin of deeper dye than gambling is recognised in Europe, and submitted to Government regulation and control. How many vain and fruitless efforts have been made to suppress what we euphoniously term "the social evil," and how unanimous, though reluctant, is the conviction that its abolition is a thing not to be hoped for! Even our own Government, always the most averse to recognise anything impure, has at last been driven by stern necessity to accede to a partial adoption—in the interests of our army and navy—of the restrictive measures long since in use on the Continent, although they are not yet adopted throughout the country. Taking into consideration the respective populations of the two cities, immorality of this nature probably prevails to about the same extent in London as in Paris; but being under police *surveillance* in the latter city, it is not such a fruitful source of broils, drunkenness, and disorders of the worst description, often ending in murder, as with us. This is what Sir RICHARD MACDONNELL proposes to do with gambling in Hong Kong; success is of course not a matter of certainty, but the experiment is quite justifiable, and in our opinion well worth a trial. One of the collateral advantages of the plan is, that the revenue produced by it will allow of a further postponement of the operation of the unpopular Stamp Act, and another is that it will afford an additional chance of carrying on the Mint—an establishment that we believe all well-wishers of the colony would regret to see abandoned.

The correspondence on this subject received by last mail has not been discussed by the London papers generally. The *Daily News* and *Post* published a part of the memorial to the Governor and the reply, but with no comments. The *Star* remarks that the gross and shameless immorality which the Chief Commissioner of British Burmah was lately compelled to rebuke in the officials subordinate to him has drawn general attention to the common relaxation of moral restrictions which the ordinary life of Europeans in the East has a tendency to produce. "A very deplorable instance of this laxity," says the *Star*, "is to be found in the fact that Sir R. G. MACDONNELL, the Governor of Hong Kong, has recently authorised the establishment and conduct of a limited number of gambling houses in the colony. This official sanction of a practice which is condemned by the English law, by that of China, and by the educated opinion of this country without exception, has not been allowed to pass without protest on the part of the community, but the Governor persists in his policy. It is not probable that the Home Government will allow him to carry out the scheme which he has announced; but the Colonial-office has so often sanctioned unwise and improper action on the part of its subordinates, where public opinion has not emphatically recorded its protest against them, that it is well to be warned and to speak out in time against these immoral proceedings. The question of interest now is whether Sir RICHARD MACDONNELL has satisfied the scruples of H.M.'s Government on the subject. No doubt the SECRETARY of STATE for the COLONIES will communicate the decision arrived at by the next mail." The writer of these stringent remarks appears to forget that the first hasty outcry of public opinion on matters which involve feelings of sentiment as well as questions of expediency is often retracted when due time has been taken for consideration; and further, that numberless measures that have been at first loudly condemned, have in the end proved both wise and beneficial. Let us hope that the Gambling Ordinance may be included in this category.

THE NEW SEASON'S TEA CLIPPERS.

ONCE more this annual contest has resulted, the winner—by a few hours only—being the *Ariel*, Captain KEAY. She left Foochow at 8.30 A.M. on the 13th June and arrived in the docks at 7 A.M. on the 23rd September, thus performing the passage in 102 days, less one hour and a-half. The next best passage is that of the *Taeping*, Captain DOWDY, who left England as chief officer, but assumed the command at the Cape of Good Hope, in consequence of the illness of Captain MACKINNON, who subsequently died there. The *Taeping* left

Digitized by Google

Foochow at 11.45 A.M. on the 4th June, and was docked in London shortly after 2 P.M. on the 14th September, or 102 days three hours, thus leaving the victory to the *Ariel* by four hours and a-half. Had there been a premium for first arrival, as in former years, the *Taeping* would undoubtedly have got it. The *Fiery Cross*, which left Foochow on the morning of the 5th, arrived in the docks on the 23rd inst. in 110 days. The *Maitland*, which left on the 31st May, docked on the 24th, 115 days. The best passage, however, is that of the *Sir Lancelot*, Captain ROBINSON (late of the *Fiery Cross*), which sailed from Shanghai on 16th June, and docked on the 23rd inst. at eight A.M., accomplishing the passage in 99 days. This vessel did not come down the China Sea, but by the long Eastern passage. The other ships from Foochow and Shanghai, which sailed before the 15th June, are expected in the next few days.

THE tenders for the performance of the India, China, and Japan mail service have been sent in, and the P. and O. Company are, we understand, the only contractors for the whole scheme of services. The owners of the Italian line now running between Brindisi and Alexandria have sent in a tender for that portion of the service, but the British India Steam Company, which it was expected would be able to perform a section of the service in India, &c., has not tendered. The arrangement and terms of the new contract will at least occupy a month.

THERE is no truth in the report that Mr. POPE HENNESSY, the newly-appointed Governor of Labuan, has been nominated for the Governorship of Queensland. Mr. HENNESSY, accompanied by Miss HENNESSY and Mr. CODY (private secretary), proceeds to Labuan *via* Bombay by the next mail.

INTELLIGENCE has been received from the directors of the East India Telegraph Company in New York, confirming the telegraphic accounts of the purchase from the Western Union Company at San Francisco, of a portion of the submarine cable for the coast of China.

Mr. EDWARD H. HALL, a correspondent to some of the leading journals in the United States, proceeds by the next mail, *via* Bombay, for a tour through China and Japan.

THE CONSUL AT HANKOW.

(To the Editor of the *London and China Telegraph.*)

SIR,—I note that a slight inaccuracy has crept into a statement made in your paper dated Sept. 12 regarding the health of Consul Gibson, whom I had the pleasure of being intimately acquainted with when he was Acting Vice at Tientsin. He was wounded by a spear, and suffered considerably for some months, but when he left he was in rude health. He and Col. Gordon were made mandarins of the red button for the services they rendered in suppressing the rebellion, the full particulars of which are of course on record.—I am, Sir, yours very truly,

Liverpool, Sept. 16. ROBERT LIVINGSTON, Jun.

THE NEW SEASON'S TEA.

A rather unworthy attempt has been made to spoil the sale of the new teas per *Taeping*, through the columns of the *Daily News*. That the Editor has been imposed on there can be no doubt amongst persons well informed in the trade. That the teas are not so good as they should be is agreed by all competent judges; but that *retail dealers* have made heavy losses in the purchase and sale of tea, is a statement so far from fact that it has simply been held up to ridicule. The following is the notice alluded to:—

The Chinese have of late years adopted the practice of adulterating the spring-grown tea with the old and withered leaves of the previous season's yield. In the new crop of Kaisow just to hand this system has been carried to such an extent that the usual characteristics of that description of tea—viz., ripeness and richness of flavour—have been entirely destroyed. The first arrival of Kaisow has in former years sold at 2s. 6d. to 3s. per lb.; but now, and principally through its fame, 2s. 2d. is the highest price obtainable for comparatively fine sorts, and sales are being pressed as low as 1s. 5d. Some judges affirm that, should the Taeping's cargo fairly represent others *en route* with more plentiful supplies, many of these teas will only fetch the price of common Congou. At present the better-informed firms refuse altogether to purchase, as it is known that the Chinese, after having tired buyers with immense quantities of this comparatively poor produce, have afterwards brought forward the finest qualities. It is also reassuring to know that musters of shipments from Shanghai of really fine Oopacks have arrived overland, and that the general quality of Congou from that port is superior to last year's supply. It is thought that these facts should be made known amongst retail dealers, lest their losses, which have already been heavy from the prevailing commercial depression, should be increased by too early purchases of new tea.

Messrs. W. S. Shuttleworth and Co., wholesale dealers, took the pains to have this printed as a circular, and issued it with the remark, "We entirely concur in the views therein expressed." We blush for Messrs. Shuttleworth's recommendation, and would ask them if they supplied the information to the editor of the *Daily News*. On the following day "A Tea Broker" wrote to the editor, and his remarks are certainly more cogent than the comments on it:—

TO THE EDITOR OF THE DAILY NEWS.

Sir,—In your money article of this day you make a statement on the subject of the quality of the new season's tea just at hand ex Taeping, to the effect that they "are largely mixed with old and withered leaves." It is not to be expected that newspaper editors can be judges of such an article as tea; you must therefore be acquitted of any mischievous intention to damage the interests of the consignees, but it is to be wished those who have afforded you this intelligence were equally free from interested motives. It is no novelty for the Chinamen to mix the new crop with leaves of the previous season, with the view of increasing the quantity, to meet the extravagant demand for fine tea at the opening of the season in China; it has been done, more or less, for years, but the very object proposed would insure the matter being carried out by an acute and intelligent race with reasonable caution. To use "old and withered leaves" in the sense you apply it would be deliberately to spoil the bulk, and render it comparatively worthless. That some parcels have last season's leaf mixed with the new is unquestionable; on the other hand, many are free from any admixture whatever, and all are sound, useful, serviceable tea, though not so fine as the average of some seasons. The effect of your article is to severely damage the interests of the consignees in that portion of the cargo still unsold, by raising an unfounded and most unreasonable prejudice, and that, in an article like tea, which is but imperfectly understood, is, beyond measure, mischievous, and may temporarily be equivalent to a confiscation of thousands sterling. It is generally the case that some disinterested person, who has been unable to "get in" as well as his neighbours, favours the country trade with similar advice at his own expense in a circular; but why you should adopt his interest, and save him that trouble, I am at a loss to see.—I am, &c., A TEA BROKER.

City, September 18.

The reply of the *Daily News* was:—

Our correspondent is illogical, and, indeed, contradicts himself. He rebukes us for having stated that there is any adulteration, or rather, as it would appear, for having, as he insinuates, "damaged the interests of the consignees" of the *Taeping's* cargo; yet, almost in the same breath, he admits the fact of the adulteration, but asserts that there is nothing new in the practice. We did not say there was anything very new in it; unfortunately, the practice of adulteration complained of has been carried on for many years, but it has now proceeded so far as to make it necessary, in the interest of the great consuming body, that it should meet with public exposure. We are quite unable to understand how a journal seeking to uphold the integrity of commerce, and the purity of the articles of which commerce is the purveyor, can be deemed deserving of such remarks as those ventured upon by our correspondent, who, we must infer, has interests which prevent him from clearly discerning the truth of the matter. As everybody knows, many of the leading articles of trade are flagrantly adulterated in their passage through the hands of the retail dealers, and it is of vital importance to the consumer that every possible safeguard shall be established to ensure their reaching our ports in a pure state. Adulteration at home is surely sufficient without our food being subjected to similar practices by Chinamen and other foreigners. Some time ago the adulteration of Indian cotton was carried to such an extent as to threaten the falling into discredit and disuse of the whole of the Indian production of that article, but the outcry which was opportunely raised on behalf of the manufacturing interest has fortunately sufficed to bring about at least a partial remedy. We cannot help thinking that the interests of the entire tea trade, both merchants and brokers, including our correspondent himself, would be best served were they firmly to set their faces against the practice of adulterating the article by which they live, even if such a course should occasionally involve the forgoing of a small commission. It need only be added that if the tea by the *Taeping* is a really good article, it cannot possibly be damaged by the mild criticism that has appeared in these columns.

THE LATE SIR FREDERICK BRUCE.

(THE TIMES.)

With great regret we announce this morning the death yesterday of Sir Frederick Bruce, Her Majesty's Minister at Washington, from an attack of diphtheria. Within a period of four years the nation has lost the services of three members of one family, who were each endowed with eminent qualifications for the important work to which they severally devoted their lives. Lord Elgin died at Dhurmsala in the autumn of 1863, from the effects of a short excursion in the hills following closely upon an exhausting season in the plains of India. He was but just acquiring an intimate knowledge of his duties as Viceroy, when an affection of the heart deprived India of a ruler of long experience and great ability. General Bruce, a devoted servant of the Crown, died while in attendance upon the Prince of Wales; and now their brother, who had shared with Lord Elgin the labours of his mission in China, and who excelled him in diplomatic skill if he was not his equal in geniality of disposition, has also been removed in the prime of his life and in the height of his usefulness. It is but a few weeks since Sir Frederick Bruce was pressed by Mr. Seward to accompany him to his home at Auburn, and he must afterwards have returned to Boston, where he had already spent a part of the summer. There, apparently, he contracted the terrible malady which sometimes sends in a few hours the strongest men to their graves.

The country would have had much reason to deplore the death of Sir Frederick Bruce whenever it had happened; but his loss is an especial misfortune at a time when negotiations of the utmost intricacy and delicacy are pending with a Government which is not always disposed to approach Great Britain in a spirit of generosity and forbearance. Seldom has a citizen of another country visited the United States who possessed so keen an insight into the political working of the great Republic, and at the same time ingratiated himself so thoroughly with every American who approached him. He did full justice to the people and their form of Government, while he read the national character with faultless nicety, and explored with large discrimination every detail in the action of their national institutions. Americans who were best acquainted with their civil

Digitized by Google

polity perceived after a little conversation with him that he understood its machinery better than the majority of their countrymen. It might almost be said that he applied himself night and day to the systematic study of its merits and its defects through the medium of men or books. His own house at Washington was frequented by the most eminent political men whose duties detain them in that city a great part of every year. Although naturally somewhat impulsive in temperament, he invariably exhibited entire calmness and self command when the circumstances of his position led him into trial. In the spring of last year he accepted an invitation from the Secretary of State to attend the Hall of the House of Representatives, in order to hear a tributary oration to President Lincoln. He was compelled to listen to a violent and extravagant denunciation of England and other European Powers. Most Americans of any position felt that their sense of hospitality had been outraged, and called afterwards to console Sir Frederick Bruce. They found him earnest in his condolence with them upon having had a solemn occasion turned to their discredit. "I know nothing of national sensibility in this matter," he was accustomed to say. "Mr. Lincoln was a noble specimen of the Anglo-Saxon race, and as such I went to hear justice done to his memory. Beside the open grave men stand chastened and subdued, and all animosities are extinguished. If I am invited to see a savage put on war paint and flourish a tomahawk, and execute a war dance around it, the responsibility of the exhibition does not rest with me."

This imperturbable temperament in all his official relations served him well on many occasions from the day when he succeeded to the laborious duties relinquished by Lord Lyons, but never was it of greater advantage than in the protracted and difficult controversy concerning the *Alabama* claims. This discussion it fell to the lot of Sir Frederick Bruce to conduct on the part of Her Majesty, and we divulge no secret when we state that it was in accordance with the late Minister's repeated advice and exhortations that a wise overture towards a settlement was made by the present Government. He had succeeded in establishing for himself relations of cordial friendship with Mr. Seward and the President, and probably there are few outside the circle of his own family who will be more shocked at the tidings of his death than the astute and keen-eyed old man with whom he had sustained incessant diplomatic fence. Sir Frederick Bruce always cherished the hope that he would be able to render his country the service of removing a fertile ground of contention from the path of the two Governments, and thus bring them into closer and more friendly relations. He tried hard to induce the administration at Washington to adopt some amicable method of terminating the long dispute. Mr. Seward may sometimes have been disposed to trifle with the subject; at other times he may have made it appear of cardinal and portentous consequence. But the British Minister was always watchful to seize every opportunity of advancing towards such a reconciliation as would not offend the pride and honour of either people. It was greatly owing to his firm and persuasive representations that the United States' Government interrupted last year the preparations for the Fenian raid into Canada, and his own acuteness often changed the opinions of those members of the President's Cabinet who were distinguished for the bitterness of their prejudices against the country he represented so efficiently.

He is gone, and the duty devolves upon the Government of appointing a representative to one of the most onerous and perplexing offices in its gift. Each occupant of that post finds his labours more exacting than those of his predecessor. Lord Lyons had the *Trent* affair to arrange, but it was an exigency which brought his Government to his side with positive instructions. The critical difficulties in which Sir Frederick Bruce was sometimes placed could only be met by the unprompted discretion of the Minister. We render to the dead but justice when we record that he never deceived or disappointed his Government, and was never in the smallest act of his life unworthy of the great nation which it was his pride to serve. It is impossible to over-estimate the mischief an incautious or unguarded man acting in his capacity might occasion, and, therefore, in choosing his successor every consideration ought to be set aside, except the single one of personal fitness for the office. The old sources of irritation which Sir F. Bruce endeavoured to close for ever may easily be re-opened, and we should anticipate more good fortune than ordinarily falls to the lot of nations or individuals if we dared to hope that no new cause of umbrage on either side would arise. England and America are too nearly related not to disagree on minor topics. A man of quick observation, of a tolerant and elastic mind, and of large compass of thought will know how to deal with these emergencies when they present themselves, and such a man it is now incumbent upon the Government to send to Washington. The American people need no assurance from us that the good relations which the late Minister made it his daily study to promote will be taken up in the same spirit by his successor. There must come a day when small national vexations will be abandoned by common agreement, and till it arrives the only course England can pursue is to give evidence of her friendliness towards a people of her own race and her own nurture by sending to them as her ministers men like him whose loss she now laments.

THE CONDITION OF FINANCE.

A writer in *The Times* on the present and lato extraordinary condition of the money market says:—

I find that six of the great joint-stock banks in London hold just upon £63,000,000 of the public's money. This sum is greater now, when they are only paying 1 per cent. on deposits, than it was last year, when they were paying 6 per cent. and upwards. The Bank of England minimum was then 10 per cent., it is now 2 per cent.

We can understand that people can keep their money in the form of deposits instead of shares under such circumstances as those of last year, because the deposits earn as much, or nearly as much, as if invested in shares, and are more readily accessible. But at a time when deposits are only earning 1 per cent. while an investment in bank shares would yield from 5 or 6 to as much as 9 per cent. the enigma appears insoluble.

I think this proposition is self-evident—that nobody would trust his money in the shape of deposits to a bank in whose stability he had not the fullest confidence; in other words, he must believe that his money would practically be as safe invested in its stock as lodged in its till. For all practical purposes this, I think, is indisputable. We all know, doubtless, that as a shareholder he might not merely lose his money, but might be liable to his last shilling to the creditors of the bank in case it broke; whereas in the character of depositor he might get back his money in whole or in part should such a failure occur. But what I think there is no question about is, that unless the depositor had the strongest conviction in his own mind that nothing of the sort would happen, he would not deposit his money with the concern, and, therefore, practically its shares must, in his eyes, be as safe as the deposits in its till payable at call.

Yet, in the face of this, the prices of the shares of the best joint-stock banks are so low as to pay from 5 or 6 to even 9 per cent. on the investment. If people withdrew their deposits altogether and hoarded them in their strong box at home, or buried them in the garden, one could understand it; but that they should leave them in the banks, where they only earn 1 per cent., when they would practically have just the same security for from 5 to 6 to as much as 9, is one of those things which no one can understand, let him be as bright as Dundreary is dull. The apprehension that prices may go lower rather increases the puzzle than otherwise, for if people bought the prices would go up, so that this rests with the public. Even if the dividends payable in the future be less than in the past year, still there is such a wide difference between 1 per cent. on deposits and even the *minimum* I have mentioned of 5 or 6 per cent. on shares as to leave a considerable margin, and it cannot be supposed that depositors at 1 per cent. are speculative people who want to gamble, but rather sober, plodding persons, who only seek a safe investment.

Allow me to give a few figures in further illustration. The London and Westminster, according to the statement at its last meeting, holds more of the public's money this year than it ever held before. The London and County, according to its last report, £12,032 334 this year, compared with £10,718,483 last. The Union holds £10,614,718 this year, as against £10,260,531 last. Now take an illustration of the rate of interest on the investment. The London and Westminster shares are in quite an unsettled state, owing to the recent issue of 50,000 new shares to double its capital, and the prices rise and fall capriciously through this exceptional cause, so that I leave that out of the question. The National Bank, again, has been affected by the Fenian disturbances, &c., and is therefore not in its normal condition. Then there is the London Joint-Stock, which has just issued a lot of new shares, and there are other banks which have been affected by some cause or another. These, therefore, will not so well serve the purpose of illustration, because their shares stand at an exceptionable figure. But let us take a bank the shares of which stand very high (relatively), and which is quite in a settled state, its new shares having been long on the market. The London and County shares are quoted at 54 to 56. Suppose the price paid were £55. The Midsummer dividend was £2 4s. per share both this year and last, and last Christmas dividend was £2 16s., making £5 for the year on £55 investment; that is, at the rate of 9 per cent. Yet this bank, in common with the others, pays 1 per cent. on its deposits, and whereas it held only £10,718,483 of the public's money last year, when the deposits earned 6 per cent., it holds £12,032,334 now. Even the National Bank, whose branches are spread all over Ireland, and which, therefore, might be supposed to have suffered so much from Fenianism, holds £4,906,837 this year, as compared with £5,169,033 last

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, SEPT. 24.

The Second Chamber of the States General was opened on the 16th inst. with the following speech from the throne:—

"Gentlemen,—It is always with true pleasure that I open the legislative session. The accomplishment of this task is doubly agreeable to me to-day, when I have satisfactory communications to make to you upon the situation of the country.

"The dissolution of the ties which united one of our provinces to Germany, effected during the past year, has since obtained international sanction by the London treaty of May 11th last.

"I entertain the hope that, when experience shall have proved the harmlessness of the works executed in the Eastern Scheldt, our relations with Belgium will more and more acquire a character of reciprocal friendship.

"I am glad to be able to announce to you that we continue to entertain the best relations with all other foreign Powers.

"Although it is agreeable to allude to the praiseworthy manner in which the army and navy acquit themselves of their duties, I find myself nevertheless forced to ask your assistance for the purpose of giving some extension to our regular forces. In the meantime care will be taken to drill the National Guard, so far as the existing law admits.

"Measures are being adopted to subdue, with the aid of Providence, the epidemic that has again appeared in some localities of our country. The efforts made to eradicate the cattle plague have been crowned with success. For a long time past only a few sporadic cases of this epizootic malady have been observed.

"During the year that has elapsed public and private education has continued to form the object of my careful attention. You will immediately be invited to discuss the Bill upon university education. A Bill intended to lighten the burden imposed upon the periodical press by the stamp duty will also be laid before you.

"Commerce, navigation, and trade are in a favourable position. You will be asked to examine new arrangements for the verrification of weights and measures, and a Bill upon the regulation of the pawnbroking system.

"The harvest generally has been good, but the products of maritime fisheries have been less abundant. The works upon the State railways are being actively carried on, and the completion of some of the lines will not be long delayed. Two new lines executed by private enterprise will soon be opened to the public. If the present estimates are realised, the revenue will suffice during the current year for the requirements of the public service

Digitized by Google

and to continue the works upon the State railways without there being a necessity to resort to extraordinary measures.

"The Bill respecting the financial responsibility of the Ministers, the Bill regulating the Board of Control over the State finances, with certain Bills intended to simplify the levy of the succession duties, will subsequently be laid before you. Your deliberations upon the Bill for a new code of criminal procedure will facilitate the introduction of the new judicial organisation. With the same object I shall cause a Bill for revising the judicial districts to be immediately brought in. You will also probably have the opportunity of discussing a new Bill upon the code of civil procedure in the course of the present session. A measure upon consular jurisdiction, with various Bills relating to a partial revision of the military criminal codes, will soon be communicated to the Chambers. An opportunity will also be afforded you of taking into consideration the organisation of the State police.

"The numerous requirements and differences of opinion with reference to colonial affairs have not failed to exercise their influence upon the situation of our possessions in the East Indies. My first care will consequently be devoted to the interests of the State in those countries, avoiding everything which might compromise public tranquillity or excite the discontent of the native populations. I shall willingly lend my assistance to the development of agriculture and private enterprise, provided other interests are not compromised thereby. I have heard with regret that an earthquake has caused numerous deaths in part of the island of Java. The situation of the Dutch possessions in the West Indies continues to be generally satisfactory, although the necessity of importing labourers into Surinam is still largely felt.

"Other labours also await you. They will open a vast field to your zeal for the interests entrusted to your charge. May they, under God's blessing, contribute to the welfare of the country. I now declare the ordinary session of the States-General open."

Notwithstanding the addresses in reply to the speech were most colourless in both the Chambers, discussion of them was used to ask information from the Minister of the Colonial Department with regard to his intentions respecting a Culture Bill, an India Ground-rent Bill, &c. The important but very lengthy discussions that followed I can give in very few words. The Minister declared himself so Conservative that the *Dagblad* applauded most of the programme, and of course the cultures are to be maintained. I sincerely regret that this will again disappoint India; but on the other side, the Minister made known his programme frankly.

Some days ago there arrived at the Hague Prince MimbouTayou, brother of the Shiogoon of Japan, with his suite of about thirty persons. The Prince was received at the railway station by two Royal Chamberlains; and several Japanese, who have resided here for some years, were present. After the Prince had arrived at the Hotel Belle Vue, the Minister of Foreign Affairs called on him, and had a conference of about an hour. The Captain-Lieutenant of the Royal Navy, Jhr. J. H. van Capellen, has been appointed by his Majesty officer in charge of the Prince during his stay in this country. On the 17th inst. the Prince had a private audience with our King. An enormous crowd was present on the occasion, and the prince, who is only fifteen years old, attracted the greatest attention by his brilliant attire. Mr. von Siebald acts as interpreter. The Prince is never alone; even when he takes a bath two officers watch over him. The Prince and his suite have already made many trips into the country to inspect some of our principal agricultural and industrial establishments, and he has also visited our harbour at Nieuwe Diep, to inspect the new ironclad *Prins Frederik der Nederlanden*, the Haarlemmermeer, the works from the canal from Amsterdam to the North Sea, besides the towns of Amsterdam, Leyden, Haarlem, &c.

The Minister of the Financial Department made his statement on Saturday last. Notwithstanding that he has before stated that the Liberals had left the treasury in a most deplorable condition, he now said that the Government will not be obliged to have recourse to extraordinary measures to cover the amount that will be necessary for the State service. The expenses for 1867 are fixed now at 117,123,494,24½f., whilst the valuation of the receipts is 117,252,547,07½f., so that there is a net balance of 129,052,83f. The amount to be provided by India is valued at 14,856,334,63f. This favourable result is, however, only obtained by the Minister absorbing all the favourable balances of former years. The expenditure for 1868 is given at 99,675,990f., which amount is to be diminished for extraordinary expenses to 86,700,000f., and this sum, the Minister stated, will be covered by the ordinary means. The contribution of India for 1868 is valued at 10,600,000f., but the Minister said that this amount may be regarded as the minimum. Apparently the total amount of expenditure is much decreased, but it must not be forgotten that no more money will be spent for the redemption fund than that fixed by the law, and that only twelve millions will be used for the construction of railways.

The police at the Hague have discovered a scheme for issuing false Confederate Bonds, for 12f. to 14f. It had branches in America, London, Amsterdam, Frankfort, &c., and it is quite certain that a great many of these falsified bonds are already in circulation. A lithographer in the Hague made the bonds but he did not know for what purpose. On a certain day one of his *confreres* called on him and saw one of the copies. Of course he asked for some information, the result of which was that the contractor informed the police, who arrested one of the members of the conspiracy when he came to fetch the 500 printed copies.

One of our East India houses, Messrs. A. van Hoboken and Zoon, are involved in severe pecuniary losses, owing to one of their store-houses falling down filled with sugar and tobacco. It is said that the losses will amount to 200,000f., but I think this sum much overrated. The greatest part of the tobacco was to be offered for sale in a few days.

We are now free from cholera, only some sporadic cases having occurred The rinderpest has also disappeared.

The lieutenant of the R. N. M. P. *Struick* died some days ago in the hospital here, from wounds received at the expedition of Siutang. The papers speak in the highest terms of the bravery and courage of this officer, who was only 25 years old.

In Enschede some disturbances of the public order took place in consequence of a measure taken by the manufacturers to establish a fund for widows of workmen and to provide them with money when the workmen are sick. The workmen were compelled to participate in the scheme, and they declined to consent. The houses of some of the principal manufacturers were much damaged in the row, but troops have restored the public order.

COMMERCIAL.

COFFEE.—The Dutch Trading Company's sale of 127,800 b. Java, held at Amsterdam on the 17th instant, has gone off genarally at 1c. below the valuations, whilst the prices of the inferior qualities declined rather more; pale good ordinary 38½c., against 40c. in August. The company declared before the sale that 130,000 b. should be offered in October, and 110,000 b. in November, and that then the next sale is to be held in February, 1868. There remains for consumption of the Dutch Trading Company's coffees from 1st September to 1st February, 1868, 510,549 b., of which 142,744 are in stock on warrants on last August. For private account the following sale was held on the 20th inst.: 982 b. Padang ex Elva Johanna were offered, of which 947 b. second quality were bought in at 19c., whilst only 35 b. good white with yellowish were sold at 45½c.; 304 b. Java ex Mary and Hellegonda, good ordinary to greenish, were bought in at 38c.; 464 b. Java and 49 b. Triage were sold from 5¾ to 25½c. At Amsterdam were sold 549 b. Java and 737 b. Macassar ex Tjilingsie, at prices that did not transpire.

SUGAR (RAW).—The market is very quiet in anticipation of the Dutch Trading Company's sale on the 25th inst. 1,000 mats and 1,000 baskets Java were sold, and also 1,000 baskets floating per Bremen from ¼f. to ¾f. below the July sale. The stock of raw sugar amounts to 49,804,567 ko., against 47,306,811 ko. in September, 1866.

RICE.—There is a good demand, and the market is very active. 6,344 b. uncleaned good ordinary white Java ex Sultana were sold at 8¾f.; 1,100 b. imported by the same ship, a little damaged, will be offered in auction on the 24th inst. Several parcels Rangoon and Bassein rice changed hands. The imports were very considerable.

SPICES.—The market is very dull, and the transactions few. Only mace is firm in price. Of pepper 806 b. good light Batavia ex Aunt Lizzie were sold at 16½c.

TEA.—The valuation of the 3786/4 and 107/12 chests Java, of the Trading Company's sale on the 10th of October, is as follows:—

25/4 ch.	Boei	75 to 85c.	1197/4 ch.	Souchon	60 to 105c.
685/4 „	Congo do.	58 „ 85	231/4 } „	Pecco do.	100 „ 135
817/4 „	Congo	50 „ 85	35/12 } „		
382/4 „	Pecco do.	75 „ 100	128/4 „	Pecco	150 „ 190
14/4 „	Kempoey	65 „ 70	45/4 „	Oranje do.	105 „ 120
48/4 „	Pecco do.	110 „ 120	24/4 „	Tonkay	65 „ 70
59/4 „	Schin	50 „ 55	131/4 „	Hysant	70 „ 75

For China the market is unaltered, but the transactions are of no importance.

TOBACCO.—In waiting for the auctions there is very little doing. Besides the sales of which I already made mention of, there will be offered on the 7th of October, 3,549 b. Java Soekowono, 1,848 b. F. v. D P., 1,217 b. Java L. C., and 111 b. X, on the 18th October, 4,916 b. which 906 b. KOTTA, 94 b. F. J., 1,868 BLITAR, 403 H. & A. BLITAR, 7 S. S., 659 K. K., 406 J. C. & H. V. R., 519 MERAYOON 54 P. A., and on the 15th inst. at Amsterdam, 2,359 b. Java, Losarie and A. J. Walter.

ARRACK.—50 casks Batavia ex Marie Elise have been sold and 135 do. ex Kennington at private terms.

INDIGO.—The market is very firm, but the transactions are of no importance. Only 10 c. Java were sold.

COTTON.—The market was very quiet and also for manufactures. Maddapollams and Calicots are quoted at former prices:—No. 28 Warps, 12½d.; No. 14, 11¾d.; No. 30 Cops, 11½d.; No. 16, 10¾d.

SILK.—The Dutch Trading Company's sale on the 2nd Oct. includes the following parcels:—478 b. Japan, 156 b. China, and 2 b. Java. The valuation is as follows:—

Bales.		Ko. per bale.	Per ko.
	JAPAN.		
127	Oshio	42 to 59	f.26 to f.40
9	Amatski	45 „ 53	30 „ 38
10	Shida	41 „ 46	31 „ 36
72	Sinchiu	41 „ 57	36 „ 42
18	Maybash ..	45 „ 55	34 „ 40
127	Aechezan ..	24 „ 44	23 „ 32
56	Mino	30 „ 36	23 „ 25
16	Masta	30 „ 32	24 „ 28
5	Sodai	30 „ 32	32 „ 33
7	Sinchiu-Ida ..	30 „ 32	34 „ 36
1	Jama-Mai ..	30 „ 32	24 „ 25
	CHINA.		
97	Tsatlee	47 „ 49	31 „ 34
59	Taysaam ..	47 „ 49	26 „ 30
2	JAVA at 2 ko.		

BANCA TIN.—The sale on the 16th will include 71,476 slabs. The general condition of the market is good. Last week 1,500 slabs were sold at 55f., 200 slabs at 55½f.; 500 slabs Billiton at 53½f.; 500 do. floating at 53½f. Prices in auction will be well maintained, because the production as well in England as in Banca has so much diminished. It is even thought possible that higher prices will be paid ere long.

DRUGS.—Camphor with some transactions at firm prices. Gum Damar: The parcels lately arrived were sold floating. Gutta Percha: On the 1st October 24,000 ko. will be offered for private account. Japan Wax: Very scarce, and high in price.

RATTANS.—160 piculs, ex Tjilingsie, were sold; 2,630 piculs, ex Camperdown and Calamet, will be brought into the market on the 23rd instant.

MONEY.—The demand for discount at the Bank, where still the former rate is maintained, is very limited. In the open market there is no feature. General inactivity prevails still in the Market for public securities. The stagnant state of business, however, does not much affect the prices, and therefore the tone of the market is rather good. The general opinion is that should buyers come forward business will go better; the large amounts of disposable money will certainly strengthen prices. For the moment, however, there is but little demand. Dutch Two-and-a-Half per Cents.,

ARRIVALS.—Sept. 14, at Hellevoet, from Batavia, Niphon; 15, at Brouwershaven, from Batavia, Hendrika; 16, from Batavia, Willem Poolman; from Samarang, Dahlkarlsa.

DEPARTURES.—Sept 17, from Brouwershaveu, for Batavia, Noach II.; 18, from Hellevoet, for Ceylon (via Cardiff), Constantia; 19, from Texel, for Singapore, Estafette; for Padang, Padang packet; 21, from Hellevoet, for Batavia, H.M. steamer Sumatra; 21, from Texel, for Batavia (via Bahia), H.M. steamer Curacao.

PASSENGERS INWARD.—From Batavia, per Twee Cornelissen, Mr. R. F. van Rhyn; per Maria Catharina, Messrs. A. R. de Roode and W. Kamscheur and family; per Willem Poolman, Messrs. P. van Dyk and family; Schipio and family; Kropveld and family; Moet and a child; Leydelmeyer, Mrs. Brandon and daughters.

The Trading Company chartered the following five vessels to convey produce from India to the following ports:—To Amsterdam, Cornelia, Captain de Boer; Sperwer, Captain Huisman; Vooruit, Captain ——; to Dordecht, Triton, Captain Schey; to Schiedam, Constance, Captain Schroot.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, September 24.

Among the more important Bills that have passed the Bundesrath and are now awaiting the confirmation of the German Parliament is one for creating and legalising a Federal flag for all vessels belonging to the Union. Arts. 54 and 55 of the Constitution enact that the merchant vessels of all the Maritime States of Germany are to be fused into one mercantile navy, with one single flag common to all, the colours to be black, white, and red. In the preamble of the new Bill it is stated that the law of nations requires every sea-going vessel to carry a national flag, and lays stress on the importance of its strict execution; for only such vessels as carry a national flag recognised by other maritime States can claim the advantages secured by treaties with other countries both in times of war and peace, in the former case, however, only when neutral. The Bill provides that no German mercantile vessel can be permitted to wear any other national flag than the Federal one, under the penalty of losing her claim to the protection afforded by it, and the risk of being treated as a pirate. The right and privilege of carrying the German Federal flag can only be exercised by those vessels exclusively owned by persons who enjoy the right of settlement in one of the Confederated States; and in the case of joint-stock companies, where the seat of the management is in one of such States. The other clauses of the Bill contain the particulars respecting the ships' registers, the enrolling of seamen, the mode of measuring the capacity and tonnage of vessels, certificates of origin, &c. It is, moreover, enacted that the possession of a register is to be considered sufficient proof of the right to carry the German national flag.

The fair at Nijni-Novgorod is over, the flag having been hauled down on the 26th of August, old style (Sept. 7). The Kiachta tea dealers return home in very depressed spirits, having sold their stocks at a loss and at long credits, varying from twelve to twenty-four months; whilst the cotton and iron merchants are in a similar position, their only hope for the future being bound up in the execution of the Siberian railway that has been projected and commenced. The failure of a large Moscow house, with liabilities to the tune of 2,800,000 silver roubles, was announced during the fair, and tended to increase the general depression. On the termination of the fair a grand banquet was given by the merchants to the Governor of the province, General Odinzow, at which Col. Bogdanowitch, one of the speakers, laid much stress on the necessity of great exertions for the completion as soon as practicable of the great Siberian railway, his remarks being received with vociferous applause.

Herr Niebuhr, Consul at Rangoon for the Hanseatic city of Bremen, has been appointed corresponding member of the Bremen Society for Natural History.

The Japanese Embassy to Switzerland have left that country and proceeded to Holland. Before quitting Berne they expressed themselves much pleased with their visit, and left behind them some valuable presents, among which is a large geographical map of Japan, executed by native artists.

COMMERCIAL.

The increased animation observable last week in the produce markets has been continued ever since, and the prices of most articles are firm. The demand this week for cleaned Rice was particularly lively, and in some instances higher rates were paid. Cassia Lignea remains in favour, and the late advance is fully established. Several parcels of Cloves have changed hands at rather higher rates, and Pepper still commands an easy sale. For Spelter the demand has slackened, and prices have receded a shade; the sales of the week being only 3,500 centners at 14 marks 1 sch. Banco. Discount 1½ to 1¾ per cent. for good paper.

SHIPPING.

ARRIVED.—Astræa, from Rangoon; Mathilde, from Zanzibar.

SAILED.—Christine, to Nagasaki; Ernst, to Hong Kong.

LOADING.—Carl and Auguste, for Singapore; Isabelita, for Manila; Picciola, for Bangkok; Catharina, for Hong Kong; and Pallas, for Shanghai.

Monetary and Commercial.

—o—

The biddings for £100,000 in bills on India were held at the Bank of England. The amounts allotted were to Calcutta £99,500, and to Madras £500. The minimum price was fixed at 1s. 11½d. on Calcutta and Madras—a reduction of 1 per cent. Tenders at 1s. 11½d. will receive about 21 per cent.; those above will be allotted in full. No tenders for bills on Bombay were invited. These results show no active demand, although the price paid, owing to the smallness of the amount offered, is about 1½ per cent. higher than that of a month ago.

At a meeting held lately of the Hong Kong and China Gas Company a dividend of 5 per cent. for the year was declared, and the accounts from Hong Kong were considered very favourable.

A general meeting of the Oriental Bank Corporation will be held on the 24th October, when an interim dividend for the half-year ended the 30th of June last will be declared.

Several of the consignees per *Ajax* still contend that the passage was not performed in 75 days, and that they are entitled to the reduction of 30s. per ton. The shippers are much to blame in not having the bills of lading more clearly defined.

It is stated that the negotiation of the contemplated Hungarian Railway loan for £8,000,000 has been intrusted to the Societe Generale of Paris, and that it is likely to be issued simultaneously in this country, Germany, and France.

It is stated that the surveys ordered by Lord Cranborne of Captain Sprye's proposed telegraph and tramway route from Rangoon to the western frontier of China, a distance of 500 miles, has been completed, and that the results confirm the views expressed as to its practicability. For some years past a strong interest has been taken in the project at nearly all the leading centres of trade in this country, but it has met with great opposition from the Indian officials. On this subject a correspondent writes:—

Would it not be well to ascertain whether a much easier route is not to be found by going right up the Irrawaddy to Bamoo, which is 500 miles above Mandalay, the present capital of Burmah, and less than 200 from the Chinese frontier, and accessible to steamers? In 1863 I went to Mandalay to see the King of Burmah about English steamers going up, and I had no trouble in getting his permission, the truth being that he would be glad to allow anything that promises an increase of revenue. I may mention that I am acquainted with the navigation of the Ganges, Berhampooter, and the Irrawaddy, and that of these three great rivers I consider the last to be the least difficult.—I am, Sir, your obedient servant, W. C. P.

The bills of Messrs. J. Hewitt and Co., of Liverpool, cotton importers, have been returned. The firm held a good position in the trade, and it is feared the engagements may reach from £250,000 to £280,000. Nothing definite has transpired with respect to property.

The announcement alluded to in our last issue that Mr. William Chappell, silk broker, of Coventry, through inability to meet his engagements, had been compelled to call his creditors together, has we regret to learn been followed by the suspension of payment by Messrs. Peters and Warburton, ribbon and smallware manufacturers, of Coventry and London. In each case the liabilities are said to be about £80,000. With reference to the failure of these firms the *Birmingham Gazette* states:—

There can be no doubt that these mercantile embarrassments are attributable much less to actual depression in the silk trade than to the collapse of a system of accommodation bills for some time past carried on by these houses, and some smaller ones in Coventry, together with one or two firms in the North of England, and several houses in London. It may be reasonably hoped, however, that the stoppage of most of the firms which have been engaged in it—though productive at the time of much suffering and precuniary loss to many classes of trades people—having effectually weeded out the "shaky" establishments, will in the end be beneficial to the legitimate trade of the city.

The following extract is from the *Produce Markets Review* in reference to a letter which appeared in the *Japan Times* signed "R. C. B.":—

"It will be seen that 'R. C. B.' in reality does little to meet what we said, but raises so many side issues, that it is difficult to see the exact point of his letter. He meets our suggestion, that the time may come when tea-tasters will be drawn from a more practical class—by saying that the class from which they are now drawn is sufficiently practical, and that the social harmony in the hongs would be interrupted were an inferior class of men employed. The first is a question of fact of which merchants alone can judge, and so far as 'R. C. B.'s' testimony goes, he is rather unfortunate, for Messrs. F. Huth and Co. than whom none can be better acquainted with the subject, appear to think that the losses in tea are in great measure due to the enormous speculations of tea-tasters; and if so, we may fairly infer that the latter have not a sufficient acquaintance with their business. The second point he raises is one of feeling, which has nothing to do with the purchase of teas. The tea market is now in London, and not in China; and the buyers here are anxious to obtain much more knowledge than they have hitherto possessed of the manner in which trade is conducted in China. It is so difficult to obtain this information that very slight and imperfect statements have to be relied upon, and we should only be too happy to acknowledge ourselves wrong if some of our readers in China would take upon themselves the task of pointing out our errors, or supplying us with such information as it may be in their power to give."

The amount of bullion by the P. and O. Company's steamer

Digitized by Google

Bangalore from Southampton on the 20th inst., was in gold, to Alexandria, £10,000; to Galle, £100; to Madras, £939; in silver, to Hong Kong, £25,486; to Shanghai, £2,580; total in gold, £11,039; in silver, £28,066.

The report of the Mauritius Land Credit and Agency Company (Limited) shows an available total of £2,579, and recommends a dividend of 2s. per share, making, with the distribution in March, a total of 10 per cent. for the year. This will absorb £1,250, and after appropriating £1,200 to preliminary expenses a balance of £129 will remain to be carried forward. In the course of next year another £2 per share is intended to be called up.

A petition for the winding up of the Ceylon Coffee Estates Company (Limited) is to be heard before Vice-Chancellor Malines on the 8th November.

The accounts from Manchester report the suspension of Messrs. H. and A. Warrens, but their liabilities are understood to be moderate.

A prospectus has been issued of the Clerks' Dining Company, which has been formed to open establishments in the city to provide shareholders and subscribers with shilling dinners, and to supply provisions for home consumption on equally economical terms. The proposed capital is £20,000, in shares of £1 each, one-fourth to be paid up.

EXPORTS TO THE FAR EAST.

We have received Mr. Sam Mendel's tables, giving the total export of Cotton Goods from the ports of London, Liverpool, Southampton and the Clyde, to China, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and nine months ended 16th September, compared with the corresponding periods of the two previous years.

TO HONG KONG AND WHAMPOA.—For the month ended 16th Sept., 1867: Plain Cottons, 7,326,385; Coloured Cottons, 226,459; Printed Cottons, 78,300 yards; Cotton Yarn, 1,014,188 lbs.; total value of Cotton Goods, £211,609. For the nine months ended 16th Sept., 1867: Plain Cottons, 29,915,080; Coloured Cottons, 1,688,786; Printed Cottons, 467,647 yards; Cotton Yarn, 4,612,654 lbs.; total value of Cotton Goods, £1,083,582. Decrease in value for 1867 against 1866, £68,612. For the nine months ended 16th Sept., 1866: Plain Cottons, 29,910,208; Coloured Cottons, 3,330,779; Printed Cottons, 552,662 yards; Cotton Yarn, 3,460,988 lbs.; total value of Cotton Goods, £1,152,194. For the nine months ended 16th Sept., 1865: Plain Cottons, 22,769,350; Coloured Cottons, 2,283,435 yards; Cotton Yarn, 1,133,600 lbs.; total value of Cotton Goods, £665,075.

TO SHANGHAI.—For the month ended 16th Sept., 1867: Plain Cottons, 14,906,655; Coloured Cottons, 277,926; Printed Cottons, 603,268 yards; Cotton Yarn, 104,300 lbs.; total value of Cotton Goods; £306,904. For the nine months ended 16th Sept., 1867: Plain Cottons, 74,200,523; Coloured Cottons, 7,699,392; Printed Cottons, 3,621,984 yards, Cotton Yarn, 369,232 lbs.; total value of Cotton Goods, £1,745,743. Decrease in value for 1867 against 1866, £508,984. For the nine months ended 16th Sept., 1866: Plain Cottons, 80,613,680; Coloured Cottons, 9,404,357; Printed Cottons, 3,540,674 yards; Cotton Yarn, 48,800 lbs.; total value of Cotton Goods, £2,254,727. For the nine months ended 16th Sept., 1865: Plain Cottons, 58,247,817; Coloured Cottons, 4,093,968; Printed Cottons, 1,590,191 yards; CottonYarn, 74,000 lbs.; total value of Cotton Goods, £1,389,495.

TO JAPAN.—For the month ended 16th September, 1867: Plain Cottons, 1,144,875; Coloured Cottons, 113,984; Printed Cottons, 36,000 yards; Cotton Yarn, 391,580 lbs.; total value of Cotton Goods, £56,793. For the nine months ended 16th September, 1867: Plain Cottons, 13,216,520; Coloured Cottons, 2,708,621; Printed Cottons, 636,802 yards; Cotton Yarn, 2,038,529 lbs.; total value of Cotton Goods, £512,878. Decrease in value for 1867 against 1866, £224,319. For the nine months ended 16th September, 1866: Plain Cottons, 19,958,218; Coloured Cottons, 2,290,629; Printed Cottons, 2,219,431 yards; Cotton Yarn, 1,812,910 lbs.; total value of Cotton Goods, £737,197. For the nine months ended 16th September, 1865: Plain Cottons, 1,556,116; Coloured Cottons, 953,441; Printed Cottons, 966,688 yards; Cotton Yarn, 251,100 lbs.; total value of Cotton Goods, £329,086.

TO SINGAPORE AND PENANG.—For the month ended 16th Sept., 1866: Plain Cottons, 7,575,752; Coloured Cottons, 695,135; Printed Cottons, 476,468 yards; Cotton Yarn, 498,046 lbs.; total value of Cotton Goods, £199,999. For the nine months ended 16th Sept., 1867: Plain Cottons, 45,256,026; Coloured Cottons, 7,071,631; Printed Cottons, 3,513,041 yards; Cotton Yarn, 1,858,853 lbs.; total value of Cotton Goods, £1,286,797. Increase in value for 1867 against 1866, £74,428. For the nine months ended 16th Sept., 1866: Plain Cottons, 37,539,616; Coloured Cottons, 5,485,012; Printed Cottons, 3,210,166 yards; Cotton Yarn, 1,252,577 lbs.; total value of Cotton Goods, £1,212,369. For the nine months ended 16th Sept., 1865; Plain Cottons, 26,717,400; Coloured Cottons, 3,604,074; Printed Cottons, 1,556,665 yards; Cotton Yarn, 999,885 lbs.; total value of Cotton Goods, £745,843.

TO BATAVIA.—For the month ended 16th September, 1867: Plain Cottons, 2,708,626; Coloured Cottons, 635,455; Printed Cottons, 1,539,494 yards; Cotton Yarn, 65,110 lbs.; total value of Cotton Goods, £113,986. For the nine months ended 16th September, 1867: Plain Cottons, 14,207,719; Coloured Cottons, 11,051,504; Printed Cottons, 11,388,004 yards; Cotton Yarn, 468,364 lbs.; total value of Cotton Goods, £878,321. Decrease in value for 1867 against 1866, £120,145. For the nine months ended 16th September, 1866: Plain Cottons, 24,118,186; Coloured Cottons, 8,026,422; Printed Cottons, 7,259,539 yards; Cotton Yarn, 505,608 lbs.; total value of Cotton Goods, £998,466. For the nine months ended 16th September, 1865: Plain Cottons, 12,470,958; Coloured Cottons, 4,219,200; Printed Cottons, 6,054,824 yards; Cotton Yarn, 446,600 lbs.: total value of Cotton Goods, £546,287.

TO MANILA.—For the month ended 16th September, 1867: Plain Cottons, 925,270; Coloured Cottons, 1,135,622; Printed Cottons, 19,730 yards; Cotton Yarn, 34,000 lbs.; total value of Cotton Goods, £49,127. For the nine months ended 16th September, 1867: Plain Cottons, 12,156,924; Coloured Cottons, 12,537,486; Printed Cottons, 746,194 yards; Cotton Yarn, 134,626 lbs.; total value of Cotton Goods, £630,602. Increase in value for 1867 against 1866, £180,450. For the nine months ended 16th September, 1866: Plain Cottons, 7,555,381; Coloured Cottons, 8,958,801; Printed Cottons, 492,365 yards; Cotton Yarn, 46,588 lbs.; total value of Cotton Goods, £451,152. For the nine months ended 16th September, 1865: Plain Cottons, 10,759,287; Coloured Cottons, 11,077,730; Printed Cottons, 951,752 yards; Cotton Yarn, 91,852 lbs; total value of Cotton Goods, £546,195.

TO CEYLON.—For the month ended 16th September, 1867: Plain Cottons, 423,539; Coloured Cottons, 65,903; Printed Cottons, 37,600 yards; Cotton Yarn, 17,240 lbs.; total value of Cotton Goods, £13,784. For the nine months ended 16th September, 1867: Plain Cottons, 12,419,972; Coloured Cottons, 1,069,060; Printed Cottons, 1,958,790 yards; Cotton Yarn, 185,235 lbs.; total value of Cotton Goods, £362,306. Decrease in value for 1867 against 1866, £185,607. For the nine months ended 16th September, 1866: Plain Cottons, 13,326,523; Coloured Cottons, 1,268,906; Printed Cottons, 3,632,937 yards; Cotton Yarn, 709,357 lbs.; total value of Cotton Goods, £547,913. For the nine months ended 16th September, 1865: Plain Cottons, 5,907,275; Coloured Cottons, 1,031,291; Printed Cottons, 812,532 yards; Cotton Yarn, 158,222 lbs.; total value of Cotton Goods, £214,728.

ARTICLES OF IMPORT.

TEA.—The Ariel, Fiery Cross, and Maitland have arrived from Foo-Chow; the Sir Lancelot, from Shanghai; the Belted Will, from Canton; and the samples are mostly on show. The amount of business in the new Teas first in per Ariel, &c., has been moderate, the trade buying very sparingly, although the quality is liked better than the Taeping teas; the finer grades of Kaisow and Pak Ling have met with most attention, up to 2s. 6d. per lb. for Kaisow, and 2s. 7d. for Pak Ling kinds, the latter in boxes has been paid, the greater part ranging from 1s. 10d. to 2s. 2d. per lb. Scented Orange Pekoes have sold at 2s. 4d., Capers at 2s. 2d., and Oolongs at 1s. 11d. to 2s. 3d. Congous: Siftings, both black and red leaf kinds, show no change in prices, the demand being quiet. Broken-leaf kinds remain as before. Fair to good common have been sold to some extent at 11½d. to 11¾d. per lb. Fair to good flavoury kinds are only in limited demand at about previous prices. Good to fine Kaisows, of old import, have sold in moderate quantity at from 1s. 7d. to 1s. 11d. per lb. Common black-leaf kinds have sold from 11½d. to 11¾d. per lb. Fair to good show no change, being only saleable at low prices. Fine, of old import, have sold at public sale at former prices. The new teas, per Ajax, have not sold readily in the country; the few parcels left unsold cannot now be quitted at former prices. In new-make Canton kinds some sales have been made from 1s. 3d. to 1s. 5d. per lb. In Oolongs, new seasons, ex Taeping, have found buyers at from 1s. 11d. to 2s. 4d. per lb. for good to fine quality. In Souchongs there has been but little done, and prices show no material alteration Scented Capers remain without alteration. Some large parcels of Orange Pekoe, of old season, have been sold from 1s. to 1s. 5d. per lb., being rather lower prices. New season's Foo Chow have commanded high prices for the small quantity arrived, say 2s. 5d. to 2s. 8d. per lb. Uncoloured Japans remain as before, the demand being limited. Green Teas.—The amount of business has been small in the absence of fresh supplies, but the prices of all the better kinds are well maintained, but the commoner sorts still remain comparatively dull of sale. Some further supplies of Canton Gunpowder are to hand in the Belted Will, but at present we do not hear of sales being made.

SILK.—The position of the Silk market has not improved; there has been more eagerness on the part of importers to sell, resulting in some little business at a further decline in prices. China Silk: Chop Tsatlees, owing to their comparative scarcity, are firmly held, but all other descriptions must be quoted lower. In Japans business has been very limited; some few bales of new Mibash have arrived, but they are not of tempting quality. Deliveries from 1st to 24th inclusive: China, 1,570 bales; Japan, 424 bales; total, 1,994 bales.

COTTON.—A better demand has been experienced since our last report than for some time previously, and a fair amount of business has been transacted at the former quotations, which are firmly maintained at the close of the market. Sales have amounted to 4,495 bales on the spot and 300 bales to arrive. The stock is 108,631 bales, including 177 bales China and Japan.

COFFEE.—More liberal supplies of Plantation Ceylon have been offered, and mostly taken off, with great irregularity in prices, averaging, however, 1s. per cwt. lower, the greatest decline being on the common qualities. The result of the Dutch Company's sale, of which particulars are given below, has caused further depression in the market for Native Ceylon, and, even at a reduction of 1s. to 2s., there are few buyers. East India sorts continue to be freely offered, and previous prices are not obtainable. By private contract 200 casks Plantation, and 500 bags Native have been sold, and at the auctions 3,715 casks, 195 barrels, 1,060 bags Plantation realised 68s. to 72s. for low to medium; 73s. to 79s. for middling to good middling; and 80s. to 85s. 6d. for bold colory; and of 120 casks, 8,600 bags Native offered only a portion sold at 58s. to 65s. for good to fine bold; 56s. to 56s. 6d. for good ordirary; and 54s. 6d. for good ordinary mixed. Of Singapore 258 bags realised 45s. to 50s. The Dutch Trading

Digitized by Google

Company's sale of 127,500 bags on the 18th inst. went off without spirit at ½ to 1 per cent. below the valuations; good ordinary Java, 38½ cents.

CAMPHOR.—We have only to report a limited business in China at unchanged rates.

GALLS.—Improved demand has been manifested for China and Japan, about 60 cases of the former realising 60s. and 108 cases of the latter 55s. per cwt.

GAMBIER.—Firm, with moderate private trade at 24s. 6d. to 26s. for cubes, and 17s. 6d. to 19s. 6d. for block. No business at the auctions.

INDIA-RUBBER.—Small sales of Borneo are reported at 1s. 3d. per lb.

JAPAN WAX.—The market for this import presents a steady appearance, and 126 boxes at auction realised 80s. to 81s. 6d. for fair slabs.

MANILA HEMP.—The market continues extremely quiet, and beyond a small transaction in good roping at £50 per ton there is no business to report.

PEPPER.—Black: The low quotations ruling in this market, together with the fact of the supplies afloat being so much less than at same date last year, have led to some speculative demand, and prices have advanced about ½d. per lb., at which enhancement the market is firm. The public sales have comprised 1,560 bags Singapore, which sold at 8½d. to 8¾d. for good, and 8½d. to 8¾d. for greyish; 1,060 bags Penang part sold at the previous value—2¾d. to 3d. for West Coast. Privately, about 10,000 bags Singapore and Penang have changed hands, part of the former being afloat, at 8½d. to 8¾d., the latest sales being at 8¾d., and the Penang at 3d., with a few at 3d. to 3½d. per lb. White: The very large quantity brought to auction, being about half the stock held here, met with a much better result than was generally anticipated; both home trade and export buyers operating freely at prices which were not more than ⅛d. to ¼d. per lb. below the previous currency. The auctions comprised 2,650 bags Penang, which all sold at 4½d. to 4⅝d. for low, 4⅝d. to 4¾d. for mixed, and 4¾d. to 4⅞d. for good bold quality, and 950 bags Singapore were part sold at 4½d. to 5d. per lb. for fair quality.

PLUMBAGO.—There is still a steady demand, and of 990 barrels Ceylon at auction about one third sold at 12s. 6d. to 20s. per cwt. for ordinary to fair lump and 9s. 6d. to 11s. 6d. for dust.

RICE.—The market continues firm, and the sales effected have been of fair extent at fully previous rates—viz., on the spot and landing 8,000 bags Bassein at 11s. 7½d., 4,000 bags Rangoon at 11s. 9d. to 11s. 10½d., and 4,000 bags white Bengal at 16s. to 16s. 9d. For arrival 150 tons Dacca and broken white Bengal at 12s. 6d. to 13s. landed, and 1,000 tons Ballam at 10s. 9d. to 12s. ex ship; 1,000 tons Rangoon, June sailing, at 11s. 6d. for Liverpool, 600 tons Nakrenzie, August sailing, at 11s. 6d., continental terms, and further 2,500 tons soft grain of the new crop at 10s. 6d., 10s. 9d., or 11s., for Arracan, Bassein, or Rangoon, respectively.

RHUBARB.—Of 148 chests China, at the auctions, two-thirds sold at 5s. to 5s. 8d. per lb. for fair, and 1s. 3d. to 3s. 6d. for low to ordinary.

RATTANS.—With a steady market we have to report the sale of 5,705 bundles Penang, at 3s. to 4s. 5d. per hundred.

SUGAR.—At the opening the market had a very quiet tone, and business was on the smallest possible scale, but without material change in prices; towards the close, however, a strong demand has sprung up for British West India, and large transactions have been effected mostly at full rates. For the few floating cargoes on offer good bids are made, and fully previous prices have been paid. In East India there has been no business at the public sales, and by private contract the only transaction reported is in 450 bags Penang at 31s. 6d. per cwt. The imports of raw sugar into the four chief ports of the United Kingdom to the 14th September were 414,900 tons, against 408,360 tons in 1866. The clearances for home consumption were 377,230 tons, against 341,340 tons. The stock was 206,260 tons, against 245,240 tons.

SAPANWOOD.—The market is steady, and 14 tons Ceylon sold at £8 2s. 6d. to £8 17s. 6d. per ton.

SPICES.—Cloves: The Zanzibar descriptions are in request, and for a small quantity at auction full prices were obtained, but the Penang qualities have been disposed of at rates rather favourable to buyers. The public sales comprised 200 bags Zanzibar, which part sold at 3⅜d. to 3½d., and 11 cases Penang at 11½d. for good, and 9d. per lb. for common quality. Cinnamon: Of Ceylon 13 bales sold at 1s. to 1s. 7d. per lb. Mace: There is not any change to report in the value; holders continue firm, and the few packages sold during the past fortnight have brought full quotations. The public sales have contained 14 cases Penang, which were part sold at 1s. 11d. to 2s. for common, and 2s. 6d. to 2s. 8d. per lb. for middling mixed. Nutmegs: The market continues steady, and for the quantity sold at auction full rates have been obtained. The present stock, which amounts to 1,860 packages, shows a decrease of about 1,000 packages when contrasted with the average of the four previous years. The public sales have comprised 60 cases Penang, part of which sold at 2s. for 79, 1s. 9d. to 1s. 10d. for 84, 1s. 5d. to 1s. 7d. for 93 to 95, and 1s. 3d. to 1s. 4d. for 99 to 110 to the lb.

TAPIOCA.—Of Penang 304 bags sold at 5d., and of Singapore 22 bags at 4¾d. per lb.

TERRA JAPONICA.—The market for Cutch is slightly lower, and 1,036 boxes good to fine Pegu realised 34s. to 35s. 6d. per cwt.

TIN.—This market presents a highly improved appearance. Large business has been done in floating, as well as in landed parcels, and rates have risen £2 per ton, the latest quotations being Banca £95, and Straits £92 cash; and Straits for distant arrival, £93.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 7s. 6d. to £6 10s.; nail rods, £7 10s. to £7 15s.; hoops, £8 10s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 10s. to £7 15s.; rails, £6 5s.

STEEL.—Swedish kegs, £15 to £15 10s.

COPPER.—Sheet and Sheathing, £84 per ton; yellow metal, 7d. to 7¼d. per lb.

LEAD, &c.—English pig, W.B., £21 15s.; shot, patent, £23; sheet, £20 15s.; spelter, £21 to £21 7s. 6d.; zinc, English sheet, £26 to £26 10s.; quicksilver, £6. 17s., in bottles of 75 lbs. each.

[The following is from the circular of Messrs. French and Smith:—A moderate business is transacting. Iron is unchanged. Copper rather easier. The charters from Chili, reported by mail just arrived, amount to about 1,400 tons pure Copper, of which 580 only are bars. Lead steady. In other Metals no alteration.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

MANCHESTER MARKETS.

(17th.) The dulness reported on the 10th inst. gave way to a more cheerful tone, with increased sales, and to some extent for forward delivery. (24th.) The improvement is not maintained; prices are again weaker and in favour of buyers, without being quotably altered. Quotations are:—Grey Shirtings 7lbs., 7s. 10½d. to 8s. 3d.; 8½lbs., 10s. 6d.; Cotton Yarn, Nos. 16-24, 1s. 1¾d. to 1s. 2½d.; Nos. 28-32, 1s. 3d. to 1s. 3¾d.; Maddapollams, 3s. 7½d.; Long Cloths, 9s.; T-Cloths, 6s. 1½d.; White Spot Shirtings, 10s. 10½d.

LEEDS, 26th Sept.—Messrs. Jorss' circular says there is not even the smallest amount of enterprise to be seen anywhere, while speculation has been quite out of the question for some time. The general opinion undoubtedly is, that we have seen the lowest point which it is possible to reach; but, notwithstanding this generally conceived idea, everybody seems afraid to act upon it. Moreover, we are now between the seasons, which, as the old contracts in hand are almost *nil*, still further depress our Market unduly. Even the most ruinously low prices fail to secure orders for the manufacturers, and a more complete stagnation we have never witnessed. Notwithstanding the considerably higher cost of the raw material, both cotton and wool, prices are now absolutely lower than they were before the American war broke out.

FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports are a trifle firmer; coal freights from the Northern outports have a slight downward tendency.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £45. For Singapore: £34. For Shanghai: £56. For Saigon: £50. For Yokohama: £50. For Batavia: £27. For Colombo, £29. For Galle, £35. For Chefoo, £57. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 5s. For Singapore: £1 15s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 12s. For Chefoo, £2 15s. For Trincomalee, £1 17s. For Galle, £1 13s. For Colombo, £1 9s. For Manila, £1 15s.

The Admiralty have invited tenders for the conveyance of 115 tons navy provisions, &c., from the Thames to Hong Kong, and of 1 ton medical stores and 40 tons provisions, &c., to Trincomalee.

CASUALTIES.

The Mount Stuart Elphinstone, Freebody, which sailed from London Sept. 7, for Galle, put back to Deal Sept. 16, leaky; she proceeded on the 17th, but put back again to the Thames on the 19th, leaking.

The Jamaica, from Glasgow for Java, arrived at Mauritius Aug. 14, with chainplates carried away, and one pump choked, having experienced a strong W. gale, July 17, in 37 S., 32 E.

The Albrecht Beyling, v. d. Berg, from Batavia to Schiedam, was spoken leaky, Aug. 10, in lat. 13 N., lon. 30 W.

The Maria y Vicenta, Hormachea, from Manila to Havana, arrived at St. Helena, July 6, slightly damaged in topside, but sailed, 10, for Havana after caulking.

The Englishman, from Newport for Hong Kong, put in at St. Helena, leaky, Aug. 20; she had been surveyed and recommended to discharge until the cause of the leak was ascertained.

The Majestic (ship), from Glasgow to Batavia, arrived at St. Helena, Aug. 4, very leaky, having encountered very heavy weather on the passage. She had been twice surveyed, discharged a portion of her cargo, and had been recommended to continue discharging for further examination.

The damaged cargo ex Salatiga, Ketteler, from Batavia to Rotterdam, which put in at St. Helena, leaky, July 23, has been sold there.

The St. Jan, Lommerse, from Batavia to Schiedam, with coffee, sugar, &c., which put into Simon's Bay, July 31, with damage to bulwarks, &c., was a good deal strained, having experienced very heavy weather from the 12th to the 23rd July, between Cape Agulhas and Recife. Her cargo had been discharged and a portion of it sold in a damaged state.

Advices from Port Elizabeth, dated Aug. 13, state that the Krimpenerwaard, Kluit, from Batavia to Rotterdam, which was towed in here, July 22, leaky, parted from her moorings during a south-east breeze, and went ashore near the Port-office; about half of her cargo, consisting of coffee and sugar, had already been discharged and the damaged portion sold.

MISCELLANEOUS.

At Ascension, Aug. 29, Contest, from Colombo, and sailed 30th for London; 21, Engel, Appel, from Batavia, for Amsterdam; 26, Flying Spur, from Foochow, for London; 31, Bilderdyk, from Batavia, for Amsterdam.

AT ST. HELENA.—July 6, Maria y Vicenta, Hormachea, from Manila, and sailed 10 for Havana; Aug. 7, Henrietta, Degori, from Batavia, and sailed 8 for Amsterdam; 9, Wykaan Zee, Mannoury, from Batavia, and sailed 10 for Amsterdam; Kosmos, Matthieson, from Macao, and sailed 10 for London; 10, Angela, Onate, from Manila, and sailed 12 for London; Kandanghauer, Zeelt, from Batavia, and sailed 12 for Amsterdam; 12, Summer Cloud, Boysen, from Singapore, and sailed 13 for London; 13, Helena and Henrietta, Deterding, from Batavia, and sailed 14 for Amsterdam; 19, Sophia Kon der Nederlanden, Klein, from Batavia, and sailed for Amsterdam: Osaca (s.), Maddison, from London, and left for Table Bay and Japan; 20, Maria Veronica, Shcol, from Batavia, and sailed 21 for Amsterdam; Betty, Chevalier, from Batavia, and sailed 22 for Amsterdam; 25, Azia, Trappen, from Batavia, and sailed 26 for Amsterdam; 26, Ægidia and Paulina, Hoogland, from Batavia, and sailed for Dordt; 27, Nouvelle Penelope, Vigoureux, from Saigon, and sailed for Havana; Gerardina Wilhelmina, van der Zee, from Padang; 28, Crawshay Bailey, Hansenberg, from Shanghai; Englishman, from Newport, for Hong Kong; Maarten v. Rossem, from Batavia, for Rotterdam.

At SIMON'S BAY.—Aug. 3, Hermione, Ropert, sailed for Japan.

At MAURITIUS.—Aug. 7, Eugenie (s.s.), Dixon, from London, for Nagasaki, put in for medical aid 14; Jamaica, Gast, from Glasgow, for Java, requiring repairs.

The Leander, a China clipper of the first-class, was launched on the Clyde on Saturday, by Mr. J. G. Lawrie. The Leander, the property of Frederick Somes, Esq., of London, is a composite ship, 210 feet long between the perpendiculars, 35 feet 2 inches breadth of beam, and 20 feet 8½ inches depth of hold.

The P. and O. Company's steamer Poonah has completed her repairs in the Thames, and will shortly take up her post on the Alexandria line.

The P. and O. Company's new steamer Sumatra will take out the Bombay mails of the 12th Oct.

PORT OF AMOY.
CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

NOTICE TO SHIPOWNERS.
SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c.

Apply at the Offices of Messrs. PATERSON, SIMONS, and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

W. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1867.

THE AGRA BANK (LIMITED).

ESTABLISHED IN 1833.—CAPITAL, £1,000,000.

HEAD OFFICE—Nicholas-lane, Lombard-street, London

BANKERS.

Messrs. Glyn, Mills, Currie, and Co., and Bank of England.

BRANCHES in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

CURRENT ACCOUNTS are kept at the Head Office on the terms customary with London bankers, and interest allowed when the credit balance does not fall below £100

PATENT IMPROVED ICE-MAKING MACHINES,

FOR THE

MANUFACTURE OF ICE ON A LARGE SCALE.

TEN TO TWENTY POUNDS OF ICE MADE AT THE COST OF ONE PENNY.

SINCE the first introduction of these Machines to public notice, the Manufacturers' long experience has enabled them to effect many important improvements, largely increasing their simplicity of management and solidity of construction.

The materials employed in the production of ice are used over and over again without appreciable loss. There is no danger attending the process.

A trial of each Machine to produce the quantity of ice stated is made when so desired by the purchaser.

Hospitals, Hotels, Barracks, or other Buildings may be cooled to any temperature.

These Machines produce from ten hundredweight to twelve tons per diem, and are numerously established in all parts of the world.

Her Majesty's Government of India employ this apparatus (see official report thereon).

The Peninsular and Oriental Steam Navigation Company possess SIEBE'S large Machines at their principal Indian stations. Copies of reports upon the working of these Machines, and testimonials, will be sent on application.

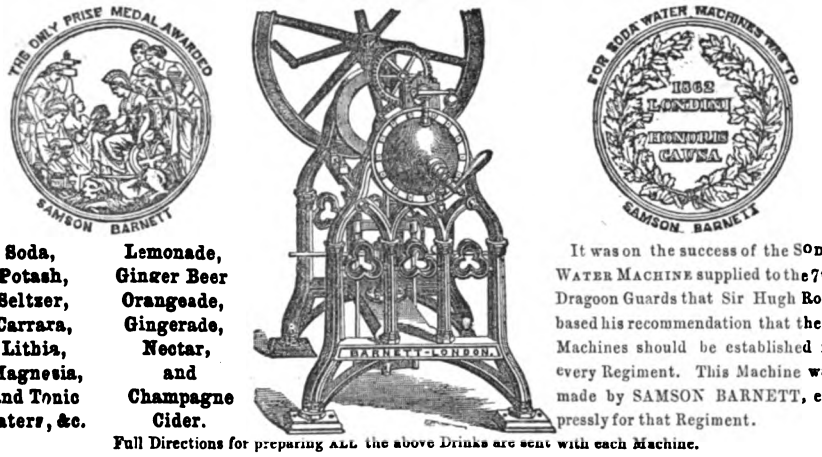
SIEBE BROTHERS desire to say that an undertaking of this nature is not to be regarded as a mere speculation, but as the purchase of tried and valuable machinery, constituting a lucrative business, returning exceedingly large profits upon the amount invested.

For terms and other information apply to the Manufacturers, or to Messrs. SMITH, ELDER, and Co., 65, Cornh

SIEBE BROTHERS,

General Engineers, Coppersmiths, Manufacturers of all kinds of Air and Water Pumps, Diving Apparatus, Steam Engines, &c.,

MASON-STREET. LAMBETH. LONDON.



Soda, Potash, Seltzer, Carrara, Lithia, Magnesia, and Tonic Waters, &c.

Lemonade, Ginger Beer Orangeade, Gingerade, Nectar, and Champagne Cider.

It was on the success of the SODA WATER MACHINE supplied to the 7th Dragoon Guards that Sir Hugh Ross based his recommendation that these Machines should be established in every Regiment. This Machine was made by SAMSON BARNETT, expressly for that Regiment.

Full Directions for preparing ALL the above Drinks are sent with each Machine.

SAMSON BARNETT, 23, Forston-street, Hoxton, London,

Above Twenty Years Foreman to Messrs. TYLOR,

FROM 30 years' manual practice in the above branch, and having constructed most of the Machines now at work in various parts of the world, is enabled to offer the most complete and durable machinery, and by confining his manufactory to only two branches, namely, SODA WATER MACHINES and DIVING APPARATUS, and his whole attention being given to these branches, it must be obvious that every part has been the subject of his most careful study, so that any derangement of parts can hardly occur. All the machines made by S. BARNETT are constructed under his own superintendence, and proved to four times the pressure they are ever required to be worked at. S. B., being so well aware of all the requirements of persons using machinery where MECHANICAL ASSISTANCE CANNOT BE OBTAINED, has paid full attention to this point, as the great number of testimonials in his possession will prove. He has also lately introduced larger condensers, and more powerful frames than those previously in use, while his prices have not been increased.

Bostonite Music Slates, 6d. each.
Bostonite Purses, from 1s. 6d. each.
Bostonite Multiplication Tablets, 4d. each.

HOLLOWAY'S PILLS.—The blood being the very essence of health and life, it is most essential that it should be thoroughly purified before the depressing influences of winter display themselves. These Pills will accomplish this purification in a safe and satisfactory manner, and put the circulation in that desirable condition which alone can rightly form flesh, bone, muscle, nerve, and skin. Capricious appetites, weak digestions, torpid liver, and irregular bowels are corrected by this potent medicine, which may be truly said to give a sane mind in a sound body. Holloway's Pills possess the remarkable property of cleansing without weakening, while purifying they are strengthening and adding to those enjoyments of life which health and vigour can alone bestow.

DYSENTERY, CHOLERA. FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn o.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.
The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any rvice in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR J. COLLIS BROWNE'S CHLORODYNE
is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE.
is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE.
EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE.
CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

JAMES HENNESSY AND CO.--COGNAC BRANDY.

TRADE MARK.

NUMEROUS COMPLAINTS having reached us directly and through our AGENTS,
MESSRS. TWISS AND BROWNING, OF LONDON,
OF THE
IMITATION AND PIRACY OF OUR LABELS ON BOTTLED BRANDY,
We beg to inform the Australian Public that the
COPYRIGHT OF OUR LABLE, WITH THE BATTLE AXE (OUR TRADE MARK)
IS REGISTERED AT STATIONERS' HALL, LONDON,
And that any PIRACY of it subjects the party to HEAVY PENALTIES, either in England or the Colonies. We have, therefore, given orders that ALL PERSONS FRAUDULENTLY USING OUR LABELS, or COLOURABLE IMITATIONS thereof, WILL BE PROSECUTED as the Law directs.

JAS. HENNESSY AND Co., COGNAC.

PIANOFORTES.—CAUTION.

THE undersigned beg to caution purchasers of Pianos against a fraudulent use of their names. Genuine "Allison" Pianos should all bear the names of "RALPH ALLISON and SONS," and their Trade Mark, a Globe.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painted

Each Cask of Pure White Zinc is stamped "HUBBUCK, LONDON, PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships, and Buildings exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard, and certain drier for White and Light Coloured Paint.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

PEACOCK AND BUCHAN'S COMPOSITIONS FOR KEEPING OFF BARNACLES, WEEDS, &c.

THIS is now established as the BEST and CHEAPEST known for protecting ships bottoms from galvanic action or fouling. It is used on the ships of the "Peninsular and Oriental," "Royal West India," "Panama and New Zealand," "Pacific Steam," and other Royal Mail Companies; also on foreign ships of war, and in H.M.'s Royal Dockyards. Apply to the Manufacturers direct, SOUTHAMPTON, or to their accredited Agents at all the seaports of the world.

Extract from the "Standard" of October 18th, 1866

"COMPOSITION FOR IRON SHIPS' BOTTOMS.—It appears that the iron turret ship 'Huascar,' on Captain Cowper Coles' plan, and fitted with his patent trimod masts, &c., belonging to the Chilian Government, before leaving England was coated on her bottom with Messrs. PEACOCK and BUCHAN'S last Improved Composition for protecting the plates and rivets, and keeping off shell fish, &c., and which has given such entire satisfaction that they, the said Government, have just ordered *five* tons of the material to be sent out to the Arsenal at Valparaiso for the use of their Iron Fleet in the Pacific. The Spanish Government have also ordered a considerable quantity of this composition for the use of their Iron Fleet."

Extract from the "Greenock Advertiser" of October 11th, 1866.

"ANTI-FOULING COMPOSITION.—The ship 'Ceres,' of Greenock, lately reached this port after a two years' voyage, and has been put into Dock to receive a fresh coating of Messrs. PEACOCK and BUCHAN'S (of Southampton) Patent Composition. The vessel was coated with it at London, in 1863, and sailed thence to Melbourne, Calcutta, Bombay, and Greenock, and on her arrival here the copper was quite clean and clear of barnacles, and has thus saved a very heavy per centage of wear and tear. We understand that the local agents, Messrs. Macallister and Fyfe, have received a letter from Captain M'Kenzie, of the "Hooyland," of Glasgow, stating that on his ship's return from a voyage to Surinam the copper, which had also been coated with this Composition, was perfectly clean."

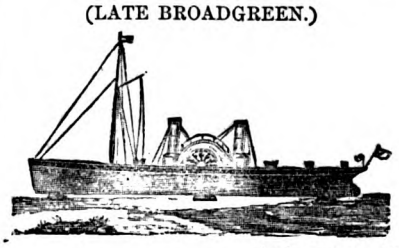
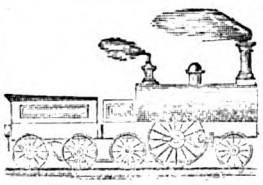
STEAM ENGINES, SCREW AN PADDLE STEAMERS, &c.

Elegant, Useful, and Instructive Presents

Catalogue free on application to

GEO. RICHARDSON & CO.,
Central Chambers, 17, South Castle-street,
LIVERPOOL.
(LATE BROADGREEN.)





An immense variety of Vertical, Horizontal, Locomotive, and Marine Steam Engines from 6s. 6d. to £5 each. Metallic Model Screw and Paddle Steamers and Sailing yachts from 5s. to £20 each. All thoroughly tested previous to despatch.

TESTIMONIALS.

From LORD BROUGHAM.

I think very highly of your Telescope as a powerful Instrument, and am quite astonished at the very moderate price you have put upon it.

From D. CRIGHTON, Esq., Forfar, N.B.

I have thoroughly tested your £2 2s. Model Steam Engine, with which my boys are highly delighted; the material and workmanship are excellent, and being quite safe, I don't know of a more useful and instructive mechanical gift for young lads.

From the Hon. F. G. WYNNE.

The Hon. F. G. Wynne is highly pleased with the 17s. 6d. Vertical Engine; it is remarkably cheap, and well worth its price. He gives Mr. Richardson great credit for it.

From A. COURT, Esq., H.M.S. Cumberland.

Your Telescope and Microscope are both admirable and wonderfully cheap.

TELESCOPES.

The Lord Brougham Telescope.—This splendid Telescope will distinguish the time by a church clock five miles, a flagstaff ten miles, windows ten miles off, landscapes thirty miles off, and will define the satellites of Jupiter and the phases of Venus, &c. This extraordinary cheap and powerful glass is of the best make, and possesses Achromatic lenses, and is equal to a Telescope that costs £5. No Schoolboy or Tourist should be without one. Price 7s. 6d; will be sent free by rail or post for 8s. 6d.

THE NEW MICROSCOPE.

This highly-finished Microscope is warranted to show the animalculæ in water, eels in paste, &c., magnifying several hundred times. The Microscope is mounted on a brass stand, and has a compound body with Achromatic Lenses. Test Objects, Forceps, and spare glasses for mounting objects, &c., &c. The whole contained in a highly polished mahogany case, price 7s. 6d., or will be sent carriage free (by rail) for 8s. 6d.

ILLUSTRATED CATALOGUE.

G. RICHARDSON and CO. have published a Catalogue of 80 pages, illustrated with 8 full page engravings of Steam Engines, 8 Lithographed Drawings, beautifully printed in colours, of Screw and Paddle Steamers and Sailing Yachts, and 12 Views of Magic Lanterns and Slides describing upwards of 1,500 Slides embracing every subject; also full particulars of Microscopes, Telescopes, &c., &c. G. and Co. earnestly invite every one to procure a copy (it gives an extended view of the various articles which cannot be put into an advertisement. It will be sent free on receipt of ONE Stamp for postage.

P. O. Orders payable to George Richardson and Co. Liverpool; Cheques crossed Alliance Bank, Liverpool.

Summary of News from the Far East.

JAPAN.

By the arrival of the Pacific Mail Company's steamer *Colorad* at Francisco, on the 14th September, our news from Japan i extended to the 24th August. The *Colorado* brought to San Francisco 1,140 tons of cargo and 362 passengers, of whom 29 were Japanese. She left Hong Kong on the 15th August, and her China news is consequently superseded by that just received per French mail. From Japan, although her dates are 14 days later than those by the present mail, there is no additional news of importance.

YOKOHAMA.

Advices from this port by the French mail extend to the 10th August. The chief item of news is one of great importance, being nothing less than the alleged abdication of the Shiogoon. Until further confirmation is received the report must, however, be received with great caution.

A correspondent of the *Friend of China* says:—"The new Shiogoon has abdicated in consequence of the dissatisfaction he gave the other princes in consenting to the opening of the ports and his general willingness to carry out the treaty. Prince Owari is now Shiogoon elect, and his proclivities are not altogether so favourable to foreigners. The writer is of opinion that there will yet be a struggle for the supreme authority, but that the resolution of foreign Governments to enforce the treaties will result in the victory of the pro-foreign party, whoever may represent it. We cannot, however, find any mention of the Shiogoon's abdication in other northern papers to hand, and it is possible that the information is incorrect. It is nevertheless doubtless true that there is much cause for anxiety respecting political matters in Japan. An illiberal Government may again plunge Japan into a war with foreign nations, of which the result must be disastrous both to the financial prosperity of the country, and to the prestige of those who direct its affairs. It is difficult to foresee the progress of events in a country of which the Government is so peculiarly constituted, but residents in Japan seem to apprehend another resort to force before matters are eventually settled, and the country is thrown open to the world at large."

The same letter also says, "The Japanese seem to be determined to put on the screw so tight that it shall be too hot to hold us. Price of ballast risen from 32 cents to $1 per ton

Digitized by Google

within a month. Plenty lying along the shore, but we are not allowed to remove it. Boats from 1 to 1½, and now at two boos per day. Rice, fish, tea, wages, and everything in the same ratio. The Japanese seem to say, 'If the barbarians will stay in our country they shall pay for it dearly enough.'"

The *Japan Herald* says: "We regret to have to record an accident which occurred on board H.M.S. *Basilisk* on Tuesday. As we have been informed, it occurred when the crew were at general quarters—Admiral's inspection. A gun went off while loading, blowing one man overboard, injuring him so much that it was found necessary to amputate one arm, and it is feared he will have to lose one leg. Two others were injured, but one, it is hoped, will come off with a mere scratch; the other may lose an arm. Great praise is due to the captain of the gun at which the accident happened, who, himself wounded, immediately went overboard to save the man who had been blown into the water."

NAGASAKI.

A letter from this port informs us that the native Christians, whose summary arrest has caused such excitement in Roman Catholic circles, are not, it appears, newly made converts, or trophies of the recent labours of the R. C. priesthood in that country, but descendants of Christian families who have secretly professed that religion, and transmitted it to their children, ever since the time of the great persecution some two centuries ago. Aware that foreign Christians had full liberty of conscience in Japan [it is noteworthy that the treaties in force make no mention of native Christians] these faithful adherents of the long persecuted faith resolved to apply to the authorities for permission to openly profess the tenets of their Western brethren. Upon discovering that the petitioners had always been Christians—and therefore according to Japanese law previous to the late war criminals—the authorities at once incarcerated them. There is but little doubt that the French Admiral will take energetic measures for their release, as though in no sense French, it is of importance that the principle of absolute toleration should be clearly established. Any concessions he might obtain would extend equally to Protestant converts of the past, present, and future.

Another letter says:—"The priests have, I hear, sent up to the French Minister and French Admiral to come down and assist them. If they do come I hope the only assistance they will render will be to send them out of the country, and not allow them to remain to endanger the good relations that now exist between foreign Powers, neutralising all the best endeavours of our Ministers at Yeddo to bring about a liberal policy towards us. It seems to me that their efforts would be far more praiseworthy were they directed to the reclaiming of their own people than to the leading of ignorant natives into a breach of their country's laws, and then leaving them to suffer for it. It is but natural that these poor folk should fall into the snare. For instance, the priest will probably say to them, 'You are hungry, naked, sick, without a house, and so on. Well, just believe what I will tell you—ours is the right faith; we feed the poor, clothe the naked, &c., and we have funds to do it with. Join us, become one of my flock, and you shall be well cared for.' In weighing between the two he thinks it better to be a Jesuit convert with a well-fed body, than to be a Buddhist and starving. And so it ever was, and I suppose ever will be, with this mischievous people, ever plotting and planning against Governments, peoples, and religions. I hope their powers of mischief-making will be restricted. The natives of Simabara are ordered from all parts of the country to appear before their own authorities and be examined as to their creed, to see if the foreign priests have been tampering with any one of them. It is especially against the Treaty, and as the Simabara men have in olden times been led from their own to the Romish creed, and suffered in large numbers, they are becoming anxious and excited to see whether they are still all true to the belief of their fathers."

A double murder is reported from Nagasaki, the victims being two seamen of H.M.S. *Icarus*, recently arrived at this port. As soon as information reached the ship, Capt. Townsend landed with his marines, and with the Consul went to see the bodies. From thence they went to the Governor's house, demanding that he should come to the scene of the murder and make inquiries. The Governor, it seems, was disinclined to obey this demand, considering it would be *infra dig.*, but told Captain Townsend he would send one of his high officers. Under pressure, however, he afterwards consented. An inquest was held, but had been adjourned, in the hope of obtaining further evidence.

The Dutch steamer *Peter Landburg* has been sold to the Japanese by Messrs. Glover and Co. The steamer *Coromandel* is taken back from the Japanese by the same firm. Coals are said to be coming into the market again.

The following is from Messrs. Alt and Co.'s Market Report, dated 1st August:—

IMPORTS.—A slight improvement has manifested itself in the demand for manufactured goods; stocks of most descriptions, however, continue heavy. T-Cloths are saleable at quotations. Camlets continue in heavy stock. Cotton Yarn in small request, with no stock. Turkey Red Prints: Large patterns wanted at quotations. Turkey Red Cambrics continue in demand, but stocks are heavy. Lawns have declined in value. Tientsin Cotton wanted at quotations. Metals generally show a slight improvement. Nail Rod, small sizes. Bar, Hoop, and Pig Iron wanted, and stocks light. Tin and Tin Plates in good request. Lead and Spelter also wanted. English Coal: None in the place.

EXPORTS.—No settlements of the new Teas are as yet reported on cash terms, but a few parcels have been taken by foreigners, in barter against imports; and these transactions show a considerable decline in the value of the Teas, as compared with the latest sales of old crop leaf. In other kinds of produce the business done has been unimportant. Sales of Tobacco have been limited, owing to the absence of stocks. New season leaf will commence to arrive shortly. Galls and Rapeseed are neglected, and only held in small quantities. The stocks of Vegetable Wax and Sulphur have been considerably reduced by extensive sales, at advancing rates.

EXCHANGE.—Credits on London, at 6 months, 4s. 8d. per dollar. On Shangai, drafts at 10 days sight, 1¼ per cent. premium. On Hong Kong par. Boos, 332 per $100.

FREIGHTS.—To London and New York no rate is quotable, as there are not any vessels on the berth. To Shanghai $3 to 3.50 per ton of 40 feet is the rate. To Hong Kong $4 to 5.50.

CHINA.

TIENTSIN.

A letter from this port dated 2nd August says:—"We are now having rain nearly every day, and in three or four days' time we suppose all the water routes will float laden junks, after which we shall see some little improvement in the import business, as also in the export trade. The failure of the autumn and spring sowings must of course act prejudicially on business in general. Since I last wrote to you the Shantung traders from Tse-nan-foo have been operating to a small extent in grey goods and opium. The quotations to-day are for 8¼ lbs. grey shirtings taels 2.75 to 2.80; T-cloths, 7 lbs., taels 2 to 2.05; American drills, 40 yards, taels 4.20 to 4.50; English drills, 40 yards, taels 3·70 to 4. During the last three days the opium market has been quiet, and rates have been inclined to give way. The quotation for Malway opium to-day is 575, Patna 490, Gold, taels 15.70. We are without any important news from Peking or the interior. The Peking authorities are taking measures to alleviate the distresses of the inhabitants in various parts of the north. The weather at Tientsin is extremely hot and muggy, and we look forward hopefully to the time when the Chinese say autumn commences, six days hence, for cool pleasant weather.

"The rebels in Shantung and Honan appear to be causing considerable anxiety to the Peking authorities. They were last heard of as spread over the Shantung province from Haeyang-heen in the East, to Taining-chow in the West province, and are said to be very numerous. Le-hungchang, the Imperial Commander-in-Chief, had his head-quarters last at Tsi-ning-chow, having over 20,000 men under his command. He was engaged in erecting forts and placing a military cordon along the west side of the grand canal (yau-ho) to keep back the rebels and protect the province of Chehle against their inroads. I have heard nothing from Shanse for some days past regarding the state of the country, but I do not expect to hear any good news, owing to the failure of the autumn and spring sowings throughout the Northern parts of Chehle, Shanse, and Kansat this year. The failure of the crops is scarcely yet felt, but from now matters will daily become worse, as far as the mass of inhabitants are concerned."

CHEFOO.

We learn from Chefoo, under date of August 6, that on the 3rd of that month the Taotai sent a communication to all the Consuls, informing them that there were four foreigners with the rebel army, and that some of them were on the way to Chefoo to buy arms and ammunition for the use of the rebels. He requested the Consuls to take measures with a view to arrest those foreigners as soon as they arrived, and to prevent any sale of arms and ammunition in favour of the rebels.

News had been brought that the rebels were besieging Laiyang, the famous centre of northern Buddhism.

Digitized by Google

The imperial army seems to be doing nothing, probably on account of the heat, which is really excessive this year. Of course that trite personage, "the oldest inhabitant of the place," cannot remember such a hot summer.

Another report from private sources has reached us to the effect that the Shantung Nienfei are being driven towards the sea, and that they are making rafts to escape upon.

HANKOW.

We hear from this port that the excitement occasioned by Mackellar and Co.'s failure has not yet died out. Three cases in relation thereto were decided before H.M.'s Consul on the 28th and 31st of July, in all of which the assignees to the estate suffered defeat. It is rumoured that two of the oldest residents of the port have filed petitions for libel against one of the creditors' assignees, but sufficient apologies have been since tendered and accepted, and legal proceedings stopped. The river continues to rise, but there is not much fear of its flooding the settlement this year, as it is still three feet from the level of the bund; whereas last year at the same time the only means of communication from house to house was by sampan. The heat has been great, and trade quiet, though signs of its improvement are manifesting themselves.

SHANGHAI.

From this port we have advices to the 16th August. The news is very meagre; we take the following items from the *Recorder*.

We hear from an authentic source that an expedition *via* the Yangtze and Bramapootra Rivers to Calcutta is contemplated by a gentleman at present residing in Shanghai. We see no reason why this journey should not be accomplished, provided the members of the expedition are not too numerous, which would attract the attention of Chinese officials, and cause the expedition to meet with that obstructiveness for which the mandarins are well known, especially by travellers in China. The difficulties of such a journey would, we fancy, commence on leaving Szechuen, when an expedition would find itself among the tribes inhabiting the neighbourhood of the Snowy Mountains, a people quite unknown, or comparatively so, while the country from the borders of Szechuen to Assam is very mountainous; but western enterprise and energy will, we doubt not, ere long make this country better known to the world.

We hear that several silk contracts have lately been thrown up. The reason has not been stated, but the market has shown a downward tendency, and a fall of nearly 20 taels has been established within the last three or four days.

An application was made on the 16th of August to the Supreme Court for a distraint warrant on the furniture in the Shanghai Club, by Mr. F. H. Bell, attorney for the landlord of the ground on which the Club stands, namely, lot No. 152 as registered at the British Consulate. The warrant was applied for in consequence of $550 due for ground-rent not having been paid. The Acting Chief Judge granted the application. We presume, therefore, that this magnificent hall will for some time be occupied by a solitary member—in the form of a bailiff.

A correspondent of the *Friend of China*, writing from the island of Chusan, states that there is a failure of the rice crop there, owing to the devastation of an insect which at certain seasons attacks that staff of Chinese life. The farmers are petitioning the authorities to be allowed to pay landowners half the crop for rent, that they may have a little food left for themselves. The U.S. steamer *Wachusetts* was in Tinghai harbour, having on board the Consul General and Mrs. Mangan. The Rev. Mr. Knowlton is performing his regular itinerary of the island for preaching and visiting the Christians who are found in many of the vallies of that beautiful place.

The following on naval movements at Shanghai is also from the *Friend of China*:—"Our vessels of war in the Shanghai River are now reduced to a very low limit, and comprise only the *Cockchafer* and *Havoc*, fighting gunboats, *Manila* for passengers and cargo, and *Acorn* hospital and medical store ship, among which the first-mentioned is temporarily guardship, and her lieutenant-commander (happy man!) holds the dignity of British senior naval officer at Shanghai. The American navy is represented by their storeship *Supply*, and other foreign nations are nowhere. The U.S. corvette *Hartford*, with the flag of Admiral Bell, whose successor, Admiral Radford, is, we hear, not expected on the station for another six months or so, has departed for Chefoo. The *Shenandoah* has left for Nagasaki. The *Wyoming* is also in the north somewhere. H.M.S. *Rattler* has gone out for a cruise. There has been some rivalry between the *Rattler's* and *Hartford's* men, and parties from each vessel met in quiet Hongque nooks to settle their squabbles amicably. Their difference of opinion arose mainly from the fact that the American challenged the Britisher to a boat race for $500 a side, but when the stakes had been subscribed on board the *Rattler*, and the challenge accepted, their opponents stipulated that the race should take place over a course on which they had been in the habit of practising daily. This could not be agreed to, and the *Rattler's* offer to race them five miles, up or down the river, not suiting the other side, the match fell through, but the English tar felt he had been done out of the five hundred dollars which he had made up his mind to win, and hence they did not fraternise much when they chanced to meet on shore. The *Rattler* is expected to return again to her anchorage in three or four days. The *Argus* and *Hardy* have left for Hong Kong. Whilst in port this last time the former vessel lost two of her men from sun stroke, one being found dead by the police on shore, the other died on board shortly after return from leave, a sad commentary on the practice of giving seamen general leave during the hot weather, for, when on liberty, it is impossible to keep Jack within bounds, and a few glasses of the villanous grog supplied them in Hongque, followed by exposure, in a cap, to a July or August sun, is sufficient to knock over the strongest of them. During this season our naval authorities should allow no men to land before four P.M., except of course on duty, and all should be on board again by 8 A.M. at the latest. The body of Mr. Mackay, the unfortunate young officer of the *Supply* who was lately drowned, has not yet been found. The fact of his death is definitely settled by the arrest of the sampan man employed by him on the night in question. At first he denied all knowledge of the affair, but subsequently admitted that the gentleman fell overboard from the front of the sampan, and was no more seen. The man is in custody pending further inquiries, and the possible discovery of the body. We regret also to learn that another officer of the *Supply*, Mr. Martin, who had especially exerted himself in the search for Mr. Mackay, was last night carried off by cholera.

The following is an extract from a very able article in the *Supreme Court and Consular Gazette*, on the subject of new ports. It will be found to embody similar views to those expressed by ourselves in a recent article on the same subject:—

"It is not by any means improbable that in taking the Treaty provisions into consideration the Foreign Governments will be called upon to give some attention to the question of opening new ports. Indeed, inconsistent though it may appear with the well known exclusiveness of the Chinese, we should not be surprised if a proposal to allow foreigners to settle at some new ports should directly or indirectly emanate from themselves. They have learnt an exclusiveness far deeper than the clumsy physical steps of mere denial of residence; they have discovered that there are subtle means by which the foreigner may be in the land and not partake of its advantages; by which he may be made to contribute to its revenue, while he costs nothing to keep in order, this being admirably done by his own Consular authorities; nay more, means have been found whereby this *ci-devant* exacting and troublesome stranger is made the means of preserving order where the Chinese Government are too weak to maintain it themselves. Thus, when rebellion was ranging on the Yangtsze River, there was very little hesitation on the part of the Chinese Government in admitting us to new ports. Shrewd and acute, they speedily saw the part our steamers would play in clearing the great river of pirates; and so long as they had security that unscrupulous foreigners would not sell arms to the rebels, they were willing enough that we should be at the strongholds which they knew themselves too weak to preserve.

"It is idle at this late date to discuss the wisdom of that policy which for a time induced us to lend the aid of our arms to the Imperial cause. There was much to be said upon both sides of the question. True, we were not called upon to interfere with the internal concerns of China; but, on the other hand, we saw nothing but cruelty and rapine in the acts of the rebels, and we had just paid a heavy price in the form of a costly war in order to obtain a treaty with the existing dynasty, whom, therefore, it might well seem folly to abandon to destruction, without at least making some slight effort to save them from the fall which was impending. Be this as it may, our policy is not at the present time to afford any active assistance to the Chinese Government. Foreign Governments, and Great

Digitized by Google

Britain in particular, have enough to do without standing forth as the custodians and props of every sinking throne. If China can live by her own strength no people more than foreign nations will delight in her progress and in her prosperity. In both foreigners will find their advantage to trade, to traffic, to steam and rail communication, to the numberless branches of industry in which Europeans might find employment; but the day has gone by when English soldiers and English treasure will be sent forth to do battle on behalf of the existing or any other dynasty in China.

"From a commercial point of view it may be doubtful whether any good will follow the mere opening of additional ports. The expense both to individuals and to the Governments would be great. The great houses would have to send out agents, and the Governments would have to provide consuls and Consular establishments, and very little would, after all, be gained. To use an engineering term, a certain water-shed would be drained of its immediate produce, and in all probability find its way to one of the chief ports in foreign bottoms; but it is a question whether the result would justify the cost or whether the same produce would not, when the markets showed a favourable opportunity, just as readily come down in China bottoms, or overland. If, however, foreigners are, as they have more than once done, to take the police of the new ports into their hands, and to send down gunboats, land troops, and keep them under canvas for upwards of a week for the purpose of fighting any rebels who may appear in the neighbourhood, as was recently done at Chefoo, the balance of advantage will be all on the side of the Chinese—in other words, foreigners will pay the expense, and the Chinese reap the benefit."

Private advices by this mail report the general condition of the place as gloomy as ever, and that about half the residents must leave before a more healthy tone can be expected. All the discharged clerks turn "brokers," but that term includes almost everything. House property is still at a heavy discount, with so many vacated premises of failed firms and banks.

HONG KONG.

Dates from this port are to the 23rd August. The outward mails of the 10th July were delivered on the 18th August, conveying also London telegrams to the 29th July. The following items of news are from the *China Mail*:—

We learn upon good authority that twelve of the gambling shops are now approved of, extending from Jardine's Bazaar to near West Point. They are mostly to the south of Queens-road; but in Taipingshan, where the road takes a bend, and leaves a considerable district on the north, one or two have been placed in that district. The gentleman who undertakes the duty of overseeing the arrangements will, we understand, receive $20,000 as commission extending over the first six months; and he will be furnished with an assistant, who will receive a handsome salary. It is rumoured that in addition to the $250,000 licence fee, the shops have to pay very highly for two policemen who are to be stationed in each of them, and an inspector over all; so that, if this is correct, the Governor, not content with the licence fee, is adopting our proposal into the bargain, and will make the houses pay the extra police expenses.

News has been received from H.M.'s gunboats *Bouncer*, Lieutenant Mainwaring, and *Leven*, Lieutenant Cameron. On the 20th of July last they destroyed, off Gow Tow Tonquin Gulf, six piratical junks mounting 39 guns, captured 43 of the pirates, and recaptured from the pirates one junk belonging to the informer whom the *Bouncer* took with her from Hong Kong. On the 24th they destroyed two piratical junks mounting four guns, captured twelve pirates, and destroyed a village which is a noted piratical haunt. Two head men of the pirates were captured by the gunboats, and one by Lieutenant-Colonel Pang Yu, the mandarin in command of the Imperial Chinese fleet. This news was conveyed to Canton by the Chinese gunboat *Chinhai*, which vessel has been sent up with the captured pirates.

The British barque *Elizabeth* has been lost near Swatow. A letter has been received (written on board one of H.M.'s gunboats then out on a search for what might be found of the wreck) in which the master of the *Elizabeth* (Capt. Darke) in heartbroken strain reports the almost certain loss of his wife, infant child, and four of his crew, who had been swept out to sea from where the vessel, bean-laden from Newchwang, went ashore in Auick Bay (the *locale* of the steamer *Soochow's* loss in 1844). Early arrivals from that quarter will bring us news of a recovery of the missing folks, we hope. Hardly had those of the crew that escaped with their lives touched the shore, than the natives pounced on and stripped them of everything.

It is reported that the last steamer from the north brought down a special emissary from the Tsung-li-Yamen in the person of the Chinese Secretary to the Inspector-General of the Foreign Customs, who is deputed to buy rice for the Government to issue to the poor of Peking during the coming winter. It is something to see that the Chinese Government are really awakening to the fact that foreign commerce has its advantages, and that they endeavour to alleviate the misery caused by a local drought by having resource to Hong Kong.

We hear that eight new justices of the peace will shortly be gazetted. Five have already been, or are about to be, sworn in, viz., Mr. Parr, of Wilkinson and Co.; Mr. Duncanson, of Gibb, Livingston and Co.; Mr. Fraser, of the Borneo Co.; Dr. Ivor Murray, and Mr. Frederick Stuart.

We understand that the local Government has taken preliminary steps towards the establishment of a postal convention with the United States, for regulating the exchange of letters between Hong Kong and the United States by the Pacific Mail Company. The convention has, we believe, been drawn up and agreed to by this Government, in consultation with an officer of the United States Post-office, and has sent forward for formal approval to America, where it will, in all probability, be immediately sanctioned. Under this arrangement letters for any parts of the United States may be posted here and pre-paid to their destination for a fee of 10 cents for the half-ounce, newspapers being taken for 2 cents each.

A rumour is prevalent that a band of Chinese "braves," banditti, or rowdies are in the vicinity of British Kowloon, and are meditating an attack upon the villages in that neighbourhood. The report may of course be "all smoke," but the police have been placed on the *qui vive* respecting the matter, and if it be a "sell" others than ourselves have been victimised. If, on the other hand, the report be correct, we trust that the police will give speedy information respecting the threatened danger.

On the 15th August the *China Mail* property was offered for sale by public auction, and passed into the possession of Mr. Charles A. Saint. The following notification has accordingly been issued:—"Notice.—The business heretofore carried on under the style of A. Shortrede and Co. was this day purchased by the undersigned, in whose name and by whom it will henceforth be conducted, and to whom all outstanding accounts relating to the said business are to be paid.—Charles A. Saint, Hong Kong, Aug. 15, 1867."

We hear that the steamer *United Service* left the Shameen anchorage at Canton at half-past four A.M. on the 21st Aug., in charge of a pilot, and was stranded on a rock in the Macao passage, just opposite the Birdcage Fort. For some hours she was in danger of capsizing, but the cargo having been got out she was eventually taken off by the steamer *China* at about six P.M. She was insured for the voyage for about $20,000, in the North China Insurance Company. She proceeds to Whampoa for repairs.

The report of the Hong Kong and Whampoa Dock Company states that the business of the company shows an increase of 25 per cent. over last year's, and announces a dividend of 16 per cent. On this the *Mail* remarks:—"The annual report of the board of directors of the Hong Kong and Whampoa Dock Company, which is published in another column, is so unequivocally satisfactory that the company may be heartily congratulated upon its position and prospects. In these times of commercial depression an undertaking which yields a net dividend of 16 per cent. per annum, with a reasonable prospect of maintaining an equal or approximate amount in future years, may be considered somewhat of a rarity. Nor does the dividend alone represent the total gain by the shareholders during the past year. A new dock, capable of accomodating the largest vessels ever likely to visit this part of the world, has been opened, while various premises for workmen, and godowns, at Whampoa, which at this date last year were in process of construction, have now been completed, and the value of the company's property has been thereby materially increased."

A Treasury clerk, named P. H. Drummond, has absconded after embezzling a small sum of public money. It is believed that the defalcations in which Drummond is implicated concerning the funds of the Colonial Treasury will not exceed $200 or $300, but the private individuals who unfortunately bestowed

Digitized by Google

upon him their confidence will suffer to a much greater extent. Some of the ruses with which the young gentleman "sold" his personal friends are somewhat amusing. From one friend, we are told, he borrowed nearly a hundred dollars some time since, and in return deposited some articles of the value of half that amount. A day or two before his evaporation Drummond came to his kind-hearted friend, saying that he had found a purchaser for the deposited articles, when they were at once given to him. From that hour until this neither the articles nor the swindler have put in an appearance. He got away in the P. and O. steamer *Malacca*, and a detective has been despatched in pursuit.

In the Supreme Court in Admiralty, before the Hon. the Chief Justice, the case of the owners of the *Veritas v.* the owners of the *Jeddo*, for salvage services, occupied the Court two whole days. The Attorney-General, instructed by Messrs. Sharp and Toller, appeared for the claimants, and endeavoured to prove the great danger from which his clients had saved the vessel, freight, and lives in question. Mr. Whyte, instructed by Mr. Caldwell, appeared for the owners of the *Jeddo*, and sought to show, by the assistance rendered by his crew, and the minimum of danger involved by the salvor in the services referred to, that a large sum was not called for. The Chief Justice observed that the case involved some very important points, one of which being that of the salvage of life, which was probably the most important of all important questions in such cases. It seemed to him that it was clearly the intention of the Chinese to take the ship. The case was probably the most important which had ever come before him, and he would therefore take time to give it his most careful consideration. He would not give his judgment before the vacation.

We learn from Macao that at the election of the deputy who is to represent Macao at the Portuguese Parliament, Senhor Amaral, late Governor of that colony, was voted by an immense majority against the exertions of official magnates. The election has been most spontaneous, for the honest Amaral, far from proposing himself as a candidate, had written to his friends here in favour of his rival. Modesty and merit have thus been rewarded.

The fact that the Spanish Minister is engaged in framing a coolie convention which shall be more satisfactory and of wider scope than that now existing between the Great Treaty Powers and China, leads to the hope that the abuses of the Havana coolie trade will at length be modified if not actually done away with. The personal character of the Minister is such as to induce the belief that he will endeavour to act more in the interests of humanity at large than of the merchants now interested in the traffic. If he does he will earn the thanks of all who value reputation, honour, and morality above mere gain.

Immediately after the passing of the sentence upon a criminal named Kwok Awoo—who has received five years' penal servitude for the manslaughter of Chun Ayoo, in the Supreme Court—a painful scene occurred. A poor old woman was led rapidly into court, who, falling on her knees near the witness-box, directed a most piteous petition towards the bench. On inquiry it was found that the woman was the mother of the murdered Chinaman, left destitute by the death of her son; but as, of course, she had come to the wrong place for assistance, her tears were unavailing, and the Court adjourned. The case appears to be one peculiarly suitable to draw upon the sympathy and the purses of well-to-do Chinese.

The P. and O. Company has despatched an extra steamer (the *Norna*) from Hong Kong for Suez direct, intended to correspond with the Bombay mail for London. She left on the 23rd August.

The affairs of Messrs. Dent and Co. appear to be in the same unsatisfactory condition as reported last mail. In Shanghai they are still in bankruptcy, Judge Hornby having refused to set aside the adjudication; while in Hong Kong Judge Smale has consented to postpone the first examination until December.

At the meeting of the Hong Kong and Shanghai Bank, at Hong Kong, the dividend declared was at the rate of 12 per cent. per annum, not 8½, as stated in the *Overland China Mail*. The report and balance-sheet will appear in our next issue; we append particulars of the meeting:—

The usual half-yearly meeting of the shareholders of the Hong Kong and Shanghai Banking Corporation was held on the 13th August, Mr. Woldemar Nissen in the chair. At the directors' table sat Messrs. Sassoon, Helland, Kresser, Whyte, Heard, Menke, Foster, jun., and W. Lemann. There was a fair attendance of shareholders.

The Chairman commenced the proceedings by reading the already published report of the directors; and in moving the adoption of the same, he referred to the growing success of the bank, spite of the trying time through which it had passed. They had opened an agency at Foochow, and there was every reason to hope for the future success of the corporation. Before proposing the adoption of the directors' report, however, he would give an opportunity to any shareholder to make remarks upon the same.

No one appearing inclined to address the meeting, the Chairman moved that the report be adopted; which motion, having been seconded, was unanimously carried by a show of hands.

The Chairman said that they would proceed next with the election of directors, when

Mr. Taylor (of Smith, Archer, and Co.'s) proposed the re-election of the board as the names stood on the printed report; which motion was received with approval by the meeting.

Mr. Hunter then rose, and said that, from the thorough examination he had made of the books of the bank, and the consequent knowledge he possessed of the skill and ability with which the affairs of the bank had been managed by Mr. Kresser and Mr. Maclean (of Shanghai), he had pleasure in proposing a vote of thanks to those gentlemen.

Dr. Murray had much pleasure in seconding such a proposition. Had it not been for the able management in those trying times, they would not have received so good a dividend for the past half-year.

Mr. Kresser returned thanks.

Mr. G. Sharp next rose to address the meeting. He had hoped that, after his infliction at the last meeting, he would be able to go away without troubling this meeting with any remarks; but there was one thing which they ought to do before separating. The affairs of the bank had not only been well managed but well directed. The directors had sometimes to attend two or three meetings a-day; and as they were not greatly paid for this service, it would only be fair on the part of the shareholders to give them their thanks also. He would therefore move that the thanks of the meeting be given to the directors.

This proposition having been received with approbation, Mr. Nissen said he (and the other directors) were much obliged for what Mr. Sharp had said, and the meeting then separated.

PHILIPPINES.

MANILA.

The progress and prosperity of these beautiful islands are constantly checked by some capricious and despotic proceeding of the authorities, interfering with the free course of trade, labour, and capital, and preventing the development of natural resources such as are possessed by few regions in the world. Foreign settlers, especially the Chinese, who form such an important element in our population, and the native Indians, are equally discontented, and the Government exhibits its own disquietude and alarm by movements of troops and arbitrary acts which add to the general anxiety and perplexity. Meanwhile, the Government at home has cares too many of its own to enable it to give any adequate attention to these remote colonies, who cry out in vain for the removal of grievances. Indeed we expect by every mail to hear of the overthrow of the Spanish dynasty, or of some great revolutionary change. The seizure and imprisonment of large bodies of labourers, who, in search of employment, have been immigrating from one island to another, has greatly impeded the progress of cultivation. Any irregularity in their passports has been made an excuse for arrests and punishments of the most exasperating character, especially in cases where the labourers bore certificates that all their taxes had been paid. This interruption, moreover, took place in the most active season of sugar production. The trouble, expense, and delay in obtaining passports is a sore oppression upon the people, whose every movement is watched with suspicion and made a ground for levying contributions. The trammels put upon the locomotion of labour show an utter disregard for the most obvious truths of political economy and for the well-being of the agricultural population. The *cabenas* are made responsible for the defalcations of the peasants, and more than a hundred have been thrown into prison, not on account of their own shortcomings, but of those over whom they have little or no control. The Governor has lately deported the Fiscal del Rey, an important functionary, and called upon the British merchants at Manila to produce their account-books at the Tribunal of Commerce—an order with which they refused to comply. He has also commanded the Chinese to keep their books in Spanish and by double entry—a mandate which in many cases cannot be obeyed. Notwithstanding these and other senseless impediments and unwarrantable interferences there is progress. Commerce is spreading in the ports opened to foreign trade. Warehouses are being built, steamers launched, and in spite of panics of the officials—consejor de guerra—and other evidences of alarm at head-quarters, cultivation gradually extends its limits, the amount of exports greatly increases, and there is unmistakable evidence of improvement.

SIAM.

The Siamese Government has published a statement to the effect that it had been announced to them, through the French Consul, that Admiral de la Grandiere had taken

Digitized by Google

possession of three provinces of Cochin China — Vinlong, Chodock, and Statin—on the ground that their inhabitants had plundered French travellers and lent assistance to Cambodian rebels. The treaty of peace with Cambodia was annulled, and all the Cambodian authorities expelled from these provinces, which are annexed to the French colony of Saigon. The annexed population is about one million of souls. It has also been reported to the Siamese authorities, that a district on the eastern bank of the Meikhong has been delivered to the possession of the King of Cambodia's half-brother, Phra Keio, who had contested the King's authority. The French report that the "rebels" have submitted to Phra Keio. The head of the rebels is said to be Pho Camboe, son of the late King of Cambodia. He will make himself a priest when a Government is established "under a ruler who is pleasant to the people in general." The King of Siam directs that no assistance shall be given to Camboe or to the rebellion. An article in the *Siam Weekly Monitor* has created some sensation, asking why the Siamese authorities do not interfere to stop these aggressions.

Letters from Bangkok of the 5th August announce the death of the eldest son of the King of Siam, heir apparent to the throne. His official title was Krom Mu'n Mahesuarsivavilas. He was born in 1823; his mother was descended from the former royal dynasty. On the demise of the second King, in January, 1866, he was appointed to some of the important military and financial functions that his uncle had discharged. He died on the 25th July last, leaving 29 younger half-brothers, 33 half-sisters, children of the present King; and of his own descendants eleven sons and eight daughters, with two grandsons and four granddaughters. The King has published a formal announcement of his death, hoping that "every one of his good friends" will sympathise with him, remembering that the same path has to be trodden by all, who will fall in due course "like the leaves and flowers and fruits of trees," all subject to drought and corruption. The King announces the death of his Highness Mom Kratai Rajoday, who accompanied, in the quality of interpreter, the Siamese Mission to England in 1857.

STRAITS SETTLEMENTS.

SINGAPORE.

Advices from Singapore are to the 3rd of September. The outward mails of July 26 were delivered on August 27.

There is no news of importance, the chief topic of interest being the prevalence of a sort of cattle plague, which appears to be the same as that known among veterinary surgeons here as the "foot and mouth disease." This has recently spread to such an extent as to give rise to serious alarm. An article has appeared in the *Singapore Free Press* advocating strong repressive measures, similar to those which were ultimately successful in this country.

The steamer *Armenian* has narrowly escaped destruction by fire. This vessel arrived from Calcutta at Singapore with a full cargo, chiefly of cotton, and, having taken in her supplies, proceeded on her way to China. When the vessel was about half way to Horsburgh Light fire was discovered to have broken out between decks, abaft the mainmast on the starboard side. She was immediately turned round to make for the harbour, where she arrived about nine P.M. On approaching the harbour she signalled her distress by burning blue lights and firing rockets; these were observed and promptly responded to by H.M.'s ships *Zebra* and *Rifleman*, boats being immediately manned from both these steamers and sent on board the burning vessel with fire-engines and all the necessary implements. Previous to this every exertion had been made by the officers and crew of the *Armenian* to obtain access to and extinguish the fire, and the donkey-engine was kept pumping water into the hold, but little progress had been made. As soon as the fire parties from H.M.'s ships arrived the upper deck was ripped up and the fire-engines directed on the smouldering bales of cotton, and a large quantity of cotton was thrown overboard. The heat on the starboard side of the vessel was so intense as to turn the iron plates on the vessel's side partly red hot, and the volumes of smoke from the burning cotton were so dense as frequently to drive officers and men from their work, and throughout it was with the greatest difficulty that the men could continue to ply the hose and buckets. After about four hours, the greater part of the deck from the mainmast aft having been ripped up, the fire was at last got under. By this time the Assistant-Commissioner of Police, with the town fire-engine and a body of convicts, arrived, and rendered assistance in the final extinguishment of the fire. The Marine Magistrate and also the acting sitting Magistrate arrived on board about midnight. The greatest credit is due to the officers and men of H.M.'s vessels *Zebra* and *Rifleman*, under command of Commander Pollard, and also to the officers and firemen of the burning vessel, for if the most untiring exertions had not been used the vessel would undoubtedly have been destroyed. As the *Armenian* was steaming into harbour, on fire, in the confusion she came into collision with the Dutch barque *Johanna*, lying at anchor, striking her about the port fore channel and doing considerable damage.

CHINA AND JAPAN.

Hong Kong, Sept. 11.

Intelligence from Japan states that Sir Henry Parkes and Admiral Keppel were about to proceed to Osaca to demand satisfaction for the late murder of two seamen.

A terrific typhoon has passed over Hong Kong, causing great damage to the shipping.

COMMERCIAL.

Hong Kong, Sept. 11.

Grey shirtings, 6¼ catty, $3.40.
Water twist, 16-24, $1.85.
Total export of tea, 67,000,000 lbs.
Exchange on London, 4s. 4¼d.

Shanghai, Sept. 5.

Grey shirtings, 6¼ catty, 2.60 taels.
Cotton, nothing doing.
Tea—Congou: 2 taels lower.
Silk—Firm, and in active demand. No. 3 Tsatlee, 5.20 taels. Settlements in fortnight, 2,700 bales.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	4 months' sight.		
At Shanghai	4 ditto	6s. 2d. to 6s. 2¼d.	6s. 2⅛d. to 6s. 3⅛d.
At Canton, At Hong Kong, At Macao	4 ditto	4s. 4¼d.	4s. 5d. to 4s. 5⅛d.
At Singapore	4 ditto		4s. 5d.
At Manila	6 ditto	4s. 4d.	

At Shanghai, bills on India, Rs. 304 to 305 per 100 taels. At Hong Kong, Rs. 219½ per $100. Bar Silver at Shanghai, tls. 111.4.0; at Hong Kong, 10⅞ per cent. premium. Mexican dollars at Shanghai, tls. 72.6 per, 100; and exchange on Hong Kong, 28½ discount. Hong Kong and Shanghai Bank shares, new, 2½ dis.; Gas Company, par; Hong Kong and Whampoa Dock, 10 to 20 per cent., prem.; Union Dock Company, 25 per cent. dis.; China Traders' Insurance, $100 per share premium.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Bisley—On the 16th Aug., at Shanghai, Mrs. Bisley, of a son.
Castilla—On the 10th Aug., Mrs. C. L. de Castilla, of a son.
Copland—On the 7th Oct., at 3, Bedford-terrace, Clapham-rise, the wife of P. Copland, Esq., of a son.
Evans—On the 13th Aug., at Shanghai, the wife of Mr. J. Hornby Evans, of a daughter, stillborn.
Kershaw—On the 30th Sept., at No. 1, Lincoln-villas, Willesden-lane, N.W., Mrs. John Kershaw, of a daughter.

MARRIAGES.

Walker—Walker.—On the 8th Oct., at Addington Church, by the Rev. W. Benham, vicar, Thomas Wright Walker (late of Yokohama), to Julia, second daughter of Marmaduke Walker, of Addington Lodge, S.

DEATHS.

Blake—At the Shanghai General Hospital, Charles Blake, aged 35 years.
Brisson—At Shanghai, Mr. George Brisson, of the Imperial Customs, aged 25 years.
McGurn—On the 6th Aug., at Shanghai, William E. McGurn, of cholera.
McLean—On the 2nd Oct., at Mead House, Epsom, in the 67th year of his age, John McLean, Esq., late of Liverpool and Birkenhead.
Reardon—On the 6th Aug., at Shanghai, of cholera, John H. Reardon, aged 33 years

SHIPPING INTELLIGENCE.

ARRIVALS.

At Yokohama.—From London, Anazi (reported by telegram).

At Shanghai.—From Cardiff, Aug. 7, Fortuna; from Newcastle, 14, Ocean Bride; (from London, Douglas Castle; from Shields, Sept. 5, via Rio, Seaflower reported by telegram).

At Hong Kong.—From Clyde, via Singapore, Aug. 9, Lamont (steamer); from New York, Aug. 12, Ashburton; 14, Benefactor; from London, Ramsey, with fore and mizenmasts sprung (reported by telegram of Sept. 11).

At Singapore.—From London, Aug. 23, Janet Ferguson; from Bordeaux, 22, Mysore; (from Cardiff, General Steins, Gondenet, T. Moysen; Besterd, Jedo, Maria Adolphino reported by telegram of Sept. 30); from Cardiff, Aug. 24, Maria Elizabeth; 27, Delft; from London, Sree Singapura; from Newcastle, 27, Antje.

DEPARTURES.

From Shanghai.—For London, Aug. 7, Helen Nicholson; 8, Pegasus; 13, Wild Deer; 14, Fusiyama, 15, Grenadier.

From Hong Kong.—For London, July 21, Carl Wilhelm.

From Singapore.—For London, Aug. 27, Meg Merrilies; for Liverpool, 22, Lochleven Castle.

VESSELS LOADING.

At Yokohama.—For London, none; for New York, Pauline.

At Shanghai.—For London, Invincible, Isles of the South, Jubilee, Sir W. Wallace.

At Foochow.—For London, Pakwan, Caranjah, Scawfell (all full), Maggie Leslie, Medina.

At Hong Kong and Canton.—For London, Kelso, Hyacinth; for New York, Princess of Wales.

At Manila.—For London, Napoleon, Neptune, Corea (*via* Cebu); for Liverpool, Trinidad, Ogono; for Hamburg, Voludoro; for New York, Galatea, Melrose.

At Singapore.—For London, A. H. Wille, Simoon, for Liverpool Bella; for New York, Benvoirlich; for Boston, Alexander.

At Penang.—For London, Coleroon, Gungadhur.

PASSED STRAITS OF SUNDA.

Coyphæus, from Cardiff; Fontenaye, from London; Racer, from Shields; Belle of the South, Sydenham, Cleta, Malvern, from Sunderland.

REPORTS AND CASUALTIES.

HONG KONG.

The British ship Sovereign of India, from Shanghai, bound to London, reports that on the 6th of August, in lat. 19.20 N. and long. 120.30 E., had a furious and severe squall, which came from S.E. and carried away topgallant masts, yards, and mizen mast with the yards attached; also blew an entire suit of sails away, and she continued on her course till the 12th, when in lat. 14.50 N. and long. 114 E. met with a strong S.W. wind, which made it necessary to bear up for Hong Kong.

The American barque Benefactor, from New York, reports fine weather and light wind up to the Equator; crossed there on the 4th of June in long. 31.40 W.; crossed the meridian of the Cape of Good Hope on the 9th of July in lat. 37.30 S.; made Java Head on the 26th of July, reached Anjer on the 28th of July; left there on the same day, and came to China Sea, when had light wind, much rain and squalls nearly all the passage; 96 days out. On the 16th of May passed the British barque Haversham, steering to N.E. in lat. 37.27 N. and long. 47.27 E.; on the 29th passed a French steamer; on the 8th of August exchanged colours with a British ship, name unknown, from Foochow, bound to London, 18 days out.

The American ship Ashburton, from New York, reports fine weather from there to the Equator, and for the most of the passage; crossed the Equator on May 18, in long. 29 W.; crossed the meridian of the Cape of Good Hope on June 19, in lat. 38.30 S.; passed St. Paul's Island on July 3rd; passed Christmas Island on 20th; made Java Head on 21st; reached Anjer on the 23rd; left Anjer on the 25th; crossed the Equator on the 30th in long. 107 E.; from thence had light southerly winds to Hong Kong. 114 days out. On May 15th, spoke the American ship Vatula, from New York to San Francisco, 29 days out, in lat. 3.42 N., and long. 25.40 W.; on the 31st spoke the British ship Empress of India, from Liverpool bound to Sydney, 48 days out, in lat. 25.35 S. and long. 29.55 W.; on July 4 passed the American ship James Guthrie, in lat. 38.45 S. and long. 79.26 W.

COMMERCIAL POSTSCRIPT.

Arrivals not in the Tables.—Oct. 7, at Falmouth, from Akyab, Morning Star; at Clyde, from Manila, Betty Perlbach; at Falmouth, from Bassein, Star of the South; off Falmouth, from Rangoon, Peter Joynson, Truce.

Departures.—Oct. 8, from London, for Shanghai, Taeping; 6, from Plymouth, for Batavia, Sumatra; 7, from Sunderland, for Galle, Eliza Laing.

Laid-on.—At Liverpool, for Singapore, Constance; for Galle and Maulmain, Oscar.

Spoken.—Venturita, Manila to Dublin, July 13, off Borneo; Cohliopé (?), Shanghai to London, Oct. 3; Eden, Foochow to London, Sept. 22, 43 N., 25 W.

The Chinese Giant in Paris.—The Tribunal of Commerce of the Seine has just been engaged in trying a cross action between M. Arnault, the director of the Hippodrome, on the one side, and Woo-Gow-Chung, the Chinese giant, his wife, a dwarf named Chuing, and a servant, Ah-King, on the other. The Chinese troop were engaged to appear at the Hippodrome and the French *salons* at the Exhibition, at the rate of 4,000f. per month, payable each fortnight in advance. On the 15th of July giant, finding his money not paid, refused to appear, and immediately the litigation commenced between the parties. The giant claimed one month's salary and 1,000f. damages, while M. Arnault demanded 3,000f. as recompense for the non-appearance of the troupe. The Court decided that Woo-Gow-Chung was entitled to his money in advance, and condemned M. Arnault to pay 4,000f., the month's salary. As to the 1,000f. damages, the Court considered that the giant had not substantiated that he had suffered any loss, and as to the claim of M. Arnault, it decided that Woo-Gow-Chung was liable to pay 300f., to be taken into account in the payment of the 4,000f., and sentenced M. Arnault to pay all the expenses.

Education in Hong Kong.—In a speech delivered by Sir John Bowring at Dundee, on Thursday, at the meeting of the British Association, Sir John urged that greater attention should be paid at our public schools to what are vulgarly called the three R's—reading, writing, arithmetic. He stated that when he was Governor of Hong Kong a highly connected young gentleman was sent out to him for public employment, bringing recommendations from very influential quarters. A report having shortly afterwards reached pim of the gentleman's ignorance, he sent for him and examined him as to his proficiency in spelling. When required to spell the word candle, the highly connected young gentleman spelt it "kandell."

A Mr. Stranger, late cashier of the San Francisco Sugar Refinery, was discovered to be a defaulter to the amount of $100,000. He left the State in the steamer *Great Republic* for China. He was in the habit of gambling, which led to the commission of the crime.

Naval and Military.

A General Order was published a short time ago (says the *Army and Navy Gazette*) fixing the rates of allowances to be in future granted to officers serving in Ceylon and the Straits Settlements. Why should not China, Japan, and the Mauritius have been included in the same order? At the former station the allowance is ten shillings per diem to each officer, irrespective of rank, which is not nearly sufficient, as far as the senior officers are concerned, to defray the expenses of life. At Japan the allowances are still less. Would it not be better to extend the Ceylon rates to China and these other stations? If climate be taken into consideration allowances at Hong Kong should be higher at any rate. It is a great shame, also, that there is no climate allowance granted in the West Indies, Bermuda, &c. A great boon would be conferred were the War-office authorities to look into this matter.

A notification has been received at Chatham that the service companies of the 1st Battalion of the 10th (North Lincoln) Regiment, now doing duty at the Cape of Good Hope, will shortly proceed to Japan to relieve one of the regiments now under orders to return home. A detachment of twenty-five non-commissioned officers and men from the depot at Chatham garrison has been placed under orders to proceed to the Cape of Good Hope to join the head quarters of the regiment. The draught will embark in one of the new Indian steam transports which will shortly be despatched to India *via* the Cape of Good Hope. The 1st Battalion of the 10th Regiment embarked for the Cape of Good Hope in September, 1864.

The Avon, 2, double-screw composite-built gunboat (for China), 464 tons, 120-horse power, has been launched from Portsmouth dockyard, and will be at once brought forward for the first-class steam reserve and commission. The machinery of the Avon will be furnished from two sets of 60-horse power engines, taken from two of the single screw gunboats of the Haslar Yard collection recently broken up. As a composite-built gunboat, the Avon, with all her sister vessels built and building, will possess sufficient vertical strength of hull, but they appear to be unaccountably weak longitudinally, neither of their outer skin timber plankings being worked on diagonally, nor are there diagonal arrangements in the iron framework that can add materially to the longitudinal strength of the ship. The latter, indeed, must depend upon the decks and the outer timber planking. There is nothing in the form of the hull of these vessels which can give a promise of high speed, yet they may answer for the special purpose they are intended for on the coasts and rivers of China, if never called upon to chase any swift-moving piratical craft.

Her Majesty's ship Plover, recently commissioned at Woolwich for China, by Commander James A. Poland, has had its crew and detachments of Royal Marines transferred, and is otherwise in a forward course of preparation for sea. The Plover, double-screw gun vessel, recently built at Deptford, has been armed with three guns and eighty officers, seamen, and lads of all ranks, together with one corporal, two gunners, and six privates Royal Marines Light Infantry, and is now ready for her final inspection.

The newly-built screw sloop Danäe, 1,287 tons, 350-horse power, nominal, machinery by R. Napier and Sons, of Glasgow, steamed out of Portsmouth harbour last week to make her trial of speed at lightest draught of water over the measured mile in Stokes Bay. A part of the full boiler power runs were made over the mile, when an unexpected and accidental fracture took place in a small drain pipe leading from the superheaters, most likely caused by the "jar" from the main feed-pipe, and this accident at once put an end to all further proceedings for the day. During the time the ship was under way the engines worked with admirable smoothness and regularity of action. Their revolutions when under full steam pressure ranged between 92 and 94 per minute. The vibration of the ship was quite equal to what was experienced in her preliminary run last week outside the Isle of Wight. The Danäe will be fast under steam for her tonnage, but if the exerted power of her engines is taken into consideration, together with her improved form of bow as compared with her sister vessels previously tried over the mile, she may not prove to be what is generally understood as a "successful" vessel.

A party of Japanese now in this country recently paid a visit to Chatham Dockyard, by special permission of the Admiralty, and were conducted through the various establishments by the officials connected with the several departments.

The armour-clad ship for which a contract has just been taken from the Admiralty by Messrs. Palmer, of the Jarrow Works, Newcastle-on-Tyne, is intended for the defence of Melbourne.

The Lords of the Admiralty have decided upon building at Pembroke another ironclad ship of similar dimensions and tonnage to those of the two ships lately contracted for by Messrs. Napier. She is to be driven by twin-screws, and is to have a nominal power of 800 horses.

Orders have been received at the dockyard at Pembroke to make the necessary preparations with the view of building a large iron ship, to be named the Invincible. The new ship will be about 4,000 tons burden, 280 ft. long, 54 ft. in breadth, and of 800-horse power. She has been designed by Mr. E. J. Reed, Chief Constructor to the Admiralty. The chief feature in her formation will be a large armour-proof tower situated amidships, which will be so constructed that shot can be thrown either fore or aft from this projection. This vessel will be built upon what is termed the belt principle.

The constructive department at the Admiralty is entirely engaged in designing new ships for the Navy. The last vessel ordered to be laid down is the Volage, an iron frigate of 8 guns, 2,322 tons, and 600-horse power (nominal); she is to be built by the Thames Shipbuilding Company, and it would seem, from the fact of the engineers who originally tendered for her engines having been called upon to send in estimates for another pair, that it is intended to build another vessel of precisely the same dimensions by contract.

LONDON: WEDNESDAY, OCT. 9, 1867.

WESTERN CHINA.

In our last issue we recorded the interesting fact that the survey lately undertaken of Captain Sprye's proposed route from Rangoon to Western China had been attended with satisfactory results. It will be remembered that for the last ten years Captain Sprye has been unremitting in his efforts to procure a recognition by Government of the merits of his scheme; and whether the advantages claimed for it prove in the end to be substantial or the reverse, it is greatly to the honour of the Conservative Government that they have so promptly recognised the necessity of action in a matter that their Liberal predecessors in office had persistently ignored. Notwithstanding the innumerable objections urged against it, the proposed route seems to be in truth very simple and practicable, if only undertaken with any degree of zeal and earnestness. A railway or tramroad from Rangoon, through Eastern Pegu to Kiang Hung, a town on the Upper Cambodia River, is the one thing needful; and the recent survey has divested this of all the fanciful obstacles raised by the opponents of the plan. Subjected to the practical eye of Captain Williams, the impassable mountain barriers, and the streams that no bridge could span, have dwindled into insignificance; and the fact is established that there are two perfectly suitable routes for the proposed line, to choose from. The first of these is the identical line proposed by Captain Sprye. It measures only 235 miles from Rangoon, of which only 58 miles are difficult, 144 miles being perfectly easy, and 31 moderately so. The other, a more southern line from the Sittang river, though measuring 10 miles more, was found to have 169 miles quite easy, 35 moderately easy, and only 40 difficult. No rivers were encountered in either line worthy of consideration, the broadest being the Sittang itself, which, when crossed by the north line, measured 1,000 feet, and at the more southern point of crossing 1,500 feet. The other streams, by both routes, are of much smaller size. The northern route might require two tunnels, neither exceeding a mile in length, while the southern line would need but one of the same length. It has further been ascertained that abundance of teak and iron-wood timber, with good building stone, exists along both routes. So much for the nature of the ground to be traversed. After such achievements of engineering skill as our own Underground Railway and the Mont Cenis line, it is idle to assume that Captain Sprye's route offers any difficulties that the science of the present day could not readily overcome.

On the grounds, however, of inexpediency, and perhaps also of inutility, the project will doubtless still have its opponents. It is maintained by some persons that the line, if constructed, will be difficult and expensive to keep in working order, and that the traffic will be insufficient to sustain it. The Indian Government, moreover, seems still inclined to throw all possible difficulties in the way. But it must be admitted that several commercial bodies are in favour of the attempt. We have before us a pamphlet comprising a third series of memorials addressed to Her Majesty's Ministers on the subject by the various chambers of commerce, and the uniformly favourable opinions therein expressed cannot fail to carry great weight. The third memorial of the East India and China Association of Liverpool, states;—

"That the memorandum and map by Captain Williams, dated the 21st of January, 1865, and presented to Parliament last session, Parliamentary paper, 'Rangoon and Western China, 373, 1864,' fully establishes that a railway for direct commerce from Rangoon with the Burman Shan States and Western China can be easily and cheaply constructed."

The fourth memorial of the Liverpool Chamber of Commerce, strongly urges the Foreign-office to undertake preliminary measures for the construction of a railway without delay. The Huddersfield Chamber, with an eye to the menacing growth of French power in the East, sets forth—

"That your memorialists believe that the Emperor of the French is fully alive to the advantages of his newly-acquired position in Cochin China, and will very probably endeavour to open up the Western provinces of China to French commerce by the River Kamboja route; and that the activity and recent development of French commerce, and the growing competition of French with English manufactures in neutral markets render this consideration, at present, one of greatly increased importance, and would make doubly serious the consequence of any delay on the part of Her Majesty's Government in securing the advantages afforded by the superior position and shorter route available to them from British Pegu.

"That the independent and official testimony afforded by Captain Williams in support of the views and opinions of Captain Sprye—whose long experience, personal knowledge, and extensive researches and efforts in connection with the projected direct land route entitle him to the gratitude of all who are interested in the promotion of British commerce—lead irresistibly to the conclusion that no further delay ought to take place in the requisite surveys of it being directed."

The Memorial of the Manchester Chamber of Commerce prays,—

"That steps may be taken effectually to survey the line of country between Rangoon and Kiang-Hung on the Meikong or Upper Camboja River; your memorialists being firmly of opinion that the commercial advantages likely to flow from the opening up of a communication overland between Rangoon and China would far outweigh the comparatively trifling expense with which the proposed survey would be attended."

The Halifax Chamber, in a third Memorial, points out—

"The great importance to the foreign trade of the country of the commercial way being constructed, by the best and most direct route, from Rangoon to the Upper Kamboja River, or to the south-west frontier of China, such as shall be practicable for commerce at all seasons of the year."

The Bradford, Leeds, Dewsbury, and Batley Chambers, and the Liverpool Shipowners' Association, have all memorialised to the same effect, and all unite in a cordial recognition of Captain Sprye's merits as the originator and consistent advocate of the scheme. Backed by such authorities as those we have quoted, there is reason to hope that he will not find continued disappointment the sole fruit of his untiring labours.

THE LYALL STILL CASE.

Having published, in our issue of the 10th ult., the memorial forwarded by the Manchester Chamber of Commerce to the Colonial office on the subject of Chief Justice Smale's comments in the bankruptcy of Messrs. Lyall, Still, and Co., we think it as well to lay before our readers the reply vouchsafed thereto by his Grace the Colonial Secretary, although a more worthless piece of circumlocutory verbiage never emanated from Downing-street. It is as follows:—

(Copy.)

Downing-street, 26th September, 1867.

Sir,—I am directed by the Duke of Buckingham and Chandos to acknowledge the receipt of your letter of the 3rd instant, commenting upon the judgment delivered by Chief Justice Smale in the Court of Bankruptcy at Hong Kong on the case of Lyall, Still, and Co., and suggesting that Her Majesty's Government should express their disapproval of some of his remarks on that case.

In reply, I am to state to you that it is not the practice of the Secretary of State, or generally of the Executive authorities of a colony, to assume the function of criticising the language used by colonial judges from the bench unless that language is sufficiently improper to be brought before the Governor of the colony by the prescribed course of procedure as a foundation for dismissal.—I am, Sir, your obedient servant,

Malcolm Ross, Esq. (Signed) Frederic Rogers.

LAUNCH OF A NEW STEAMER FOR THE SAN FRANCISCO AND CHINA LINE.

Since the acquisition by the Pacific Mail Steamship Company of their pioneer vessel, the *Colorado*, we have had to record the launches, in rapid succession, of the two fine steamers *Great Republic* and *China*. We have now the following particulars of a fourth monster ship for this line, most appropriately named the *Japan*, which was launched on the 20th September, and is expected to be ready to proceed to San Francisco in January next. Another similar vessel is, we understand, rapidly approaching completion:—

The *Japan*, the third steamship actually built for this line, and which was launched from the shipyard of Mr. Henry Steers, at Greenpoint, was ordered by the Pacific Company in October last, the laying of her keel having taken place about the 1st of December. She is, in the opinion of shipbuilders, probably the best wooden vessel ever built. She is constructed of white oak, live oak, hackmatac and red cedar; the floor and futtocks of white oak, the "tops" of live oak and red cedar, and the "half-tops" of

Digitized by Google

hackmatac. She has two thicknesses of planking, the inner layer of yellow pine and the outside layer from the bottom to the bilge of oak, and above the bilge of yellow pine. Her fastening, where exposed to water, is with what is known to shipbuilders as "yellow metal," which is copper and brass united, and elsewhere with iron, her planking being bolted edgewise and laterally. Her decks are made of four-inch white pine.

The capacity of the *Japan* is 4,800 tons, or 4,000 tons new measurement. Her length from stem to stern is 370 feet; her breadth, 50 feet, and 73 feet outside the wheels, and her depth 31 feet from the lower side of the deck to the floor. Her keel measures 360 feet. Her capacity for freight alone, aside from the space devoted to passengers, is estimated at 3,300 tons. This, of course, includes 1,500 tons of coal, the usual quantity taken by these steamers on the Japan trip. Her machinery, which is to be made at the Novelty Works, will not differ materially from that of the *Great Republic* and *China*, her predecessors on the line. It will consist of the ordinary American beam engine, with a cylinder 105 inches in diameter and 12 feet stroke, and will have a capacity of about 1,500-horse power. The wheels have a diameter of 40 feet, with buckets of 11 feet 6 inches face. She is bark-rigged, and in the event of accident to her machinery will be able to make good progress under sail.

The accommodations for passengers are planned on the same gigantic scale which characterises all the appointments of this new and magnificent enterprise. The saloons are spacious, and at the sides are rooms for 600 first-class and 500 second-class passengers, and there are accommodations, besides, for about 1,000 passengers in standing berths. The main saloon on the spar deck has one tier of rooms on each side; the second saloon, on the main deck, and underneath the main saloon, has on each side a tier of large family rooms, eight feet square, with double width berths, and the third saloon, on the same deck, but further forward, has rooms six feet square, for families also. Still further onward, on the same deck, are the second class rooms, six feet square, with movable berths; and beyond these again is the steerage, extending to the rooms for the accommodation of the firemen and sailors, and arranged for the accommodation of passengers in the standing berths. The rooms of the officers of the steamer are situated in houses on the spar-deck, with the main saloon.

The launch was in every respect successful; in fact, the splendid craft seemed anxious to get into water, as she began to slip away even before the last stays had been removed. The four tugs stationed in the river to check her after she was afloat was somewhat taken by surprise, although every thing was secure. They were not in the positions designed, however, and as the *Japan* shot into the water all were taken in tow; two of them being more unfavourably situated than the others, were drawn into the wake of the steamer with such rapidity that they came into collision, and stove in some of their lighter upper works. The steamship had received her name when the keel was laid, and there was, therefore, no occasion for the observance of the ancient custom of breaking a bottle of wine at her baptism. The crowd was large, and, of course, exceedingly enthusiastic, and gave expression to their feelings in many and loud cheers. The steamer was at once towed to the Novelty Works, at the foot of East Twelfth-street, where she will remain while receiving her machinery. The cost of the *Japan* when ready for sea is estimated at $1,200,000.

In a recent article on the reported imprisonment of Christians at Nagasaki, we had occasion to allude to the presence at that port of two Protestant missionaries, both from America. One of these gentlemen, the Rev. C. M. Williams, after an uninterrupted residence of some eight years in Japan has recently revisited the United States, and having been consecrated a bishop of the American Episcopal Church, will shortly proceed to China as the successor of Bishop Boone. Bishop Williams is now in London, and is one of the several American prelates who assisted at the Pan-Anglican Conference recently held at Lambeth.

We have been favoured by Auguste Behn, Esq., chairman of the new Germanic Lloyd's, with a copy, printed in English, of the statutes of that institution. The aim of the promoters has evidently been to establish their new society on a sound and liberal basis, with the view of emancipating the Germanic shipping interest from the thraldom of the French Bureau Veritas, which has long been felt to be intolerable. It is intended to make the society not merely local but international, all foreign countries being invited to join it by establishing sub-districts in conjunction with, and under the control of, the chief administration; a plan calculated largely to increase its sphere of usefulness.

The Peninsular and Oriental Company's new steamer *Sumatra* has arrived at Southampton from the Clyde. She is a sister ship to the *Bangalore*.

The *London Gazette* announces, under date Oct. 5th, that "The Queen has been pleased to appoint the Rev. William Roberts Beach, M.A., to be Colonial Chaplain for the Colony of Hong Kong."

(To the Editor of the *London and China Telegraph*.)

Sir,—In your issue of 30th Sept. you have placed us in the list of silk shippers from Shanghai. You will find on inquiry you have been misinformed in this matter; there is no firm of our name in Shanghai, and our agents, Messrs. Thorne Bros. and Co., had not shipped any silk within the dates referred to in your statement.—We are, Sir, your obedient servants,

Thorne and Co.

4, Cullum-street, E.C., 1st Oct., 1867.

Literature.

St. Pauls, Messrs. Virtue and Co.'s new shilling magazine, has duly made its appearance, and must be pronounced a decided success. Edited by so universal a favourite with the reading world as Mr. Anthony Trollope, illustrated by the gifted pencil of Mr. Millais, R.A., and "got up" in a handsome and attractive style by its publishers, *St. Pauls* will not fail to take a very high place in public estimation, notwithstanding the number of competitors it has to contend with. In his introductory paper the Editor disclaims any pretension that his new venture is the one thing needful to satisfy a pressing want of the age, but at the same time states his belief (with a modest consciousness of his own merit) that he will nevertheless be able to make it sufficiently acceptable to the public to ensure it a successful career. Another instance of Mr. Trollope's modesty—a somewhat rare quality, it is to be feared, in magazine editors—is that the first instalment of his own story, "Phineas Finn," is unobtrusively placed last of all. It is nevertheless the principal feature in the number, being written in his most graphic and telling manner. The other papers are an article on the Reform Bill, entitled "A Leap in the Dark, or a Glance at What was Done Last Session;" four chapters of a novel by the Baroness de Bury, entitled "All for Greed; and essays on "The Ethics of Trades Unions;" "The Turf, its Present Condition and Prospects;" "On Sovereignty;" and "On Taste," by Henry O'Neill, R.A. The other monthlies contain nothing requiring special notice, with the exception of *Macmillan*, which contains, amid the heavier matter peculiar to itself, two most amusing papers, "Eating and Drinking in America," and "Brother Prince," the latter being a sketch of the founder of the "Agapemone" and his extraordinary sect. It is rumoured that Mr. James Hannay has been asked to edit one of the magazines, and it is to be hoped he will accept the offer, for we believe few literary men of the present day are so well qualified for the post.

The Chinese Classics. Translated into English, with Preliminary Essays and Explanatory Notes. By James Legge, D.D. Vol. I. *The Life and Teachings of Confucius*. (Trubner and Co.)—Chinese literature, thanks to the efforts of such men as Mr. Wade and the translator of these works, is now emerging from the mystic shadow that so long veiled it from European scholars, and further knowledge of it continues to be sought for, and gladly received when procurable. Dr. Legge having devoted many years to the study of the Chinese classics, and being gifted with that extraordinary degree of patience and perseverance that alone renders their study profitable, is well qualified for the task he has undertaken; and the series, of which this is the first instalment, will be invaluable to students as well as interesting to general readers.

The new weekly Liverpool paper, entitled *The Leader*, was commenced on the 21st ult., price 2d., with a new and original novel, expressly written for *The Leader* by Mr. Edmund Yates, and entitled, "A Righted Wrong," and contributions on political, literary, social, artistic, and local topics, by a number of writers of eminence.

In Richardson's *Beyond the Mississippi*, which has just been published in New York, another description of Utah is offered to the public. Brigham Young is the great defender of polygamy, and exhorts the Mormons to sustain the system with their lives, even if it should be against the Government of the United States. The women, he says, regard it as a sore trial for which they will have their reward in heaven. It is this strong religious conviction which alone prevents the rival wives from quarrelling. Gentile ladies visit only the first wives. The women are forced to work hard, and altogether polygamy in Utah appears to be not a very different thing from polygamy in the Gaboon, where the first wife holds a very different position from the others, who are in reality domestic slaves, without belonging to the slave class; they therefore fetch a higher price, and it is fashionable for the rich elders of the tribe to purchase them.

The English edition of the great Dorè Bible is now completed in two volumes. It contains 238 full-page drawings by Gustave Dorè, and is certainly the most magnificent edition of the Holy Scriptures ever attempted. Messrs. Cassel, Petter, and Galpin are the publishers.

Mr. Charles Dickens has decided upon giving his "Readings" in America, and leaves Liverpool for New York on the 2nd of November. The New York *Round Table* thus good-humouredly

Digitized by Google

comments on Mr. Dickens's sketches of American life in his "American Notes" and Martin "Chuzzlewit," *apropos* of his contemplated second visit to the United States:—

"In all earnestness we consider that our countrymen owe Mr. Dickens a tangible debt of gratitude. He coloured his pictures rather highly, sometimes led astray perhaps by his intense feeling for the ludicrous, said some things which at the time were disagreeable to hear, but which everybody, as usual, read and re-read, and which very large numbers have profited by. It should be remembered that his satire was almost always directed against merely superficial weaknesses, that it was free from anything like bitterness, and in this latter respect distinguished from much which has been written of us by such authors as Mrs. Trollope, Basil Hall, or even Sydney Smith. Moreover, if we deduct here and there for exaggerations, which are (or were) inseparable from the very nature of the man, and which are quite as freely exhibited in dealing with all classes of his own countrymen, in most of his books, including 'Martin Chuzzlewit' itself, it must be acknowledged that what Mr. Dickens wrote of our manners and other social defects and absurdities was intrinsically just and true, and therefore ought properly to have been said by anyone who had the wit and literary position effectively to say it. Mr. Dickens was not, like M. de Tocqueville, a political observer, but a writer of humorous and satirical romance, who could not have described scenes in this country, any more than in his own, without impregnating them with his own proper flavour, and who, had he done so, would merely have produced what would have necessarily been insipid and uninteresting. We do not hesitate to affirm that nothing better in its way could happen to us than for Mr. Dickens, in the maturity of his powers, to write of our society with the same freedom and candour from his own point of view, as he exhibited in former years; and that we trust he may be induced to do so."

The *Athenæum* says—"The Queen's book has been printed, and will shortly be given to the public. Her Majesty describes, in her own fresh and feminine style, a series of journeys chiefly made by the royal party in Scotland. A good deal of guide-book matter is thrown into the narrative, and there are many pleasant references to her travelling companions and servants." Our contemporary adds that "from this book the public will learn something about the Prince Consort's gillie, who has recently attained a sort of grotesque notoriety."

At the meeting of the British Association, in the Geographical section, a paper descriptive of "A Boat Journey across the Northern Part of Formosa" was read by Dr. C. Collingwood. The author last year traversed the northern end of the island of Formosa, from Tam-suy, on the west, to Kee-lung, on the east coast, by the route of the Tam-suy and Kee-lung rivers, which are separated near their headwaters only by a short portage over a hill. This part of the island appeared to be densely populated by the Chinese, and several towns of considerable size were passed. The record of this remarkable journey excited great interest.

The entire correspondence relating to the attempted foundation of the Mexican empire and its fall is announced to be published by Duncker and Hamblot at Leipzig, who also announce three more volumes of the Emperor Maximilian's memoirs and essays.

The following is a list of the principal new works published during the last month taken from the *Publishers' Circular*:—

In Literature, Science, and Art we have the *Illustrated Book of Sacred Poems*, edited by the Rev. Robert H. Baynes, a handsome book, containing a judicious selection of sacred poetry; Mr. Alexander Melville Bell writes on *Visible Speech, or the Science of Universal Alphabetics*, a scheme which enables all languages to be written in the alphabet, with tables, diagrams, and examples; Chateaubriand's *Atala* is translated by James Spence Hardy, from Didot's Edition of the Viscount's works, with illustrations by Gustave Dore; we also have the same artist illustrating the poet laureate's *Guinevere* and *Elaine*, a splendid series of photographs from his designs. *The Arch of Titus and the Spoils of the Temple*, by Mr. Wm. Knight, is an historical and critical lecture, with authentic illustrations, containing an architectural analysis of the various parts of the structure; Mr. John De Liefde gives us *The Romance of Charity*, in which the most striking and interesting particulars of the author's larger work on the Charities of Europe are brought together; and Mr. M. W. Smith writes on *Cavalry Outpost Drill and Cavalry Skirmishing*.

In Geography and Travel we find an English edition of an American work by Mr. J. Ross Browne, an American traveller, *On the Land of Thor*; and Mr. James M. Hopp, also an American author, gives us a volume entitled *Old England, its Scenery, Art, and People*, a most interesting book, embodying the views of an intelligent American observer who has lately visited this country; the Hon. W. Elliott writes on *Carolina Sports by Land and Water*, a series of sketches of devil-fishing, wild cat, deer, and boar-hunting; and Capt. J. T. Newall, well known as a daring hunter, gives us his experiences of *Hog-hunting in the East, and other Sports*.

In History and Biography we have Mr. P. G. Cumming writing on *The Great Stanley, or James, Seventh Earl of Derby, and his Countess Charlotte de la Trémouille in the Isle of Man*, an interesting narrative of the seventeenth century, with notices of Manx manners, customs, and antiquities, illustrated by Messrs. Lemon and Bright; and Mr. Henry Lonsdale gives us an account of two Cumberland worthies, *John Christian Curwen and William Blamire*.

In Fiction we have Captain Mayne Reid's *Giraffe Hunters*, 3 vols.; Mr. Sheridan Le Fanu's *Tenants of Mallory*, 3 vols.; Mr. F. W. Robinson's new story, *Anne Judge, Spinster*, 3 vols.; and Dr. Norman Macleod's *The Starling*, a Scotch story, in 3 vols.

Monetary and Commercial.

The first arrangement attempted in the matter of Messrs. Dent and Co.'s failure, for a composition of half-a-crown in the pound having been found to be invalid, another meeting of creditors was convened on the 4th instant, at which it was proposed that a deed of assignment should be executed of all their estate for the benefit of the creditors. As such a deed can only be executed in China, the creditors in this country will be under the necessity of sending out powers of attorney to their agents there to sign it on their behalf. Should the bulk of the creditors agree to carry out this plan the bankruptcy will be annulled. Mr. Pollard, who has lately arrived from Hong Kong, attended the meeting on behalf of the bankrupts. So far, nothing has transpired as to the unaccountable manner in which the once vast capital of this firm, together with the deposits in their hands (which alone reached half a million sterling), has been lost or squandered away. Until some explanation is forthcoming on this point the sufferers can hardly be expected quietly to accept the terms sought to be imposed upon them.

A meeting of the creditors of Mr. Edward Webb, late of Messrs. Dent and Co., has also been held, at which a proposal of five shillings in the pound, payable in five years, was submitted, and is, we understand, still under consideration. The total liabilities are stated to be under £100,000.

The biddings for £100,000 in bills on India were held at the Bank of England. The amounts allotted were to Calcutta £96,000 and to Madras £4,000. The minimum price was fixed, as before, at 1s. 11¼d. on Calcutta and Madras. Tenders at 1s. 11⅜d. receive about 13 per cent., those above in full. No tenders for bills on Bombay were invited, owing to the expenses of Government there in connection with the coming war in Abyssinia. The terms obtained indicate a diminution in the demand for means of remittance to the East.

The market for bar silver remains very quiet, there having been no demand for the East. At the commencement of the month it was generally expected that a demand for India would set in, as the Abyssinian expedition was expected to have the effect of raising the Indian Exchanges, but as yet this result has not been produced; the market continues flat, with but little demand for the Continent, for which destination the bars by last West India packet have been disposed of at 5s. 0⅛d., the same price that was current at the commencement of the month. Mexican dollars also remain inactive, and, with the exception of some small amounts on Government account, no shipments to China have taken place. The price is now quoted 4s. 11d.

The directors of the Oriental Bank intend to propose to the meeting of shareholders on the 24th of October an interim dividend for the last half-year at the rate of 12 per cent. per annum.

An extraordinary meeting of the shareholders in the Chartered Bank of India, Australia, and China will be held on the 16th of October, for the purpose of declaring an interim dividend for the half-year ended the 30th June last.

An advance which has taken place in the shares of the Peninsular and Oriental Steam Company probably arises from the fact that this company's tender for the increased mail service to the East is the only one which has been sent to the Government. At the same time it is believed that the charter by the Government of several of the company's steamers, in connection with the expedition to Abyssinia, and the purchase of a large portion of its stock of coal at Aden, where, as a rule, 30,000 to 40,000 tons are kept, will add to the profits of the present half-year. Without the assistance thus afforded the Government would probably have had to buy its stock of coal in England, thus involving both extra expense and delay. It is to be hoped that the official decision upon the tender for the new service will be communicated without delay, in order to allow time for the necessary preparations.

The liquidators of Overend, Gurney, and Co. (Limited) announce that a further dividend of 2s. in the pound will be paid to the creditors on Wednesday, the 9th inst., and three following days. This will make a total distribution so far of 12s. in the pound.

New York advices announce the failure of Messrs. Gill, Gillets, and Noyes, tea merchants, for £190,000, through buying goods for gold and selling for currency. From Boston we learn of the bankruptcy of George L. Schuyler, of the firm of R. and

Digitized by Google

G. L. Schuyler, with liabilities amounting to £800,000, and no assets whatever.

The creditors of Messrs. Walker, Hamilton, and Co., commission merchants, of Manchester and Glasgow, are understood to have accepted a composition of 6s. 8d. in the pound, one-half to be guaranteed.

The half-yearly dividend due on the 10th inst. on the Turkish Six per Cent. Loan of 1854 is advertised for payment in due course by Messrs. Dent, Palmer, and Co., together with the bonds, amounting to £56,950, which were drawn in July last.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton on the 4th inst., was—in gold, to Galle, £691; to Madras, £40; in silver, to Shanghai, £10,500; total in gold, £731; in silver, 10,500.

A prospectus has been issued of the Kirkham and Castle Howard Iron Company (Limited), with a capital of £60,000, in shares of £20.

The prospectus of the English Assurance Company has been issued, with a capital of £500,000, in 25,000 £20 shares, and power to increase to £2,000,000. The arrangements for subscriptions are 10s. per share on application, 10s. on allotment, 10s. in three months, and 10s. in six months after the allotment, beyond which no further call is contemplated. This company is established for the purpose of affording additional facilities for fire and life assurance, the granting of loans, annuities, endowments, &c.

An extraordinary meeting of the shareholders in the London Bank of Mexico and South America (Limited) is called for the 10th inst., when a resolution will be proposed in favour of the undertaking being wound up voluntarily, and of the transfer of the business and property to a new company, with a capital of £1,200,000, in 40,000 shares of £30 each, of which 20,000 are to be allotted credited with £20 per share paid. This is a formal proceeding, with a view to the reduction of the liability on the shares, which at present is as much as £30 per share.

The directors of the English and American Bank (Limited) have issued a circular announcing that a requisition has been addressed to them for the winding-up of the bank, and that a meeting will accordingly be held on the question on the 16th inst. The circumstance of a call of £5 being proposed is the cause of the movement, but the directors consider a dissolution of the company would be inexpedient, because the business thus far has realised their expectations, and they are of opinion that if the call be met they will be able to do an extensive and remunerative business.

At the meeting of the proprietors of the Bank of British Columbia a dividend was declared at the rate of 4 per cent. per annum, leaving £1,574 to be carried forward. It was stated that since the last meeting there have been no fresh bad debts, and, although the business of the company is at present rather limited, the board hope to be in a position to show a better result as public confidence revives.

An extraordinary general meeting of the Lower Assam Company (Limited) is called for the 14th inst., "for the purpose of authorising the directors to make two further calls of 10s. each on the shares issued."

BOARD OF TRADE RETURNS.

The Board of Trade returns for the month of August show great steadiness, the declared value of our exportations having been 2½ per cent. in excess of those of the corresponding month of last year, while compared with August, 1865, there is an increase of 26 per cent. The favourable nature of the total on this occasion is due chiefly to the revival in the iron trade, our shipments of Iron and Steel for the month having been to the value of £1,582,666, which is 29 per cent. over the amount in August, 1866. Cotton Manufactures figure for a decrease of 7 per cent. in value, although there has been an increase of 2 per cent. in the quantity, a circumstance explained by the fall in the price of the staple, and which indicates that there has been no diminution in the actual amount of employment. Of Cotton Yarn our consignments have been nearly 20 per cent. in excess of those of last year, both in value and quantity, and this fact, coupled with an increase of 23 per cent. in the value of Machinery exported, denotes a general tendency toward a revival in the manufacturing industry of other countries. Owing to the dulness of the American trade, our shipments of Haberdashery and Hardware continue to show a falling-off, the reduction being 5 per cent. and 3 per cent. respectively. The same cause has contributed in a great degree to a decline of 9 per cent. in Linen Manufactures, 18 per cent. in Silk Manufactures, and 5 per cent. in Woollen Manufactures. The total value of our Exports for the first eight months of the present year has been £121,056,913, showing a reduction of only a little more than 3 per cent. from the unprecedented total of last year. Looking at the fall in the prices of Cotton and other kinds of raw material within the past 12 months, our trade, as regards the amount of profit and employment it has afforded, may be considered to have exceeded that of 1866. Contrasted with the total in the first eight months of 1865 it exhibits an increase of 18 per cent.

Compared with last year the value of the Imports for both the month of July and the seven months still presents a decrease. The Imports for July are valued at £18,166,789, which is about seven per cent. less than the value for July, 1866, while for the seven months of 1867 the total is returned at £121,663,140, and for 1866 at £134,872,580, showing a reduction of £13,209,440, or about nine per cent.

The returns which have special reference to China and the Far East generally show that our Export trade with those countries is still greatly depressed. Thus we find that contrasting the first seven months of the present year with the corresponding period of last, the export to China (exclusive of Hong Kong) has decreased 18 per cent., to Hong Kong 25 per cent., to Japan 4 per cent., to Java 13 per cent., and to Ceylon 25 per cent. On the other hand the export to the Straits Settlements has improved to the extent of six per cent, and to the Philippine Islands 41 per cent. For the month of July a comparison of the figures presents the following results:—To China (exclusive of Hong Kong) a decrease of 10 per cent., to Hong Kong an increase of 23 per cent., to Japan an increase of 17 per cent., to the Straits Settlements a decrease of 16 per cent., to the Philippine Islands an increase of 98 per cent., to Java an increase of 27 per cent., and to Ceylon a decrease of 18 per cent.

The following is a summary of those figures relating to our Export and Import trade with China and the countries in the Far East:—

IMPORTS.

The total quantity of Raw Cotton imported during the month and eight months ended 31st Aug., and the value to the 31st July, are thus given:—

From	1865.	1866.	1867.
	Quantity for the Month ended 31st Aug.		
China	44,581	4,453	— cwts.
British India	530,105	550,946	611,582 „
Egypt	101,135	45,193	66,996 „
Total from all parts	866,978	876,615	995,576 „
	Quantity for the Eight Months ended 31st Aug.		
China	301,509	17,949	4,707 cwts.
British India	1,941,401	3,439,087	1,869,451 „
Egypt	1,005,454	735,460	851,675 „
Total from all parts	4,561,040	8,809,601	7,391,680 „
	Value for the Month ended 31st July.		
China	£252,469	£58,258	—
British India	1,580,752	2,167,506	£1,149,076
Egypt	1,097,992	701,396	534,740
Total from all parts	4,056,267	6,220,925	3,402,210
	Value for the Seven Months ended 31st July.		
China	£1,210,335	£58,258	£20,976
British India	7,460,795	£13,905,053	4,970,795
Egypt	7,291,833	6,168,031	5,676,216
Total from all parts	24,534,839	53,569,684	35,769,409

The quantity and value of the Raw Coffee imported into the United Kingdom from British Possessions are thus shown:—

From	1865.	1866.	1867.
	Quantity for the Month ended 31st Aug.		
Ceylon	9,968,924	10,069,123	8,817,567 lbs.
Other British Possessions	3,579,541	3,816,368	1,737,415 „
	Quantity for the Eight Months ended 31st Aug.		
Ceylon	48,228,050	47,706,659	53,945,198 lbs.
Other British Possessions	12,705,033	11,274,479	8,390,921 „
	Value for the Month ended 31st July.		
Ceylon	£290,758	£199,841	£310,213
Other British Possessions	75,639	109,006	82,965
	Value for the Seven Months ended 31st July.		
Ceylon	£1,314,330	£1,202,979	£1,546,643
Other British Possessions	295,633	247,546	217,423

The following quantities were entered for Home Consumption:—

	1865.	1866.	1867.
	In the Month ended 31st Aug.		
Ceylon	1,586,996	1,769,162	1,452,995 lbs.
Other British Possessions	574,151	501,521	517,035 „
	In the Eight Months ended 31st Aug.		
Ceylon	13,011,401	15,305,296	13,868,553 lbs.
Other British Possessions	5,378,303	3,918,681	4,208,919 „

Returns are given of the quantity and value of the Unrefined Sugar imported from Java and the Philippine Islands:—

	1865.	1866.	1867.
	Quantity for the Month ended 31st Aug.		
Of 2nd quality	—	—	190 cwts
Of 3rd do.	32,925	2,450	1,242 „
Of 4th do.	25,968	38,793	32,462 „
Total, all qualities	58,893	41,243	33,894 „
	Quantity for the Eight Months ended 31st Aug.		
Of 2nd quality	2,117	3,830	190 cwts.
Of 3rd do.	149,372	53,636	1,305 „
Of 4th do.	360,929	246,946	206,700 „
Total, all qualities	512,418	304,412	208,195 „
	Value for the Month ended 31st July.		
Of 2nd quality	—	£4,689	—
Of 3rd do.	£27,515	1,007	£1,329

CASUALTIES.

The Martha Rideout, Reed, from Singapore to Boston and New York, which put in at Padang, July 8, after being ashore, had been surveyed, and the cargo was being landed.

The Albrecht Beyling, Berg, from Batavia for Schiedam, arrived at Zierikzee, Sept. 28, leaky.

The Galilei, Mey, from Batavia for Amsterdam, arrived at Flushin Sept. —, with loss of head, damage to bowsprit, &c., having experience heavy weather off the coast.

The Phœnix, Cullen, from Cardiff to Shanghai, which put in at Milford, Sept. 23, through stress of weather and to stop a leak, was lightened of some coals, being too deep, and proceeded on the 6th Oct. for her destination.

The Panama (American ship), Soule, from Bangkok to Queenstown, with rice, which put into Bahia, Aug. 4, leaky, was condemned at that port, and sold by auction previous to Aug. 24.

The Bolivar, Christian, from New York, for Japan, put into Rio de Janeiro, Sept. 6, leaky.

The Peter Jordt, Brodersen, from Liverpool to Ceylon, which put in at Rio de Janeiro, Aug. 16, leaky, was discharging there on the 6th Sept.

The Taitsing, Mitsford, which arrived at London, Oct. 7, from Foochow, lost three topgallant masts, bulwarks, and all sails set, and had her decks swept of boats, spars, &c., during a very heavy gale, Sept. 4, in lat. 13 N., lon. 26 W.

The Mount Stuart Elphinstone, Freebody, which has twice sailed from London for Galle, and been twice compelled to return, being leaky, is now detained in the Downs by a refractory crew.

The screw steamer Hiogo, Bainton, which left London, Sept. 27, for Yokohama, Hiogo, and Nagasaki, went ashore (during calm weather) on the eastern rock of the Eddystone Lighthouse on the morning of Oct. 1 and became a total wreck; the crew and passengers were saved. Two cases specie, value £10,000, have been got safely ashore, and it is expected that part of the cargo may yet be saved.

MISCELLANEOUS.

At St. Vincent (C.V.).—Sept. 4, Vulcan, Vos, from Cardiff, and sailed 9 for Japan.

At Chinchas.—Aug. 24, Golconda, Marshall, loading for China.

PORT OF AMOY.
CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

NOTICE TO SHIPOWNERS.
SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c.

Apply at the Offices of Messrs. PATERSON, SIMONS and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

PATENT IMPROVED ICE-MAKING MACHINES,

FOR THE

MANUFACTURE OF ICE ON A LARGE SCALE.

TEN TO TWENTY POUNDS OF ICE MADE AT THE COST OF ONE PENNY

SINCE the first introduction of these Machines to public notice, the Manufacturers' long experience has enabled them to effect many important improvements, largely increasing their simplicity of management and solidity of construction.

The materials employed in the production of ice are used over and over again without appreciable loss. There is no danger attending the process.

A trial of each Machine to produce the quantity of ice stated is made when so desired by the purchaser.

Hospitals, Hotels, Barracks, or other Buildings may be cooled to any temperature.

These Machines produce from ten hundredweight to twelve tons per diem, and are numerously established in all parts of the world.

Her Majesty's Government of India employ this apparatus (see official report thereon).

The Peninsular and Oriental Steam Navigation Company possess SIEBE's large Machines at their principal Indian stations. Copies of reports upon the working of these Machines, and testimonials, will be sent on application.

SIEBE BROTHERS desire to say that an undertaking of this nature is not to be regarded as a mere speculation, but as the purchase of tried and valuable machinery, constituting a lucrative business, returning exceedingly large profits upon the amount invested.

For terms and other information apply to the Manufacturers, or to Messrs. SMITH, ELDER, and Co., 65, Cornh

THE 'LONDON AND CHINA EXPRESS," ON SALE

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, RED BULL WHARF, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Eau Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist's Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

Orders executed on receipt of 10 per cent. of the amount in cash, the balance being drawn for through a Banker.

HOLLOWAY'S OINTMENT and PILLS.—Throughout the year, whether summer heats or wintry chills rule the atmosphere, these remedies are always applicable, and will never fail to reward those sufferers who give a trial to their efficiency. This Ointment is invaluable for the relief of the many accidents which happen to children. Chafes, cuts, burns, pimples, and boils are instantly relieved and speedily cured by it; all external inflammations, carbuncles, whitlows, sprains, and erysipelas are restrained in their painful course by this cooling unguent and conducted to a thorough cure. Assisted by the purifying power of the Pills, Holloway's Ointment works wonders in healing up old ulcers and effectually skins over those chronic sores on the legs which make existence miserable.

DYSENTERY, CHOLERA. FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn o.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any rtic e in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE, is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by th Vice-Chancellor

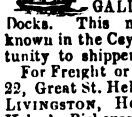
No. 22, Great St. Helen's, E.C.

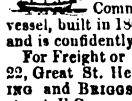
A regular trader. To follow the "Seafield."
(First Ship.)



DIRECT for COLOMBO, the splendid British-built ship, GRANVILLE, A1 15 years, 696 tons register; G. GALLICHAN, Commander; West India Docks. This magnificent high-classed vessel, well known in the Ceylon trade, offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Pegasus," and will meet with the usual quick despatch.



FOR BOMBAY DIRECT, the fine British-built clipper ship LAURETTA, A1, 554 tons register; J. McPHERSON, Commander, East India Docks. This splendid vessel, built in 1865, is noted for her fast-sailing qualities, and is confidently recommended to shippers.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Has a large portion of her cargo engaged, and will meet with quick despatch.

DIRECT for POINT DE GALLE, Mangalore, Calicut, and Cochin, the fine, fast-sailing British ship ISABEL, A 1, 12 years, 186 tons register, 450 tons burthen; D. DAVIES, Commander; St. Katharine's Docks. This magnificent clipper, built under special survey in 1865, is strongly recommended to shippers of fine and season goods. Made her last passage home from Algoa Bay in 57 days.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

FOR COLOMBO, CEYLON, DIRECT, will have immediate despatch, having a large portion of her cargo engaged, the clipper ship BOYNE, AA1, 618 tons register; C. P. JONES, Commander; loading in the West India Docks. This beautiful vessel has a full poop, with accommodations of the first order, for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

FOR SHANGHAI, to sail punctually on the 16th of October, the celebrated clipper ship, ARIEL, A 1 14 years, 853 tons register, JOHN KEAY, Commander; lying in the East India Docks.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

REGULAR LINE of PACKET SHIP (to follow the Belted Will).—For Hong Hong and Whampoa, the well-known clipper BLACK PRINCE, A 1 13 years, 750 tons register; WILLIAM INGLIS, Commander: lying in the East India Docks. Has superior accomodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

REGULAR LINE of PACKET SHIP.—To sail on the 17th October.—For Hong Kong and Whampoa, the well-known clipper BELTED WILL, A1 14 years, 812 tons register; A. LOCKE, Commander; lying in the London Docks. Has excellent accommodation for passengers.

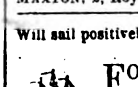
For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

To follow the "Ariel."

FOR SHANGHAI, the favourite clipper WHITEADDER, A1 10 years, 915 tons register; F. W. MOORE, Commander; lying in the East India Docks. This ship has a full Poop, with superior accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

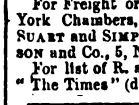
Will sail positively on the 5th November. **Last shipping** day 2nd November.



FOR SINGAPORE and PENANG, the very fine clipper-built ship ALPHINGTON, A 1 12 years, 326 tons register; J. CAINES, commander. West India Docks. This fine shia, built under special survey, is strongly recommended to shippere requiring despach.

For Freight or Passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; or to STUART and SIMPSON, 9, Clement's-lane; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

For list of R. and Co.'s line of ships now loading see "The Times" (daily) and other papers.



SHANGHAI direct, the magnificent, river-built, clipper ship DILKHOOSH (owned by Messrs. Smith, Fleming, and Co.), 816 tons register; loading in the East India Docks. This splendid vessel, built in 1864, is strongly recommended to shippers of fine goods, and has good passenger accommodation.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., Pool Fold Chambers, Cross-street, Manchester; or 27, Leadenhall-street, E.C.

The next Homeward Mail, with Hong Kong dates to Sept. 11, will be due here on the 28th inst. Telegrams from Hong Kong to Sept. 29, and Shanghai 22, were received *via* Galle yesterday—only 14 days from Hong Kong.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer Bangalore, arrived Oct. 12.—From Singapore: Mr. and Mrs. Blanckerhagen and servant, Don Negion, Don de Beceria, Don and Donna Escoba, Don M. Falco, Don Gonzalez, Mrs. Limbert, and four second-class passengers. From Hong Kong: Mr. Ramsay, Mr. Glossap, and one second-class passenger. From Galle: Mr. Stretch, Mr. Snead. From Shanghai: Mr. Canitt, Mr. King, Mr. Cull.

To Southampton, per P. and O. steamer Pera, expected to arrive Oct. 20.—From hanghai: Capt. Blow, Mr. Konig, Mr. Forsyth. From Singapore: Mr. Bentley. From enang: Capt. and Mrs. Alexander. From Galle: Mr. Pace, Mr. Bagshott.

To Suez.—From Hong Kong: Sergeant-Major Hardie

PASSENGERS OUTWARD.

From Marseilles, October 28.—To Singapore: Mrs. R. Little and child, Mr. Greenshields, Mrs. Waterhouse. To Shanghai: Mr. L. R. Goldsmith. To Hong Kong: Mrs. J. Haffenden, Mr. T. Pyke, Mr. F. Rowett, Mr. W. R. Beach. To Yokohama: Dr. and Mrs. Jenkins. To Ceylon: Mr. W. N. Duckworth, Mr. G. Somes.

From Suez.—To Ceylon: Mrs. Bloomstrand, Miss Von Eberstein, Captain Hon. J. Fitz Maurice. To Penang: Mr. E. Fredericks. To Shanghai: Mr. J. Mackellar.

Per P. and O. steamer, from Southampton, Nov. 4.—To Ceylon: Mr. and Mrs. J. M. Vanderspar and four children, Mr. Malcolm, Miss Malcolm. To Singapore: Mr. and Mrs. J. McLachlan, Mrs. Dunman and two daughters, Mrs. Willans and two children, Miss Willans, Mr. and Mrs. J. G. Slade, Miss Laurie.

From Marseilles, Nov. 12.—To Ceylon: Mr. J. F. Dickson, Mr. and Mrs. Donnan, Mr. W. C. Miller.

Per P. and O. steamer, from Marseilles, November 20.—To Shanghai, via Bombay: Mr. R. C. Antrobet.

Per P. and O. steamer, from Southampton, November 20.—To Yokohama: Mr. and Mrs. McDonald and two children. To Singapore: Mr. F. A. Sheppard.

Per P. and O. steamer, from Marseilles, Nov. 28.—To Singapore: Mr. J. D., Mrs., and Miss J. Almeida, Miss Renéaud, Mrs. Velge. To Hong Kong: Mr. Tait. To Ceylon: Mr. and Mrs. Gunter.

Per French mail, from Marseilles, Oct. 19.—To Hong Kong: Mr. R. Deacon. To Shanghai: Mr. N. P. Kingdom.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present mail brings intelligence to the 14th August—four days later than the French mail. The outward mails of 10th and 17th June arrived on the 29th July and 5th August respectively, the latter conveying London telegrams to July 6.

The *Japan Herald* throws doubt on the report of the Shiogoon's abdication, and treats it as a *canard* promulgated by the "opposition party."

The following items are from the *Herald*:—

Telegrams may now be despatched from here to all parts of the world through Mr. E. S. Benson, who has been appointed agent for the Western Union Telegraph Company. By this means the telegrams per *Colorado* this trip may be of a more interesting character than they have been hitherto, and we trust the line may be sufficiently supported to enable them to keep up their agency.

The body of a soldier named R. Surgey, belonging to H.M.'s 29th regiment, has been found in the sea near the French Hatoba. A coroner's inquest was held, but no information was elicited as to the manner of his falling into the water. The verdict was returned "Found Drowned."

H.M.'s *Pelorus* arrived on the 8th August from Nagasaki we hope to remain with us during the remainder of the season The *Ena-Kawa*, a small steamer of only 100 tons, has also arrived from Nagasaki with four passengers.

The rumour of the abdication of the Shiogoon is alluded to by the *Japan Times* in the following terms:—"We have taken as the subject of a leading article a report which has reached us from a source on which we have always been able hitherto implicitly to rely. The Shiogoonate is said to be again vacant, Stotsbashi having resigned, and professed himself, as on the occasion of the death of his predecessor, ready and anxious to acknowledge the claims of the young Owari to the dangerous dignity. We cannot state positively that this intelligence is correct, but the rumour is prevalent in many quarters, and, all things considered, the probabilities are in favour of its truth. The wish on this occasion certainly does not father the thought, for, in common with all the foreign diplomatic *corps*, we should receive confirmation of the report with dismay. It would imply another long minority, contests for power between several rival factions, constant alarm, disturbance, and perhaps a bloody civil war. But as we have before pointed out, the position of Stotsbashi has always been a difficult one. Without much territory or means of his own, and with but a scanty personal following, nothing but his talents raised him to greatness at so early a period of his life, and by many of the great nobles he is regarded as a clever adventurer and neither feared nor envied—certainly disliked. It will be recollected that it was with the utmost difficulty, at a most important crisis, when they could hardly do without him, the Daimios succeeded at last in persuading him to accept investiture. He gave them distinctly to understand that he would only remain Shiogoon on condition that his foreign policy should be endorsed and supported by a majority of them; and it cannot be matter of surprise that now—the danger over and intrigue against him commencing—he should remind them that he never sought the dignity, and should seek to lay it down. In the position he held before, as Gotairo or Protector of the young Shiogoon, he had nearly all the power and but little of the responsibility. Who can wonder that he should wish again to occupy, as he probably would should Owari be installed, so desirable a post?"

In accordance with the orders of the Mikado, the Prince of Echizen left Shimonoseki on the 11th July to communicate the terms "lenient and generous" on which his rebellion is condoned. Chiosiu goes into retirement and a son succeeds

Digitized by Google

to his dignities and the son of Ongasawara, the Daimio who lost his all at Kokura, is to receive from Chiosiu when he comes of age (he is now six years old) a hundred thousand kokus. Chiosiu has also lent Ongasawara the means of rebuilding his palace, which was totally destroyed when his town was taken. Thus the civil war is finally brought to a close and peace restored to the country.

The case of C. S. Hope *v.* Hansard and Black has been tried in H.M.'s Consular Court, before Dr. Myburgh. This was a case to try the validity of a bill of sale given to Mr. C. S. Hope as security for the repayment of money lent to Messrs. Hansard and Black, now bankrupts. On behalf of Mr. Hope, the case was conducted by Mr. H. B. Austin, who held a power of attorney, which he handed in for the satisfaction of the Court. In opening his case Mr. Austin read his petition that the plant and goodwill of the *Japan Herald* be handed over to him, as its rightful owner, by the official assignee. To this petition Messrs. A. Marks and Co. had raised objections, and called in question the validity of the deed, on the grounds that no detailed specification of the property affected by the deed was upon the face of it; that the terms of "Order in Council, 1865," had not been complied with, requiring that "within 21 days an affidavit of the time when the bill of sale was made;" and thirdly, that the property had never been taken possession of by Mr. Hope before the adjudication of bankruptcy, although he was aware that Messrs. Hansard and Black were insolvent. Dr. Myburgh, in giving judgment, said the bill of sale in question appeared to have been executed on the 14th of February, 1866, but it was not registered until the 28th of November following, nine months afterwards; so that in law it could not be construed to be a registration in the terms of the Act. It would appear, therefore, that the document was to all intents and purposes a secret bill of sale during the interval. There had also been an absolute failure of compliance with the Act which renders the filing of an affidavit obligatory to validate a bill of sale. The Court therefore had no option but to hold the so-called bill of sale to be absolutely null and void.—Petition dismissed and plaintiff to pay costs.

The sale of the *Japan Herald*, which had been put off from the 11th of July to the 1st Aug., had again been postponed, this time indefinitely, and it was believed that no further proceedings would be taken in the case until the arrival of Sir Edmund Hornby, who was expected to visit Yokohama shortly.

NAGASAKI.

Dates hence are to the 17th August. Admiral Keppell was in port in H.M.'s *Salamis*, and though he had experienced some slight indisposition had quite recovered his usual good health. [It is thought that the report recently spread as to the Admiral's serious illness and probable resignation proceeded from interested quarters.] Sir Harry Parkes was also on board the *Salamis*, making a tour of the ports with the Admiral.

CHINA.

HANKOW.

The Hankow *Times* mentions an act of looting on the estate of the wealthy family of Tseng kwoh-fan, the Viceroy of the Two Kiang, in Hunan:—"It will possibly be remembered by some of our readers that some weeks since there was a considerable stir among the gunboats and troops on the Wuchang side, consequent upon the despatch of a large force to Hunan. In the district of Shiang-shiang the family mansion of Tseng had been pillaged, many myriads of silver taken out of the family hoard, and the whole household scattered. This was an act of retaliation, carried out by the members of the Ko-lau-hwei (a new society formed of disbanded braves), because one of their leaders had been decapitated at Wuchang by order of the Governor of Hupeh, who is a brother of Tseng-kwoh-fan. The discovery of this immense amount of treasure, probably only a part of the deposits or savings of the Tseng family, has led to a few inquiries as to the way in which it has been come by. The matter is hushed up; but the whole affair, from first to last, is such a perfect exhibition of the ways and means of the governing and the governed of this unique country that very little comment is needed upon this particular instance of the internal disorder of a country whose people are said to be submissive and industrious."

SHANGHAI.

Advices from this port now extend to the 22nd August, at which date the outward mail of July 10 had not arrived. The following items are from the *North China Herald*:—

"It appears that there is a prospect of having the church completed, the contractors having decided upon finishing it, and keeping it in their possession till their account is paid by the trustees.

"The sale of the club building has been postponed to give shareholders in the old building an opportunity to take such measures for the protection of their interest as they may deem fit.

"We should add that there is reason to believe that Dr. Macgowan's telegraphic proposition to the Government of Yedo is under favourable consideration, and it would surprise no one who is acquainted with the Japanese to hear that they have anticipated the Chinese as regards the introduction of the electric telegraph."

The *Shanghai Recorder* has the following comments on the bankruptcy case of Messrs. Mackellar and Co., whose first meeting of creditors took place at Hankow on the 6th July:—

"The injury which is constantly done to trade by the ill-advised action of a few speculators, who, without capital to lose, enter the markets and raise prices against more prudent and more legitimate traders, is such as to render it the imperative duty of the press not to pass without comment cases of this nature when they come before the public. For this reason we propose to take into consideration the facts which have come to light in reference to the bankruptcy of Messrs. Mackellar and Co., Hankow. We take our data from the published report, and we deduce from them such inferences as must naturally occur to any one who gives them an attentive perusal. We shall be glad to find that the report is wrong in some respects, or that we have misunderstood its drift, seeing that the matter, as it is now brought before the public, forms one of the most melancholy commercial episodes which it has yet been our misfortune to notice.

"The report of the proceedings which we reproduce from the *Hankow Times* is not by any means so explicit as might have been expected. At the same time it throws a light upon one or two broad facts, which are sufficient to indicate the nature of the affair. In truth the whole proceedings appear to have been characterised by an unaccountable recklessness; one fact alone being sufficient to show a total absence of a proper consideration for the interest of those who intrusted good to the bankrupts. We find, according to Mr. Gordon's statement, that about May, when the firm had 'no balance either in hand or at their bankers to any extent,' they commenced to operate in tea, and purchased teas to a considerable amount, so that taels 230,000 or thereabouts stood as due to the Chinese teamen in June; of which sum taels 150,000 had actually been received by Mackeller and Co., the remainder being margin not drawn against. In June, that is in the month in which the 150,000 taels were received on account of the tea purchased from the Chinamen, payments to sundry foreign firms to the extent of 162,000 taels were made; so that it would appear that the money received for the teas pledged as security to the banks, was used to pay off old liabilities, while the unfortunate Chinamen were left unpaid. There are one or two statements which appear incongruous; such for instance that certain "Loans from Chinese," amounting to 26,000 taels, were also repaid in June; it being difficult, if the figures given are correct, to see precisely where the money to make this payment came from. There may, however, be some discrepancies in statements from memory; and doubtless this as well as some other points of detail is susceptible of explanation. The broad fact, however, remains, that, with the knowledge of being under heavy liabilities, and with scarcely any funds in hand, the firm deliberately went into extensive purchases of tea, and that while old debts were liquidated with the sum advanced upon those teas, the Chinese sellers remained without a cash. Allusion is made by Mr. Gordon to certain 12 chops of tea which, it seems, he expected would be sent to his godown, but which, for some reason, were not sent. 'If,' says he, 'the 12 chops which were not delivered had been sent into my godowns, I could have paid all my cheques. I trusted to pay for the 12 chops by the margins returning from Shanghai, as teas were lower in Hankow than they have ever been.' What margins were these that Mr. Gordon trusted to? He tell us himself in a previous part of his statement: 'The margins 90,000 taels are chiefly on chops that have not been paid for—all with the exception perhaps of 10,000 taels or 15,000 taels.' So here were 230,000 taels due to the Chinamen from whom Mackellar and Co. bought the teas; of which sum 150,000 taels had been

Digitized by Google

received in hard cash and paid away in other directions; and the margin is designed—for what? Not to pay at least a portion of the money due to the Chinamen whose teas had been received, drawn against, and shipped off, but to pay for another 12 chops of tea altogether. Again in another place, we find Mr. Gordon stating that he 'expected the margins back from Shanghai any day to pay up the 140,000 taels.' Certainly these 'margins' were expected wonderfully to increase, seeing that they were to be large enough to pay the total amount over which they were the original margin, and the cost of twelve chops besides, and in addition were to have been of such a nature that Mackellar and Co. could 'have their pudding and eat it too,' as the margins themselves belonged to the Chinese.

"Such are the leading features in this case; and much as we may deprecate the recent demonstrations on the part of the Chinese at Hankow, we cannot but admit with reluctance and shame, that if they mistook their remedy, they at least had too good cause for disrespect and hatred towards the foreign house who had so grossly and heartlessly abused their confidence."

We regret, says the *Recorder*, to have to record the death of Captain Rae, formerly of the *Bunker Hill*, which occurred under melancholy circumstances. One night he went with some companions to bathe in the Yang-king-pang Creek, and was observed to plunge into the water from the bank. He swam some distance and then suddenly sank, his body being recovered next morning. An inquest was held at the U.S. Consulate, and a verdict that the deceased was drowned in the Yang-king-pang Creek was returned.

The "De Norman monument" has long been a bone of contention to the Shanghai newspapers as to the most suitable spot for its erection. The *Friend of China*, in recording the final settlement of the discussion by its having been placed in the grounds of the British Consulate at Shanghai, gives a copy of the inscription, stating that the original intention, overridden by the impossibility of finding means of carriage to Tientsin and overland transit thence to Peking was, that this tribute of affection, sent out by a sorrowing mother in England, should be erected in the Russian cemetery at Peking, where, on the 17th October, 1860, the unfortunate victims of Chinese cruelty were buried; hence referring to its crucial form, the inscription which appears on the face of the shaft :—

Born in its light,
Passing through the dark valley
in its power,
Resting in its shadow,
Rejoice O Christian
in its great glory.
Behold it, O Heathen,
Enquire, believe, and live!

Under this appears the inscription—

William de Norman, born 28th August, 1832; died 5th October, 1860.

The remaining names, inscribed on panels on the sides of the plinth, are those of his unfortunate companions, viz. :—

Robert Burn Anderson, Lieutenant and Adjutant, Fane's Horse, born 14th October, 1833; died 27th September, 1860.

Thomas William Bowlby, special correspondent of *The Times* newspaper, born 17th January, 1818; died 25th September, 1860.

Luke Brabazon, Capt. Royal Artillery, supposed to have died on the 19th September, 1860, aged 28.

John Phipps, private 1st Dragoon Guards, born 1833; died 18th September, 1860.

FOOCHOW.

Our readers will be sorry to learn of the death of the late Commissioner of Customs at Amoy. He was universally respected and liked by all who knew him, and his loss will be much felt. By an account which is published in the *Foochow Advertiser*, it appears that one evening he was missed from his house, and alarm having been excited, search was made for him during most of the night, which resulted in the discovery of his dead body in a well on the premises. The deceased gentleman was of Polish nationality, and as there was no consul present under whose jurisdiction he came, an inquest was held at the British Consulate, and the verdict agreed upon was to the effect that deceased had fallen into the well while in a state of temporary insanity.

The *Foochow Advertiser* says :—"We understand that the Consul of the United States at Amoy has arrived at this port with a view to arrange with the authorities here about the occupation of the south-end of Formosa. It is high time that something be done, and we hope to hear soon of the establishment of a Chinese colony in the neighbourhood of the place which has lately been the scene of so much disaster. During the whole of the north-east monsoon vessels wishing to go from Swatow, Amoy, or Taiwan to Foochow and the north, go round the South Cape of Formosa. By sailing up the east side of that island they avoid the very strong current which on the west side is during that monsoon setting southward. In doing so they are often obliged to take shelter in the excellent harbour at the south-end, and while at anchor the crews go on shore to procure water or look out for provisions. The people who at present occupy the district are savages, and savages in every sense of the word. Fierce, cowardly, and bloodthirsty, they allure the strangers on shore and into the jungle; they slay them, not for the sake of plunder, but merely for their scalps through love of blood."

AMOY.

From Amoy there are but few items of news, the most important being that according to the versions which have reached us there have been some glaring cases of Customs' injustice lately. One has reference to some goods per *Cruizer*, a Siamese barque from Siam, about which it is feared there will be a serious row. It is said that teas are getting into heavy stock, and teamen will soon be obliged to reduce their prices to European ideas.

It is rumoured at the coast ports that Wanchew is not likely to be opened for some time, on account of opposition from the merchants in Foochow, but we cannot say anything for the truth of the report at present.

HONG KONG.

From this port our dates are to the 28th August. The mail steamer *Ellora* met with a slight accident just after leaving, and had to put back, but only for a few hours. The French mail of July 17 arrived out on the 27th August.

The *China Mail* has the following announcement with reference to its recent change of ownership :—"On the 15th August the proprietorship of the *China* and *Overland China Mails* passed from A. Shortrede and Co. into the hands of Charles A. Saint. It is customary when such a change occurs in newspaper property that some manifesto should be made by the 'coming guest,' so that people may know whether he is Whig or Tory, Republican or Royalist, Locofoco or Dead-head, or to which of the thousand-and-one ramifications of political party he belongs. One is spared that necessity in Hong Kong, for here there are no politics, *i.e.*, no 'constitutional' politics. No 'representative' institutions are here, and therefore the journalist's functions are comparatively circumscribed, and he can devote to the collection of news much of the attentive and persistent energy which in other parts of the world is spent on 'leader' writing and in political controversies. It is the belief of the new proprietor of the *China Mail* that next year will be fertile in incidents, and that in the negotiations attendant on the revision of the treaty, in the operations of the French in the Corea, in the 'occupation' of Formosa by the Americans (which will come), and in the other complications that must spring from the strong setting in of the 'Western' current upon China, there will be found ample employment for the *Mail*; and it will endeavour to prove itself equal to the emergencies that arise, by securing the presence of correspondents wherever events of public interest may occur. The local politics of Hong Kong will not, of course, be neglected, for the file of the *Mail* would be incomplete if it did not contain a record of local life, and an accompanying commentary thereupon; but, while taking due care of local matters, we shall step beyond that comparatively narrow sphere, and aim at making the *Mail* the reservoir into which all the items of China and Japan news shall flow. That will be our chief object, and in proportion as we approach it shall we become possessed of materials in which the public as well as ourselves, will find matter for profitable thought and wholesome criticism."

The following return is published of average amount of notes issued and of specie in reserve by the undermentioned banks for the month ending July 31 :—

Oriental	$551,000 ...	$300,000
Chartered Mercantile	448,822 ...	300,000
Chartered Bank of India, Australia, and China	196,290 ...	100,000
Hong Kong and Shanghai	959,548 ...	400,000

The following items are from the *China Mail* :—We have much pleasure in giving publicity to a statement which appears in our morning contemporary, to the effect that a public dinner is to be given on the 5th September, to Dr. Kane, so long an esteemed member of Hong Kong society, and one of the "oldest inhabitants" of which the colony can boast. There are few who, directly or indirectly cannot bear testimony to the services he has rendered in his day and generation to those who have made Hong Kong what it is; and we

Digitized by Google

simply forbear from expatiating more fully on the many qualities of head and heart which has made his name so popular in this part of the world, from the fact that they are too well known to need a "puff" in their favour. The list of those who may wish to subscribe to the farewell dinner is lying for signature at Messrs. Lane, Crawford, and Co., it being intended that it shall take place at the Hong Kong Club. The following gentlemen have consented to act as a committee for making the necessary arrangements :—The Hon. C. C. Smith, Hon. Francis Parry, Dr. Murray, Messrs. D. R. Crawford, J. B. Endicott, E. A. Hitchcock, W. Kaye, J. B. Taylor, and J. C. Whyte. They have seldom undertaken a duty likely to be more generally appreciated than this.

The report to which we gave currency respecting the intention of the rival claims at Kowloong to "have the matter out" appears to have been well founded, and the forty Sikhs taken over by Mr. Creagh turned out to be of some service. The Hakkas, it appears, had challenged the Puntis to fight so soon as the "devils" should have withdrawn their forces, and Mr. Creagh arrived just in time to put a stop to the little amusement for which they were preparing. A small armoury of a most original description was captured. So far as we are yet aware it has been found impracticable to get hold of the head men of the rival parties in the neighbourhood of Kowloong so as to bind them over to keep the peace. The only and best security will be the announcement that if any fresh disturbances take place on British territory every one found with arms in his hands will be severely and infallibly punished.

The following is from the *Overland Trade Report* :—"Stimulated by the deeds of the British gunboats a Dutch vessel of war, the *Watergeus*, now in these waters, is said to meditate an expedition in search of pirates, and a small American gunboat, the *Unadilla*, which has just arrived here, will, it is said, engage in the same occupation. It is high time that some other nations besides the British should share in the task of keeping down the pirates on this coast. Numerous as they are, and peculiarly adapted to the service of the pirates as the formation of the southern shores of China may be, a great deal has been done within the last twelve months by the two or three indefatigable English gunboats which have hunted the pirates down. It is a very long time since any European vessels have fallen a victim to pirates in this vicinity ; and although native boats are still attacked now and then—one was robbed only the other day in the mouth of the Canton river, almost within sight of Hong Kong—still the evil is nothing to what it was. Continued exertions, however, are necessary to frighten away the pirates, and there is no doubt that if the vigilance of the gunboats was relaxed, they would swarm round the entrances to the harbour and gather in the creeks and islands near as much as ever. The Chinese authorities are utterly incompetent to do any good, lazily indifferent to the evil, and beneath feeling shame at the knowledge that the waters in the immediate neighbourhood of their greatest trading port are only kept free from pirates by the voluntary and gratuitous exertions of a foreign Power. Setting the Chinese Government aside, therefore, as outside the influence of honour and reason, the obligation of sharing in the police duties of these seas rests equally upon the various nations whose ships visit them and whose subjects reside in Hong Kong or China ports."

We (*China Mail*) have received a circular from Mr. E. S. Benson (formerly Military Secretary to General Burgevine), who has established himself at Yokohama as agent of the "Western Union Telegraph Company and California State Telegraph Company," and proposes to transmit through the Pacific Mail Company's steamers to San Francisco telegrams to all the principal cities and towns in the United States of America and Canada; and by Atlantic Cable to Great Britain and Europe. The first thing which strikes one is that no mention is made of the time which the transmission is supposed to take from Yokohama to Great Britain. Assuming, however, that some 25 or 26 days will be sufficient—and that only on the dates of the P.M.S.S. Co.'s steamers leaving Yokohama—we are at some loss to see what advantages are presented by his scheme to British residents in China. Even to Americans in Japan there does not seem to be much inducement offered, as by sending a telegram to an agent at San Francisco it might be forwarded with equal facility and at a much cheaper rate, while the new tariff of the Atlantic Cable Company makes the same argument hold good for those having business in England. The charge of a telegram of 10 words or less to New York. is $7.50. each additional word being 56 cents; to Washington, $8.13 ; each additional word 63 cents. By the Atlantic Cable the charges are:—From Yokohama, to Great Britain and Ireland, 20 words or less, $53 ; each additional word, $2.65. To France, Holland, Belgium, Prussia, Austria and German States, $54.50 ; a tariff which seems to us rather high. With the Kiachta and Galle lines open to residents in Hong Kong, and the former still more handy for the Shanghai people, it does not seem probable that Mr. Benson will get much custom from the South of China.

Some interesting news is to hand from Formosa. The body of poor Mrs. Hunt, wife of the captain of the *Rover*, was, it is stated, purchased from the savages by the Chinese, who demanded a large amount for giving it up. There is a melancholy satisfaction in knowing that death has put an end to the sad and pitiful existence which, worse than death itself, she must for some time have endured. A large quantity of books, nautical instruments, jewellery, &c., &c., belonging to the late *Rover's* crew, are also in the hands of the Chinese dwelling in the vicinity of and a little below Siarr Kiarr. Captain Home, who sailed from Swatow is our informant. Now that some definite information is to hand respecting the fate of those who have perished, it becomes even more than before a question of interest as to whether the United States authorities are about to take any measures to teach the savages of Southern Formosa that the murder of shipwrecked sailors, and yet more horrible, the nameless ill-treatment of a defenceless woman, is a crime for which condign punishment will surely overtake them. We sincerely trust that no namby-pamby sentimentalism will interfere to prevent the Americans from vindicating the claims of common humanity. Let them take the late operations in the Nicobar and Andaman Islands as a precedent, and we can assure them that the sympathies of every Englishman will attend their enterprise.

A little piece of news reaches us from the coast which affords an indication of "which way the wind blows" in the neighbourhood of Takao. Dr. Maxwell, the medical missionary at that port, established some time ago a chapel and dispensary at Pitao, or Peh-tao, a place distant a few miles from Takao. Some days since, during his absence from the spot, the chapel was broken into and a considerable amount of damage done. Had the institution attacked been of any other nature than that of affording medical relief to the sick and suffering, some palliation might perchance have been found for the act on the part of the pigheaded natives. But there appears to have been no provocation further than that the missionary was a "foreign devil."

(FROM OUR OWN CORRESPONDENT.)

August 27, 1867.

The French mail steamer which left here on the 23rd took everybody by surprise by the punctuality of its departure, and caused some inconvenience to correspondents who were counting on the usual delay of from two to four days after the date of notified departure. This has been, I think, the first instance in eighteen months in which the French mail has not been delayed, owing to the non-arrival of the Japan steamer *via* Shanghai ; but the unusual celerity observed on this occasion is probably due to the necessity observed by the French superintendent of competing with the "spurt" recently put on by the P. and O. in the speed of their mails. For some months past we have now received our English mails in from 37 to 39 days from London, in lieu of the good old times of 44 to 50 days, and various little expedients have been adopted for increasing the efficiency of the service since the arrival about three months ago of Mr. Sutherland as superintendent in China after a visit to England. Residents in China will certainly for the most part rejoice in any measures taken by the P. and O. Company to accelerate their time of transit ; but it is generally felt that no measure can enable them permanently to regain the footing they have lost since the institution of the Messageries' competition short of the establishment of the much-desired *direct* line from Hong Kong to Suez without break at Point de Galle. The Post-office has also been stirred up to a great extent lately, and the reiterated complaints of the mercantile community at Shanghai have been at length attended to in so far as regards the placing of sorters upon the steamers carrying the mail between Hong Kong and the north, which will accelerate the time of delivery of letters at Shanghai by several hours. The tour of Mr. Rea, the inspector sent out from St. Martin's-le-Grand, who is now on his way homeward, has further had the effect of initiating a treaty of alliance between the Hong Kong Post-office and the "municipal post" at Shanghai, which have hitherto been bitter foes. For the future they are to

Digitized by Google

work in concert, the Hong Kong Post-office taking all mails for the ports south of Shanghai, with all of which regular steam communication exists, with duly organised post-office agencies at each port; whilst for the northern and Yangtsze ports the municipal post-office is to be the recognised medium of communication. The Chinese Government is beginning to recognise the benefits of our system of postal despatch, and official communications between Peking and the various provincial authorities continually pass through the British post. addressed to or from the respective custom-houses for transmission. It might be worth while one of these days to conclude a postal convention with the Chinese Government, and thus draw its attention more closely to another branch of foreign ingenuity.

The local topic of interest still continues to be the policy pursued by Sir Ricard MacDonnell with respect to the licensing of gambling-houses. The idea of contributing towards the suppression of the vice by placing it under official supervision has been unsparingly condemned, though a large proportion of the residents of the colony are quite prepared to approve of the measure as a financial one, relieving commerce of the Stamp Act bugbear. It is believed by many persons that Sir Richard MacDonnell, being at his wit's end for money wherewith to keep his machine of government in working order, has, with his usual shrewdness, concluded that however probable it may be that orders from home will eventually require him to rescind his present regulations, he will, nevertheless, have at least a year's swing under the new system, which will furnish a pretty little sum of about a quarter of a million dollars wherewith to wipe out the pressing liabilities that now embarrass the colony. The last number of the local *Punch* has caricatured the Governor's notion of suppressing *illicit* gambling through issuing licences to houses under "official supervision," by a mock proclamation calling for proposals for the exclusive right to *garotte* in the colony, accepting garotting as an inevitable necessity, and confining it to a limited number of professionals. It is reported that D. R. Caldwell, who was dismissed from the Registrar-Generalship in 1861 in consequence of charges brought against him of confederacy with pirates, has been appointed Inspector of Gambling-houses at a salary of two thousand dollars *per month*. This appointment has not yet been gazetted, it is true, but rumour asserts it positively.

In commercial matters there is nothing stirring, and a gloomier feeling than even was prevalent before has reigned since the news arrived of the recent heavy disasters in Bombay. In the north, the proceedings, just published, in the case of Mackellar and Co.'s bankruptcy at Hankow, disclose some astounding particulars of what it would be complimentary to call recklessness.

We have a melancholy instance of the widespreading character of the disasters involved in Messrs. Dent and Co.'s failure in the news recently received of the suicide of M. Kleczkowski, the Commissioner of Customs at Amoy. His savings of several years were invested in the hands of Messrs. Dent and Co., and the loss of this fund at his somewhat advanced age appears to have been more than the unfortunate deceased could make up his mind to endure. He leaves a wife and daughter, who were with him at the time of his death. The deceased was a Polish subject, but had held the rank of major in the Belgian army, and was cousin to the late French Chargé d'Affaires at Peking, the Count de Kleczkowski.

The Peking Government have been induced by the prospects of a very serious dearth and famine in the north of China, owing to the protracted drought, to import rice from Hong Kong to Tientsin, and four vessels are now being freighted with cargoes of this necessary by an agent instructed by Mr. Hart, the Commissioner of Customs at Peking.

STRAITS SETTLEMENTS.

SINGAPORE.

Dates hence are to the 7th September. No later outward mail had been received. The following is from the *Straits Times*:—The Governor returned from Penang on the 24th August, and since then there has been no meeting of the Legislative Council, but one is announced for the day after the departure of this mail. A budget for that portion of the present year which will have been administered by the new Government, namely from 1st April to 31st December, has been brought forward by the Auditor-General. It cannot, of course, be expected that estimates framed on such a short experience of actual working will be very accurate; but the financial position represented is considerably more satisfactory than was anticipated. It is calculated that the existing sources of revenue will more than cover the ordinary expenditure—civil and military. There are two items which have to be provided for by special loan, these are the purchase of steamers for the local marine, and the cost of erection of a new Government-house.

The new Court-house is rapidly approaching completion, and will doubtless be finished within a few months now. The building is a very handsome one, and will prove an ornament to the town; but we think it would have been better had colonnades or verandahs been extended round its entire circuit. At present a large number of doors and windows are exposed on the different sides of the building without shade or shelter of any kind, and we fear this will be found a great drawback to the comfort of the apartments they enclose.

H.M.S. *Rodney* reached Singapore, *en route* to China, on the 3rd September.

PENANG.

The *Penang Gazette* states that although the Kongsi riots have to all appearance been quite suppressed, there has been nevertheless a very uneasy feeling in the settlement, it being quite evident that matters in dispute amongst the various societies are not by any means settled yet. During the week, as if to show the very unsettled state of matters, assaults and robberies have been very frequent. No less than forty-two cases were brought before the police, the offences being of all kinds.

The commission of inquiry into the causes and the circumstances of the late Hoey riots commenced by a preliminary meeting on the 24th of August, and a good deal of important evidence was obtained. The evidence in the meantime is carried on, and too much praise cannot be given to those gentlemen who constitute the commission, for their disinterestedness in sacrificing their valuable time in order to sift the whole system of these Kongsis to the very bottom.

Late news from Junk-Ceylon states that four steamers are expected at Tongka from Siam with troops. It is said that about 1,000 soldiers will be sent from Bangkok to the assistance of the Rajah against the Chinese rioters. The Rajah is in hourly expectation of an attack, and has his fast boats ready to take him on board his steamer. The rioters are suffering from famine, and they are also short of ammunition. The arrival of the troops from Siam will no doubt soon put an end to the riots there, and we fancy the rioters will have scant mercy at the hands of the Siamese soldiers.

LATEST TELEGRAMS.

(Received via Galle, Oct. 13th.)

CHINA.

Hong Kong, Sept. 29.

The steamer *Genkai* was lost at Hong Kong during the late typhoon.

The Peninsular and Oriental steamer *Singapore* has sunk near Japan. The crew and passengers were saved.

COMMERCIAL.

Grey shirtings, $3.40.
Cotton Yarn, $180.

Shanghai, Sept. 22.

Grey shirtings, 6½ catty, 2.65 taels.
No. 3 Tsatlees, 5.35 taels.
Settlements, 3,000 bales; stock, 3,000.
Exchange, 6s. 0⅜d. Freights, £3.

Mons. Aubaret, the French Consul at Bangkok, returned by the last French mail, owing to ill health, and it is very doubtful if he can return to that post. Mons. Grapinet acts as Vice-Consul *pro tem.*

A memorial has been drawn up by the British merchants interested in the trade of Saigon for the appointment of a Consul at that port, which will be shortly presented to Lord Stanley, the Secretary for Foreign Affairs.

A meeting of the managers and directors of the East India and China Banks will be held at the Oriental Bank to-morrow, the 15th inst., and the question of the six months' *versus* four months' usance for bills will be again discussed.

We believe that instructions have been transmitted by the Secretary of State for the Colonies to the Governor of Hong Kong, disapproving of the farming of the gambling licences, but approving of the issue of licences for a certain payment and under certain conditions, with a view to bring gambling under proper restrictions, but not as a source of revenue.]

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BAILEY—On the 4th Aug., at Yokohama, the wife of the Rev. W. Buckworth Bailey, of a daughter.

BRENIER—On the 16th Aug., at Shanghai, the wife of George Brenier, Esq., of a son.

BOYD—On the 28th Aug., at Hong Hong, the wife of C. R. Boyd, of the Mint, of a daughter.

BIRLEY—On the 25th Sept., at Highfield, Standish, near Wigan, the wife of Frederick H. Birley, of a daughter.

BONHAM—On the 30th Sept., at Naples, the wife of Edward William Bonham Esq British Vice-Consul, of a daughter.

DAVIES—On the 27th August, the wife of C. Langdon Davies, Esq., of twins.

RUTTER—On the 5th Oct., at Glebelands, Mitcham, the wife of J. C. Rutter, Esq., of a daughter.

TAYLOR—On the 7th Sept., at Inverness, the wife of Joseph M. Taylor, Esq. (formerly of Shanghai, China), of a daughter.

TURNER—On the 1st Oct., at Chiton-villas, Penge, Surrey, the wife of Arthur Newman Turner, Esq., of a daughter.

MARRIAGE.

GETH NG—ALLAN.—On the 12th Aug., at Rangoon, Captain George Gething, of the steamer Bassein, to Maggie, eldest daughter of Henry Allan, Esq., of the barque Henrietta.

DEATHS.

DANIELS—Lost, with all on board the ship Fy Chow, which sailed from New York on the 15th March last, aged 20, Stanley Herbert, second son of Arthur Daniels, Esq., of Fellows-road, Eton-park.

EITEL—On the 3rd Aug., at Chefoo, Ernest Legge, infant son of the Rev. E. J. Eitel.

GLOVER—On the — Oct., James L. Glover, Esq., of Aberdeen (late of Nagasaki).

MORRIS—On the 23rd Aug., at Hong Kong, Ann, wife of Mr James Morris, of the Mint.

MAY—On the 8th Oct., at Margate, Arthur Edmund May, the youngest son of Charles May, Esq., Chief Magistrate of Hong Kong, China, aged 17.

RAE—On the 17th Aug., at Shanghai, accidentally drowned while bathing, Mr. A. D. Rae, late master of steamtug Bunker Hill, aged 28.

RODGER—On the 11th Oct., at Cox's Hotel, Jermyn-street, David Rodger, Esq., late of Singapore, aged 37.

SM TH—On the 8th Aug., at Amoy, Alexander G. Smith, aged 27 years.

SYERS—On the — August, at Hong Kong, Mr. Syers, clerk on board H.M.S. *Melville*.

TAYLOR—On the 10th Oct., at Inverness, Jessie Dunbar Leys, aged 22 years, wife of Joseph M. Taylor, Esq. (formerly of Shanghai, China).

WHITBREAD—On the 19th Aug., at Hong Kong, Frederick Thornton Whitbread, son of Capt. Whitbread, 75th Regt.

COMMERCIAL REPORT.

CHINA AND JAPAN IMPORTS.

YOKOHAMA.—There is very little change to report. A native holiday extending over about a week, during which the half-yearly accounts have been made up, has to some extent interfered with business, which considering the activity in the Silk and Tea market, ought to have been of a more satisfactory nature. In some few staple articles a good business has been done, but most remain as before—entirely neglected. We have to notice a slight improvement in the prices of Grey Shirtings and Camlets; otherwise any change in quotations is for the worse. The market for Yarn is perhaps weaker, but sales for the article on the spot were at previous rates. The demand for Rice and Sugar must be reported over, and in the face of falling prices and an expected large native crop, losses appear inevitable on foreign importations.

SHANGHAI.—Grey Shirtings: The stocks in second hands have been considerably reduced at lower rates. Best Eagles, 8lb. 4 oz., may be marked 2.65 to 70. tls., but at these figures few but needy holders sell. White Shirtings and T-Cloths as last. Woollens: A moderate inquiry for low camlets, at 12.50 to 12.75 tls. per piece. Metals: The market maintains it position; no material change to call for notice. No arrivals to swell stocks, which in Nail Rods amount to about 10,000 bundles, which are held for 2.55 tls. per picul, or 5 candareens more than dealers offer. Flat Iron, 2.60 tls. Round, in good assortment, 2.70 tls. Stocks of each being light. Coals: No transactions of consequence, supplies having been small, though quite equal to existing demand.

CANTON.—A moderate business has been transacted. Yarn has further declined about $3, and rates for Lead, both common and W. B. can barely be maintained. Quicksilver is in good demand, and were there any stocks at market an advance on present quotations could readily be obtained.

HONG KONG.—There is little or no change to advise, as the auction sales of sea-damaged goods noticed in our last report have continued, and although the quantity thus disposed of has not been very large, it has been, with but few exceptions, quite sufficient for the requirements of the Chinese. It is hoped, however, that as soon as the dealers begin to receive the returns for their recent investments regular business will be recommenced. T-Cloths of 7 lbs. quality are the only goods which show any improvement in price, and this is owing more to smallness of stocks than to any considerable demand. Rates for Yarn, Shirtings, and Fancy Cottons are weak, and inquiry is on the smallest possible scale. Raw Cotton: There have again been large arrivals both from Bombay and Calcutta, although the market has been well supported, holders have been obliged to submit to a decline of $1 per picul for Indian Staples. Arrivals of China Cotton are inconsiderable as requirements in the North continue to equal the supply; rates are about the same. Woollens: There is little or no change to note. The demand for sound goods has quite subsided for the present, the only sales reported being of sea-damaged goods at auction, the time of year for a brisker market is now, however, close at hand. Metals: Prices for all kinds of Iron continue to be firmly maintained. Lead remains steady here, stocks being now small, but in Canton some falling off in the demand is noticeable. Coals: The market remains very much as last reported, there being little or no inquiry. The only settlement reported is that of about 1,200 tons of "West Hartley," at $12.25 per ton, ex ship. Two small cargoes have arrived from New South Wales and one from America.

CHINA AND JAPAN EXPORTS.

TEA.

YOKOHAMA.—Since the departure of the Singapore business in this article has steadily increased, and a large amount has been settled, both for the English and American markets; prices have advanced from $2 to 3 per picul. Stocks are moderate, but good supplies may be expected from up country should the present demand continue. Settlements since the 27th July are estimated at 5,000 piculs.

SHANGHAI.—Black Tea: A moderate business has been doing at gradually receding rates. The Ningchows from Kiukiang (Monings) still continue to form the bulk of the settlements, although their quality is rapidly falling off as the season advances. Common Hohows and Oonams have been in good inquiry for price, these being the least dangerous teas in the present position of the home market. Of Oopacks only a very few chops have been offered, the majority of the second crops having been simply transhipped for account of Hankow buyers. All reports from the country still point to a moderate supply for the season, the extra quantity received to date being simply attributable to the very early yield. Prices, when compared with the previous fortnight, exhibit a decline of one tael and a-half on medium, and of three-quarters of a tael on common teas. The stock on hand is estimated at 50,000 chests, and consists almost entirely of second crop Ningchows and common Oonams (common Congou). Green Tea: Pingsueys have continued to sell readily at former rates, leaving only 5,000 packages on hand. In the new Fychow and Teenkai sorts, with the exception of one chop bought for England, at 32 taels, nothing has yet been done, although about 17,000 half-chests have arrived. Holders are attempting to make a stand for last year's opening rates, while buyers are demanding a reduction on these of at least ten per cent. There being, however, no vessel on the berth for New York, intending shippers are content to wait, and allow the accumulation of stocks to produce its natural result.

HANKOW.—Some 22,000 chests have found buyers at about the rates previously paid, though latterly the home advices have somewhat checked anxiety to buy. The greater portion of the purchases are Oopacks, at tls. 17.50 to 19.50. A large quantity of Tea is still held under advances from the banks, but natives have shipped about 10,000 chests to Shanghai on their own account.

KIUKIANG.—Out of 14,000 packages arrived only one chop has been settled, a second crop Ninchow at tls. 20.6, the balance being shipped on to Hong Kong. The stock was only 4,700 packages. Arrivals of new Green Teas were expected.

FOOCHOW.—Congou: The market has become more quiet, and prices were gradually weakening when the arrival of orders for Australia caused a more active demand, and an advance in prices. The teas of the third crop are coming forward, but the high prices demanded by the producers in the country will in all probability restrict the amount sent to this port. Souchong: Considerable quantities of second crop teas have come forward, only a small proportion of which have found buyers. Oolongs: The unsold stock is gradually increasing, purchases for Europe being very limited, and the American buyers keeping out of the market. Flowery Pekoes: A few parcels have been taken at full prices for shipment to

Digitized by Google

Bombay. The proportion of finest shipped off or on hand is exceedingly small. Scented Teas: Nearly 10,000 boxes of inferior quality have been settled at about previous rates.

CANTON.—A quiet tone has pervaded the market; moderate settlements have been effected at rates showing a decline of a tael in Country Congous, and about 2 taels in District Congous. Of the former, the best of the three chops at market have been taken at tls. 24½, leaving a stock of only 2 chops or 1,360 packages. Scented Teas: Common to medium kinds of Orange Pekoes are a shade easier, and fine to finest have fallen about 2 taels. Scented Capers, common to medium, are likewise rather easier, and fine to finest firmer.

SILK.

YOKOHAMA.—The news brought by the French mail of the 16th of June was so discouraging that the attention of buyers of Hank Silks was, in consequence of the stock at home being chiefly composed of medium and inferior sorts, and considering the probability of a much larger export from China than last year, chiefly directed to the finer grades. The supply, however, was quite inadequate to the demand, as the arrivals of the fortnight, say about 650 piculs, chiefly consisted of Mybash, Oshio, and Coshio of secondary quality; and the attempt at picking out of them some really good and fine silks, although the percentage of goods rejected after inspection was unusually large, failed in most cases. Settlements since July 27 comprise 260 piculs of Hank Silk, 160 of Oshio, and 50 of other sorts, say in all 470 piculs, leaving an unsold stock of about 350 piculs. The quotations given on the 10th August show an advance of $20 in the price of Hank Silks, but this advance is compensated by corresponding fall in the sterling exchange, and some improvement in the quality. Since the 10th rates for medium and inferior Mybash are easier.

SHANGHAI.—Notwithstanding the receipt of continued unfavourable advices from Europe regarding the home market, business in Silk was resumed the day after the last mail's departure, daily purchases being made at prices showing but little decline on the rates previously quoted. Subsequently, however, holders of silk, learning the tenor of the adverse telegraphic news received from England, and observing a disposition on the part of the majority of foreigners to wait until lower rates ruled before purchasing, became anxious to realise their stocks, and consequently had to submit to a further decline in prices, and the larger portion of the settlements, estimated at fully 2,000 bales, have been made at rates showing a decline of fully Tls. 12 to 20 for Chop Tsatlees, Tls. 20 to 30 for Market and Inferior Tsatlees, Tls. 10 to 15 for Taysaams, Tls. 10 to 15 for Hainings and Yuenfas.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From Swansea, Aug. 18, Georgeos; (from Tyne; Onsuri; Ocean Chief, from Cardiff, Aug. 7; from Newcastle, 14, Ocean Bride.—Reported by telegram.)

At HONG KONG.—From New York, Aug. 24, Fung Shuey (str.); from Philedelphia, 28, U.S. Aroostook.

At SINGAPORE.—From Liverpool, Aug. 27, Bonnie Lassie; from Glasgow, 30, Courier (str.); Sept. 6, Bothwell Castle; from England, 9, H.M.S. Rodney; from Hamburg, 6, Emma; from Cardiff, 6, Ocean.

At PENANG.—From Glasgow, Aug 23, La Plata.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, Aug. 19, Isles of the South, Invincible.

From FOOCHOW.—For London, Aug. 8, Caranjah.

From HONG KONG.—For London, Aug. 25, Sovereign of India; Sept. 9, Agamemon (s.) (reported by telegram).

From MANILA.—For London, Aug. 17, Napoleon; for Liverpool, 3, Trinidad; 11 Ogono; 14 (via Cebu) Tio y Sobrino; 14, Corea, Morning Star; for New York. 18, Galatea.

From PENANG.—For London, Aug. 25, Dewa Gungadhur.

VESSELS LOADING.

At YOKOHAMA.—For London, Conrad; for New York, Pauliue, Caractacus.

At SHANGHAI.—For London, Juannore, Sooloo, Titania, Sir William Wallace, Jubilee; for New York, none.

At FOOCHOW.—For London, Seawfell, Amazone, Pakwan, Medina, Maggie Leslie, Cymbeline, Grasmere (all to leave in a few days); for New York, none.

At HONG KONG and CANTON.—For London, Hyacinth, Kelso; for Liverpool, Veronica; for New York, Princess of Wales.

At MANILA.—For London: Anne Longton, Neptune; for Cork: Gladiateur; for Havre: Ille et Vilaine; for Hamburg: Volador; for New York: Stuart Wortley.

At SINGAPORE.—For London: Matilda Atheling, A. H. Willie, Simoon; for Liverpool: Bella, Janet Ferguson; for Boston: Alexander; for New York: Benvoirlich.

At PENANG.—For London: Coloroon (full), La Plata.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s.; Silk, £4 to £4 10s. To New York, £2 10s. to £3; *via* San Francisco per steamer, $45.

At SHANGHAI.—The rate to London has advanced to £3, and vessels on the berth are having quick despatch. For the coasting ports there is but little demand for tonnage.

At FOOCHOW.—To London, £3 per ton.

At HONG KONG and CANTON.—There has been but little inquiry for tonnage, either for coasting or home vessels on the berth for London and Liverpool are getting £2 10s. per ton; for New York two charters have taken place at £2 10s. and £2 17s. 6d. respectively per ton of 40 cubic feet. The number of disengaged vessels in Hong Kong, according to the circular of George Holmes, is (exclusive of Siamese) 19, representing 13.132 tons.

At MANILA.—The supply of tonnage is exhausted by the settlement of the only disengaged vessel, the Anne Longton, at £3 5s. for Wet Sugar, and £3 10s. for Hemp per ton of 20 cwt. net weight delivered. The following engagements have taken place during the fortnight:—Tio y Sobrino, 250 tons, Cebu to Liverpool, £3 Wet Sugar, and £3 5s. Hemp; Morning Star, 562 tons, Cebu to Liverpool, £3 10s. Wet Sugar, and £3 15s. Hemp; Adan y Eva, 455 tons, Manila to Channel for orders, £3 5s. for Wet Sugar.

At SINGAPORE.—The rate to Liverpool has declined to £3 per ton, and the Bella, that began to load at £3 10s., has been forced to accept this rate to fill up. Even £3 has been obtained with some difficulty. For London the Sree Singapura tried the berth at £3, and subsequently at £2 15s., but meeting with no success, she accepted a charter from Siam, on which the Matilda Atheling laid on at £3; and has a portion of her cargo engaged at that rate.

At PENANG.—The La Plata, 393 tons, is laid on for London at £3 for dead weight, and £3 5s. for light freight.

COMMERCIAL POSTSCRIPT.

ARRIVALS.—Oct. 9, at Plymouth, from Akyab, General Wyndham; 7, at Gironde, from Akyab, Courrier des Mers; 11, at London, from Hankow, Eliza Shaw; from Shanghai, Crawshay Baillie; 9, off Dover, from Batvia, Yokohama, Sophia Kroningen d. Nederlanden 10, at Falmouth, from Maulmain, Campbell; 11, from Singapore, Ingeburg; off Falmouth, from Batavia, Maarten v, Rossem; 9, at Queenstown, srom Bassein, South; 12, at London, from Shanghai, John R Worcester; 11, at Deal, from Bassein, Choice; at Falmouth, from Akyab, Glenisla; 8, at Gironde, from Singapore, Argonautes; at Havana, from Saigon, Nouvelle, Penelope; 11, at Falmouth, from Bassein, Elizabeth Douthwaite; 9, at Texel, from Batavia, Wykaan Zee, Caroline; Sept. 26, at New York, from Shanghai, Condor; Oct. 13, at London, from Penang, Mathilde; at Falmouth, from Akyab, Priscilla; in the Downs, from China, Golden Spur.

DEPARTURES.—Oct. 10, from London, to Yokohama, Rifleman, 9, from Sunderland, for Galle, Acacia; 11, from London, for Penang, Roska; for Colombo, Palestine; 10, from Newport, for Galle, Energie; from Liverpool, for Singapore, Harvest Home; from Schiedam, for Galle, Cordan; 10, from Shields, for Singapore, Vanguard; 11, from Cardiff, for Hong Kong, Canton; from Penarth Dock, for Galle, General Birch; from Liverpool, for Manila, Jesus.

LAID-ON.—At London, for Batavia and Sourabaya, Erna.

SPOKEN.—Coringa, Liverpool to Hong Kong, 6th Oct, 47 N., 10 W.; Faderland, Batavia to Amsterdam, 23 Sept., 43 N., 26 W.; Adria, Batavia to Amsterdam, 26th Sept., 46 N., 19 W.; Mathilde, Penang to London, 24th Sept., 44 N., 22 W.; Ridderkirk, Amsterdam to Batavia, 11th Aug., 32 S., 27 W.; Caroline, Batavia to Rotterdam, 11th Aug., 34 S., 28 E.; Ægidia and Pauline, Batavia to Rotterdam, 30th Aug., 10 S., 12 W.; Contest, Colombo to London, 6th Sept., 3 S., 24 W.; Star Queen, Liverpool to Hong Kong, 2nd Sept., 9 N., 25 W.; W. H. Haselden, Ceylon to Falmouth, 18th Sept., 31 N., 37 W.; Patriot Queen, Singapore to Liverpool, 18th Sept., 25 N., 34 W.; Alaric, Liverpool to Galle, 8th Sept., 1 N., 21 W.; Nieuwland (Dutch ship), Cardiff to Hong Kong, 12th Sept., 10 N., 24 W.; Ceylon, Penang to London, 1st Aug., 30 S., 44 E.; Belle of Southesk, Foochow to London, 5th Aug., in Gillolo Passage.

CASUALTIES.—Advices received from Helsingfors state that the Sovinto (Russ barq). Wittman, from Cronstadt to the Amoor River, with flour, was stranded on the 10th of October off Porkala; a steamer had gone out to save. The Black Prince, Inglis, from Foochow, which arrived at London on the 7th of October, reports that when off Folkestone, at 9.30 p.m. on the 5th (?) of October, she was in collision with a barque, with all sails set, outward bound; was struck on the port side, and received much damage; the other vessel proceeded.

About 40 packages of cargo, mostly large bales and cases, have been saved from the Hiogo (s.), Bainton, from London, to Japan, which ran ashore on the Eddystone, Oct. 1. The vessel was lying much in the same position as when she struck; but her lower side forward has been crushed on the rock with her weight, so that some of her deck beams are broken, and she is completely covered at high water.

The Belle of Southesk, for London, spoken Aug. 5, in Gillolo Passage, had lost an apprentice overboard and her jibboom during a typhoon.

NOTICES TO CORRESPONDENTS

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A Register is kept of the addresses of all persons connected with the Far East, and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in China, Japan, Singapore, *and other parts of the* Far East, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the Far East.

Subscription 5*l*. per annum, including Postage. Export Supplement 12*s*. extra.

The London & China Telegraph.

LONDON: MONDAY, OCT. 14, 1867.

JAPAN.

The news received from Japan by these last two mails is of a somewhat disturbing nature, and the brief telegram announcing an impending visit by Sir Harry Parkes and Admiral Keppel to Osaka is by no means reassuring. There is but too much reason to fear that the pæans of triumph with which we hailed the accession of a Shiogoon of friendly disposition and liberal proclivities were premature, for it appears that the new Shiogoon, from whose wisdom and moderation we hoped so much, has found it necessary to abdicate—*resign* would be the most appropriate word, considering the true nature of his office—in favour of a younger brother. Another political crisis is evidently at hand, in which our own interests can only be preserved intact by the most delicate and skilful management. The representatives of the Treaty Powers should have been content, for the time, with carefully watching the course of events, avoiding active interference, and yet giving such a degree of moral support as lay in their power to the Government, which had undoubtedly shown an earnest desire to keep faith with them, and to promote foreign intercourse. Two disagreeable complications have however arisen, which may render it difficult, if not impossible, to preserve this attitude. The first (in point of time) is the alleged persecution of native Christians at Nagasaki, which seems likely to lead to remonstrances and threats, if not to actual reprisals, on the part of the French; the second, the unfortunate murder of two British seamen at Nagasaki, to "demand satisfaction" for which the telegraph informs us that our Minister and the Admiral had decided to proceed to Osaka. Both these disputes are of a nature eminently calculated to give rise to renewed resentment on the part of the hostile daimios, and even to provoke a degree of irritability among those of more friendly disposition.

The religious difficulty will not be an easy one to deal with, for not the slightest injury, or even indignity, has been practised on any foreign subject in reference to it. The Government has simply placed in confinement a number of its own subjects who were undoubtedly offenders against the laws of the country. So far, we hear nothing of any torture or other ill-usage. The victims are not newly-made converts of the French priests in Japan, but the descendants of Christian families who have preserved their faith in secret through many generations, and there is not even any proof that their ancestors were disciples of the *French* propagandists. Yet we are told that the French Minister and Admiral have been appealed to for succour, and it is expected that they will take "energetic measures" for the release of the prisoners. We hope that such measures as the French are prone to adopt in similar cases will not be too hastily put into execution, for such ill-judged precipitation would assuredly endanger the whole future of foreign intercourse with Japan. Already the lingering hatred of Christianity has been partially revived, but we should not too hurriedly conclude it to be implacable. The question of religious toleration is, moreover, one as important to Protestant as to Catholic nations; and the first step in the present case should, we think, be a combined representation by the Treaty Powers, urging, with all possible moderation at first, a modification of the existing law, and an amnesty for previous offences against it. Should this prove unavailing it will then be quite soon enough to consider the propriety of using stronger measures.

The murder at Nagasaki is another link in a long chain of similar crimes, but it seems to be devoid of that political importance that has characterised many previous attacks on the lives of foreigners. The *locale*—as is usual when sailors are implicated in such affairs—was a tea-house; and the crime has very likely arisen in a mere drunken broil, or may have been provoked by violence on the part of the sailors. Such things happen in all countries, and although there may be more difficulty in bringing the offenders to justice in Japan than elsewhere, still some allowance must be made for the authorities in consideration of the turbulent, unruly character of the yakonins and lonins that form so large a proportion of the populace. The pressure by which the Consul and Senior Naval Officer compelled the attendance of the Governor in person to view the remains of the murdered men showed, in our opinion, excessively bad taste; it was a needless humiliation that could serve no good purpose, and was calculated only to embitter future relations. And, unless the offence can be shown to have some political bearing of which we are as yet in ignorance, we can hardly approve Sir Harry Parkes's hasty determination to carry the grievance to Osaka for solution, more especially at a moment when such evident confusion exists in consequence of the Shiogoon's abdication. We are always anxious to see the dignity as well as the interests of England worthily maintained, but there are occasions when a little forbearance may be more beneficial to both than too prompt or pressing demands for "satisfaction."

THE PHILIPPINES.

Our Manila correspondence by last mail, despite its assertions that progress is being made, is far from encouraging. Commerce, we are told, is spreading, and the ports open to foreign trade exhibit evidence of sure though gradual improvement. This is all very well, but how can we place any reliance on the continuance of even this small degree of prosperity, fettered as it is by the senseless obstructiveness of the Spanish Government? The very phrase which limits the record of progress to "those ports open to foreign trade" is in itself strongly suggestive of old-world tyranny and misrule. We talk of Oriental despotism and exclusiveness; we rail at the Chinese and Japanese Governments for limiting our trade to certain ports, and for their ultra-conservative reluctance to acquiesce in our ardent longing for closer relations; we dictate to them a fair and equable tariff under which our trade shall be carried on; we promptly fire up and demand "satisfaction" for every extortion or indignity practised on our merchants; and we look upon those countries generally as our "oyster which we with sword will open"—that is, if we fail in accomplishing our purpose by more pacific means. While adopting this attitude towards the half-civilised countries of the Far East, what should be our feelings towards an European Power—a third-rate Power only, it is true, but yet one that claims a position among Western nations, and calls itself Christian and civilised—whose Government persistently adheres to every ignorant, grasping, and despotic tradition of the dark ages? And yet this is but a mild description of the policy adopted by Spain in her rich and beautiful Eastern possessions. Foreign traders are as jealously restricted to certain ports as in China. Freedom of transit is subject to most vexatious restrictions, even as regards native labourers; passports are required even for migrating from one island to another, and this passport system is moreover enforced with every imaginable oppression and aggravation. Not only trade, but even agricultural labour is checked by the capricious interference of the Government; and as regards the former, the meddling of the authorities has reached such a pitch of audacity that they have dared to order the British merchants, as a body, to submit their books to the inspection of the Tribunal of Commerce—one of the corrupt engines of extortion that form part of their villanous system of misgovernment. Such an unwarrantable demand, we are told, met with the firm resistance that it deserved, and we trust that in resenting such an impertinent interference with their rights, the English merchants will be staunchly backed by our authorities. A notable instance of the capricious manner in which this despotic control is used was the arbitrary stoppage, some years since, of all shipments of cheroots and cigars from Manila; and within the last few days we have had another example, in the promulgation by the Spanish Consul-General here of a Royal order, dated 30th September, which notifies that positive

Digitized by Google

instructions have been issued to suspend all public sales of tobacco leaf at Manila, and that those instructions having already been received by the authorities of the colony, no shipments from that source can be expected until the Government shall be pleased to reverse this order, with the exception of some 750 bales in two vessels now on the way (the *Neptune* and *Napoleon*). No explanation whatever is given as to the reasons for adopting such a course; but it is self-evident that such a sudden stoppage of supplies will have the effect of forcing up prices, and that those who knew beforehand of the intended step will accordingly reap a rich harvest.

That another revolution is impending in Spain—the precious "mother country" of this fine colony—there is little doubt, but that cannot be accepted as an earnest of any speedy improvement. Long experience, extending over many changes of Government, has shown us that ignorance, rapacity, fanaticism and cruelty are inherent in the Spanish character, and that not even the prospect of another change of dynasty can justly be held to afford ground for hope. The firm attitude lately exhibited by Lord STANLEY in the *Tornado* case has, however, somewhat rebuked the overweening arrogance of these self-inflated Dons; and we earnestly hope that Government will be equally prompt and decided in resenting any interference with the just rights of our countrymen in their colonial possessions. Concessions that we are quite certain will never be granted spontaneously may perhaps be obtained by judicious intervention; and if the Spanish Government could be convinced by the combined representations of those foreign nations interested in the trade that a more liberal administration of their Philippine possessions would be profitable, not only to the colony but to themselves, something at least would be gained. If we are justified in exercising a "moral pressure"—that, we believe, is the Parliamentary term for a special envoy with a fleet at his back—to obtain satisfaction for insults offered by mandarins or aggressions on the part of daimios, how much more right have we to demand liberty and justice for our merchants from a Power which (as we have already said) puts forth claims to civilisation and Christianity—and a Power, moreover, to save which from merited extinction our coffers have ere now been drained, and the best blood of our soldiers has been shed! There is a wonderful vitality in a trade which is sound in itself and conducted on prudent principles; and the Manila trade may continue to make headway, even against the manifold obstacles that now impede it. But with a helping hand, instead of jealous interference, with freedom and encouragement instead of repressive extortion, these fertile and productive islands would soon become the seat of a thriving commerce.

M. JACQUES SIEGFRIED, of Mulhausen, has received a mission from the French Minister of Commerce to seek the means of extending French commercial relations with distant countries. For this purpose he is to visit the principal cities of the Levant, Palestine, and Egypt, the centres of trade in the East Indies, the open ports of China and Japan, returning by California, Peru, Chili, and the United States.

WE notice with satisfaction that a very able article in the *Supreme Court and Consular Gazette*, on the subject of new ports, embodies very similar views to those expressed by ourselves in a recent article on the same subject, and that these opinions are also endorsed by the *China Mail*.

WE are glad to announce that the University of Cambridge has conferred the honorary degree of LL.D. on Bishop Williams, of China.

THE NEW SEASON'S TEA CLIPPERS.

In our issue of the 30th Sept. we gave particulars of the passages of some of the clippers from Foochow. We now append a complete list:—

Ship.	Date Left.	Date Arrived.	No. of Days.
Maitland ...	31st May ...	24th Sept. ...	115

The *Sir Launcelot*, which left Shanghai with new Monings on June 16, arrived on 23rd Sept., 99 days. The steamer *Ajax* left on June 19, and arrived on the 2nd Sept., 75 days.

THE SAN FRANCISCO AND CHINA TRADE.

From San Francisco we learn that the Pacific Mail Company's steamer *Great Republic* sailed thence for Japan and China on the 3rd September, with a considerable cargo, consisting chiefly of flour, potatoes, butter, &c., and a large number of passengers; these included Captain Allan McLane, with his wife, child, and two servants, Miss Knight, Miss Harris, Mr. G. H. Pierce and wife, Messrs. F. C. Spooner, D. C. Waterman, W. C. Van Ordt, Captain James T. Watkins, C. Koopmanschap, E. J. Bacon, Capt. James Herron, Mr. Sands, wife, child, and nurse, John Lindsley, E. Crace, James E. Gandy, W. W. Gandy, Mrs. Ewing, J. W. E. McCarthy, Rev. C. Hartwell, wife and child, Miss Pete, Rev. H. Lowey and wife, Mrs. D. K. Thompson, child and servant, Norman T. King, and 650 in the steerage. Captain McLane is the managing director of the company, and goes forward by the *Great Republic* to lend the China establishment the benefit of his personal supervision, aided by the experience of Captain Watkins, the titular "commodore" of the line. The next departure from San Francisco will be the same steamer, on the 4th December, after which the service will be monthly. Besides the *Great Republic* we hear of several other departures for China, of which the *California China Mail* gives some particulars. The *Der West*, which sailed for Hong Kong on the 24th August, carried in treasure 385,540 dols., besides the following:—Abalones, sks. 105; barley, sks. 257; beche le mar, sks. 71; firearms, cs. 113; flour, bbls. 222; do. half sks. 1,735; do. qr. sks. 19,222; fungus, sks. 312. Metals: Iron, old, tons 13; yellow metal, old, tons 7. Oil, fish, bbls. 63; potatoes, bxs. 100; seaweed, sks. 27; wheat, sks. 960; wine, cs. 19. Valued at 49,332 dols. The *Rattler* sailed for same port, Aug. 2, with 805,421 dols. in treasure, and the following cargo, valued at 45,988 dols:—Abalones, bxs. 328; bones, bxs. 347; Chinese merchandise, pkgs. 3; flour, bbls. 1,600; do. hf. sks. 5,000; do. qr. sks. 11,590. Metals: Copper, old, pkgs. 7; iron, old, pkgs. 198; yellow metal, pkgs. 74; pearl barley, bxs. 75; wheat, 100lb. sks. 2,421. The above two vessels were despatched by Alsop and Co. The *Douglas* is now on the berth for same port, and is loading in Koopmanschap and Co.'s line. At present the China trade, as also the Japan, is said to be in rather a dormant state, but some revival is looked for upon the return of the *Colorado*. The rapid development of this newly-opened traffic seems to attract great attention among our enterprising American cousins, the California journals being full of allusions to it. The proprietors of the "Pacific News-rooms" at San Francisco advertise that they will in future file copies of every newspaper published in China and Japan. We trust, however, that amid all this enthusiasm the superabundant energy of the California merchants will not lead to the trade being forced too much while yet in its infancy; for should such be the case, a premature collapse may be the disagreeable result.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Oct. 7.

The political news is very dull. At last the Budget for India for 1868 has been laid before the members of Parliament. The Government, however, acknowledges itself that this Budget was brought in too late, and indeed it will be very difficult to pass it through both the Chambers so that it may arrive in India before the 1st of January, 1868. The total of the expenses for that year are estimated to be f.120,449,771—viz., f.42,082,304 here and f.88,406,467 in India. But amongst these expenses appear a disbursement to the Dutch Treasury of f.10,619,555. The total amount is f.4,844,701.98½ higher than that of the former Budget. The revenues, however, are estimated to cover the total expenditure. The increase of expenses is due to the costs of the statistical measuring of Java, for the harbour and irrigation works, the extension of the telegraph lines, the augmentation of the wages of the India heads, &c. Among the new proposals made by the Government appears that to establish a Department of Justice at Batavia.

The Ministers of the Financial and Home Departments, Messrs. R. J. Count van Schimmelpenninck and J. Heemskerk, are named by H.M. commanders of the Order of the Netherlands Lion. A great many other functionaries of the State are also honoured with the same distinction, which creates a good deal of indignation amongst the public, because no good reasons for these distinctions are known.

We learn from the Budget for the Department of Justice that every year an amount of 7,046f. is wanted for wages and pensions of hangmen. The statistics now prove that only one capital punishment occurs in ten years, so that the cost of every one is f.70,460. Now the costs for prisoners are only 50c. a day each, so that when they are condemned to twenty years' imprisonment instead of to death they only charge the Treasury with 3,650f. Indeed, this fact may be regarded here as an eloquent argument that the abolishing of capital punishment is a necessity in Holland.

To-morrow a detachment of 125 soldiers will embark on board the *Mary en Hillegonda*, which will sail within a few days for Java. A great many volunteers are now offering themselves at Harderwyk for enrolment for service in India, and amongst them are a great many Germans who took part in the war of 1866.

COMMERCIAL.

COFFEE.—With some demand for export and consumption; white and yellowish sorts were sold readily, and are difficult to obtain. Of private imports 1,473 b. good ordinary greenish-reddish Java, ex Professor van der Boon Mesch, were sold at 36½ c., and 637 b. Java, ex Dahlkarlsa, at private terms. The Dutch Trading Company will announce to-morrow the sale for this month. The deliveries in September amount to 95,728 b., against 92,048 in 1866 and 85,854 in 1865; from 1st of January to September, 640,259 b., against 540,541 in 1866, and 619,561 in 1865. Stock in September at the Dutch Trading Company, 430,721 b., against 391,834 in 1866, and 376,597 in 1865. Floating are for account of the Dutch Trading Company 135,000 b., and for private account 13,000 b. Total

Digitized by Google

stock in second hand and at the Dutch Trading Company, 411,100 b., against 435,600 b. in 1866.

Sugar (Raw).—In the Dutch Trading Company's sale on the 25th August the 30,625 b. Java were sold at ¼f. to ½f. below the July sale for the brown and yellow sorts, and ¼f. to ¾f. for the white. From 3,000 to 4,000 baskets were taken for export, and the rest by the refiners. 33f. were paid for No. 16, and since then the market has been quiet. Of private imports 667 b. and 2,500 do., per Andromeda, were sold at ½f. to ¾f. below the September sale. The September stock amounts to 46,587,048 k., against 43,984,186 k. in 1866. Unsold stock at the Dutch Trading Company, 16,617 b., against 30,674 in 1866. Stock in private first hands 45,319 baskets, and 1,730 muts.

Rice.—1,000 b. uncleaned Rangoon, per d'Elmina, floating, were sold at 8½f., and 2,650 b. Java, ex Kennington, from 8¾f. to 9¾f. At Amsterdam 6,083 b. Java, per Maria Elise, at 9½f. to 9¼f.

Spices.—The market remained quiet at unaltered prices. Deliveries in September 268 casks nutmegs, 201 do. mace, 54 do. cloves, 55 b. cinnamon, and 1,352 b. pepper. Stock on warrants, 4,907 c. nutmegs, 870 c. mace, 3,173 c. cloves, 683 b. cinnamon, and 293 b. pepper.

Tea.—After the sale on the 10th inst. of Java, which is to be held by the Dutch Trading Company, there will be offered for private account 772 ch. Green China of superior quality, per Sea Witch. The valuation is for the Thunkay 60 to 85c.; Hysans, 100 to 160c.; Uxim, 95 to 175c.; Imperial, 120 to 170c.; Gunpowder, 160 to 180c. On the 18th inst. there will be sold at Amsterdam 1,120½ and 78 1-16 ch. China.

Tobacco.—The sale announced on the 7th inst. of 3,625 b. Java will now be held on the 11th inst., together with another quantity of 4,916 b., whilst on the 16th 10,061 b. are to be offered at Amsterdam. The valuation for the tobacco offered on the 11th is for the Blitar 60c.; H and A Blitar, 74c.; K K, 48c.; Z C and HvR, 45c.; L C, 60c.; Fv dP ordinary, 30c.; Soekowono, 32c.; and V R, 47c. Stock in first hands here—16,228 b. Java, 45 b. Manila, and at Amsterdam 17,210 b. Java. Manila tobacco, with a lively demand at firm prices; the stock is as good as exhausted.

Manila Cigars.—On the 10th inst. a sale will be held of 150,000 2a Cortados, 1866, and 150,000 2a Habanas, 1866, of very good quality direct import from Manila. Undoubtedly very high prices will be paid.

Arrack.—In the first hands were sold, at very firm prices, 150c. Sourabaya, ex Johanna, imported in 1866; and at Amsterdam 14 ¼ and 80 ½-casks Sourabaya, ex Rota. The stock is very restricted.

Indigo.—In the sale of the Dutch Trading Company on the 2nd and 4th inst. there was much demand for the good colouring and soft quality. The Bengal indigo was sold at 20c. above the valuation; the Java ordinary at the sale prices of May; good ordinary, 30c. to 50c. higher; middling, 40c. to 60c.; fine and very fine, 70c. to 80c. higher. For private account were sold 103 ch.; Bengal, from 440c. to 560c.; 292 ch. Java from 245c. to 705c.

For Cotton there was more demand, but the prices declined somewhat.

Manufactures.—The market was a little firmer; 6-4 Madapollams and Calicots, nominal; No. 28 Warps, 11½d.; No. 14 ditto, 11⅜d.; No. 30 Cops, 10½d.; No. 16, 9½d.

Silk.—The result of the sale of the Dutch Trading Company of 478 bales Japan and 156 bales China was as follows:—

		Valuation.	Prices paid.
157 bales	Oshio	per kilo. f.26 to 40 ...	f.26.25 to 38.25
9 do.	Amatski	30 to 38 ...	31.25 to 37.—
10 do.	Shida	31 to 36 ...	26.50 to 32.—
72 do.	Sinchiu	36 to 42 ...	35.50 to 43.25
18 do.	Maybash	34 to 40 ...	31.75 to 39.25
126 do.	Aechezan	23 to 32 ...	23.— to 28.25
56 do.	Mino	23 to 25 ...	25.25 to 28.25
16 do.	Mastah	24 to 28 ...	26.— to 30.—
5 do.	Sodai	32 to 33 ...	29.— to 35.25
7 do.	Sinchiu Ida	34 to 36 ...	32.— to 32.50
1 do.	Jama-Mai	24 to 25 ...	21.75 to —.—
97 do.	Tsatlee	31 to 34 ...	27.50 to 31.75
59 do.	Taysaam	26 to 30 ...	23.50 to 26.75

The prices were very irregular; Oshio was paid below and above the valuation; Sinchiu and Maybash nearly to the valuation; Mino and Mastah 10 per cent. above.

Tin.—The 71,031 slabs Banca were sold by the Dutch Trading Company at 54¼f., and the 445 slabs Billiton at 53¼f. Half of this quantity was taken for English account. Since the sale the market was quiet, but the opinion is favourable for the article, because the supply and the production is decreasing, whilst the consumption is increasing; above are the prices—20 per cent. below the average of the last ten years. Deliveries in September, 9,786 slabs, against 7,950 in 1866; from 1st January 84,066 slabs, against 118,705 in 1866. Stock on warrants, 116,520 slabs, against 89,900 slabs in 1866; floating are 19,600 piculs.

Of Hides were sold 695 p. Sourabaya from 3 to 3¼ kilo., and 320 p. from 5 to 5¼ kilo., ex Baltimore. The prices did not transpire.

Drugs.—20,000 kilo. Gutta Percha were sold from 25 to 131c.; 200 cases Cassia Lignea and 250 chests preserved Ginger will be sold on the 8th inst. For Camphor there was more demand; Japan, 80 to 81c.; and China, 81 to 82c. Cubebs nominal, 30c.; Cassia Oil, 4½f.; Anise Oil, 8f.; Japan Wax, 47 to 60f.; India Rubber was paid with 124f. Gum Damar; 700 p. imported per Hendrina will soon be brought into the market.

Rattans.—The market is dull, and there is but little demand; 2,849 b. per Anna and 1,683 b. per Niphon have been sold. On the 29th inst. the Dutch Trading Company will offer for sale 87,900 bundles.

Money.—The Bank rate of discount is still unaltered, but the demand for discount is not on the increase, notwithstanding the tendency in the open market is to lower rates.

The Stock Markets remain still very quiet, and there are no transactions of any importance to state. The high prices of articles of food, the moderate crop, the very bad weather, and the disturbed state of foreign politics and finance, work together to rule the markets in a bad way. Prices are mostly nominal: Dutch Two-and-a-Half per Cents., 52¾; Three per Cents., 63; Four per Cents., 84½; Trading Company, 135¾; Java Bank, f.164; Rotterdam Bank, 99.

Exchange.—London, 3 mo., f.11.87; 2 mo., f.11.89; short, f.11.92; Paris, 3 mo., f.47.05; 2 mo., f.47.12½; short, f.47.30; Antwerp, 3 mo., f.46.90; short, f.47.25; Hamburgh, 3 mo., f.35; 2 mo. f.35.05; short, f.35.20.

SHIPPING.

Arrivals.—Sept. 26, at Flushing, from Batavia: Galilei. 27, at Brouwershaven, from Batavia, Minister Fransen van de Putte. 28, at Texel, from Batavia: Henriette; from Samarang: Elizabeth and Jacoba. 28, at Zierikzee, from Batavia: Albrecht Beyling. 29, at Texel, from Tjilatjap: Nederland and Oranje.

Departures.—Sept. 28, from Hellevoet, for Java, via Cardiff: Zollens; for Singapore, via Sunderland: Grootmeester Nationaal.

Passengers Inward.—From Java, per Minister Fransen van de Putte; Messrs. Idenburg, Cuperus, Carp, Cramer, Mrs. Van Nierop.

Passengers Outward.—For Java, per Cornelis Wernard Eduard; Mrs. Boss and family, Mrs. Mulock Houwer, Miss Heekmeijer, Miss Staatman, two ladies Wynstroom; Messrs. G. A. Stam and family, W. J. G. Stumpff and family, J. Louwerier, C. Loos, A. J. Wolvekamp, Mulock Houwer, U. H. S. van Waning, F. D. Mariouw, J. Spanjaard, H. J. Hooghwinkel, A. Egli.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, October 7.

We are now in the midst of a period of transition here, and almost every day brings forth some events of importance; but it is satisfactory to reflect that every one of them tends, in a greater or lesser degree, to the unification of Germany, which is now no longer the weak and disunited theatre of foreign intrigues and the laughing-stock of the world, but one powerful and united State, strong enough to defy invasion and repel insult, but with no wish for conquests, and appreciating the value of peace as the means of consolidating the various Teutonic races into one homogeneous nation.

On the 1st inst. the contingents of Hamburg, Bremen, and Lubeck were dissolved; most of the officers retire from the military career on the pensions to which they are entitled, and the others are transferred to the Prussian army and appointed to different regiments as vacancies occur. On the same day Prussian troops marched in—Hamburg being now garrisoned by the 1st and 2nd battalions of the 76th Regiment, Lubeck by the 3rd battalion of the same, and Bremen by a battalion of the 75th Regiment. They have been amicably received in the three cities, and fraternise with the inhabitants.

The 1st inst. was also a memorable day, as witnessing the introduction of the new Federal flag for ships of war—an event of great importance, though somewhat premature, for, so far as is known, its creation has not yet been notified to the other maritime Powers. But it has not escaped the attention of the Federal Chancellor, Count Bismarck, that this is a step that must be taken before the new flag can be hoisted on board the German merchant vessels, so that the period for its introduction is postponed till the 1st of April next year.

The Federal Parliament is getting through its work at a great pace; the drafts of the Bills, having been previously prepared by the Council, meet with but little or no opposition, and are passed by overwhelming majorities, exhibiting a pleasing view of the general unanimity that prevails in the House. Among the important Bills that have thus passed is that relating to the Federal consulates abroad and their dotations. They are to be founded on the mixed principle of having a certain number of *Consules Missi*, gentlemen who have been specially educated for the profession, and employing for the less important posts merchants established at the different ports. In the estimates for 1868 the sum of 77,000 dollars was voted for Federal consulates in Alexandria, Bosnia, Beyrout, Jerusalem, Smyrna, Trapezunt, New York, Japan, and Moscow; together with an additional 50,000 dollars for the creation of new consulates at the discretion of the Executive, 30,000 dollars for the erection of a new residence for the consul at Alexandria, and 20,000 dollars for a new consular building in Japan.

The new Post-office Bill, too, has passed without any opposition, and with a storm of applause. It is founded on very liberal principles; all the Post-offices of the separate States are to be administered for Federal account, and the surplus raised in each placed to their credit. Hitherto there have been three rates of internal postage, of one, two, and three groschens, according to the respective distances. On and after the 1st of January next the two latter will cease, and all letters under one half ounce weight will pay one groschen for any distance. As thirty groschens make a dollar, which is equivalent to 3s. sterling, one groschen is about a 1¼d.

Hamburg is to pay 340,000 dollars annually for the privilege of remaining a free port, besides which she will have to pay Prussia 225 dollars per head in lieu of the contingent now dissolved, for which Prussia undertakes the food, clothing, armament and pay of the soldiers. Hamburg has to furnish at the rate of 1 per cent. of the population. Besides this she will lose the net revenue from the Post-office, amounting to 280,000 dollars, as well as 10,000 dollars from the telegraph department. It has been calculated that the increase of the Hamburg budget will amount to 600,000 dollars, besides 300,000 dollars and a free site for a new barracks for the Federal garrison.

COMMERCIAL.

The political disturbances in Italy, and the consequent fear of war, have considerably tended to paralyse the produce markets, and still more the Stock Exchange. The transactions in rice have been on a moderate scale, and prices are hitherto without alteration. A further rise in the value of cassia lignea has to be recorded, and flores is in great request. There is also more doing in pepper and cloves, whilst the prices of other spices are firmer than they were. Spelter is higher, and a further advance is expected, though buyers on the whole are reluctant to pay the prices demanded; therefore, the sales have not been extensive, and only a few thousand centners were taken at 13 marks 6 sch. Banco. None is now to be had under 13.8. Silver bars are being gradually withdrawn from the Bank, and discount is rather higher, but still good paper can be done at 2 per cent.

SHIPPING.

Arrived.—Malabar, from Rangoon; Hermann, from Akyab; Helios, from Rangoon.

Sailed.—Picciola, to Bangkok.

Monetary and Commercial.

We regret to announce that Messrs. Moore, Phillips, and Co., Birmingham, with firms in Hong Kong and other ports in China, as also at Manila, have again been compelled to call a meeting of creditors in consequence of non-remittances. About twelve months since they received advices of losses in China which compelled them to call a meeting, at which they arranged for an extension of time to pay their engagements, and it appears that a sum equal to 5s. 6d. in the pound has been since paid. A proposition to pay 2s. 6d. was made but declined, and a committee has been appointed to investigate the affairs. The liabilities are stated at £80,000, but the assets are not known correctly. The firm was established in Hong Kong as Phillips, Moore, and Co. in 1844 by Mr. Jacob Phillips, and has consequently stood for nearly a quarter of a century. Mr. Phillips was held in high esteem both in China and England, and we trust arrangements will be made to continue the business. The cause of the failure is chiefly owing to imprudent speculations of the Hong Kong manager.

At the meeting of shareholders of the Hong Kong and Whampoa Dock Company, held at Hong Kong on the 16th Aug., a full statement of the company's affairs was submitted, and the working of the various docks showed a very handsome profit. The investments by the company in new docks, &c., will be found detailed in the directors' report in another column. A dividend at the rate of 16 per cent. per annum was declared. Mr. Keswick, Mr. Ryrie, Mr. Bertrand, and Mr. Burrows, were duly elected as directors. Mr. Smith was not re-elected, owing to his uncertain residence in the colony. It appears by the company's deed that a notice of three weeks must be given by any one desirous of becoming a director, and this led to some discussion. Mr. Anderson asked whether or not the meeting had power to expunge any of the company's rules; if so, and he failed to see anything in the rules to prevent such being done by an ordinary general meeting, he would move that the Rule 81, which compelled shareholders wishing to become directors to give three weeks' notice of such an intention, should be expunged or altered. Such rule was very objectionable; and, as sometimes it was impossible to say when the meeting would be held, it was also absurd. It also gave far too much power to the board of directors. The Chairman explained that on the present occasion the auditors claimed their right of twenty-one days for auditing the accounts, while formerly they used to do so in three or four days. Mr. Anderson, however, argued that it was most absurd that, had the auditors not claimed that right, the applications of Messrs. Ryrie and Burrows could not have been made in time before the meeting took place. Dr. Kayne said that such a special motion surely demanded special notice. Mr. Anderson said he was of a different opinion; he thought he was right, and it ought to be put to the vote. Mr. Kaye moved that the advice of the legal adviser of the company be taken as to what was necessary to be done in order to expunge the rule alluded to by Mr. Anderson. Mr. Bosman seconded the proposal, and the question was therefore settled. A vote of thanks to the chairman was proposed by Mr. Kaye and responded to by Mr. Helland. The Hon. Mr. Ryrie remarked that nothing had been said of the remuneration of the directors. (Laughter.) He would therefore propose that the same remuneration be paid for last year as had been given for the previous year, viz., $4,000, which was approved of.

The P. and O. Company's screw-steamer *Sumatra* went out for her trial trip round the Isle of Wight, and her average speed was over fourteen knots. She left for Alexandria on the 12th inst.

Telegraphic advices have been received from Hong Kong that the steamer *Agamemnon*, which put back disabled, succeeded in procuring a new shaft, and left again for London on the 9th of September. Her cargo consists of 2,108,416 lbs., chiefly new season's from Hankow.

We noticed in our last issue the meeting of the Hong Kong and Shanghai Banking Company, held at Hong Kong on the 13th of August, at which the shareholders present expressed their unanimous gratification at the able management of their directors, and the satisfactory position of the bank's affairs. In another column will be found the report and balance-sheet adopted by the meeting.

We have commented elsewhere on the recently issued Royal order, by which public sales of tobacco in Manila are suspended until further notice. A correspondent of *The Times*, in reference to the subject, says:—

"It would have been desirable for those interested in Manila tobacco had the Spanish Consul, in the official notice inserted in the City Article of the *The Times* of the 11th instant, likewise stated what were the intentions of the Spanish Government with reference to the large quantity of tobacco known to be in Manila on the 1st of August last.

"Although the official notice asserts that there will be no auctions in Manila until further orders, it conveys no guarantee that the tobacco wil not be sold privately or forwarded in consignment to Europe on behalf o the Spanish Government, as in the case of the cargo per *Her Majesty*, lately arrived."

ARTICLES OF IMPORT.

TEA.—The market for new season's has been more active, and for the best chops a positive excitement exists amongst dealers and brokers, 3s. and 3s. 2d. having been paid for the best Kaisows for export to Russia, &c. The ordinary and common descriptions—about 1s. 2d. to 1s. 6d.—are still difficult of sale. In Greens and Scented sorts the Min and Deerfoot from Canton have brought a good supply, and prices are rather flatter. The arrival of Moning kinds has been as yet small, but they are better than last year's teas. Congous: Siftings remain in limited demand; a few of new season's sold at public sale at 7¼d. to 7½d., which were full prices, compared with old Teas. Moning kinds are only saleable at about 5d. to 5½d. per lb. Broken leaf kinds continue firm, being scarce. Fair to good common remain at about previous quotations, say 11½d. to 11¾d. per lb. Fair to good flavory kinds, of old import, remain difficult of sale at the low prices current. A few old season's fine Kaisow have sold at full prices. In new Kaisows common to fair qualities have sold only in small quantities, at from 1s, 4d. to 1s. 8d. per lb., good at from 1s. 9d. to 1s. 11d.; whilst fine have sold freely at 2s. to 2s. 4d. per lb., finest 2s. 5d. to 2s. 7d. per lb. Pak Lins have been in strong demand for export, and half-chests have sold from 1s. 11d. to 2s. 4d. per lb.; boxes from 2s. 7d. to 2s. 11d. per lb. Common black-leaf kinds have again sold at 11½d to 11½d. per lb.; fair to good, 11¾d. to 1s. 3d. per lb., but the better kinds are relatively cheap. In new Teas fair to good have sold from 1s. 6d. to 1s. 11d. per lb., fine to finest at from 2s. to 2s. 5d. per lb. In new-make Canton kinds sales have been made to some extent at from 1s. 3d. to 1s. 8d. per lb. for fair to fine quality. Oolongs have been taken readily from 1s. 11d. to 2s. 4d. in half-chests, 2s. 2d. to 2s. 7d. in boxes, for good to fine kinds. In Souchongs business has been small; a few of fair new season's have been sold from 1s. 5d. to 1s. 9d. per lb. Scented Capers have been taken at from 1s. 5d. to 1s. 10d. per lb. for fair to good, and a few fine, both Canton and Foochow make, at 2s. to 2s. 2d. per lb. In old season's Scented Orange Pekoes, Canton-make, sales are difficult to make even at the low prices current; new season's have not been in much demand, except the finer kinds. Foochow kinds have sold to a fair extent, at from 2s. 2d. to 2s. 5d. for good to fine kinds. In Uncoloured Japans there has been but little business. Green Teas.—The amount of business in these has been limited, the fresh supplies of country kinds being very small, and we have no alteration to make in quotations. In Canton Gunpowders there have been some considerable sales at from 1s. 5½d. to 1s. 8d. for fair to good kinds, and in young Hysons at 1s. 5½d. to 1s. 6d. for good quality. The stock in the United Kingdom on the 30th September was estimated at 72,000,000 lbs.

SILK.—Since last mail there has been more activity in the Silk Market, and at one moment hopes were entertained of a general improvement, but these have been frustrated by the unsettled state of politics on the Continent. China Silk: Prices are much as they were, though for some descriptions rather lower quotations have been made, Red Peacock having been sold at 24s. 6d. In Japan silk the little business transacted has been at low prices. Deliveries from 1st to 8th inclusive: China, 761 bales; Japan, 178 bales; total, 934 bales.

COFFEE.—The market has again been freely supplied, and although in most instances the quantity offered has met with purchasers, the importers have had to submit to a further reduction in the value. For plantation Ceylon, except fine sorts, rates are 1s. to 2s. lower. Native has been disposed of at fully 2s. decline, while other East Indian has sold very irregularly, at a fall of about 2s. to 4s. per cwt. The total imports show an excess over those of last year to this date of about 5,700 tons; the deliveries have increased by 1,450 tons, and the stock is now larger by 5,370 tons, but the quantity afloat from Ceylon is less than that at the same date of 1866 by 2,350 tons. In Holland the deliveries for the nine months show an excess of 100,000 bags, when contrasted with those of last year; while the stock on the 30th ultimo was about 30,000 bags more than in 1866. The public sales have comprised 4,060 casks, 380 barrels, 1,350 bags plantation Ceylon at 68s. to 74s. for low to middling; 75s. 6d. to 79s. for good middling; and 80s. to 85s. for bold sorts; 119 casks, 3,170 bags native part sold at 52s. 6d. to 54s. for mixed to good ordinary, and 57s. to 63s. for bold.

COTTON.—The adverse course of the market, both at London and Liverpool, still continues. The sales are extremely limited.

GUM BENJAMIN.—Siam descriptions lower; 17 cases dark rough in block realised at auction £11 to £11 10s. Sumatra steady, and out of 46 cases offered two-thirds sold at £6 7s. 6d. to £6 15s. for fair thirds, and £2 10s. to £2 12s. 6d. for fourths.

GUM COPAL.—Manila descriptions have realised lower rates than those previously ruling, and of 233 cases at auction about half sold at 36s. for good hard, and 27s. for good soft.

JAPAN WAX.—A scarcity in the market has caused holders to demand higher rates. There is a limited business doing privately, and of 114 boxes at auction a few sold at 95s. per cwt. for fine saucers.

CAMPHOR.—This market exhibits extreme dulness, and very limited business is reported in China, with an entire absence of transactions in Japan.

CUTCH.—Good business has been done privately at full prices; 118 boxes at auction withdrawn.

GAMBIER.—Market firm, with moderate private trade on previous terms. At auction 770 bales were withdrawn, but 350 baskets Cubes sold at 25s. 6d. per cwt.

MANILA HEMP.—The dulness reported in our last has continued without relief. Quotations are reduced, and 16 bales common to good qualities at auction sold at £46 to £49 15s. per ton.

PEPPER.—Black: The market continues steady at the advance recently established, and further sales on the spot and afloat have been made at the improvement. The stock at this date is about 700 tons short of that held at same time last year, while the quantity afloat from Penang and Singapore is less by 1,500 tons than that at corresponding period of 1866. The public sales have offered 5,700 bags Singapore, which sold at 3¼d. to 3⅜d. for fair, and 3⅜d. per lb. for very good. 160 bags Penang were bought in at 3d. to 3⅛d.; and of 420 bags Alleppy and Cochin part sold at 3¼d. per lb. Privately, sales of Singapore and Penang have been made at above quotations. White: Notwithstanding the excess in the stocks the market continues steady, and the sales have gone off without alteration in the value. At auction of 1,130 bags Singapore part sold at 4⅞d. to 5d. for fair, 5d. for good, and 5⅛d. to 5¼d. per lb. for very good quality; 146 bags Penang were bought in above the value at 4¾d. per lb. for low quality. The stock is now 480 tons, against 210 tons in 1866.

PLUMBAGO.—The market for Ceylon presents a steady appearance, and of 956 barrels at auction, one-fourth sold at 10s. to 10s. 3d. for very good dust.

RICE.—There has been a very firm market, and prices of soft grain descriptions have further advanced. Confidence in the stability of present rates is shown by the desire of speculators to secure part of the new crop for Spring shipment. A full amount of business has been done in Ballam to arrive. The total stock continues remarkably small, and the consumption does not fall off. Transactions in soft grain sorts reach 30,000 bags, including Rangoon at 12s. to 12s. 9d., Necransie Arracan 11s. 3d. to 11s. 7½d.; 500 tons Rangoon arrived here, sold at 12s. 4½d. to 12s. 6d. 100 tons Bassein at 11s. 6d. 1,500 bags white Bengal are reported at 16s. 3d. to 16s. 9d. Afloat 8,000 tons have sold, including Bassein at 11s 6d.; Rangoon at 12s. to 12s. 6d.; Necransie 11s. 4½d. to 12s. 2,500 tons Ballam afloat, chiefly at 10s. 10½d. to 12s. according to conditions. 500 bags ex ship at 12s. 3d. Further quantities of soft grain have sold to be shipped next Spring, and the sales are now estimated at 20,000 tons; Rangoon, 11s. to 11s. 3d.; Bassein, 10s. 9d. to 11s.; Necransie Arracan, 10s. 6d. to 10s. 9d. per cwt.

SUGAR.—The market has generally continued in the same condition as recently observed, a steady demand has prevailed, and transactions have been of fair extent at about the former currency, to which holders in general adhere very firmly. At auction 6,260 bags Muscovado Manila realised 25s. 6d. to 26s., and by private contract the sales have been 25,000 bags clayed Manila (duty 8s.) at 29s. 3d. to 29s. 6d., and 7,000 bags Muscovado Manila at 25s. 9d. to 26s. 6d. per cwt. Private returns make the imports of Raw Sugar into the four chief ports of the United Kingdom, to the 28th September, 427,320 tons, against 426,180 tons in 1866. The clearances for home consumption 395,720 tons, against 364,720 tons, and the stock at that date 200,040 tons, against 239,300 tons.

SPICES.—Cinamon: Of Ceylon we quote first quality, 1s. 9d. to 2s. 9d. per lb.; second, 1s. 5d. to 2s. 6d.; third, 1s. 3d. to 2s. 1d.; fourth and Jungle, 10d. to 1s. 8d. 62 bales sold at auction at an advance of 2d. per lb. Cloves: There is a deficiency in the stock, when contrasted with that held at same date last year, of about 2,500 packages, and holders are firm. The public sales have offered only 100 bags Zanzibar, which part sold at 3⅜d., the remainder bought in at 3⅛d. per lb. Of Penang 25 cases met with purchasers at 10¾d. to 11¼d. per lb. for fair to middling quality. Mace: The supplies still continue limited, and good quality sells readily at full quotations. 20 cases offered in auction were disposed of at 1s. 6d. to 1s. 11d. for low to low middling, 2s. 3d. to 2s. 9d. for middling to mixed bright, and 3s. per lb. for good middling. The stock is now about 270 against 510 packages at same date last year. Nutmegs: There has been a good demand, and the sales have gone off steadily at full quotations. The deliveries to this date show an excess of about 600 packages, while the stock exhibits a deficiency of 400 packages when contrasted with those to same date last year. The public sales have comprised 95 cases, and these were chiefly sold at 3s. 11d. to 4s. for 66 and 67 to the lb.; 3s. to 3s. 5d. for 74 to 70; 1s. 11d. to 2s. 4d. for 79 to 74; 1s. 9d. to 1s. 11d. for 86 to 81; 1s. 7d. to 1s. 9d. for 92 to 89; and 1s. 1d. to 1s. 5d. per lb. for 150 to 90 to the lb.

SAPANWOOD.—The market is firm, and of 34 tons Ceylon at auction three-fourths sold at £9 10s. to £11 10s. per ton.

TAPIOCA.—Of 935 bags Penang, barely half was realised; good white, 5d.; good middling, 4½d. to 4¼d.; 100 barrels Rio were withdrawn, but sales have been made privately on recent terms.

TIN.—In consequence of the Dutch periodical sale going rather under anticipations the £2 advance reported in our last is, for the present, lost, and the market has become quiet; latest quotations for cash, £94 Banca and £89 to £90 Straits.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 7s. 6d. to £6 10s.; nail rods, £7 10s. to £7 15s.; hoops, £8 10s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 10s. to £7 15s.; rails, £6 5s.

STEEL.—Swedish kegs, £15 to £15 10s.

COPPER.—Sheet and Sheathing, £82 to £84 per ton; yellow metal, 7d. to 7½d. per lb.

LEAD, &c.—English pig, W.B., £21 15s.; shot, patent, £23; sheet, £20 12s. 6d.; spelter, £21 7s. 6d.; zinc, English sheet, £26 to £26 10s.; quicksilver, £6. 17s., in bottles of 75 lbs. each.

The following is from the Circular of Messrs. French and Smith:—The improvement in trade we spoke of in our last monthly circular has not continued. There is no animation in business generally, dealers and consumers still take only for immediate wants.

IRON.—Scotch pig iron is about 6d. per ton dearer. In Welsh and Staffordshire there is no alteration in quotations, with but moderate business.

COPPER.—The earlier part of last month copper appeared firmer, and the quotation for Chili bars was maintained at £72 10s. to £73, but a disposition to sell amongst some holders produced a flatness, and £72 was accepted. On the arrival of the Chili mail of 28th ult., bringing advices for a larger quantity than was anticipated, the price still further receded, and we quote to-day Chili bars, £68; tough English, £77; Burra, £84; Wallaroo, £22; and Ores, about 14s. 3d. per unit.

TIN PLATES are in good demand. The shipments in September from London and Liverpool were 129,000 boxes, against 135,000 boxes same month in 1866. By the Board of Trade Returns, the exports, January to August, were 53,476 tons, against 48,988 tons in 1866, and 40,345 in 1865.

LEAD is steady. LB and Co., £20 2s. 6d. WB, £21 15s. Other brands, £19 12s. 6d to £19 15s.

SPELTER is firmer, and has advanced to £21 10s. in warehouse. The stocks here on 30th September were 3,681 tons, against 5,827 tons in 1866.

QUICKSILVER unchanged.

ANTIMONY advanced to £44 per ton.

EXPORT OF BULLION TO CHINA, &c.

MANCHESTER MARKETS.

Mr. Sam Mendel's Circular of the 8th inst. says:—"The improved feeling reported last week has again vanished, and we have a dull market with an easier tendency, and small concessions from quoted prices are not difficult to obtain." Quotations are:—Grey Shirtings, 7lbs., 7s. 9d. to 8s. 1½d.; 8½l bs., 10s.; Cotton Yarn, Nos. 16-24, 1s. 0¾d. to 1s. 1½d.; Nos. 28-32, 1s. 2d. to 1s. 2½d.; Maddapollams, 3s. 6d.; Long Cloths, 9s.; T-Cloths, 6s. 1½d.; White Spot Shirtings, 10s. 10½d.

The following is from the Circular of Messrs. Jorss and Co., Bradford:—Since our last issue of the 26th ult. our market has remained throughout in a state of inanition, and the transactions for the fortnight may be very simply described as *nil*. In wool the transactions are of the narrowest possible limit, and prices unchanged. Yarns remain quiet as ever, and as spinners cannot get orders at any price, they adopt short time as their contracts run out. In pieces scarcely an order has been placed; even the most ruinous prices fail to induce orders, and manufacturers are compelled to stand. The somewhat unsettled state of politics on the Continent has cast an additional gloom over the market.

Bostonite Purses, from 1s. 6d. each.
Bostonite Multiplication Tablets, 4d. each.

HOLLOWAY'S OINTMENT and PILLS are the best, the cheapest, and the most popular remedies at all seasons, and under all circumstances they may be used with safety and with the certainty of doing good. Eruptions, rashes, and all descriptions of skin diseases, sores, ulcerations, and burns are presently benefited and ultimately cured by these healing, soothing, and purifying medicaments. The Ointment rubbed upon the abdomen checks all tendency to irritation in the bowels, and averts diarrhœa and other disorders of the intestines frequently prevailing through the summer and fruit seasons. Heat iumps, blotches, pimples, inflammation of the skin, muscular pains, neuralgic affections, and enlarged glands, can be effectively overcome by using Holloway's remedies according to the instructions accompanying every packet.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, RED BULL WHARF, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

DYSENTERY, CHOLERA. FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn o.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any rvice in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE, is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

Aden	New Brunsk	499	A1	Tyne	withdes

No. 22, Great St. Helen's, E.C.

Will sail positively on the 5th November. Last shipping day 2nd November.

FOR SINGAPORE and PENANG, the very fine clipper-built ship ALPHINGTON, A 1 12 years, 326 tons register; J. CAINES, commander. West India Docks. This fine shia, built under special survey, is strongly recommended to shippere requiring despach.

For Freight or Passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; or to SUART and SIMPSON, 9, Clement's-lane; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

For list of R. and Co.'s line of ships now loading see "The Times" (daily) and other papers.

With quick despatch.

FOR MANILA, DIRECT, the splendid Spanish clipper-ship ANGELA, 3-3rds=A1 9 years in veritas, 486 tons register; J. Y. DE ONATE, Commander. West India Docks. This vessel, built at Bilboa, in Spain, expressly for the Manila trade, and being of the highest class, is strongly recommended to shippers requiring despatch.

For Freight or Passage apply to JOHN WILLIAMSON, York Chambers. 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

For list of R. and Co.'s line of ships now loading see the "Times" (daily) and other papers.

SHANGHAI direct, the magnificent, river-built, clipper ship DILKHOOSH (owned by Messrs. Smith, Fleming, and Co.), 816 tons register; loading in the East India Docks. This splendid vessel, built in 1864, is strongly recommended to shippers of fine goods, and has good passenger accommodation.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., Pool Fold Chambers, Cross-street Manchester; or 27, Leadenhall-street, E.C.

REGULAR LINE of PACKET SHIP (to follow the Belted Will).—For Hong Hong and Whampoa, the well-known clipper BLACK PRINCE, A 1 13 years, 750 tons register; WILLIAM INGLIS, Commander: lying in the East India Docks. Has superior accomodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

To follow the "Ariel."

FOR SHANGHAI, the favourite clipper WHITEADDER, A1 10 years, 915 tons register; F. W. MOORE, Commander; lying in the East India Docks. This ship has a full Poop, with superior accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th August, 1851.

PAID-UP CAPITAL, £1,500,000.

RESERVED FUND, £444,000.

COURT OF DIRECTORS.

CHAIRMAN—HARRY GEORGE GORDON, Esq.

DEPUTY-CHAIRMAN—WILLIAM SCOTT BINNY, Esq

James Blyth, Esq. | Alexander Mackenzie Esq.
Duncan James Kay, Esq. | Lestock Robert Reid, Esq.
John Binny Key, Esq. | James Walker, Esq.

CHIEF MANAGER—Charles J. F. Stuart, Esq.

BANKERS.

The Bank of England.
The Union Bank of London.

The Corporation grant Drafts and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Pondicherry, Ceylon, Hong Kong, Shanghai, Yokohama, Singapore, Mauritius, Melbourne, and Sydney, on terms which may be ascertained at their office. They also issue Circular Notes for the use of Travellers by the Overland Route.

They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the Receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

Nicholl, Mr. R. W. Pearse, Mr. Keep, Mr. J. G. S. Mackenzie, Mr. McDonald, Mr. Greenhill, Mr. Von Eymern, Mr. Snell, Mrs. Cookes, Mr. and Mrs. R. H. Ramsay, Miss Avary, Mr. T. Duff, Mr. and Mrs. Chretien, Mr. T. Grant, Mr. Newington, Mrs. McLaughlin, Mr. Loveday, Mr. Valetta, Capt. H. W. Jones, Mr. A. B. Large. To Madras: Mrs. Arbuthnot, two children, and three servants, Mr. and Mrs. J. W. Breeks, Captain and Mrs. C. J. Pearse, child, and ayah, Miss Honeywill, Lieut. Ewing, Capt. Cox, Mr. E. W. Bird and servant, Major Gillilan, Miss Utting.

From Suez.—To Ceylon: Mrs. Bloomstrand, Miss Von Eberstein, To Penang: Mr. E. Friederichs. To Shanghai: Mr. J. Mackellar. To Calcutta: Mr., Mrs., and Miss Da Costa, Miss Howard, Mr. and Mrs. Atkinson and child, Mr. C. C. Bancroft, Mr. P. Nolan, Mr. Oldham, Mr. Stolicza, Mr. R. Morell. To Madras: Rev. Messrs. Hardeland and Kahl, Mr. T. J. Maltby.

Per P. and O. steamer Poonah, from Southampton, Nov. 4.—To Ceylon: Mr. and Mrs. J. M. Vanderspar and four children, Mr. Malcolm, Miss Malcolm. To Singapore: Mr. and Mrs. J. McLachlan, Mrs. Dunman and two daughters, Mrs. Willans and two children, Miss Willans, Mr. and Mrs. J. G. Slade, Miss Laurie.

From Marseilles, Nov. 12.—To Ceylon: Mr. J. F. Dickson, Mr. and Mrs. Donnan, Mr. W. C. Miller. To Hong Kong: Mr. and Mrs. G. N. Minto. To Singapore: Miss Powell.

Per P. and O. steamer, from Marseilles, November 20.—To Shanghai, via Bombay: Mr. R. C. Antrobus.

Per P. and O. steamer Pera, from Southampton, November 20.—To Yokohama: Mr. and Mrs. McDonald and two children. To Singapore: Mr. F. A. Sheppard. To Ceylon: Mr. Armitage.

From Marseilles, Nov. 28.—To Singapore: Mr. J. D., Mrs., and Miss J. Almeida, Miss Reneaud, Mrs. Velge. To Hong Kong: Mr. Tait, Mr. Pedder, Miss Marsh. To Ceylon: Mr. and Mrs. Gunter.

Per P. and O. steamer, from Southampton, Dec. 4.—To Ceylon: Mr. and Mrs. W. Thompson. To Singapore: Miss Mary Thompson, Rev. W. and Mrs. Lisle. To Hong Kong: Mr. N. J. Hannen.

From Marseilles, Dec. 12.—To Shanghai: Rev. F. King.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present mail brings advices from Yokohama to the 31st August. The mail of July 10 arrived out on the 29th August. The P. and O. steamer *Singapore* arrived on the 16th, and left for Hakodadi on the 18th, being expected to return to Yokohama about the 27th. Being four days overdue at the time of this mail's departure, fears were entertained for her safety, which have been verified by the telegraphic report of her loss already received here. There is a report current that the the *Shovey-leen* steamer has also been lost in the neighbourhood of the Japan coast, the captain only being saved. The following items of news are from the *Japan Times* :—

Certainly the most important event in our small world has been the arrival, long expected, long hoped-for, of Sir Edmund Hornby. It is rumoured that he expressed his dissatisfaction on arrival at what he had thought to be a haven of rest, after a long and fatiguing session in Shanghai, at finding a large number of important cases awaiting his decision here. But to judge from the airy ease with which he unravels the complicated entanglements into which the happy and childlike ignorance of ourselves and our Consular authorities had involved us;

Digitized by Google

disposes of half-a-dozen cases in an afternoon; reads us elementary lessons of mercantile law in a suave and agreeable manner; and induces suitors to withdraw their cases and refer them to arbitration—he must after all find his "work" in Japan what is popularly termed "a little holiday.'

The English Minister and Admiral Keppel, we have heard from Nagasaki, have left that port for Osaka, to ask for satisfaction for the murder of two seamen of the *Icarus*, the circumstances of which we detailed in our last. From information we have received, we are under the impression, however, that they will not have found the Shiogoon where they expected, which will probably account for their return hither having been delayed so long as it has. As the budget of news they will bring with them will contain information of the probable settlement of the west coast port question—confirmation or denial of the report of that 'Stotsbashi has abdicated, and of the adjustment of this last little Nagasaki difficulty—we look for their arrival with some degree of impatience.

Compensation, we say, has been demanded for the murder of these two British seamen. Will a great Power give compensation for the manslaughter of a Japanese? An opportunity for testing the point has arisen. A coloured man, a sailor belonging to the U.S.S. *Shenandoah*, was riding furiously through the native town at about 8 P.M. on the 27th inst. The streets were crowded, as is usual at that time of night, and the natural consequence was that a Japanese was knocked down. His skull was fractured, and he died about 3 A.M. on the following morning. Now we condemn unanimously the evil practice of a Japanese *Samourai* carrying at his side a convenient deadly weapon which the least provocation brings flashing from its scabbard, wounds or death following almost before he or his victim is aware; the line between this dangerous practice and that of allowing drunken sailors to gallop furiously through crowded streets is not a very wide one. We seriously urge the American Minister to take up the matter in earnest, and were general orders issued by both military and naval authorities of all nations forbidding, under pain of severe punishment, the indulgence in this dangerous and cruel amusement, it would be well. When a French marine some months ago met with his death, mainly by his own fault, at the hands of a Japanese whom he had beaten and whose wife he had grossly ill-treated, the French Minister demanded satisfaction and got the head of the offender. The Japanese Government can with perfect justice ask for the severe punishment of this man, who has killed one of its people, and for compensation for support of his victim's family. Unfortunately it has not the power to enforce its demand; but it is the part of a great nation to do justice unasked, and we have little doubt that by next mail we shall be able to report that the American officials have seriously taken up the case and done the duty that their country and public opinion expects of them.

A serious mob riot has taken place in Yedo since we last wrote, to which the Dutch Minister, H.E. de Graeff Van Polsbroek, nearly fell a victim. It will be remembered that we recently had to record an attempt on his life by an assassin, who fired upon him while sitting reading in his verandah. On this latter occasion he had to drive a long distance through a raging mob, flinging stones till they half filled his carriage, wounded his guard, servants, and horses. The reason for the attack has not been satisfactorily ascertained. The guard as usual, with the exception of its chief, behaved in a most cowardly manner.

Another attack on foreigners resulted seriously for the assailant. Mr. H. Schnell, of the Prussian Legation, and his brother were set upon while driving in Yedo in a low pony carriage by a *Samourai*, who attempted to cut them down. They were armed, however, and fired upon the man, wounding him severely. He is in custody and undergoing examination. These circumstances do not augur well for our comfort when we take up our abode in the capital of the Shiogoon next January.

A most dreadful murder has been committed in Yedo. A labourer had a beautiful wife, who unfortunately did not possess the other qualification necessary to make her a "crown to her husband." In fact, her continued misconduct exasperated him to such an extent that he drove her from his house and hearth. By the intercession of friends, however, the quarrel was made up, and the man—most unfortunately—took back his erring wife on her promise of repentance and amendment. But her promise was not kept, and she soon returned to her former evil courses. The husband again detected her infidelity, and determined to kill her. He slew her at midnight in his own house, and hewed her head, arms, and legs from her body with a long sword, like unto a "certain Levite, sojourning on the side of Mount Ephraim, who took to him a concubine out of Beth-lehem-judah." The fragments he distributed in much the same way as did the Jewish chaplain:—To his master he allotted the head, to her principal paramours he gave each an arm or a leg, and to her parents the trunk. A letter was attached to every limb, informing her lovers of the punishment of the guilty wife, and each portion of the corpse was hung up at the door of the house it was meant for in the course of the night. In the morning the people found a leg here, an arm there, an unrecognisable body in another place, and gradually—for the search had to be carried on over a space of nearly two miles of streets—all the parts of the body were collected together and identified. The husband had disappeared. And now let our readers go on to mark the exceeding civilisation of the Japanese, as exemplified in their criminal code. "According to law," our correspondent proceeds, "the husband has the right to kill his wife, providing that with her he kill her paramour. But should he favour one—that is, kill only his wife, or only her lover—he pays the forfeit of his own head. But in this instance the husband pleads, in a letter he left behind him for his master, that he did not think it right to kill the men; because it was evident, from the large circle of his wife's acquaintance, that it was she alone who was thoroughly bad. The officials hold his plea to be good. He will probably return to his house and work, so soon as he hears of the decision given in his favour by the authorities."

It may interest some of our readers (says the *Japan Times*) to know that a notification has recently been issued in Yedo stating that the Shiogoon's Government has no objection to mixed marriages between its subjects of what rank soever, and those of other nations having treaties with it. The matrimonial connections hitherto entered into between foreigners and natives have been of a morganatic character only. This notification is probably for the special behoof of those among the young gentlemen recently sent to Europe for education whose temperaments may not incline to severer studies. We can hardly imagine the license of much service to Europeans here, as those of the fair daughters of Japan whose acquaintance we have hitherto made can scarcely be held suitable as matrimonial partners in the business of life. We heard, indeed, some years ago, of one enthusiastic foreigner being so struck with the charms of a young lady of the country, as to be impelled to write to his Consul asking if it were possible for him to marry her; but the Consul, a man of strong common sense, replied that he knew of no just cause or impediment, except that he trusted his correspondent would not make such a fool of himself. Though all who have had the rare privilege of introduction to the homes of the Japanese nobility and gentry speak in the highest terms of the beauty and grace, the intelligence and modesty, of women of rank in this country, any idea of mixed marriages which should have any but the most disastrous consequences, must be, for many, many years, most wildly speculative. Still, the issue of such a Notification is a very curious fact; that it has been issued is absolutely certain—and not the least curious consideration surrounding it is—what can possibly be the object of the Gorojiu?

H.B.M.'s Supreme Court, Japan Circuit, before Sir Edmund Hornby, Chief Judge. Civil side: Several cases connected with the bankruptcy of Mr. J. R. Black came on for hearing on the 27th of August. Mr. A. G. Watkins first prayed the Court to set aside all claims on the estate of the late A. W. Hansard, arising out of transactions entered into by Mr. Black with A. McKechnie and Co. The whole of the claims on the estate were gone through *seriatim*, and all creditors to whose claims Mr. Watkins objected were heard in defence thereof. The judge reserved his decision as also respecting the claims of Messrs. C. S. Hope and J. G. Walsh, under bill of sale and mortgage, to whom opportunity will be given to argue their cases. Mr. Marshall's bill of sale over McKechnie's goods was held to be established.

The case of R. Brett *v.* the Chartered Mercantile Bank was then taken. This was a case in which the plaintiff sought to set aside the decision of a referee appointed by arbitrators. It appearing from his own letters that he had pledged himself to abide by such decision, he was immediately nonsuited.

The day's work concluded with hearing of a case between

Digitized by Google

Mr. Schnell and Messrs. Whitfield and Dowson, respecting certain rifles given to the defendants to put in order, but alleged to have been kept by them an unreasonable time. His Lordship urged the parties to submit their cases to arbitration, and Mr. R. Lindau being selected as arbitrator, his decision, when given, will be held final.

NAGASAKI.

Admiral Keppel and Sir Harry Parkes had left this port for Osaka, for the purpose of demanding "satisfaction" for the murder of the two seamen of H.M.S. *Icarus*. A letter from the Nagasaki correspondent of the *Friend of China*, dated Aug. 17th, has gone the round of the papers, in which the Admiral is stated to have arrested the Governor and Vice-Governor, for the purpose of conveying them to Yedo. This part of the story, however, is unworthy of credence, as in the first place it is most unlikely that such extreme and unjustifiable measures should have been resorted to; and, in the second place, advices of a later date do not confirm the report.

The following is an extract of the letter referred to:—

"Admiral Keppel arrived last Monday in the *Salamis*, and Sir Harry Parkes next day in the *Basilisk*. Both have entered strongly into the case of murder of the two men from H.M.S. *Icarus*. The Governor refuses to give any information. It is supposed to have been done by Toza's men, who escaped the same night in the *Nancai*. The Admiral has, I hear, taken the Governor and Vice-Governor under arrest, and sends them up to Yedo to-morrow in the *Basilisk*, to be dealt with by the Shiogoon. It is further the intention of the Admiral to demand satisfaction from the Prince of whom the men were followers."

In the Provincial Court, Messrs. Maltby and Co., agents for the barque *Fruiter*, sought to recover the sum of 2,353 dols. from Messrs. Alt and Co., being a balance of charter-money due to the above-named vessel. The captain of the *Fruiter* sailed in the first instance for Tientsin, where he received the first month's charter-money; but upon his proceeding from thence to Chefoo the agents for the defendants at that place refused to recognise his claim for the second month. He ultimately obtained a charter for his vessel on his own account to Nagasaki. The Court was of opinion that the plaintiffs had duly established their claim, and found for them accordingly for the full amount with costs.

CHINA.

PEKING.

There is no news of any movement on the part of our Minister at Peking of an authentic nature; but it is rumoured that some very important negotiations are going on between Sir Rutherford Alcock and the Chinese Government. Mr. Hart has proffered the chairs of Natural Philosophy and of Chemistry in the New College established there to Dr. Macgowan.

TIENTSIN.

Dates from this port are to the 28th August. A letter from this place of 26th says:—

On the 22nd the wind changed to the north-west, when cool autum weather at once set in, and since then we have had also clear dry weather. Some three or four inland traders from Shanse have arrived here since I last wrote to you, but up to last evening they had not purchased any imports. Rates for piece goods are almost daily going lower, which shows that the demand for that class of goods is weak, without signs of future improvement. Yesterday 8⅓ lbs. Grey Shirtings were being sold by Tientsin dealers to Shantung traders at 2.50 to 2.55 taels, and 8⅓ lbs. Grey Shirtings at 2.60 taels. The reports from the interior are very disheartening for the mercantile people at Tientsin. There appears to be almost no demand for manufactures at the usual marts in Shanse and Mongolia, arising from the failure of the grain crops in the northern parts of this region and the want of pasture for the herds and flocks in Mongolia. On the other hand, cotton, fruits and medicines are daily arriving by the canals from the south of the province, west of Shantung and north of Honan. On more cotton arriving we hope to see rates for that article fall considerably. The present quotation is Tls. 13.20 per picul of 133⅓ lbs. On the whole I may state that the import trade at this port is generally in a deplorable condition, with only very slight signs of any future improvement. We are still without any reliable news from the south part of this province relative to the rebels there and in Shantung.

At present there are considerable numbers—over 80—of large southern junks anchored at Kokoo, a town half way between Tientsin and the mouth of the river, which brought sugar, rattans, and the other usual Straits produce. As they are anchored several abreast—report says six—the navigation for steamers and foreign sailing craft has become extremely difficult. Several of these junks, I understand, come from Cochin-China and Hainan, and the remainder from Fuhkeen, and as the crews—numbering at a low calculation over 3,000 men—are armed with spears, swords, gingals, and cannon, and being accustomed to fighting with pirates, and probably also at times being accustomed to doing a little business in that line themselves, they are a fearless set, and do not feel inclined to yield any of the way to steamers and foreign sailing craft passing Kokoo; hence affairs are assuming a rather unpleasant appearance at that place; and some of the Consuls here are beginning to entertain fears of a lamentable collision taking place between the crews of some foreign craft and the crews of these junks, when probably a considerable loss of life may take place. It appears that in the eighteenth year of Taonkwang—twenty-nine years ago—when the southern junks were accustomed to anchor at Tientsin, a serious disturbance arose between the crews of these junks and the crews of northern junks and shore people, and it was not quelled for several days, and not till the military acted against the southern men. The Tientsin district magistrate was killed and a number of policemen. After that event the Emperor issued an edict, prohibiting the southern junks coming higher up the river than Kokoo. If any disturbance should arise between the foreign vessels and the southern junks, whose crews, as I have already said, number over 3,000 hands, no foreign Government has any gunboats at this port to render foreigners any protection, and we should therefore be placed really at the mercy of these junk people if they were to get their blood up through the loss of any of their body.

CHEFOO.

Report from Chefoo says the rebels are again moving in that direction, yielding to an advance by Li, who has completed his entrenchment and is now going to commence active operations. Unfortunately Chefoo as well as the rebels is enclosed between this entrenchment and the sea, so that any success on the part of the Imperialists must necessarily drive their adversaries nearer to this unhappy port. There is, however, a further report that another body of Nienfei is marching up from Honan, to the assistance of those enclosed in Shantung. If so, it would seem that these cannot be the main body; and the question arises, what business Li had to leave a more powerful enemy behind him to pursue a detached force. However this wants confirmation. At present, all that is certain is that the rebels are within about one hundred miles of Chefoo, and that they have scouting parties twenty or thirty miles nearer. It is a notable fact that there is no British man-of-war in the port except a gunboat, the *Insolent*, which is so hopelessly dilapidated that the crew have to pump water into her boilers all the time she is in motion, they being incapable of feeding themselves; and even then the rest of her machinery is so bad that she cannot go two hours without breaking down. Yet to this interesting nautical phenomenon are British interests entrusted. It seems strange that no ship of war of a slightly larger and more efficient class can be spared from Japan, where there is nothing doing, to lie in Chefoo harbour when there is at least prospective danger.

HANKOW.

The *Hankow Times* has the following:—

At the present time Tseng-kweh-fan, the Viceroy at Nanking, has issued and distributed all through the provinces of Hupeh and Hunan, as well as in his own jurisdiction, a lengthy proclamation against a new society called the *Ko-lau-kwei*. This club is apparently composed, for the most part, of disbanded braves, who, without any visible means of living, go about the country plundering and terrorising the people of the surrounding provinces.

The proclamation is an amusing specimen of the manner in which these documents alternately embody the coaxing and the threatening tones. From the tenor of this document it would appear that large numbers have been induced or compelled to join common cause with these disloyal and disbanded militia. The *Ko-lau* name is the term, "venerable elder brother," used by the braves in camp when addressing their friends, and is, we believe, new, and not connected with any older or wider organisation.

A case having been decided in the Court at Hankow—*In re* Joseph Henry Evans and Alfred Hutchison, creditors' assignees for the estate of Mackellar and Co., plaintiffs, *versus* the

Digitized by Google

Chartered Bank of India, Australia, and China, defendants—in which judgment was given for the defendants, the plaintiffs have requested the Court to state the reasons for their judgment.

The reply of the Court was in effect as follows:—

Our reasons are three, embodied in the following questions:—In the first place, was the mercantile transaction fair and honest? In the second place, did the agent of the Chartered Bank know that Mackellar and Co. were going to fail? In the third place, did the plaintiffs succeed in proving a fraudulent transfer on the part of Mackellar and Co. of their money to the Chartered Bank?

We will examine these questions most briefly. In the first place, was the mercantile transaction fair and honest?

Not only the evidence adduced by the defendants, but the evidence adduced by the plaintiffs, prove that it was. There was absolutely no sale for the tea at Shanghai; the market was very low; the bills drawn by Mackellar and Co. on parties at Shanghai were numerous; and on these grounds the Chartered Bank requested Mackellar and Co. to give them an additional margin on the tea bills equivalent to 15 per cent. This was a perfectly justifiable mercantile transaction, as the evidence of every one of the witnesses examined upon the case abundantly proves. There was no trickery, dishonesty, or fraud on the part of the defendants. The whole transaction is plain and simple.

In the second place, did the agent of the Chartered Bank know that Mackellar and Co. were going to fail?

Mr. Macreath, agent of the Chartered Bank, examined by one of the plaintiffs, swears that he had no idea that Mackellar and Co. were likely to suspend payment until the 28th June; and he farther asserts that the Messrs. Gordon never hinted at such an event to him. William Grant Gordon's evidence goes to prove that Mackellar and Co. entered into that transaction with the Chartered Bank on account of a request for a higher margin made by the agent of the bank to them officially. The transaction was completed on the 28th of June. Macreath, the agent of the bank, swears that he had not received a single hint that Mackellar and Co. were going to suspend payment until the 28th of June, and William Grant Gordon swears that Mackellar and Co. did not contemplate bankruptcy until the 28th of June; the bank's agent, therefore, could have no notice of Mackellar and Co.'s intended failure on the 27th of June, at least from Gordon. Did the agent of the bank know that Mackellar and Co. intended to suspend payment from Shanghai or any other quarter? We find no reason to believe that he did.

In the third place, did the plaintiffs succeed in providing a fraudulent transfer, on the part of Mackellar and Co., of their money to the Chartered Bank?

This is the whole gist of the question, as the plaintiffs explain their petition. The evidence, however, only proves this—that if the Commercial Bank pressed Mackellar and Co. for the bill, they would have to come to some arrangement with their creditors. Did the plaintiffs prove that the Commercial Bank would press Makellar and Co. for the bill, or did they prove that Mackellar and Co. had a presumption that the Commercial Bank would press them for the bill on or before the 27th June? The plaintiffs did not prove either of those positions. Look at the evidence. The query is embodied in the word "if." Would he, Cameron, the liquidator of the Commercial Bank, press them or not? The plaintiffs have not proved that he would, nor even raised a presumption that he would.

It is a rule in law, as well as in equity, that fraud is not to be presumed; but neither in law nor in equity is it positively necessary to prove fraud. Where is the presumption that Mackellar and Co. had committed any fraud, according to the evidence adduced in the arranging of this mercantile transaction? If fraud is not to be presumed, and if it is unnecessary to prove fraud, where is the presumption, for a presumption there must be, that fraud has been committed? We have studied the evidence, and our decision is that there is no presumption of fraud in the evidence adduced.

Judgment for the defendants, in accordance with the fourth division of the defendants' answer; the plaintiffs to pay the costs.

The *Hankow Times* of the 31st August, in its leader, after drawing attention to the "luminous reasons given by his Honour the Chief Judge of the Court" in the cause of "the Creditors' Assignees of the Estate of Mackellar and Co. against the Chartered Bank of India, Australia, and China," goes on to say.—

The hearing of this important case lasted nearly four hours. Two gentlemen of undoubted experience and acquaintance with financial and mercantile matters were properly conjoined with the official President of the Court. At the close of the evidence, without any delay, or any clearing of the Court to deliberate with the assessors, the decision of the Court was abruptly delivered by the Acting Consul. Such a treatment of the case; we can only lightly characterize as flippant and unwise. It is possible that the legal acumen of the Acting Judge was such, that, without any summing up or deliberation, the case stood before his clear mind in all the full relief of a stereoscopic picture. Such being the case, it would be of course useless and troublesome to deliberate with the assessors; but it would have appeared more satisfactory had the reasons for the verdict been embodied in his fiat. One fact we have yet to notice in connection with this case. The document copied into our columns of last week had never been seen by the gentlemen whose names and assent are appended thereto, and whose opinions it purports to embody, until supplied with our issue.

SHANGHAI.

The London mail of the 10th July arrived out on the 22nd August. Dates are now down to the 4th September. The intelligence is unimportant.

At a sale of land at Messrs. Cowie and Co.'s, on the 28th August, the following prices were realised. They show a lamentable fall in the value of property:—A lot of land next to the site of the New Mixed Court, at Tls. 25 per mow; a lot east of Chinkiang Road, at Tls. 30 per mow; a lot in Hankow Road, rear of Ton-lok-yuen Theatre, at Tls. 40 for half interest; a lot at south-western portion of Hankow and Chinkiang Roads, at Tls. 315 for half interest; a lot near north-eastern corner of old Race Course, at Tls. 600 for the whole, about 1 mow 6 fun; a lot at rear of old Racquet Court, about 8 mow, for Tls. 1,600 in all. A share in Honque Wharf sold for Tls. 30, and one in the Pootung Dock for Tls. 1,000.

The labours of the Assessment Committee have been completed, and their report handed in; but there is a very general feeling that the estimates have been made too high. They considered that the present selling prices of land and the rental for houses now obtainable could not be taken as a standard, as they looked upon property as being exceptionally low at this time. The prospects, however, of its increasing in value to any extent during the next three years are small.

A marked change has taken place in the weather. The temperature has fallen some ten degrees, and rain, which was anxiously looked for by the Chinese, and for which prayers had for some time been offered up by the Taotai, has fallen in some quantity. The worst of the hot weather now seems to be passed, the summer having been one of the shortest we have for some years experienced. The heat commenced only on the 23rd July, and on the 24th August it abated, so that we have not had more than one month of oppressive weather.

The new seamen's church on the Pootung Point was opened for Divine service, for the first time, on the 25th August, the Rev. M. Kaufman reading the service. The building has given very general satisfaction.

Mr. Farnham, who has contracted to build the new church, has declared his intention of carrying out his contract notwithstanding a difficulty with respect to funds, concerning which there has been a great deal of correspondence in the local papers.

The marriage of Mdlle. Brenier de Montmorand, daughter of Vcte. Brenier de Montmorand, Consul-General of France, to M. Leonce Verny, Ingenieur de la Marine Imperiale, was celebrated on the 22nd at the Jesuit Fathers' Church, on the French Concession. A large number were present to witness the ceremony, including the majority of the Consular and Naval officers in Shanghai.

The Club is to be resuscitated and put in working order by the 1st October. The great merit of the committee's proposal is its cheapness, as by their scheme any one can become a member on payment of an entrance fee of $10, and a monthly subscription of $4. It was stated to be the opinion of many that the large subscription and entrance fee required formerly was the cause of so many not joining the Club, whilst under the new system many new members will be induced to join who were debarred from doing so before on account of the expense. The adoption of Mr. Fisher's idea of letting out the rooms as chambers, and his general estimates, must have been of great value to the committee. It appears to us that all that was good, except the matter of low subscriptions, has been taken from Mr. Fisher's scheme, whilst the mixture of interests and divided management may lead to dissensions.

The training for the Autumn Races has already begun, and there has been a good muster both of ponies and spectators every morning on the Race Course.

The *North China Herald* says that Mr. Geo. F. Seward, lately United States Consul, will return to China in the early part of next year. The presence of this gentleman will be very valuable at a time when the Treaty between China and the foreign Powers is being readjusted. The arrangements entered into in the beginning of 1868 will affect the future Eastern policy of England, France, and America, and indeed will contribute to settle their relations with China for some years. It is therefore very satisfactory to know that a gentleman so well versed in Chinese affairs as the late American Consul at Shanghai will be on the spot to advise and influence by his experience the high contracting parties.

A large portion of the settlement had been completely under water. The spring tides, naturally high at this season, were, by the aid of a fierce N.E. by N. gale, driven right over the Bund, and some of the streets running east to west were submerged for a distance of a quarter of a mile or more from the Bund. A great deal of damage has been done to Chinese property on the Honque side of the river, and the banks and wharf bunding on both sides have suffered considerably. We cannot hear that any resident remembers the river to have been so high before. The surrounding country was flooded.

A kind of amnesty or clemency is promised to all those who

Digitized by Google

desist from these evil practices, and formally apply to the proper authorities, who will restore them to the rank and privileges of good subjects.

We fear that we cannot say much for the activity and zeal of his Excellency the Viceroy of the Two Kiang, for the proclamation came to light only after an attack upon the paternal hall and estate of his wealthy family in Hunan, of which province he is a native. It will possibly be remembered by some of our readers that some weeks since there was a considerable stir amongst the gunboats and troops on the Wuchang side, consequent upon the despatch of a large force to Hunan. In the district of Shiang-shiang, mentioned in this proclamation, the family mansion of Tseng had been pillaged, many myriads of silver taken out of the family hoard, and the whole household scattered. This was an act of retaliation, carried out by the members of this Ko-lau-kwei, because one of their leaders had been decapitated at Wuchang by order of the Governor of Hupeh, who is a brother of Tseng-kweh-fan.

The discovery of the immense amount of treasure, probably only a part of deposits or savings of the Tseng family, has led to a few inquiries as to the way in which it has been come by. The matter is hushed up; but the whole affair, from first to last, is such a perfect exhibition of the ways and means of the governing and the governed of this unique country that very little comment is needed upon this particular instance of the internal disorder of a country whose people are said to be submissive and industrious.

The *North China Daily News* contains an account of a serious accident which has taken place at Nankin, an explosion having occurred in the Chinese Arsenal, causing the death of five men. The originator of the accident was a mandarin sent down from Peking for instruction, who, from the accounts given by the men who were in the room when the explosion originated, appears to have been working at the manufacture of friction tubes for artillery purposes, and the spirit in the composition having evaporated from the dryness of the weather, leaving the composition in caked masses, he took a hammer or other piece of metal with which to crush it; the result was only what with certainty might have been anticipated, a very slight degree of either friction or percussion being sufficient to produce fire. Of the five he was the last to die, so that, says our contemporary, whilst lingering for three days in great suffering, he may be accounted to have, in some manner, expatiated his imprudence, for the accident could not have occurred from ignorance, he having been over and over again a witness of the fearful caution with which the men employed in the laboratory handled the dangerous mixture. Indeed, it would appear that they had hinted to him the danger of what he was doing, which was all that a workman could do, the unfortunate experimenter being a Mandarin.

A notification has appeared in the *Supreme Courts and Consular Gazette*, announcing that a meeting of the creditors of Messrs. Smith, Kennedy, and Co. would be held on the 7th September, for the purpose of taking steps to annul the bankruptcy. Telegrams have been received stating that the meeting had been held, but that further proceedings were postponed until January next. There appears little doubt but that the bankruptcy will be annulled.

HONG KONG.

From this port we have dates to the 11th of September. The London mail of July 26 arrived out on the 3rd of September, conveying telegrams to the 10th of August. *Via* Calcutta telegrams from London to August 13 had been received.

It was notified that the next departure from Hong Hong for Japan and San Francisco by the Pacific mail line would be that of the *Great Republic*, on the 15th of October.

The present mail brings accounts of the severe typhoon of the 8th September, already reported by telegraph. According to the *China Mail*, it virtually commenced about nine P.M. on that day, and gave ample warning of its approach. The afternoon sky betokened wind, and at about seven P.M. a tremendous gust swept over the town, accompanied by a pelting rain. It was not, however, till nearly ten o'clock that the storm burst in all its fury. The first to suffer were the native boats, numbers of whose crews would have been drowned but for the exertions of the water police, who did everything in their power to afford help. As the night wore on the force of the wind rose still higher, and numbers of vessels either sank or were wrecked and seriously injured. To commence with the former, the *Minerva*, Spanish barque, sank in midchannel. Her crew were with [one exception (the steward), saved. The *Eagle*, American schooner, also sank, the crew being saved. Two water boats belonging to Messrs. Bowra and Co. also sank, and several of their crews were drowned. The chop of Mr. Michell, carpenter, also sank. The vessels driven on shore at Kowloon are, the Danish schooner *Alexandra* and the Siamese three masted schooner *Maria*, the two vessels having their rigging locked together and both utter wrecks. The British barques *Omar Pasha*, *Canton* and *Fortitude*, and the ship *Aden* are also ashore, and the unfortunate Government junk *Preposterous* has run on shore, and is little more than a wreck at Kowloon.

The British ship *Regina*, the *Wartburg*, *Young Greek*, *Senator Webb*, *Bengal* and *Heather Bell*, were all jammed together ahead of the *Fort William*, and most of them are seriously damaged. The steamer *Lintin* and the police junk at Sowkewan have both been clean swept, while an immense number of junks have been wrecked or have foundered. Off the village of Yoma-ti an immense number of sampans were lost and 7 or 8 junks are on shore at Sowkewan. The yacht *Re-echo* has been knocked to pieces, and several other yachts have sunk. On shore, on both sides of the harbour much damage has occurred.

The small houses known as "Wohang's houses," at the end of Kowloon peninsula, are blown into fragments, and look as if they had been destroyed by fire. Three men were wounded and two killed by the falling debris, and an inspector of police slightly injured. The Mint wall has "started," and the Bathing-house is simply a complete wreck. The scaffolding of the City Hall and Hong Kong and Shanghai Banking Corporation's new buildings have fallen across the Praya, quite obstructing the way. A culvert has burst in Shelley-street, and the roads in the upper part of the town are cut up with gullies made by the torrents of rain water, and leaves and branches of trees are scattered in every direction. A large loss of life has occurred amongst the native boating population, but there are no means of arriving at absolute statistics."

Within the limits of the harbour-master's jurisdiction the wrecks and damages amounted to the following totals:—Sank: (exclusive of yachts) one barque, one schooner, two water-boats, and one chop. Wrecked: One ship, three barques, two schooners, and the Government junk. Of other damages eight vessels are seriously injured, while an immense number have, more or less, "come to grief." There are no means of estimating the loss of native junks and native life, but however great it may have been in the harbour and neighbourhood of Hong Kong, there is reason to believe that the number of lives sacrificed at sea is, in proportion, far greater.

At Whampoa and Canton much damage was done among the native craft, and many lives were lost on the river; the Chinese say over one hundred. Between Whampoa and Canton many junks are on shore, and of sampans and other small craft undoubtedly a great number came to grief. The *Southern Bell*, British ship, lying in one of the Union Docks, was nearly laid on her beams and her hold filled with water by reason of the floods breaking over and overflowing the dock she was in. The *Solent*, in Gow and Co.'s Dock, met with a similar accident, except that she got no water in her hold. Ferguson's Dock was also overflowed, but no damage was done to the American ship *Magnet* lying there. Very little damage, and that only of a trifling description, has been done to any of the houses on the Shamien site, and even the mat bungalows have weathered the storm. Many wrecks, however, have taken place among the junks, cargo-boats, &c. The sea-wall of the Shamien site is uninjured. None of the steamers lying in the river have suffered injury. At Macao the typhoon did not commence with any great violence until midnight, and it lasted only an hour. But little damage was done.

The following narrative of the proceedings of H.M.S. *Pearl* during the typhoon and for the twelve hours following it throws much light upon the fearful havoc caused by one of these terrific hurricanes amongst the seafaring population of the China seaboard:—

The *Pearl* left Hong Kong harbour at 7.30 A.M. on the morning of the 8th Sept. The weather-wise predicted a typhoon, but the wind being in her favour and simply a fresh breeze, little uneasiness was felt by those on board. The barometer at the time of her weighing anchor stood at 29 deg. 80 min. At 2 P.M. it had fallen to 29 deg. 60 min., and they wore ship and stood in for Mir's Bey. The wind, however, suddenly increased, and the weather became so thick that it would have been the height of imprudence to attempt to make the land. She therefore lay to under a main trysail on the starboard tack with her head to the S.W. At four P.M. the barometer showed 29 deg. 46 min., and at five P.M., 28 deg. 96 min., and now the fearful force of the typhoon began to show itself. The Captain's

Digitized by Google

galley was blown (not washed) away, and matters began to look serious. All was made as snug as possible; hawsers were passed along the breeches of the guns, secured by tackles, life-lines, rove, &c. Heavy squalls, accompanied by much rain, kept sweeping over the ship. At 6.14 P.M. the barometer fell to its lowest point, 28 deg. 60 min., and the typhoon raged with its utmost fury. The second cutter and third gig were washed away, and the dingy was blown from the davits inboard, and, falling across the spanker-boom, was nearly cut in two. At 7.45 P.M. the life-boat was washed away, and at 8 P.M. the mizen top-sail and spanker, and soon afterwards the foresail, main topsail, fore and main trysails, and jib (although all furled or stowed except the main trysail) were blown from their gaskets, the ship at that time lying to under the clue of the storm main trysail. At 8 P.M. the barometer showed 29 deg. 20 min., rising to 29 deg. 68 min. at midnight, with the wind at south. From 8 to 9 heavy squalls passed frequently, but it was evident that the typhoon was breaking. During the whole time steam was kept up in her boilers, and it was occasionally necessary to move the engines in order to clear the ship of the masses of water which deluged her decks and found their way into the bilges.

As daylight broke a scene was gradually presented which astonished even old sailors on board. Here and there were to be seen numbers of junks floating bottom upwards, and the sea was literally strewn with wreck. Most of the junks and many of the floating spars supported half-drowned Chinese, and the *Pearl* immediately set to work to save as many lives as possible. This was the more difficult from the fact that the boats were gone, and it could only be accomplished by steaming up alongside each piece o wreck and throwing ropes to the occupants. This, thanks to very skilful handling, was most successfully done. The first descried was one man on a piece of sail with two bamboo sticks adhering to it; next they came across the half of a junk, bottom up, with five men on it, who were also rescued; the third lot consisted of four men and one woman upon the bottom of a capsized junk. When the craft upset the men were thrown into the water and contrived to get upon the inverted hull, but the woman who was in the cabin at the time remained inside. With a nail torn from the outside the men contrived to scratch a hole in the bottom, and then to tear up the planking and get the woman out! Next came a set of four men, followed by another of two men both on the bottoms of capsized junks. The latter asserted that some more men remained inside, and this was suddenly verified in a way that produced an almost comic impression. Suddenly, and without apparent cause, a bamboo shot up through the rotten planking, its upper end waggling about in the air in the most eccentric manner, while an unmistakable noise proclaimed interior humanity. There was some difficulty in getting sufficiently close to the junk again, so volunteers were called for to swim to, and cut a hole in, the floating coffin, and four gallant fellows did so. Unfortunately, one of the three men found inside was dead when his rescuers arrived, but the others survived. The help of the warm tea and rice, liberally dispensed to the unfortunates by the captain and officers, restored them to their usual state of impassive equanimity.

The next case was of a very similar nature; one man was taken off from the bottom of a junk, and another was cut out by the swimming volunteers. Two men were next rescued, each on a separate half of their junk some half mile apart. Again, scattered fragments of rotten junk with humanity still clinging to them claimed attention, and by the time the *Pearl* had arrived off the entrance of this harbour she had succeeded in rescuing twenty-nine men and one woman.

The United States steamer *Monocacy* was also caught in the typhoon when about 100 miles from Hong Kong, and the *China Mail* publishes the following account of her experience:—

At 8 o'clock it showed signs of coming on, by not allowing us to eat our breakfast unless in a standing posture. From morning to about three P.M. the barometer kept steadily going down, and in the interval we were being plunged about, straining the vessel considerably—having 14 inches of water in the hold at this early stage. The water came over the top-gallant forecastle in tons, and over our quarters in such immense quantities as made the berth deck a pond, and the captain's cabin, ward-room and steerage ankle deep. So much water, and in such weight, coming down over the sides jarred and strained the ship frightfully. The timbers over our heads sprung to such an extent that it allowed water enough in to float our bedding. The wind increased until between 7 and 9 P.M., when the barometer was at its lowest, 27.85. It then commenced rising. After much labour and exertion the main staysail was bent, which steadied our vessel considerably, but it finally gave way, leaving us to broach to, and shipping seas upon all parts of the vessel. The tiller was here broken, but was fortunately replaced, and lasted well. The seas coming over the forward part of the hurricane deck started it an inch and made it "sag" fearfully. Then the first cutter was washed away, and another sea striking the davits wrenched the five-inch iron off, and the boat went astern and was soon lost sight of. The 1st and 2nd cutter and gig were stove in, but not parted from the davits.

Another sea unfortunately succeeded in tearing away our launch. We had now but two light and imperfect boats in case we had been compelled to leave the ship. At 9 p.m. another furious wind came, making us lay hold of solid and substantial things, whilst every movable article went floating in the seething element around us. It required but another jerk like this to lose our smoke-pipe, and too soon we received it. The smoke-pipe having been loosened by the detachment of about 15 or 20 one-inch iron gauges, was lifted by the force of the wind from the fire-room to the spar-deck, and from the spar to the hurricane-deck, throwing it over the railings of the latter as if it were a pipe-stem, while in reality its weight was three tons and upwards. We certainly thought our chances of life were but little at this critical juncture. The officer of the deck immediately had a fire-hose in readiness to stand by, in case the cinders from the fire-room should communicate to the wood-work, and burn the vessel. This danger was escaped.

Fragments of wood and iron were to be seen all around as the daylight dawned upon us. At 8½ A.M. we commenced chopping away the wood around the four sheet-iron ventilators on the hurricane deck, in order to raise a *pro tem* smoke pipe to give draft to the grate surface. At 11 A.M. sufficient steam had been raised to get under weigh, endeavouring to coax the vessel into Hong Kong. All the afternoon, passing drift wood of sunken junks. At 4 the quarter-master conned a person floating about on a piece of timber, and shortly afterwards saw two more drifting about. Stopped engines, sent the best boat we could and succeeded (though the sea was rather high) in bringing aboard two women and a man. We could not understand them, and satisfied ourselves by giving them dry clothes and something to eat. They are all more or less bruised about the head. At 4½, passed several dead bodies floating by. At 8, came to anchor.

The Legislative Council met on the 10th August, all the members present. His Excellency explained that he had been compelled reluctantly to postpone the former meeting, owing to the fact that he had been flooded on the peak by the typhoon. The Piracy Suppression and the Marine Store Ordinances were passed. On the Governor moving that the Appropriation Bill be passed, Mr. Whittall took the opportunity of expressing his approval of the estimates in the bulk, and particularly the Gambling-licence revenue, while at the same time he protested against the Stamp Tax and the Military Contribution. Mr. Parry took exception to the Civil Hospital and the Kowloon Sanitarium items, and entered his protest against the Gambling-licence, and the derivation of any revenue from such a source. He advocated suppression, and suggested imprisonment in place of fines for convicted gamblers. As no amendment was proposed, however, the estimates were then passed. His Excellency remarked that there would not likely be any further legislation this year, unless orders came from home; and the Council was therefore adjourned *sine die*. The following is a tabular statement of the estimated expenditure for the year 1868:—

Civil Establishments:—	
The Governor	$240.00
Colonial Secretary	13,212.00
Colonial Treasurer	6,852.00
Auditor General...	9,527.00
Clerk of Councils	100.00
Surveyor General	18,849.60
Master of the Mint	63,288.00
Postmaster General	139,388.00
Registrar General	7,980.00
Harbour Master and Emigration Officer ...	26,944.60
Collector of Stamp Revenue	5,000.00
Judicial Establishment	6,570.00
Register of Companies	288.00
Ecclesiastical Establishment	942.00
Educational Establishment	10,608.00
Medical Establishment	19,910.00
Police Magistrates	5,964.00
Police	163,468.40
Gaols	33,821.00
Charitable Allowances	640.00
Transport	3,500.00
Works and Buildings	161,400 00
Roads, Streets, and Bridges	44,500.00
Miscellaneous Services	24,500.00
Land and Houses Purchased...	32,500.00
Special Services	—
Military Contribution	94,200.00
Total	$894,192.60

The complimentary banquet alluded to in our last issue in recognition of the social and professional attainments of Dr. Kane took place at the Hong Kong Club on the 5th Aug. A large company assembled, and due honour was done to the worthy guest, who was about to depart from the colony to Europe.

Mr. C. Langdon Davies, who holds an appointment in the Mint, has been appointed by the Governor to act as Coroner for the colony.

We believe that the statement in our correspondent's letter—published in our issue of the 14th inst.—in reference to the death of M. Kleczkowski at Amoy, has been questioned in regard to his being one of the unfortunate depositors in Messrs. Dent and Co.'s. We shall be glad to find that such is the case, for the ruin and misery actually caused is quite sufficient without any exaggeration, which we should regret to circulate.

It has been a frequent subject of remark amongst those interested in the coasting trade of China that the 32nd article of the existing treaty, which provides that the "Consuls and Superintendent of Customs shall consult together regarding the erection of beacons or lighthouses and the distribution of buoys and lightships, as occasion may demand," has hardly resulted in as much benefit to navigation as was expected by it framers, and the British residents then in China. A grant was, some months since, made by the Chinese Government out of the Customs revenue sufficient to erect and maintain properly some fifteen lighthouses, and, if we are rightly informed, the Inspector General, Mr. Hart, has been entrusted with its suitable application. Aided by the harbour masters of

Digitized by Google

the more important ports, and the tide surveyors of others, the opinions of qualified captains who are navigating these seas, and the mass of information continually being accumulated in the logs and note-books of coasting vessels, he will find little difficulty in arriving at safe conclusions. It is, we believe, intended to commence with the Pratas Shoal which, lying as it does right in the highway of vessels making direct for the Formosa Channel, is one of the most formidable dangers on the coast of China. It is expected that a light will be burning there in January, 1869, at the latest, and the benefit its establishment will confer upon commerce and navigation will be immense. The other points are not yet, it is said, fully decided upon, but the following are named as likely localities for lighthouses:—(we give their position for home readers)—Breaker point, lat. 22.5 N. long. 116.31 E.; the Lamocks, lat. 23.17 N. long. 117.21 E.; Chapel Island, off the entrance to Amoy Harbour; the Pescadores (possibly on Fischer Island or one of the small islets in its vicinity); Turnabout Island, off the island of Haitan; the White Dogs, off the entrance of the Min; Ockseu Island, one of the Lam-yet group in lat. 24.59½ N. long. 119.34½ E.; Tung-ying Island, in (about) lat. 26.23 N. long. 120.32 E.; Video Island, at the eastern end of the Chusan Archipelago; the Barren Islands, off the Saddle group; Sha-Wei-Shan, the northern-most of the Chusan Archipelago, and lying off the entrance of the Woosung river; the Shantung Promontory; the Miao-tow Islands, at the entrance of the Gulf of Pechili; and Sha Lui Tien, off the mouth of the Peiho. These, in addition to the lights now being got for Gutzlaff, and the North Saddle, and the one already in operation at Chefoo, ought to make the navigation of the coast comparatively easy. It is believed that all these can be in working order in five years' time, though of course it is possible that some change may be made in the points selected. We do not hear that anything is in contemplation for Formosa. A lighthouse at its southern end would be a great boon to navigators, but very possibly it will be an impossibility to establish one for some years. Its ports again are hardly of sufficient importance to justify the erection of a lighthouse at either of them so long as more frequented and dangerous portions of the China coast are without one. A light is, however, to be erected on the Gap rock to the south-west of Hong Kong. This completed, a great facility will be afforded to vessels approaching this port from that direction. It is not, we understand, the intention of the Chinese Government to consider the work completed by the erection of the outer line of lights. The approaches to the ports will next receive attention, and in some ten years time the coast of China will, for safety of navigation, so far as proper lights can ensure it, compare favourably with that of most other countries.

STRAITS SETTLEMENTS.

SINGAPORE.

Dates from this port are to the 20th of September. The outward mail of August 10 was delivered on the 11th of September. London telegrams had been received *via* Calcutta to the 3rd of September.

The budget estimates for the concluding nine months of the present year have continued to form the subject of discussion both in and out of the Legislative Council. The revenue side of the account shows a total of $1,050,227, the disbursements $1,000,987, leaving a nominal credit balance of about $50,000.

There is a report that it is the intention of Government to abolish the Municipal Councils at the various Straits Settlements. These Councils have in charge, as their name implies, the general maintenance and improvement of the towns, and they collect rates and taxes for that purpose, which are kept a distinct fund from the general revenue. As they are not more likely to clash with the Government now than before, it is difficult to see any reason for their abolishment, and it is to be hoped the report is incorrect. Moreover, whatever may be said of Penang and Malacca, Singapore is quite as large as most towns that possess their town councils and civic authorities.

The serious disease in cattle which broke out here a short time since spread to nearly all the working bullocks in the place, causing great interruption to business; the cool weather, however, has had a favourable influence, and the disease is now disappearing.

H.M.S. frigate *Rodney*, Captain Heneage, sailed on the 14th Sept. for Hong Kong and Japan. Shortly before her departure a seaman fell overboard and was drowned.

The British steamer *John Bull* was put up for sale by public auction, and realised $12,860.

The seventh general meeting of shareholders in the Tanjong Pagar Dock Company took place on the 30th August, the Hon. Thomas Scott in the chair, at which the directors' report and balance-sheet to 30th June, 1867, were adopted. The report states that of the $200,000 debenture bonds authorised to be issued, only $35,500 remained to be taken up. Satisfactory progress had been made with the works; tramways had been laid down, and other improvements were in progress; 52 steamers and 16 sailing vessels had made use of the wharf during the half-year, and the dock is expected to be ready for use early in 1868. The accrued profits for the half-year are reckoned at $6,615.92. The directors have waived all claim for their fees for the past year.

THE UNITED STATES MINISTER IN JAPAN.

The *New York Times* publishes a despatch received by the State Department at Washington from Mr. Van Valkenburgh, the United States Minister in Japan, from which we extract the following:—

The United States Minister, Mr. Van Valkenburgh, recently applied to the Japanese Government for ground and privileges for a wharf to be built at Nagasaki by the United States Mail Steamship Company. The application is understood to be regarded with favour.

The Japanese Government is expecting to make a new coinage of native gold and silver, on the bases of the assays which were made for that Government at the United States' Mint. The machinery for the purpose has been ordered, but not yet received from Europe.

New Ministers have arrived from Yedo, from Italy, Belgium, and Prussia. Perfect cordiality and unanimity exists between the foreign legations. They have selected a site for the foreign settlement in Yedo at the mouth of Sumedagsa River, which enters the bay of Yedo near the centre of the city. The site of the settlement is directly upon the water's edge. Within this foreigners are to be allowed to rent houses and land under the treaties. The Japanese Government proposes to build a large two-story hotel to be conducted on the Western plan, to contain sixty rooms, for the especial use of foreigners. An American architect has been employed to make a plan of the building, and they have already sent to San Francisco for furniture. It is expected that all will be ready by the 1st of January.

According to the terms of the treaty, it is to be understood that no one is to be admitted to Yedo except for purposes of trade, which means exports and imports only, and which does not mean the erection of grog shops or the promiscuous intermingling of visitors. Such intercourse would be full of danger in the present unsettled condition of public sentiment in regard to foreigners in Japan. A very curious and interesting map of Yedo, showing the location of the foreign quarter and of the proposed hotel, has been received.

Mr. Van Valkenburgh gives a full account of the persecutions of the Christians, of which the telegraph has heretofore given us imperfect notices. There are in Japan 20,000 natives, Roman Catholics, descended from the Christian converts left there two hundred years ago, when Japan was closed to foreign intercourse. They are scattered throughout the Empire, and there are no new converts. A large portion of these Christians reside in the Island Kin Sin, and Nagasaki is their central point, where there are a Roman Catholic bishop and several priests. So far as possible they have hitherto held their worship in secret and in the night. The Government must have had notice of these meetings for a long time, but it took no measures regarding them until the Buddhists and Lentoo priests complained bitterly that their revenue from burials and other religious ceremonies was rapidly falling off. These complaints became so numerous that the local Government of Nagasaki caused the arrest of sixty-three men, women, and children, in a valley a little outside of Nagasaki. They were confined in small prisons erected for the purpose. It was not known that any torture had been inflicted, or what was their intended punishment. The Minister had appealed to the Governors of Nagasaki to relieve the prisoners. They declared themselves unable to do so, as the prisoners were arrested as criminals under the Imperial laws of Japan. They, however, gave assurances that none of the prisoners had been tortured, and that the wants of those arrested and their families would be provided for. In the future no arrests would be made without the direction of the Supreme Government. Afterwards two more were arrested. The governors in this case denied that they were arrested for being Christians, and renewed all the previous assurances. Mr. Van Valkenburgh then addressed an earnest remonstrance to the Tycoon's Government. No answer had been received when the steamer left, but it was understood that orders had been forwarded by the Gorogio to Nagasaki for the release of the prisoners. The Secretary of State now urges upon the Japanese Government the abrogation of the law which proscribes Christianity.

ORIENTAL BANK CORPORATION.

The half-yearly meeting of shareholders of the above-named bank was held at the offices of the corporation in Threadneedle-street, on the 24th inst., for the purpose of declaring an *interim* dividend. H. G. Gordon, Esq., in the chair.

For the information of the shareholders, the following statement of the finances of the bank was submitted.—

General statement and balance-sheet of the Oriental Bank Corporation, for the year ending June 29, 1867.

The CHAIRMAN said it would be necessary for him to say very few words with respect to the general position of the affairs of the bank. From the figures just presented it would be seen that they were in an excellent position, and he had good hopes for the future, for already he thought he saw approaching an improvement in trade and in banking. The losses announced the last time they met had all been written off, and had turned out less than had been expected, while the losses since had been most insignificant in amount. In the late failure in Liverpool they were very little concerned, and he did not anticipate that there would be any loss. They were going on in every way prosperously and satisfactorily. Their friends abroad complained of there being little business, but he hoped there would soon be an improvement. About twelve or eighteen months ago an arrangement was made with the chief Indian banks with reference to shortening the date of bills from six to four months. Their conviction was that it was a good measure, but three banks had withdrawn from the arrangement, and this bank could not maintain its business against them, and in substance the six months' usance would be again resorted to. He had only further to declare a dividend of 30s. per share, being at the rate of 12 per cent., free of income-tax.

The proceedings concluded with a vote of thanks to the chairman.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

KUSTERMANN—On the 20th Sept., at Singapore, Mrs. F. Kustermann, of a son.

LANE—On the 17th Oct., at Grove End House, St. John's-wood, Mrs. T. A. Lane, of a daughter.

MORRISS—On the 23rd August, at Shanghai, the wife of Edward Morriss, Esq., of a son.

ROBERTSON—On the 16th Sept., at Singapore, Mrs. J. H. Robertson, of a daughter.

SHEPPARD—On the 17th Oct., at South Bank-road, Grassendale, Liverpool, the wife of John Edward Sheppard, of a daughter.

TIDMAN—On the 21st Oct., at Ardmore, Blackheath-park, the wife of Paul Frederick Tidman, Esq., of a daughter.

MARRIAGES.

FINCH—TOWSE.—On the 17th Oct., at St. James's Church, Dover, by the Right Rev. the Lord Bishop of Honolulu, assisted by the Rev. W. E. Light, M.A., the rector, Frederick George Finch, B.A., eldest son of F. Cotton Finch, Esq., of Tudor House, Blackheath-park, to Alice Mary, second daughter of William Beckwith Towse, Esq., of Fishmongers' Hall, London. No cards.

FULLERTON—CARR—On the 22th Sept., at Trinity Church, Shanghai, by the Rev. C. H. Butcher, M.A., George Fullerton, of Dundee, Master Mariner, to Elizabeth, youngest daughter of Thos. Forster Carr, Esq., of South Shields.

MAINGAY—BAUMGARTEN.—On the 14th Sept., at St. Andrew's Church, Singapore, by the Rev. Charles Waterhouse, Colonial Chaplain, Alex. C. Maingay, Acting Assistant Colonial Surgeon, Malacca, to Ada, eldest daughter of Christian Baumgartten, Esq., Registrar of the Supreme Court. No cards.

DEATHS.

AINSLIE—On the 21st August, at Tientsin, Thomas Alexander Ainslie, Esq., M.D. aged 32 years.

DUNCAN—On the 7th Sept., at Hong Kong, Catherine, the wife of Mr. R. Duncan.

FRY—On the 9th Oct., at 291, Great College-street, Camden Town, Miss Ann Charlotte Fry, in her 86th year.

KNOX—On the 26th August, at Shanghai, of cholera, Mr. James Knox, aged 32 years.

OLIVER—On the 28th July, drowned at Shanghai, Capt. Oliver, late of Messrs. Dent and Co.

RAMSEY—On the 7th Sept., on board the brig Adeline, while on her passage from Shanghai to Keelung, Henry, son of Henry and Mary Ann Ramsey, of South Salcombe, aged 12 years.

SMYTH—On the 31st August, at Shanghai, Mr. Edwin Smyth, Surgeon.

WHERRY—On the 22nd August, at Chefoo, of remittent fever, Mary Lyon, beloved daughter of the Rev. John and Sarah E. Wherry, of Shanghai, aged 1 year and 21 days.

YOUNG—On the 21st Oct., at Kensington, W. O. Young, Esq., ship broker, of Newman's-court, Cornhill, aged 60.

COMMERCIAL REPORT.

CHINA AND JAPAN IMPORTS.

YOKOHAMA.—We are glad to have to chronicle a slight but steady improvement in the market. Business has been checked to some extent by the occurrence of another native holiday, but holders remain firm, and their prospects good. Deliveries have been very satisfactory, and the only increase stocks have received has been per Anazi, from London, with a general cargo, including Yarn and Shirtings. She has made a very long passage, and her goods are partly damaged. The business has been principally in Grey Shirtings, Yarn, and Black Velvets. The former staples have been placed at previously quoted rates, but for the Velvets an advance of $0.30 has been secured. Sellers of S.S. Camlets have also got an advantage of $0.50. Considerable sales of Dyed Brocades are reported, and we have also to note a demand for Blankets. In metals little has been done, with the exception of a considerable sale of Pig Iron at $1.70. Rice, in consequence of the continued drought, has advanced again and a fresh demand appears to be springing up for this indispensable article of food. Sugar as yet is unchanged, with a small business.

SHANGHAI.—The market for Cotton fabrics has been in a most dull and depressed state, and values of most descriptions show a marked decline upon those ruling a fortnight ago; this state of affairs is to be traced to the complete collapse of the Tientsin market, which in ordinary seasons draws such large supplies from this. Grey Shirtings 8¼ lb. have further declined in price, and in sympathy with them, White Shirtings, T-Cloths, and other staple goods. Fancy Cottons have been very dull of sale, and quotations for such must be regarded to a certain extent as nominal. Woollens have shared in the general depression, and Spanish Stripes, Medium Cloth, and Camlets have been almost unsaleable. Long Ells, for which an active demand was noticed in last report, have gone out of favour, and the quotations for these goods have had to be lowered. Of Orleans, both Figured and Plain, the stocks are excessive, and a further decline in value has been established. Metals: Of Iron Nailrod has been in good demand, but other descriptions have not been wanted. Lead has

Digitized by Google

not been inquired for. Tin Plates have continued in demand at considerably advanced quotations. Steel and Quicksilver have been difficult of sale. Coals: There is no change to report in the market. Cardiff coals without arrivals. English coals in some supply, but buyers refrain from operating at present extreme rates. Anthracite Coals have been sold from ship and from store at taels 14 to 15 per ton, and "to arrive" at taels 12.7.5. Australian Coals without arrivals, and no stock on the market.

HANKOW.—The demand for imports has been on a moderate scale. Grey Shirtings, under advices of a stagnant market in Shanghai, have steadily declined. Woollen and Worsted fabrics, with the exception of Long Ells, which still command attention, have been almost entirely neglected. Fancy Cottons have been taken freely, but at lower values.

CANTON.—Transactions in cotton and manufactures have been very limited. Lead again shows an upward tendency, and Quicksilver has advanced about $1 per picul.

HONG KONG.—Yarn has been in request and the market is firm at the close. Cotton Goods: Contrary to the general expectation, there has been little inquiry for Piece Goods generally, and almost all descriptions are lower. T-Cloths are still wanted, but do not command quite former values. Grey Shirtings of all weights have declined. The 5,000 pieces of 8¼ lb. reported sold were "small eagle" chop, and were taken by a number of dealers who agreed amongst themselves to purchase the parcel, but left the negotiations to one of their number, so that the seller might not suppose that there was more than the one buyer in the market. This is a plan now frequently resorted to, and has the effect of keeping prices down. Small sales of American and English Drills have been made at a decline of 10 cents per piece. Woollens: Camlets have been in moderate inquiry, and a few pieces of Spanish Stripes have found buyers, but other descriptions are quite neglected. Metals: Nail Rod and Bar Iron have been in more demand at former values. Lead is very dull. Tin, firmer. Quicksilver, a little higher. Coals: English and Welsh are firmly held. Australian has been sold at $11.50 per ton, at which price there are still buyers, but holders are now asking $12. A parcel of 600 tons Anthracite has been sold ex ship Benefactor to the U. S. squadron at $14 per ton. Large supplies continue to arrive, and a good deal is being stored because of the difficulty of selling "ex ship" at reasonable rates. Quotations remain about the same, but are almost nominal.

CHINA AND JAPAN EXPORTS.

TEA.

YOKOHAMA.—Prices have again slightly advanced, increased demand coinciding with some improvement in quality. Supplies come forward freely, except of fine or finest qualities. Settlements amount to 5,000 piculs, and the remaining stock is about as much. The only departure has been the Colorado, which took 74,000 lbs. to San Francisco.

SHANGHAI.—Black: For some days after the departure of the last mail the market remained sluggish, and prices dropped. Later, however, rather more life was shown, and the settlements have been on a liberal scale, although at no higher rates. The decline on all descriptions of Tea during the fortnight is about one tael per picul. The stock on offer, although of fair magnitude, embraces few parcels of desirable quality. Green: The transactions have been inconsiderable. They comprise 14 chops of Fychow and Teenkai, at Tls. 31 to 42; one of Pinsuey, at Tls. 36¾, and three of Shanghai-packed, at Tls. 30½ to 37½. Five chops of the new Teenkai Teas have been bought at very high rates, viz. Tls. 40 to 42, a price, taking quality into consideration, quite on a par with that of last year. The Pingsuey Teas show a small decline.

HANKOW.—Only a moderate amount of business has been transacted, consequent on the unsatisfactory home intelligence, and the accumulating stock at Shanghai. For medium Teas, prices have in some instances ruled lower, whilst other kinds maintain their former values.

KIUKIANG.—Black Teas: The arrivals of these had been more moderate, amounting to 7,400 packages; but these were again all destined for Shanghai, the only settlement being a small parcel of 200 chests second crop Ningchow at Tls. 17.5.0. The supply, which had hitherto been excessive, was now likely to fall off, most of the teamen having closed their hongs, country operations now only showing a loss in Shanghai. Green Teas: Six chops of new leaf had arrived, and musters of two chops been shown, but, as usual, teamen's first requirements were much above buyers' ideas, and no business had been done. Four chops had been forwarded to Shanghai. No judgment could yet be formed of the quality of the crop.

FOOCHOW.—Congou: The teamen continue firm holders, and although the large export and depression in the home markets have considerably reduced the demand, prices have but slightly receded. Many of the orders sent into the interior for the purchase of teas on native account are said to have been cancelled, and it may be hoped that the producers, unable to obtain remunerative prices for the fourth crop, will not pick the leaf, but leave it on the trees, in order to obtain greater vigour, and produce a crop next season superior in quality and quantity, thus also reducing the export for the current season. Souchong: Has been taken for England and the Continent at about previous rates. Oolongs: About 600 packages have been purchased for shipment to Europe, but there has been no demand for America. Flowery Pekoe: Settlements of the fortnight include some of the finest chops of the season for shipment to Russia. Scented Teas: There has been a considerable demand for these descriptions, as they appear relatively cheaper than other kinds.

CANTON.—Two chops of Country Congou have arrived, one of which is packed in half-chests. There is at present no demand whatever. Country Greens also continue quite neglected. Some settlements of district Congou have been made at about Tls. 23 to 25. In Scented Teas attention has been chiefly directed to the fine and finest kinds of Scented Orange Pekoes, which have therefore recovered the decline noticed in last report, rates closing decidedly firmer. Capers have not been much enquired for.

SILK.

YOKOHAMA.—We had last mail to report an eager competition amongst buyers, which kept up prices in spite of the continued unfavourable advices from your side. This has continued for a fortnight, and it is only in inferior kinds that we can report any change for the better. The news just to hand of a really serious fall may have its effect, but it has not yet been manifested. The market will hardly gain a healthy tone so long as we receive "unlimited" orders; the purchase of even one comparatively insignificant parcel is quite sufficient to confirm the obstinacy of native holders. The quality of finer sorts is certainly above the average—the greatest caution being observed in selection, and many houses having adopted the practice of offering fullest market rates for the privilege of picking over bales. More than a half of the nominal settlements have thus been sent back after inspection, and we do not estimate actual purchases at over 320 piculs. These consist chiefly of best and good hank sorts. Oshus are coming forward freely, and these have also been bought to the extent of about two-thirds of the Mybash—Koshus and some trifling lots of inferior kinds making up the rest. We put the unsold stock at from 700 to 720 piculs.

SHANGHAI.—Notwithstanding the receipt of continued unfavourable telegraphic advices of the home market, considerable settlements in Silk have again taken place, estimated at fully 2,000 bales, and consist chiefly of common and medium grades. The decline in prices anticipated by many intending buyers, consequent upon the unfavourable news from home, has not been realised, and cannot be expected while transactions are entered into immediately after the departure of each mail. It is moreover unreasonable to suppose that the Chinamen will place any faith in the telegrams, when these transactions are made in the face of such adverse advices. The arrivals from the interior for the past fortnight do not exceed 1,500 bales, and from Ningpo no Silk has been received; owing to these moderate receipts and our large settlements the stock unsold is now reduced to 3,000 bales, amongst which there are but few bales of true Chop Silks, the bulk consisting of medium and common grades. The latest advices from the producing districts report a restricted business having been transacted. Prices were lower than last mail, but still showed a loss as compared with quotations. The estimates given of the total crop were about 40,000 bales, though of course export to a great extent will be governed by the prices ruling in this market, for should prices decline considerably, the demand for native consumption will probably increase.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Yokohama.—From Newport, Aug. 29, Clio.

At Shanghai.—From London, Aug. 21, Weymouth; 28, Douglas Castle; from Cardiff, 23, Sea Flower; from London (reported by telegram), John Lidgett.

At Hong Kong.—From London, Sept. 1, Banian; 4, Ramsey; from Cardiff, 4, Corypheus; from Sunderland, 4, Clete; 6, Belle of the South, The Cedars; from Hamburg, 4, Fetish; from New York, 4, Colorado; from London, previous to Sept. 29, Osprey and Chetah. (Reported by telegram.)

At Manila.—None.

At Singapore.—From Liverpool, Sept. 10, Eastern Chief; from Cardiff, 7, Bestevaer; 10, Ymuiden; 15, Bourse d'Anvers, Grondwet; 16, Jedo; 17, General de Steurs; from Hamburg, 10, Freya; from Cardiff, previous to Oct. 30, Grafstroom. (Reported by telegram.)

At Penang.—None.

DEPARTURES.

From Yokohama.—None.

From Shanghai.—For London, Aug. 23, Sooloo; 27, Jubilee; Sept. 2, Titania; 4, Juanpore.

From Foochow.—For London, Aug. 22, Pakwan; 27, Scawfell; 29, Maggie Leslie; 30, Cymbeline; Sept. 2, Grasmere; 3, Medina.

From Hong Kong and Canton.—For Falmouth, Sept. 3, Peiho.

From Manila.—For London, Aug. 22, Neptune; for Cork, 26, Gladiateur; Sept. 3, Adan y Eva.

From Singapore.—For London, A. H. Wille; 13, Simoon; 19, Matilda Atheling; for Liverpool, 10, Bella; for Boston, Alexander.

From Penang.—For London, Sept. 14, Coleroon.

VESSELS LOADING.

At Yokohama.—For London, Conrad; for New York, Pauline, Caractacus, Yokohama, Fair Leader.

At Shanghai.—For London, Sir William Wallace, Polmaise, Evelyn Wood (all full), Allendale, Weymouth, Douglas Castle, Albuera, Georges; for New York, none.

At Foochow.—For London, Amazone, Prudhoe, Caller Ou; for New York, none.

At Hong Kong and Canton.—For London, Hyacinth (full), Kelso; for Liverpool, Veronica; for New York, Magnet, Princess of Wales, Marie Haydorn.

At Manila.—For London, Stuart Wortley; for Cork, Fort Regent; for Havre, Ille et Vilaine; for Cadiz, Conception; for Hamburg, Voladora; for New York, Stuart Wortley, Norval.

At Singapore.—For London, Sebastian Cabot; for Liverpool, Eastern Chief, Janet Fergusson; for Channel, St. Paul; for France, Java; for New York, Benvoirlich, Kalahome.

At Penang.—To London, La Plata, Minalto.

FREIGHTS AND CHARTERS.

At Yokohama.—To London: cotton and tea, £3 to £3 10s. per ton; silk, £4 to £4 10s. To New York £2 10s. to £3, per steamer, via San Francisco, $45.]

At Shanghai.—To London: the rate remains at £3. In coasting charters scarcely anything is doing.

At Foochow.—To London £3.

At Hong Kong and Canton.—To London: £2 15s. per ton; to Saigon and back 47½ cents. The circular of George Holmes gives the number of disengaged vessels in harbour at 28 (exclusive of Siamese), representing 12,409 tons.

At Manila.—There is still no unemployed shipping in port, and produce has begun to accumulate. The last settlement was the Fort Regent, 655 tons, at £3 5s. for a full cargo of dry Sugar to the Channel for orders, to be discharged in a safe port in the United Kingdom, with 10s. per ton extra if sent to the Continent.

At Singapore.—Freights during the past fortnight have remained steady. The rate to London and Liverpool has been maintained at £3 per ton all round, owing mainly to a more plentiful supply of produce being ready for shipment.

COMMERCIAL POSTSCRIPT.

The steamer *Ajax*, which cleared from Liverpool on the 16th inst. for Singapore, Hong Kong, and Shanghai, took out the following quantities of cotton goods:—Plain Cottons: Shanghai, 2,698,250 yards; Hong Kong, 925,405 yards; Singapore and Penang, 1,383,286 yards. Printed and Dyed Cottons: Shanghai, 451,360 yards; Hong Kong, 36,100 yards; Singapore and Penang, 131,800 yarns. Cotton Yarn: Shanghai, none; Hong Kong, 159,410 lbs.; Singapore and Penang, 76,870 lbs.

Arrivals not in the Tables.—Oct. 22, off Portland, from Singapore, Antelope.

Departures.—Oct. 23, from Sunderland, for Penang, Auguste Lancker.

Laid on.—At London, for Colombo, Susan Pardew.

Spoken.—Shakespeare, London to Shanghai, Sept. 21, 5 N., 23 W.; Dryden, Swansea to Hong Kong, Aug. 3, 36 S., 19 W.; Ellen (barque), Shields to Shanghai, June 23, 34 N., 19 W.; Nazarene, Shields to Shanghai, Aug. 9, 30 S., 25 E.; Vrede, Amsterdam to Batavia, Sept. 8, 10 N., 25 W. Maria Sarah, Rotterdam to Padang, Sept. 20, 4 N., 23 W.

Mr. W. O. Young.—This gentleman, well known in the China trade as a shipowner and broker of many years' standing, died suddenly at the residence of his sister-in-law. Our readers will learn with regret that the proceedings in his recent bankruptcy (some details of which appeared in our last issue) so affected his mind as to bring on an attack of paralysis, from which he never rallied. Mr. Young was sixty years of age.

The Brindisi Railway and Docks.—The Italian Minister of Public Works has been making an examination of the works of the railway from Naples to Foggia and the port of Brindisi. These and other similar works are those which will constitute the grandeur and prosperity of the country. A considerable portion of the Foggia line, it is said, might be opened in December, but obstacles are feared. At Brindisi it has at length been determined to form a dry dock, of the length of 120 metres. The estimated expense is 2,500,000 lire; the works are to be thrown open to competition, and offers are to be made under the obligation of constructing the basin sufficiently large to receive vessels of 2,000 tons.

Consular Appointments.—The Queen has been pleased to approve of Baron Carlo de Cretty de St. Paires as Consul at Aden for his Majesty the King of Italy; of Mr. Francis MacNab as Consul at Sydney, in New South Wales, for his Majesty the King of the Netherlands; and of Mr. William Minto as Consul for the Presidency of Bengal, to reside at Calcutta, for his Majesty the King of Sweden and Norway.

Digitized by Google

An Unfaithful Steward.—Daniel da Silva, a man of colour, the steward of the ship *Eliza Shaw*, lying in the West India Dock, was brought before Mr. Benson, charged with stealing two bottles of champagne, a bottle of brandy, a bottle of gin, a bottle of sherry, two tins of sardines, a bottle of mustard, a bottle of pepper, a knife, a pistol, six pounds of candles, a table-cloth, fifteen desert-spoons, three tea-spoons, and four table forks. On the 12th inst. the prisoner made his appearance at the import entrance of the West India Dock, with his chest, bed, and bedding. He said he was from the *Eliza Shaw*, a China ship, lying in the West India Dock, and produced a pass from his captain. Joseph Cleaver, a constable in the service of the East and West India Dock Company, overhauled the chest, in which he found the above-mentioned property, and also found 4½ lb. of contraband tobacco on the prisoner's person. The prisoner said he came from the *Eliza Shaw*, and that all the property belonged to him. Cleaver detained him, and made inquiries. The result proved the falsity of the prisoner's statement. Captain John Steel, the master of the ship *Eliza Shaw*, stated that the whole of the property belonged to him. He had eighteen pistols with knives attached, like the one produced, when he sailed from England for China. He missed five of them when the voyage terminated. Mr. Benson: Are the rest of the things your property or the property of the ship? Captain Steel: The property of the ship. The steward had the use of all the things, and great confidence was placed in him. There was brandy on board similar to this. The Prisoner: I own I am guilty. I am sorry for what I have done. Captain Steel very humanely recommended the prisoner to mercy. The prisoner could not be more sorry than he was. He had been a good and faithful steward on the voyage, and had proved unfaithful at last. He did not expect this of the prisoner. Mr. Benson: He has stolen a large quantity of property, and he ought to be committed for trial for this robbery. Captain Steel earnestly appealed to the magistrate not to commit the prisoner for trial. The prisoner: I will pay for the goods. Mr. Benson: No, that cannot be allowed. You have committed a very serious robbery, and if you had not been strongly recommended to mercy you would have been committed for trial, and then you would have been sentenced to a long term of imprisonment. I convict you of the unlawful possession of the goods, and sentence you to two months' imprisonment and hard labour.

The Mont Cenis Railway.—A correspondent states that during the six months of official trials above Lanslebourg no accident of any kind took place in consequence of horses or mules being frightened by the engines, to which those sensible animals soon became reconciled—as they do in England where railways approach the public roads and streets of towns. Until the horses become accustomed to the engines over the whole length of the mountain, however, some care will be required. The goods trains, which are to precede passenger traffic, will run at a speed of only eight or ten miles an hour, and will be seen long before they approach the diligences, which may be stopped while the train passes, or the train may be stopped to allow the diligences to pass, as was done in the trial trip of the 26th of August last, on which Captain Tyler reported. Another important safeguard is that the railway has taken the outside of the road and left the inside to the horse traffic. The railway, in fact, forms an embankment nearly the whole way, and its post and rail fence effectually protects the road conveyances from the dangers of the precipice. From this point of view the railway must be considered rather to increase than diminish the security of travellers on the ordinary road. The Government inspection of the line was fixed for the 20th inst. The date of opening for traffic is not yet fixed, nor is it decided whether there will be any ceremony of public inauguration.

Wreck of the Ship "Elizabeth."—The following report has been received by the Board of Trade:—"British Consulate, Swatow, August 6. Sir,—The British barque *Elizabeth*, of Dundee, bound from Neuchwang for Swatow, with beancake, was totally lost in Owick-bay, to the north of this some forty miles, on the 15th ult., during a severe typhoon. Seven lives were lost, besides those of the master's wife and child. Those of the crew who succeeded in reaching the shore were stripped by the natives and robbed of their effects; but afterwards met with kindness from the inhabitants of one of the villages. A junk was hired, and the survivors were all brought hither. At the request of Mr. Darke, the master of Her Majesty's gunboat *Drake* proceeded to the remains of the wreck. The people appeared so poor and wretched, and so many villages were concerned in the plundering, that the commander of the gunboat judged it inadvisable to resort to force, and without doing so no attempt or threat would have availed to obtain the restoration of any of the property. From what was left of the ship he brought away a piece of one of the masts and a portion of cable, as there was in this case no suspicion of any fault or misconduct on the part of the master or those under him. No papers of any description have been saved.—I have, &c., W. M. Cooper, Her Majesty's Acting Consul."

The Suez Canal.—It is perhaps not generally known that the Suez Canal Company charges itself now with the conveyance of goods from the Mediterranean to the Red Sea, and *vice versa*. This provisional working is carried on partly by the maritime canal and partly by the sweet-water canal; and the English Government is availing itself of the facilities offered by forwarding by the new route horses, forage, and other stores required in connection with the Abyssinian expedition. The French Minister of Marine has also on several occasions availed himself of the new route in the despatch of stores for Cochin China. Everything forwarded has, however, to be transhipped *en route* from the sweet-water canal to the maritime canal.

The New Atlantic Telegraph.—It seems we are likely soon to have cheaper telegraphic despatches to and from America than the rate charged by the Atlantic Telegraph Company. It is stated that the cable between France and the United States—Brest and New York—will offer superior advantages to that of England, as the prices will be much reduced, from 50f. to 60f. To expedite the delivery of despatches and prevent probable confusion, it is proposed to establish two classes of telegraphy—the express and the ordinary. The express, which will cost more, will arrive as promptly as possible, and be delivered at the place of destination by messengers on horseback; the ordinary will be arranged as at present.

A Warning to Consuls.—A correspondent mentions that one of our Consuls abroad has just been the victim of an ingenious and novel swindle, by which he has been eased of a sum of money considerable in comparison with a small salary. A young man of gentlemanly manners and address presented himself at the Consulate with a request that the Consul would legalise his signature to a declaration for half-pay due to him as lieutenant in the navy. This person produced at the same time a Foreign-office passport to prove identity, and exhibited a letter, which he stated he had just received from the Admiralty, wherein he was authorised to draw on the Paymaster, Naval Department, for a sum which would be duly paid on the declaration being attached to the bill. He further said that he found himself in a disagreeable position, since he had come under the full conviction that a remittance from his agents would be waiting for him, and had left a young lad who was his servant by way of pledge at an hotel until his return with funds for the discharge of his hotel expenses. He was "awfully disgusted" at receiving a letter from his agents, Messrs. Hoare, informing him that they held a balance to his favour of nearly £300, but they had omitted to endorse a list of their correspondents on the Continent. The Consul, after examining the papers, gave credit to the story, and advanced the gentleman £40, receiving in exchange a bill payable at sight on the London firm, which was soon after returned with the endorsement "not known."

The American Colony in Syria.—Two years ago an enthusiast named Adams persuaded a number of the citizens of the State of Maine to establish an agricultural and religious colony at Jaffa, in Syria, which he represented to them as a land flowing with milk and honey. The enterprise proved a complete failure financially and sentimentally. A few of Mr. Adams's victims have contrived to struggle back, having some slight resources of their own still left to them; while a subscription is now being raised in New York to rescue the others, many of whom are women and children, from a state of actual starvation.

Accounts from Jerusalem give a very unfavourable account of the state of the road between that city and Jaffa, and the increasing misery of the population, and the continued neglect of the representations forwarded to the Porte as to remedial measures causes much discontent.

The new Federal flag of Germany has been recognised by France, England, Sweden and Norway, Italy, Austria, and Spain. From the other seafaring Powers the like is shortly expected.

STOPPAGE OF THE ROYAL BANK OF LIVERPOOL.

During the morning of the 22nd instant rumours were current in Liverpool regarding the difficulties of the Royal Bank; and at three o'clock on the same afternoon the bank closed, the following notice being posted on its doors:—"The bank has been compelled to suspend payment. A meeting of the shareholders will be held to-morrow to determine the course to be adopted.—H. A. Withers, Manager, Oct. 22, 1867." As is usual in such cases hundreds crowded round the bank for several hours to read this notification and comment on it. During the day a protracted meeting of the directors was held, and the "talk on 'Change" was that, owing to the fact that the proprietary is small but wealthy, the bank an unlimited one, and the accounts more large than numerous, the individual suffering would be smaller, the results of the suspension being far less disastrous and discreditable than the Barned failure. As might be expected, there was a run early in the morning upon the other local banks, but all of them met the demands so promptly that confidence was soon restored—if such a feeling as confidence can be said to exist at all.

On the following day a private meeting of the directors was held at the offices of the bank, to adopt such measures as might be deemed necessary. It was, we believe, suggested that the several shipping firms to whom the bank has made advances to the extent of between £400,000 and £500,000 should be placed in liquidation, and that the advances should be deducted from the assets as a bad debt. It was also decided that a meeting of shareholders should be called as soon as possible, and this accordingly took place on the 24th.

At this meeting an immediate call was resolved upon of £5 per share. It was at the same time agreed that a speedy resumption of the business is desirable, and that steps should be taken to register the bank under the Joint-Stock Companies Act of 1862. The present liabilities to be provided for are £1,650,000, of which £1,200,000 are on deposit and guaranteed accounts, and £450,000 on bills that will come back owing to default by the parties primarily responsible. The losses sustained are estimated at £770,000, to meet which there are the capital, reserve fund, and undivided profits, amounting altogether to £820,000. Another meeting is to be held on the 7th of November, with the view to winding up the company under its existing form of unlimited liability.

The announcement of the stoppage excited a great deal of attention in London, but no great surprise. Bills bearing the endorsement of that bank have been regarded with suspicion here for some time past, in consequence of the speculative nature of its transactions. Departing from banking operations of a legitimate character, the management has always shown too great a willingness to embark in financial business of a wider scope, and involving, of course, proportionate risk. Thus, it is stated that some £300,000 has been locked up in ships, representing about 40,000 tons, and which are now trading to various parts of the world. A large sum is also understood to have been advanced on paper represented by cotton. The total liabilities are estimated at £3,000,000 to £4,000,000, but it is fully anticipated that the creditors will be paid in full, this being an unlimited bank, and many of the shareholders being very wealthy. The reserve fund was recently stated at £106,933. Mr. Francis Shand is the chairman, and Messrs. Holme, John Bibby, and Robert Hutchinson are directors. The proprietary is a very small one, as we have before stated, but the parties interested are involved to very heavy amounts. One lady is said to be interested to the extent of £100,000, a merchant to nearly a quarter of a million sterling, another merchant to the amount of £274,000, and a broker to £84,000.

THE SUEZ CANAL.

Whether the Suez Canal be destined to become a great fact in the world's history, or whether it prove a gigantic and costly failure, Egypt is, and must always continue to be, a country of the greatest interest and importance to all engaged in or connected with our trade with India and China. In August last we had occasion to comment on the unmistakable symptoms of increased prosperity that have lately become manifest, not only as regards the traffic through the country, but the development of foreign enterprise and native industry within it, and the undeniable progress of M. Lessep's colossal scheme is now attracting so much attention that we need hardly apologise for once more recurring to the subject. Of the financial position of the undertaking we will say nothing here, except that it is quite incomprehensible, and therefore most unsatisfactory; the public have been completely mystified by a series of contradictory statements that have been commented on at considerable length by *The Times* in a leader which we reprint elsewhere. Neither will we speculate on its future utility and remunerativeness, regarding which M. Lesseps is so sanguine, and the British capitalist so persistently sceptical. But in the works actually accomplished, and those now in active progress, there is much that is both interesting and instructive. Our former article (above alluded to) had reference only to such works connected with the southern end of the Canal as might be noticed by any overland traveller passing through Suez; those at the northern end, however, are quite out of the transit route, and must be the object of a special expedition.

Port Said, the spot selected as the entrance to the Canal from the Mediterranean, is about 140 miles to the east of Alexandria, and stands on a narrow strip of land separating Lake Mengaleh from the sea. A recent visitor describes the town as somewhat resembling San Francisco in its early days. "Its streets are "traced at accurate right angles to each other; the houses re- "semble those of a gold diggers' city, a few being built of "stone, but the great majority of wood, either plastered over or "left bare, while there are not a few canvas tents. The streets "are nothing but sand, in which one sinks nearly ankle deep, "and walking would be no pleasure to the most determined "pedestrian. The principal streets were really crowded with "people, and the stores, in which everything could be purchased, "seemed to be doing a brisk business." The works going on in this little-known place are described as a triumph of engineering skill and boldness, to say nothing of the wonders that had to be accomplished before the actual construction of the Canal could be begun. Where six years since was but a desert strip of sand, there now stands a busy town, a port with its large basin full of shipping; docks, quays, and factories. The first necessity was a channel deep enough to allow ships to enter. This being accomplished, a mole or pier fully two miles long, extending into six fathoms of water, was required to protect the channel. No stone suitable for building this could be obtained except from quarries so distant that the cost of obtaining it was no less than 85f. per cubic metre! Not daunted by this difficulty, the engineers set to work to make their own stone from the sand itself; and by combining it with lime and sea water an excellent artificial stone is obtained, with which the pier is being rapidly completed. A second pier is in course of construction in such a position that the two together will form an immense "outer port," which will defend the mouth of the canal from any wind whatever. The "inner port," where most vessels are moored at present, is 866 yards long and 400 to 600 wide, and is being dredged to a depth of 26 feet. In the port and different parts of the Canal there are forty-six steam dredging machines at work, of 60 to 75 horse-power, each lifting about 1,500 cubic yards of sand per day. And there are 28 steam-barges engaged in carrying the sand raised out to sea. These barges are constructed with an air-tight casing, so that they cannot sink. The bottoms are mere folding doors, which are kept in their places by chains. When the barge is far enough out at sea the engine slackens these chains, the bottom opens, and the cargo is discharged. The weekly consumption of coal, by dredging-machines, barges and tugs, is no less than 10,000 tons per week! These few facts will suffice to show the nature of the preliminary work already accomplished; and we cannot withhold our tribute of admiration to the wondrous energy and skill therein displayed, although our feelings as regards the shareholders whose millions are thus magnificently expended may be more nearly akin to pity than anything else.

STUDENT INTERPRETERS FOR CHINA.

We hear that six more appointments have been made to the class of student interpreters in China. Candidates are nominated by the Secretary of State for Foreign Affairs as vacancies require to be filled up. They undergo a strict competitive examination in *Precis*, Latin and French construing, the simple rules of arithmetic, and four books of Euclid; they are expected to be well acquainted with modern geography, and to write and spell the English language properly. To this admirable test of capacity we should like to see that some proficiency in the rudiments of Chinese were required as well. That language confessedly requires a lifetime for its proper acquisition. It is said to be a case of mere plodding and hard work, but not every one has an aptitude nor the devotion required for such labour, and we think that it is only fair that those who are ready to undergo this test should, *cæteris paribus*, receive the preference. There is a professor of the language at King's College of many years' experience, who could, without doubt, enable gentlemen going to China in the capacity of student interpreters to grapple with the first difficulties of so arduous a study advantageously. At present however this office—established with so much energy by the late Sir George T. Staunton, himself an eminent Chinese scholar—exists almost as a sinecure, and, being in no way encouraged by Government, is of much less utility than it might be. We understand however that a representation to this effect has already been made to Lord Stanley, and we trust it may lead to the desired result. Mr. W. C. Hillier, son of the late Charles Butler Hillier, chief magistrate at Hong Kong, and nephew of Walter Medhurst, H.M.'s Consul at Hankow, has passed a very satisfactory examination before the Civil Service Commissioners for a student interpretership in China. Out of sixteen candidates he stood second.

The assertions of the *Japan Times* relative to the alleged abdication of the Shiogoon having been freely quoted in the leading European journals, Prince Mimbou tayou, the Shiogoon's brother, as well as the Japanese Envoy now in Paris, have authorised a distinct denial that there is any truth in the rumour. It is unfortunate that the *Japan Times* should have so confidently put forth a statement of such importance without being able to give undeniable authority, or some tangible proof of its accuracy. The persistent manner in which the only two Japan papers contradict one another on every point is most confusing. Coming events sometimes cast their shadows before, and the assertions of the *Times* may in the end be justified; in the meanwhile this official denial must be allowed to have some weight.

The ironclad ram *Stonewall*, which was transferred by the United States Government to that of Japan, as compensation for the frauds practised on the latter by certain American citizens, has left Fortress Monroe for her destination, and reached Barbadoes after a passage of nine days. Her commander reports that she behaved very well at sea, although some very rough weather was encountered.

The *Gazette* of the 18th instant contains a notification that the Queen has been pleased to appoint Lieutenant-Colonel Roland Macpherson, R.A., to be Colonial Secretary for the

Digitized by Google

Straits Settlements. Her Majesty has also appointed the Hon. James Terrence Fitzmaurice to be Inspector of Prisons in the Island of Ceylon.

The *London Gazette* contains the official notification of Mr. Pope Hennessy's appointment as Her Majesty's Consul-General in Borneo. A recent telegram from Egypt mentions the presence of Mr. Pope Hennessy at a review, by the Viceroy, of the Egyptian troops that recently returned from Candia.

Mr. Seward, the Consul-General for the United States at Shanghai, has arrived in London from New York, and will we understand proceed to his post *via* Suez early in December.

A STORM IN A TEA-CUP.

(PALL MALL GAZETTE.)

A rather melancholy view of British dominion in Asia is presented in an ill-printed little pamphlet of twenty-two pages which lies before us. This unwelcome production bears no publisher's imprint. It is entitled "Papers Relative to the Proposed Establishment of Licensed Public Gambling Houses. Printed by De Souza and Co." Elsewhere we gather that it was published in Hong Kong, and was printed for the information of the people of that British colony and of England. Premising that a reckless and incorrigible love of gambling has possession of the Chinese population of Hong Kong, and that the Europeans are factiously divided between those who would and those who would not license gambling, the story it has to tell is as follows:—

On the 10th of March, 1866, Sir Richard Graves MacDonnell, Knight, C.B., arrived at Hong Kong to assume the Governorship of the colony. On the 25th of July following, at a meeting of the Legislative Council, amongst other new ordinances read for the first time was one entitled "The Order and Cleanliness Ordinance," the last clause of which ran as follows:

"And whereas the evils of gambling in the colony are found to be on the increase, notwithstanding the application of the penal laws in force for their prevention, and it is expedient to devise and adopt further measures for the gradual control and ultimate suppression thereof; be it therefore enacted that it shall be lawful for the Governor in Council from time to time to frame and pass such rules, regulations, and conditions as may be deemed expedient for the total suppression, or in the meanwhile for the better limitation and control, of gambling in this colony, with power from time to time to alter and amend such rules and regulations, or repeal the same or any part thereof."

This was understood to mean that the Governor was decidedly against the licensing of gambling houses. Great, therefore, was the astonishment of the non-licencers when the *Daily Press* of July 10, 1867, published a long article declaring that the Governor's policy after all was for licensing. This article is reprinted at length in the pamphlet before us, with all the more powerful bits of denunciation printed in italic. Without detailing the matter of this article, which in its literary aspect is very like colonial journalism generally when it is wrathful, we may briefly note its more remarkable features. It argues strongly in favour of the licensing of public gambling houses in Hong Kong and the making of "the darling sin" legal, under certain penalties to the floating Chinese population of 140,000, since they will gamble whether or no.

"The humblest class of itinerant hawkers," says the writer, "are frequently in the habit of gambling with their customers for the change out of a purchase amounting to a few cash," which certainly seems to be a strong example of the length to which the passion may be carried, only we should remember that in our own land there used to exist, not long ago, a hawker of pastry who always left it to his customer to "toss or buy." However, that is by no means the worst phase of the present state of things in Hong Kong. The great temptations held out by proprietors of illegal "hells" in Hong Kong to corrupt officials engaged in discovering and suppressing them have resulted in the utter demoralisation of the force so employed.

"The purity and honour of the police have been sacrificed, and the lower class of the Chinese population in the colony has been kept in a perpetual state of warfare with the authorities by the raids the police have made on the illicit gambling houses, their respect for the law being in this way undermined. In such ways, harassed by its gambling subjects, and deserted by its servants in the pay of the gamblers, the Government have resolved to legalise what it finds it cannot suppress by lawful means. Licensed gambling houses will, we believe, be shortly—say within the next six weeks—introduced in Hong Kong."

The appearance of this article in the *Daily Press* roused the non-licensing party to a clearer sense of the state of affairs. A deputation consisting of three missionaries immediately sought and obtained an interview with the backsliding Governor. What took place at this interview—what special arguments were employed by Sir Richard MacDonnell and the missionaries for and against the licensing system—do not appear in the pamphlet. That the pleadings of the deputation, however, were not very successful is tolerably certain from a letter which was despatched to his Excellency soon after. This letter is published in the pamphlet, and both its matter and tone go some way, perhaps, in explaining *why* the missionaries failed in converting Sir Richard to their opinions. Beginning with thanking his Excellency for listening to their arguments a day or two previously, they set forth their "reasons" for protesting against the licensing scheme in the following manner:—

1. Because it has been introduced in an underhand and un-English way. It looks as if every care had been taken to blindfold the public on this subject. There has been no opportunity of eliciting the public opinion here; no opportunity of memorialising the Home Government in opposition to it.

2. Because licensing gambling houses will certainly lead to a large increase of gambling.

3. Because licensing gambling houses will never lead to the "ultimate suppression" of the vice. To pretend the contrary would be the most barefaced hypocrisy.

4. We believe that a large proportion of the Chinese population of this place are opposed to this measure. Its introduction will have a seriously demoralising effect on the Chinese resident in the colony.

5. Gambling is at present equally illegal by British and by Chinese law, in every part of the two empires. Only last year the Governor of Canton took stringent measures for the suppression of gambling in that city. The proposed measure will degrade both our civilisation and our Christianity in the eyes of the Chinese people.

6. We believe that the Government has no right to countenance and sanction vice.

The memorialists conclude by assuring his excellency that their party will take every possible measure, both in Hong Kong and in England, to upset his plans.

Sir Richard replies at considerable length. He has not, he says, come to the conclusion that the licensing of gambling houses in the colony is the only way of checking the present frightful state of things without giving the whole subject the best consideration and advising with some of the best authorities in the matter. The memorialists had assailed his conclusions, but left his arguments unanswered, and had no scheme to propose in lieu of the policy the Government proposed to try. He denied most emphatically the accusations contained in "reason" 1. He says:—

"The ordinance of last year, like that of the present, contemplated, if possible, the suppression, and, failing that, the limitation and control of gambling. The Governor had then hopes that by increased exertions gambling could be put down, hopes which, after the greatest personal efforts, aided by equal exertions on the part of several officers of the police, he has been obliged to abandon, as he found the attempt only led to the continued corruption of the police, on whose efficiency the security of the lives and property of the community mainly depends. Those efforts, moreover, drove the incorrigible and numerous Chinese gamblers of the colony to resort to secret lairs, to live in a perpetual defiance of the law, and thus established numerous rendezvous of the worst classes, where nine-tenths of the burglaries and daring crimes perpetrated were planned. The Governor believes that under the new policy there will be more gaming, but by removal of its illegality, the consequences will be far less pernicious to individuals or the public than its present more limited practice. One system has been tried and failed. Therefore, another is now about to be tried. Should it also fail, the Governor has reserved complete powers to terminate the experiment at a moment's notice.

In some "Comments upon his Excellency's Reply" the memorialists (who are the publishers of the "Papers") complain that Sir Richard does not attempt to reply to objections 3, 4, and 5, and that objection 2 he in effect admits. And as to a remark of his Excellency's that even the regulation of houses of sin of a deeper dye has been found most beneficial, the memorialists observe, "His Excellency is unable to see the distinction between licensing brothels and licensing gambling houses. We do not see the need of imitating Sir Richard in avoiding ugly words by elegant circumlocution. The licensing of brothels we do not care to defend, nor will we hastily condemn it, not understanding the disgusting subject." For the rest, they stick resolutely to their own view of the matter, and quote Sir Richard himself in proof of its superior wisdom and morality. They say, "Sir Richard admitted to the three missionaries who waited on him that if he could only get a sufficient number of London policemen he would be able to suppress illegal gambling without resorting to the licensing system."

The pamphlet concludes by remarking that "the matter is in a very curious predicament." Very curious, and very edifying, no doubt. Further comment is at present, perhaps, uncalled for.

OVER SPECULATION.

The following is from a leading article in the *Liverpool Albion*, on the reckless career of speculation which has led to the present unsound state of trade in that town, and especially with reference to the recent failure of Messrs. Colin Campbell and Co., and the legal proceedings now pending against the head of that firm:—

"No local event of the past twenty years has caused more talk in Liverpool than the proceedings before Mr. Raffles and Mr. Brancker, in the Police-court, last week. That a member of one of the most eminent firms in energetic and wealthy Liverpool—the member of a family holding a high social position in the town—should be charged with acts which, if proved, would give him a sad notoriety, is sufficient cause for the interest excited by the hearing of the cases under the five summonses, charging him with having obtained about £30,000 from the National Bank of Liverpool by fraudulent pretences. Until the whole of the facts have been laid before a jury and a verdict has been pronounced, or until there has been a conclusive ruling by one of Her Majesty's judges on the points of law bearing upon the arrangement between the defendant and the bank, upon which the prosecutions are founded, we shall refrain from committing ourselves to any expression of opinion in prejudgment of the case. It is surrounded by fine questions depending upon commercial usage and the interpretation of what may be challenged as an obscurely drawn agreement; but sufficient evidence has been adduced to relieve the bench from any other course than that which they adoptod—a *prima facie* case being abundantly established—and to justify them in sending the defendant for trial at the approaching winter assizes. The evidence has exhibited something more. It has lifted the veil which had but partially hidden that mad system of cotton speculation, that feverish pursuit of fabulous fortune, too often ending in stupendous ruin, which was inaugurated by the scarcity of cotton during the American war. It is this dream of sudden wealth which has been as an *ignis fatuus* after which men rush with a speed which wrests the reins from the grasp of judgment, and impels to a headlong rush to commercial disaster. It has brought into the Liverpool cotton trade a number of needy adventurers, many of whom have been able to plunder the banks, and to manipulate large advances from their brokers, whom they have finally left to make the best of depreciated securities. The extent of the immense speculative transactions that have taken place in cotton in Liverpool since the American war, and the large sums of money which have been lost by an over-san-

Digitized by Google

guine belief that cotton would still be the grand alchymist, and create the golden change expected by its devotees, will never be known. To give even a reasonable estimate of the money sunk by banks and brokers in this huge pit of ruin would surpass belief. We shall not essay the task; but we seize this moment, when the attention of men on 'Change is arrested by the misfortunes of an old-standing firm, and by charges of so serious a nature arising out of one mode of conducting financial operations, to warn the whole trading community of this great town against a system lax in its principles, fraught with danger to those who allow themselves to be drawn within its treacherous toils, and altogether subversive of that healthy tone of morality which is the surest and most reliable guide to commercial men. Great and undue speculations founded on an infatuation which appears to possess most of those who deal in cotton—transactions which, by their nature and magnitude, are far removed from the sphere of legitimate and sound business—may turn out all right, but when once entered upon they carry their victims into a maelstrom, out of which it is impossible to extricate themselves when beset by long-continued depressions of the market. Then with losses comes failure of principle—the beginning of a demoralisation which makes questionable means justify the all-hoped-for end of security from disaster. It is no new thing to preach that there is something nobler than wealth, that it is worse to lose honour than fortune; but this bright axiom is so often disregarded that its enforcement becomes a frequent duty. Without reflecting upon the case that has suggested these remarks, it is a matter for regret that in Liverpool there should be danger of a time arriving when great commercial men's words will cease to be as good as their bond. That there is sufficient ground for this homily of censure is beyond doubt; but there is a fine leaven of honour still on the Liverpool flags. Many failures have occurred to firms who have been simply unfortunate; and it is to the credit of Liverpool that the large firms have borne their losses without indulging in the expression of hard feeling against those by whom they have suffered heavily; for though the cases of failure have been numerous, very few have come before the public. It is the infatuated speculator who is the cause of the mischief, and him we caution against pursuing a Procrustean policy which, while ultimately ruining himself, involves better men than he in his misfortunes. This has been so time and again, and so will continue, until the lesson which Liverpool is being taught shall have brought about its own severe cure, when, the period of ruin having ceased, trade shall resume its empire upon a sounder, and that must be upon a less speculative basis. Not only will the lesson be taught to Liverpool, but to every other large commercial community in England, from each of which many examples may be drawn showing that none are entirely innocent of practices which, just now, they are denouncing as peculiar to Liverpool. There is an Augæan stable in every city.

THE BRINDISI ROUTE.*

(THE TIMES.)

There is a hitch somewhere about the projected transmission of the Overland Mail through Italy, and it is highly desirable that the world should know who it is that stops the way. Our readers are fully aware of the importance of this question. The Overland Mail from England to India travels now across France from Calais to Marseilles, where it is embarked for Alexandria. It is proposed to convey it from Calais to Brindisi, across the Alps, and throughout the Italian Peninsula. The distance from London to Alexandria *via* Marseilles is 2,532 English miles; *via* Brindisi it is only 2,455 miles—*i.e.*, shorter by 77 miles. But it has this additional advantage, that it reduces the sea voyage nearly by half, substituting in its stead a railway journey, by which it is practicable to proceed at more than twice the speed. From London to Calais, Paris, and Mâcon, over a distance of 590 miles, the two routes are one and the same. At Mâcon they branch off. The French route, after a 263 miles' land journey from Mâcon to Marseilles, leads by a long navigation of 1,683 English miles through the Gulf of Lyons and round the Italian islands to the eastern shores of the Mediterranean; the Italian route from Mâcon strikes across the Savoy Alps at Mont Cenis, and reaches the same goal in the Levant by a land journey of 914 miles over Turin, Bologna, Ancona, and Brindisi, and a sea voyage of 955 miles from the last-named port, at the mouth of the Adriatic, in a direct line to the city of the Delta. Independently of the great superiority of railway travelling over steam navigation in everything that concerns safety, punctuality, and comfort, the Italian line offers the inestimable advantage of saving rather more than 35 hours in the total distance between London and Alexandria—a gain which will be raised to 39 hours on the Summit Railway over Mont Cenis, now completed, coming into full operation, and which will further extend to 43 hours by the time the Great Tunnel across the same mountain pass is finished, for which achievement the year 1871 has been assigned as the probable date.

In an age which shows so praiseworthy an impatience of obstructions of every kind it is natural that questions should arise as to where lies the obstacle in the way of so desirable a consummation. Who is it that has anything to gain by thwarting the conveyance of the Overland Mail by what is so evidently the preferrable route? It is certainly not England, whose postal service and whose passengers would be sure of a saving both in time and money. It ought not to be Italy, who always looked to the chance of becoming the great highway between the East and West as one of the main material advantages likely to result from her political unification. Yet, strange to say, the blame has lately been laid on the Italian Government with an assurance and persistency which seems scarcely rational, and which, we believe, may be proved to be utterly unfounded.

The task of the Italian Government in the furtherance of this enterprise begins at the foot of the Alps, at Susa, and ends at Brindisi; for, as to the maritime service between that extreme point of the Peninsula and Egypt, England could, and most certainly would, for her own sake, make up for any shortcoming on the part of Italy. For what concerns the transit of the Peninsula from end to end all that was required was that a serviceable line of railway communication should be established and kept up in the best order. With respect to Brindisi it was necessary that its harbour should be made practicable for steamers suitable to the Levant trade. With an earnestness and activity above all praise, and by dint of enormous sacrifices, the Italian Government has been for the last six years attending to both duties. The report published in July, 1866, by Captain Tyler—the distinguished officer deputed by the authorities at our General Post-office, ane at the express request of the Italian Government, to inspect those works—seems altogether decisive as to the satisfactory condition both of the railway line and of the harbour at the time of his visit; and there has been no remissness in the exertions of the Italian Government since that time. Express trains have been running all along the line, merely in anticipation of the Overland Mail Service, and in excess of any requirement of the usual traffic of the country. The Government, however, professes itself ready to establish a special train at still greater speed, and even to construct a second line of rails all along the line, the moment the choice of the Brindisi route for the conveyance of the Mail is positively resolved upon. Even with one line of rails, however, the special train would meet with no obstruction whatever, as the unfrequency of the ordinary trains, and the excellent service of the telegraph all along the line, would enable the administration to keep the way thoroughly clear for the safe and speedy accommodation of the Mail.

The only serious difficulty in the way of the establishment of this important line of communication arises from the conflicting interests of the French Railway and Steam Navigation Companies. The Overland Mail must needs travel over two-thirds of the length of the French territory, and it is natural that both those companies and the Government, intent upon the promotion of their prosperity, should wish the mail to follow its course through the whole of their country. Not only is it an advantage to the French railways that the mail should be kept to its old route as far as Marseilles, but it is still more important that it should there be shipped, and made to pursue its journey by means of the steamers of the Imperial Messageries. To secure this object as long as possible, the French postal service has been so contrived that the English mails leaving for Italy in the evening are detained in Paris for above thirteen hours. They leave here at 8.30 P.M., and arrive in Paris at 7.20 A.M., and there are made to wait till the evening at 8.40. Besides this first hindrance, several precious hours are lost in the journey between Macon and Culoz, and still more from this latter place to St. Michel de Maurienne, at the foot of Mont Cenis. This Savoy line, which bears the name Victor Emmanuel, and was originally a Sardinian or Italian enterprise, has lately been purchased by the French "Paris, Lyons, and Mediterranean Company;" it has thus been altogether withdrawn from Italian control, and made subservient to French general interests, and to those of the railway company above-named in particular. This company has thus the means of thwarting the progress of the overland mail on its way to Italy almost at every step from Paris to the Alps, and it is impossible to deny that it has used its advantage so as to secure the monopoly of our Eastern traffic to this day. If this is, as we truly believe, a correct statement of the case, we shall not be much moved by the hints which have lately been thrown out, especially in France, as to the delays occasioned in the furtherance of this enterprise by the sluggishness of the Italian Government. Whatever negligence they might be supposed to have shown in this matter hitherto, owing to the political and financial difficulties by which they have been and are beset, we must take it for granted that they are sufficiently alive to the interests of their country to be willing to go hand in hand with us in a matter which concerns them far more than ourselves. The evidence of Captain Tyler, besides, goes far to prove that south of the Alps everything was sufficiently advanced for the opening of the line more than eighteen months ago. It is time, at all events, that full light should be thrown on the subject, and to no authority could we look with more confidence for information than to our General Post-office, where the scheme of the contemplated change in the conveyance of the Mail received its first impulse. The utmost hindrance that the present arrangements of the French trains may raise against the progress of the Mail cannot be computed at more than 18 hours, still allowing from 17 to 21 hours in favour of the Italian route, even with the means which the diligence or the Summit Railway already places at our disposal, and previous to the termination of the Mont Cenis Tunnel. The gain which it is already in our power to secure ought to determine us at once to the change, even were we to suppose that the French companies and Government could never be made aware of the futility, to say nothing of the illiberality, of further obstruction. It will, however, be impossible for them to hold out against that law of progress which, for all practical purposes, makes the highways of one country the common property of all other countries. No mere local interest, no national jealousy, no social or political contrivance can long make head against the force of a geographical necessity.

* To obtain a correct impression regarding the advantages and difficulties of the Brindisi route the reader should compare this with an article that appeared in our issue of the 12th September.

THE SUEZ CANAL.

(THE TIMES.)

We do not know what to make of M. de Lesseps and the Suez Canal. On the Continent the loan of £4,000,000 necessary to the completion of the work is said to be filled up. In this country his agents apply for subscriptions. By this time we thought that the great enterprise was to be achieved without us; but an opening is still made for us to come in for the crowning work. The shares of the Suez Canal are offered to us with the persistence with which the Sibylline books were laid before the old Roman king. The number of the sacred volumes has dwindled from nine to six, from six to three, still the weird old woman gives no sign of abating her demand, and still she reckons upon a purchaser.

We do not know how many of our people may be willing to avail themselves of the opportunity. There are three different points of view from which a public undertaking may be considered—the mercantile, the philanthropic, and the poetical. We may be called upon to join in the pursuit of a remunerative object, or of a useful, or simply of a great and beautiful one. Love of gain or impulse of charity may fail to move us; still we may be induced to open our purses, as certain nations are said to be willing to go to war, "for an idea." The opening of a ship Canal across the Isthmus of Suez was a sublime conception; so was that of a railway tunnel through the Alps; so would be that of a

Digitized by Google

tubular bridge from Dover to Calais; so a company of steam balloons to the moon. Now, there were persons in this country to whom M. de Lesseps' transcendent scheme appeared as chimerical as that of aerial navigation. There were others to whom, however materially feasible, the enterprise seemed, like the great tube across the Channel, to require means inadequate to the end; others, finally, thought that, however desirable and eventually profitable, the achievement, like that of the Mont Cenis Tunnel, would be conducive to other than English interests. There was a fixed idea in England, partly arising from vague instinct, but partly also grounded on the authority of competent judges, that the projected Canal either could not be done at all, or only at such enormous cost as to preclude all possibilty of its returns in any manner compensating the outlay for years, if not for centuries. Taking even the expense on M. de Lesseps' own estimate, and making the amplest allowance for the average number and tonnage of the vessels that could avail themselves of the Canal, it seemed demonstrated that the capital invested would never yield anything like a fair interest, except by the imposition of such heavy tolls as would drive most vessels to their old route round the Cape, and thus defeat the purpose of the enterprise. And it seems so evident that M. de Lesseps himself had no great reliance on arguments drawn from mere maritime statistics that he strove to recommend the scheme as a vast landed speculation. Now, there is no doubt that whenever a line of communication is constructed the adjoining land may become valuable for a variety of purposes; but the essential condition is that the road or railroad should be finished as well as commenced; that it should be open and safe from all chances of ever closing again; for it is the thoroughfare that must keep the inn, not the inn that can to any extent contribute to the support of the thoroughfare.

In the same breath as the project of the Suez Canal was proposed as a profitable investment to English captitalists it was also described on the Continent as an achievement fraught with signal advantages to the countries bordering on the Mediterranean, and consequently with detriment to the nations inhabiting the north-eastern coasts of the Atlantic, and especially to England. England was thus invited to supply the means of cutting her own throat—to bear a hand in a work which was to end in her own ruin. Such considerations, however, had no great weight either way. Had the Canal been looked upon as a paying concern, the Money Market would not have been greatly swayed by patriotic feelings. Speculation, like *la politique*, "*n'a point d'entrailles*," and there never was an instance in which England's enemies could not command the purses of some of England's children. And, on the other hand, it was difficult for the English to conceive that any new road could be opened in which English enterprise should not be as foremost in the race as it ever was in the old ones. Whatever nation took upon itself the cutting of the Suez Canal, England would be sure to derive as great a benefit from its accomplishment as any of her neighbours, or "she would know the reason why." But precisely because the Mediterranean nations so fondly looked upon the Suez Canal as their own monopoly, and because, mere advantages of geographical position being considered, so it might undeniably have been, England thought that the work, if it was to be done at all, should fall to the lot of those who fancied themselves, and might be in reality, most immediately concerned in its success; just as in her turn she wasted not only large treasures, but also infinitely more precious lives, in the search of the North-West Passage, the discovery of which, had it ever been made, and had it turned out of any practical use, would have been a triumph not only for the trade of England, but for that of the whole world. It is impossible for us to look upon the Suez Canal otherwise than as we do on the boring of the Mont Cenis Tunnel. When direct railway communication between Calais and Ancona or Brindisi shall be established, we shall probably be as great gainers by it as either the French or the Italians, but it is not the less just and reasonable that every nation should bear the burden of what, in the equitable distribution of man's labour upon earth, naturally falls to its respective share, and that one should lend the other only such co-operation as it may deem it worth its while to contribute. It was owing to this positive and, as M. de Lesseps may perhaps feel inclined to call it, "grovelling" bias of the English trading mind that the Suez Canal shares never evinced any peculiar buoyancy on the Stock Exchange. We were always loth to dig in or build on the sand. We fancied we descried wildness in the scheme, vagueness in the estimate, looseness in the accounts. The enterprise seemed to begin and end with one man; it offered less of substance and responsibility than suited our ordinary business habits. We did not forget that the date originally appointed for the opening of the Canal was the year 1861, and we saw it put off by two, by four, by six, and even by eight years, till "hope deferred made the heart sick," and we thought we might have to resign ourselves to indefinite postponement. It might have been expected that M. de Lesseps, disgusted with our stubborn scepticism, so strikingly contrasting with the full faith which he inspires everywhere on the Continent, would turn from us in disgust, and seek anywhere rather than in England the soil best adapted to the growth of his ideas. He was well aware that anywhere out of England, wherever private enterprise and spirit of association fall short of their aims, the Government is ready to come to the rescue. So long as not only the people, but also the rulers of France and Italy, Greece and Spain, were with M. de Lesseps, we should have thought that it could matter but little whether England was for or against him. It was not without surprise, therefore, that we heard of the application of M. de Lesseps, or of his London agents in his name, for subscriptions in England to the amount of £4,000,000 effective, or £6,500,000 nominal. Such a move on the part of the projectors of the Canal might have encouraged a suspicion that either the confidence or the means of the Continent were exhausted, and that, to use a common expression, the enterprise was "on its last legs."

We are convinced that English capitalists are well able to take care of their own interests, and we shall not, therefore, waste words either in warning them against or in recommending to them the undertaking. The Suez Canal is a magnificent scheme, well worth the favour and encouragement of all those who think that "virtue should be its own reward." Were it to turn out a geographical success, its failure as a stockjobbing operation might be lightly thought of. Great unforeseen future results might make up for present sacrifices, and the loss of individuals might turn out the world's gain. To men for whom no speculation has any interest unless it partakes of the nature of gambling, the Suez Canal must possess irresistible attraction. After so many years of inquiry, after such long, learned and more or less impartial dissertations *pro* and *contra*, the subject is still involved in all that beautiful obscurity which gave it its main interest at the outset. That the Suez Canal may be finished is what we all wish; but it is what few, if any of us, can even now confidently assert. But whether or not it will pay is a question which this fresh application for English funds ought to solve to every man's satisfaction.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Oct. 15.

The Second Chamber of the States-General will not meet again before November 15 for the despatch of business. The reports of the sections were not very favourable to the Ministry, especially that upon the Marine Department. The Minister proclaimed last year the urgent necessity of building monitors and ironclads, whilst he now declares that he has no intention to execute the plans.

Among the Bills that have been laid before the Chamber appears that upon the reorganisation of the Dutch army. From this Bill it appears that the Minister proposes to fix the maximum of the army at 70,000 men, and to obtain this number by means of an annual contingent of 14,000, so that a reinforcement of 15,000 men will be obtained in five years. Above this number 3,000 militia are to be recruited for the marine. This measure will cost for the first year 270,000f. Important alterations are proposed also with regard to the exoneration. Till now all young men being only sons in any family were free, but in future this measure will be restricted to those who have no sisters and whose parents are still alive. The minor number of the brothers are thus free by the new Act, instead of the major number, as prescribed by the law of 1861. Those who have drawn a bad number can only be replaced by healthy young men fit for the service, and not younger than 21 nor older than 25 years. But this substitution has no effect with regard to the liberation of the minor number. The young men, however, who are paid for substituting, are placed, with regard to their family, in the same condition as if they had been incorporated in consequence of having drawn a bad number. In order to render the military service more attractive, young men henceforth may choose the corps in which they wish to be enlisted, whilst they will be free to live outside the caternes. This last proposal has created a good deal of indignation, and it is fervently wished by the public that this Bill may be rejected by the Second Chamber. And indeed the law of 1861 is already severe enough for a country that dislikes nothing more than the idea of becoming a military State.

On the morning of the 8th inst. the brother of the Shiogoon of Japan visited the town of Maestricht, to inspect the hardware works of Mr. P. Regout. On the evening of the same day he started for Aix-la-Chapelle.

Rumours are circulated to the effect that steps will be taken by our Government to obtain the recognition of the neutrality of the Netherlands by the European Powers, and to form a league between Belgium, Luxembourg, and Holland. These rumours, however, are thought to be without foundation. It is at the same time very strange that they are set in circulation, just as the Budgets are laid before the members of Parliament. You will remember that last year the Luxembourg question came also on the *tapis* when the Budgets were brought forward, and that Mr. van Zuylen used this question as a means of intimidation.

According to the Belgian papers Belgium insists upon France, Prussia, and England entering again into the Scheldt question by issuing an international commission of engineers. It is certain, however, that these steps will have no success, even if they are taken. In the meantime the works are progressing, and in a short time will be finished. Mr. Dujardin, the Ambassador of Belgium, but who is now appointed to represent that State at the Court of St. James, will not start for London until the end of October; in the meantime he will place his successor, Mr. de Beaulieu *au fait* with this Scheldt question.

It is said that on the 1st of January next the price of telegrams between places in Holland will be lowered from 50 to 30 cents.

His Majesty the King will be present at the inauguration of the memorial of Mr. Gysbert Karel earl van Hogendorp, which festival will take place here on the 26th inst.

A general promotion in the army took place some days ago.

The Dutch Missionary Society has received since the 1st of January an amount of f.36.206.05½ in donations and gratuities.

SHIPPING.

ARRIVALS.—Oct. 9, at Texel, from Batavia: Caroline; from Samarang: Wyk aan Zee; 12, at Texel, from Batavia: Yokohama, Sophia Koningin der Nederlanden; 13, at Texel, from Batavia: Helena and Henriette; at Brouwershaven, from Batavia: Aegidia and Pauline; at Texel, from Batavia: Bilderdyk, Helena and Henriette, Galilei.

DEPARTURES.—Oct. 10, from Brouwershaven for Batavia: Nieuwe Waterweg II., Triton, Cornelis Wernard Eduard, Batavia; from Texel for Batavia: Kanagawa; 11, from Texel for Singapore: Jacob; for Batavia, H.M. steamer of war, Borneo, Zaanstroom; 12, for Batavia: Petronella; for Macassar: Hollandia, Macassar.

PASSENGERS INWARD.—From Java, per Wyk aan Zee: Messrs. J. Mager and family, A. de la Rambelle and family, C. Mathiew and family, Arendsen, Raat; per Sophia Koningin der Nederlanden: Mr. J. Koorman.

PASSENGERS OUTWARD.—For Java, per Cornelis Wernard Eduard, Mrs. Ross and family, Mrs Mulock Houwer, Misses Heekmeyer and Staatman, two ladies Wynstroom, Messrs. G. A. Stam and family, W. J. G. Stumpf and family, J. Louwerier, C. Loos, A. J. Wolvekamp, Mulock Houwer, W. H. S. van Waning, F. D. Marion, J. Spanjaard, H. J. Hooghwinkel, A. Egli. Per Petronella: Mr. J. Steen. Per Zaanstroom: Messrs. de Does and family, Nagelvoort, A. Holdert and family, Teme-

chelen, Cornets de Groot and family; Machielsen and Franken, Mrs. van der Kemp and child, and de Haan.

The Dutch Trading Company chartered the following ships to convey produce from Java to the following harbours:—

To Rotterdam: Johanna Antonia, Captain G. C. H. Withoff.

To Amsterdam: Maassluis, Captain J. G. Kuchler; Elizabeth and Jacoba, A. H. Zwaneveld.

To Middelburg: Julia, Captain J. J. van Loon.

COMMERCIAL.

Coffee.—The Dutch Trading Company will offer on the 23rd inst. 130,361 b. Java, Menado, and Padang. The market was quiet, but firm. There is some demand for Menado, Demerara, and Cuba sorts, which are very scarce. For Malang there is no demand. The quotation is for good ordinary Java, private import, 36½c. to 37c.

Sugar (Raw).—The market is very firm, and there is but little offered, 1,500 b. Java were sold at Amsterdam at ½f. below the September sale. 805 b. Sourabaya, No. 12¾, damp, ex Maria Catharina, at 30½f.; 489 b. No. 11½, ex Electra, at 28½f.

Rice very firm; the quotation is for Java table rice, 16f. to 17f.; Java 2nd, 12f.; good white, 10f. to 11f.; Sourabaya, 8¼f.; Rangoon, floating, 8½f. offered, but these offers are not accepted.

Spices.—The market remains quiet; nutmegs, No. 1, 95c.; mace D. 115c.; cloves, No. 2, 29c.; pepper firmer at 17c.

Tea.—The result of the sale held by the Dutch Trading Company of 4,108/4 and 107/12 ch. Java was as follows:—

	Chests.		Valuation.	Prices paid.
Boey... ...	... 25/4	—/12 ...	c. 65 to 70 ...	c. 76 to —
Congo Boey ...	... 685/4	—/12 ...	56 to 85 ...	61 to 77

Schin ...	... 73/4	—/8	—/12 ...	60 to — ...	81 to 86
Hysant ...	... 79/4	—/8	—/12 ...	105 to 140 ...	91 to 154
Uxim ...	... 1/4	—/8	24/12 ...	80 to 150 ...	87 to 133
Joosjes (G.B.)	... —/4	8/8	22/12 ...	105 to 120 ...	100 to 117

On the 30th inst. another public sale is to be held here, when 4255/4 and 194/12 chests Congo, 79/4 chests Souchong, and 166/4 chests Pecco, ex Yeavering Bell, which were bought in on the 10th July, will be offered.

Tobacco.—The sale of the 8,541 b. Java has given the following results:—

			Average.
1868 Bales... ...	Blitar	from 25½ to 181c. ...	c75½
906 „	Kotta	18¼ to 102½ ...	50⅛
94 „	FJ	18 to 19 ...	18⅓
403 „	H & A /Blitar ...	50 to 160½ ...	97⅛
7 „	SS	— to 20 ...	—
406 „	JC & HVR ...	28½ to 112½ ...	62½
659 „	KK	22½ to 110½ ...	54¾
519 „	Merayoon	27⅛ to 142½ ...	86⅝
54 „	PA...	29½ to 36 ...	82⅘
300 Baskets ...	Java	10½ to 15 ...	—
1217 Bales... ...	LC...	25 to 105 ...	70½
111 „	X	20 to 52½ ...	40
1360 „	Soekowono ...	10 to 80 ...	29
937 „	F vd P	12 to 107 ...	35⅜

The prices paid for the fine and middling qualities were very high, specially for Blitar; for this mark there was very much demand at 5c. to 100c. above the valuation. The Bezoekie was not of good quality, and therefore the prices were low.

Segars.—The 500 mille Manila of 1866 were but partially sold, and the rest bought in; 2a Cortados were paid with 29¾f. to 31½f.; and 2a Habanos with 30f. to 32f. On the 17th inst. 330 mille 2a Cortados will be offered here.

Miscellaneous.—Japan camphor offered at 80c. without buyers; Cubebs at 30c. Of Cassia Lignea 250 chests were partly sold at 67½c., the rest bought in at 68c.; 250 chests preserved ginger from 60c. to 99c., according to quality. Of Cassia Vera 3,000 b. per Gerredina Wilhelmina and per Bremen were sold at firm prices. The quotation is 42c. to 45c.; Aleum Cassia, 4½f.; Anise oil, 7¾f.; Japan wax, with much demand, firm at 48c. to 60c., according to quality; Vanille low in price; Indiarubber, 125f.; of gum d'amar 274 chests were sold at high prices.

For Rattans the market is dull; 120 piculs were sold per Twee Cornelissen and 193 piculs, ex Hertha.

Indigo.—90 chests were sold at firm prices. Fine quality of Java is very scarce.

Cotton.—With some demand at unaltered prices, and for manufactures the market unchanged.

For Tin the market is dull; 1,500 slabs Banca were sold at 53¾f., and 1,800 slabs do. at 53¼; 200 slabs Billiton at 52¾f.

Money.—The Bank rate of discount is still unaltered, and there is but little demand. General stagnation of business is the prevailing feature in the Stock Exchange. The bad state of the weather, together with the unsettled feeling of affairs in Italy, further tends to weaken prices in tone.

Exchange.—London, 3 mo., f.11.85; 2 mo., f.11.87; short, f.11.90½: Paris, 3 mo., f.47.05; 2 mo., f.47.12½; short, f.47.30; Hamburgh, 3 mo., f.35; 2 mo. f.35.05; short, f.35.20.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, October 14.

The Hydrographical Department at St. Petersburg gives notice that in the course of this last summer two new reefs of rocks have been discovered in the Bay of Amoor by Lieutenant Klykow, of the Imperial Navy, employed on special surveying service. The first has only 11 feet of water, and is 2½ cable lengths, N. 49 deg. E., by compass of the little Islet of Ogbi, and N. 32 deg. W. of the northern end of the Lazarew Peninsula, from which it is 4¾ cable lengths distant. The other is 11 feet under water, and a cable's length to the W. N. W. of the first, whilst between both there is only 4 to 4½ feet water at low tide. They are both buoyed off, and vessels coming in should therefore steer south of them.

The *Irkutzk Government Gazette* states that a fire broke out in the forests of Vershe-Udinsk in March last, when the ground was covered with snow, and the conflagration still continues. The air is so saturated with smoke as to make it difficult to breathe, and the country is as free from all vegetation as the Desert of Gobi. The most melancholy part of the story is that nothing has been done to extinguish the fire, human exertions being unavailing, and it must continue either till put out by a heavy fall of snow, or till it dies out for want of nourishment on reaching some river or rocky mountains.

The final account of the Nijni-Nowgorod fair is of a very gloomy and unfavourable character. At the settling day it was found that there were a great many people in difficulties and unable to meet their engagements. Compromises for debts and protested bills were very numerous. In addition to the failure of Messrs. W——, brothers, for two millions and a-half of roubles (mentioned in a former letter), two others of some magnitude are announced; one a dealer in cloth and cotton goods with liabilities to the amount of a million roubles, the other a fur merchant, for half a million. These losses make a total of 6,400,000 roubles, being half a million more than in the memorable crisis there in 1859, when the great house of P. Alexejews and Sons failed for nearly six millions, dragging after them many others to ruin. None of the present failures are ascribed to fraudulent transactions, but to the force of circumstances and the general depression of trade. The want of a central board is much felt, and it is proposed to petition the Government to create a special separate ministry for trade and industry.

Russia appears to be in earnest with regard to the reform of the tariff. The committee of the St. Petersburg Exchange has officially convened a meeting of the merchants to take into consideration the subject and draw up a statement of their wishes and proposals for the information of the Government. Similar steps have been taken at Moscow and Riga.

The Russian *St. Petersburg Gazette* contains the translation of a decree of the Emperor of China in answer to a humble petition from some high dignitaries of the State who state their belief that the newly-established schools at Peking, in which instruction is given in the European languages, are the real cause of the dreadful drought with which the vengeance of Heaven has visited the vicinity of the metropolis. To this the Emperor replies that the petition of the Mandarins is only empty nonsense, and proves nothing but the unmitigated ignorance of those who signed it.

The brother of the Shiogoon of Japan is travelling through the manufacturing districts of the Rhine Provinces, visiting and inspecting the different industrial establishments, which interest him much. He is expected next week at Berlin, where he will be received and entertained by the Crown Prince, should the king by that time not have returned from Baden-Baden, where he is now sojourning.

The *Trieste Zeitung* announces that M. de Lesseps has telegraphed to the Prefect of Venice to say that the new loan for a hundred millions of francs for the completion of the Suez Canal has been taken, and it is now positive that the new road to the Far East will certainly be opened for general traffic in October, 1870.

On the other hand the French and German financial organs agree in describing the loan as a decided failure, and that out of the 333,000 bonds to be issued, only 60,000 have been taken by enthusiastic shareholders.

Oct. 23.

At Vienna the question of the commercial and diplomatic expedition to the Far East has been again revived, and with renewed energy. Baron von Beust, the Chancellor of the Empire, is stated to be warmly in favour of its execution, and has pledged himself to support it with all his influence, not only in the Ministerial Cabinet, but with the Emperor. The Vienna Chamber of Commerce has placed itself in communication with that at Trieste, and both have drawn up a joint and pressing address to the Government, animadverting at great length on the advantages to be derived from the expedition, and praying that steps may be taken without loss of time to enable the vessels to leave Europe early in the spring. The question has formed the subject of several long Ministerial councils and is still under consideration, but there is good reason to hope that it will receive a favourable and speedy solution. It is added that the Finance Minister has promised to place in the Estimates for next year a sum of money sufficient to defray the expenses of the expedition, the absence of which in this

Digitized by Google

year's Budget was the formal obstacle to its execution and the alleged reason for postponing it.

Last week the third meeting of the directors of the Germanic Lloyd's was held, and for the first time in this city. One of its members, Herr Fr. Harkort, was absent, as his Parliamentary duties required his presence at Berlin. Mr. A. Behn, the president, who was in the chair, regretted that the political questions now agitating Europe had tended considerably to withdraw the public attention from the institution; but he was glad to state that they had received gratifying support from the declaration of adherence and acknowledgment on the part of several foreign insurance companies amongst which were the "Noguntia," at Mayence, the Dusseldorf, the Basel, and the Wurtemberg. District establishments had been opened at Rostock and Liverpool. At Emden, Flensburg, Stettin, Kiel, and Danzig, the publication of the rules and regulations was looked for with great impatience. Many offers for agencies and inspectorships had been received from foreign ports, some of which had been accepted and added to the lists already published. The appearance of the first register of ships was then fixed for the 1st of January next, and was still open for new contributions. A proof copy was submitted to the meeting and unanimously approved. The financial statement was then read and considered highly encouraging. The meeting then terminated with a vote of thanks to the president, for the energy he had displayed, to which might be ascribed the success of the institution.

Great excitement has been caused in Finland by the publication of an Imperial decree ordaining the introduction of the Gregorian calendar to its full extent. The meaning of this step could not at first be understood, as it is well known that Finland, when it was a Swedish province, changed the calendar, and has reckoned by the new style for more than a century. It is now explained that the new decree has simply reference to the festival of Easter, which has hitherto been kept according to the Julian calendar. In the other parts of Russia this is considered as an indication of the intention of the Government to alter the calendar in the rest of the empire, and conform to the new style of dates as used in all other countries of Christendom. It is therefore expected that some fine morning very shortly Russia will be agreeably surprised by the intelligence that the system of old style is to be abandoned and replaced by the new.

COMMERCIAL.

The political complications on the subject of the occupation of Rome have had more influence on the Stock Exchange than in the produce market in this city, which latter continues to exhibit a firm attitude. Cleaned rice has been in considerable request, and full prices are freely paid, the cleaning mills having work enough on their hands to fulfil their engagements for delivery, the period for which expires the end of November. Cassia Lignea in constant demand at former rates. Ginger more demanded and higher prices paid. Pepper is in great favour, and amongst the sales for the week were 5,000 bags of Singapore, partly in loco and partly for arrival, at 3¼ Sch. Bco. per lb. The inactivity of the spelter market remains unchanged, and there are no transactions to report. Prices nominally the same. No alteration in the rate of discount.

SHIPPING.

ARRIVED.—Notos, from Singapore.

Legal.

BANKRUPTCY COURT.—IN RE W. O. YOUNG.—The bankrupt, William Ogston Young, was a shipbroker in Newman's-court, Cornhill, residing at Palace-gardens-terrace, Notting-hill. He came to the court on his own petition on the 25th ult., ascribing his failure to badness of trade. He returns his debts at £24,242. The principal creditors are—Messrs. Gibb and Co., Old Broad-street, £9,260; Messrs. Hall and Co., Aberdeen; £6,270; and Messrs. Matheson, of Lombard-street, £2,240. This was the first sitting under the bankruptcy. Several proofs were admitted, and Mr. Slater, butcher, of High-street, Kensington, was chosen trade assignee. The next sitting will take place on the 5th of December. The death of Mr. Young has since been announced.

BANKRUPTCY COURT.—IN RE KAPARIA.—This was a sitting for examination and discharge. The bankrupt, Jamshedjee Pallonjee Kaparia, commonly called Jamshedjee Pallonjee, was a member of the firm of Dadabhai Naoroji and Co., of 32, Great St. Helen's, and Bombay, and since April, 1856, he had traded in partnership with one Rustonjee Pallonjee Kaparia, as merchants, at 31, Great St. Helen's. His accounts, prepared by Mr. Charles Brown, return the following figues:—Creditors unsecured, £29,513; ditto on separate account, £5,792; claims, £1,975; and liabilities, £8,200; against property surrendered to assignees, £3,000, and balance claimed to be due from the firm of Dadabhai Naoroji and Co., £9.000. Mr. Aldridge appeared for the official assignee and Mr. G. E. Philbrick for the bankrupt. It was stated to the Court that the assets were dependent upon the result of the liquidation of the affairs of a firm at Bombay in which the bankrupt was a partner. The bankrupt had invested £12,000 in the firm of Dadabhai Naoroji and Co., the whole of which he had lost, and he had been compelled to petition the Court in consequence of pressure in regard to a partnership debt. His honour having satisfied himself that notices had been sent to all the creditors at Bombay, and that ample time had elapsed for them to come in and oppose if so advised, granted the order of discharge.

BANKRUPTCY COURT.—IN RE PETERS AND WARBURTON.—The bankrupts were ribbon manufacturers and dealers in trimmings, carrying on business at Coventry and in Cheapside. The adjudication was made on the petition of Mr. Henry Evans, silk broker, Manchester, and the first meeting under the failure was now held. A preliminary statement of affairs, prepared by Mr. H. W. Pettis, shows the following results: Creditors unsecured, £48,975 3s. 4d.,; creditors holding security, £10,000; and liabilities on bills receivable, £56,378 1s. 2d.—making a total liability of no less than £115,353 4s. 6d. Against assets: Book debts about £5,000; stock in trade, £8,000; and surplus expected to become available from property mortgaged, £5,000. Lloyd's Banking Company (Limited) are stated to be creditors for £25,000; and Messrs. Carr and Co., of Coventry, for £20,000. The failure is said to be attributable to losses by bad debts and depression of trade, partly occasioned by the French treaty. Numerous proofs of debts were admitted, and Mr. Henry Evans, silk broker, Manchester, the petitioning creditor, and Mr. Kottgen (of the firm of John Batt and Co., silk merchants, Old Broad-street) were appointed trade assignees. Messrs. Dubois and Maynard, as agents for Mr. Leech, of Derby, are the solicitors under the proceedings. The meeting was also attended by Mr. Lawrance, on behalf of creditors, and by Mr. Davis, of Coventry. It was announced that in addition to the ordinary statement the assignees would require the bankrupts to file a cash account, a profit and loss account, a trading account, an accommodation account, and a special account as from the 1st of January, 1867, of their transactions with Messrs. Chappell and Co., of Coventry. The 19th of December, at twelve, was fixed for the sitting for examination and discharge.

Naval and Military.

The Tamar, iron troop ship, Captain Sullivan, sailed on the 17th from Portsmouth with 22 officers, 644 men, 6 officers' wives, 7 children, 3 female servants, 24 soldiers' wives, 44 children, the troops being under the command of Brevet Major Ord, 2nd Battalion 20th Regiment. The officers are—for St. Helena, Capt. Carey, R.E. For the Cape of Good Hope, Captain Maunsell, 2nd Battalion 11th Regiment; Ensign Kelso, and Staff Assistant Surgeons Knife and Irving. For the Mauritius, Lieutenant Scott, R.E., Captain Pike, and Lieutenant Spence, 86th Regiment. For Penang, Lieutenants Robson and Carre, R.A. The other officers are for Gibraltar, where she will embark a regiment and proceed to the Cape of Good Hope, where another regiment will embark. She will then sail for the Mauritius, returning with a regiment to the Cape. From thence she will go to Japan with the troops ordered there to relieve troops whose period of service has expired.

The Leopard, paddle wheel steam frigate, lately on the China station, having been sold out of the service, was towed to the yard of Messrs. Marshall and Co., in Catwater, Plymouth, to be broken up last week. On her return she was paid off at Devonport, in September, 1866. She was also previously the flag ship of Admiral Sir Stephen Lushington, G.C.B., when commander-in-chief on the south-east coast of America.

Her Majesty's screw troopship Serapis, Captain Soady, has sailed from Portsmouth for Alexandria, on her first turn of duty in the relief of Her Majesty's troops in India. The following officers and troops have embarked:—Colonel G. B. Shakespear, in command of troops on board; Surgeon-Major T. H. Fasson, in medical charge; Captain C. G. W. Lascelles, Captain and Adjutant J. H. P. Anderson, Captain Hon. R. Hare, Lieutenant P. J. Barclay, Lieutenant T. Roberts, Lieutenant H. R. J. Morgan, Lieutenant J. R. S. O. Hersell, Lieutenant G. R. Ellis, Lieutenant W. Arthur, Lieutenant M. A. Macintosh, Quartermaster J. Gibson, 244 non-commissioned officers and men of the 5th brigade Royal Artillery, Mrs. Shakespear, five children, and two servants, Mrs. Anderson and child, Mrs. Roberts and child, Mrs. Gibbs and five children, 24 soldiers' wives and fifty children. Lieutenant-Colonel J. Swinburne, Major A. G. Moore, Major Hon. G. F. Ellis, Surgeon G. D. Smith, Captain W. Chaine, Veterinary-Surgeon F. Sewell, Captain A. T. Jones, Paymaster J. O. Macartney, Captains J. T. Bennyon, F. Hodgkinson, T. Gist; Lieutenant R. Swaine, Lieutenant and Adjutant T. P. Saif, Lieutenants T. L. Beady and T. Martin, Ridingmaster F. Moore, Assistant-Surgeon A. Lewis, Lieutenant H. Gifford, Quartermaster M. Carey, Lieutenants J. L. Swale and A. B. Griffiths; Cornets F. H. Parker, F. Gooch, A. Bibby, G. Williams, N. B. Edmonstone, and J. D. Bland, 19 staff sergeants, one schoolmaster, 39 sergeants, one farrier, 23 corporals, 23 trumpeters, 345 troopers of the 4th (Queen's Own) Hussars; Mrs. Moore, Mrs. Saif, Mrs. Jones and child, Mrs. Marson, Mrs. Gifford and child, Mrs. Carey, 37 soldiers' wives, and 42 soldiers' children. The following officers and detachments also embarked:—Captain Massingberg and 12 men, 5th Hussars; 10 men, 11th Hussars; 11 men, 19th Hussars; Lieutenant M'Arthur, Lieutenant Murphy, 11 men, Royal Engineers; Lieutenants Nolan and Chapman, Mounted Battery R.A.; Lieutenants Sheel, Blake, Crawford, Skinner, Lloyd, Ditmas, and Knox, R.A. Cornet M'Farlane, 2nd Dragoon Guards, Lieutenant Douthwaite and Ensign Gilchrist, 26th Regiment; Ensign Brooke and 126 men, 37th Regiment; Ensign Eytoun and 22 men, 55th Regiment; Lieutenant Samuda and 34 men, 58th Regiment; Lieutenant Gillespie and Ensign Hamilton, 96th Regiment; Ensigns Turner and Tovey, 1st battalion 6th Regiment; 2 men of Indian army, 27 soldiers' wives, and 20 soldiers' children. The ship will sail with a total number of 1,554 people on board, all told.

The United States' squadron, under the command of Admiral D. G. Farragut, comprising the screw frigate Franklin, the screw sloop Ticonderoga, and the paddle yacht tender Frolic, has left Spithead for Plymouth Sound and will proceed to Lisbon in a few days. During the stay of the squadron at Spithead Sir Thomas S. Pasley, Port Admiral at Portsmouth, has placed his steam paddle yacht Fire Queen, Capt. F. Paul, at the exclusive disposal of Admiral Farragut. During the stay of the American squadron at Spithead the Commander-in-Chief of the American navy and his officers have paid visits to every point of interest in the dockyard, to the Excellent gunnery ship, the Waterwitch, hydrulic propelled gun-vessel, and other ships afloat, as well as the more ceremonious visits to the flagship of the Port-Admiral and others of a like character. There has been no ironclad of importance to submit to Admiral Farragut's inspection; but in the Waterwitch the gallant Admiral found a "novelty," and one that yet, by a simple re-arrangment and adjustment of the water-wheel propelling principle, may effect some astonishing results. Admiral Farragut spent upwards of an hour on board the Waterwitch, examining her machinery and the method of her propulsion, the vessel being placed under steam, and at Admiral Farragut's command in steaming between Spithead and the harbour, expressly to afford the gallant Admiral an opportunity for thoroughly inspecting the vessel and her machinery. On board the Excellent, Admiral Farragut had an opportunity of inspecting our adopted system of mounting 12½-ton rifled 9-inch guns on iron carriages and slides for broadside armament. There were numbers of other guns mounted, including the 6½-ton 7-inch rifled, with its iron carriage and slide, 8-inch rifles, 10-inch smooth-bores, 64-pounder rifled Pallisers, and others; but the *prima donna* of the Excellent's "singing birds," as a broadside gun, in the eyes of Admiral Farragut and his officers was evidently the 12½-ton 9-inch rifle. Some very excellent practice was made with shot and shell, and some minor kind of torpedo

Digitized by Google

experiments were exhibited, and concerning which matter Admiral Farragut must be very much more at home than we are ourselves. Before leaving, Admiral Farragut and his chief officers were entertained at dinner on board Her Majesty's ship Victory by Flag-Captain F. B. Seymour, C.B., A.D.C. to the Queen.

Messrs. Maudslay and Sons, of East Greenwich, are engaged in making a number of pontoon rafts, after the system introduced by Capt. Mends, C.B., Director of Transports, and naval aide-de-camp to the Queen, to be attached to the new screw steamships Serapis, Crocodile, Euphrates, Jumna, and Malabar, built for the Indian relief service. One of the rafts marked "Serapis," is now lying at Woolwich for experiments. It consists of four pontoons, and forms a raft 36ft. in length and 26ft. broad, with a movable deck capable of transporting a sub-divisional battery of Royal Artillery across the rivers and lakes to be met with in India. The upper plates are of wrought iron, and those immersed are of steel, strongly united with hammered rivets. To guard against the effect of the spray washing over the raft it is provided with side rails and sail cloth, and is supplied with four oars.

The Nelson, screw line of battle ship, Acting Commander Payne, left Spithead on the 20th, under steam, for Victoria, Australia.

The death of Admiral Lord Fitzhardinge will promote Vice-Admiral Sir H. J. Codrington to be an admiral, Rear-Admiral Charles Frederick to be vice-admiral, and Captain George Sumner Hand, C.B., to be rear-admiral.

The Plover, double-screw gun vessel, 3 guns, 663 tons, 160-horse power of engines, Commander James A. Poland, the first of her class in Her Majesty's Navy placed in commission, has received orders to complete her stores and outfit for a term of service on the West Coast of Africa.

His Prussian Majesty's new armour-plated screw steam-frigate Frederick Carl, Capt. Koller, which was built at Toulon, put into Plymouth Sound on the 22nd. She left Gibraltar on the 17th inst., and on the 20th, when crossing the Bay of Biscay, carried away her fore and main masts. This accident is said to have arisen through various causes. The masts, which were of steel, are said to have been very long, and the wire rigging not sufficiently stout.

Monetary and Commercial.

A meeting of the managers of the East India and China Banks was held at the office of the Oriental Bank Corporation, on the 15th instant, to reconsider the question of the six months' *versus* four months' usance for bills on England. Although no formal resolution to that effect was passed, the unanimous impression was that the position lately adopted by the banks is no longer tenable. The National Bank of India, which joined the compact entered into in July, 1866, then had its head office in India, but has since been reconstructed with head-quarters in London, and since the change has not held itself bound by the agreement. This secession of course exonerates all the other parties, and henceforth the managers will have discretionary power to take six months' paper when they may deem it advisable. Apart from motives arising from the withdrawal of the National Bank, we believe that some of the directors of other banks feel that the attempted restriction is a failure; and, although with much regret, they are compelled to abandon it. As we have before stated, the step was dictated by sound motives for the protection of the India and China trade, and there is no question but that it has already been productive of much good in checking speculations. We consider its withdrawal a mistake, the evil effects of which will be felt by the banks as well as the trade generally.

Telegrams have been received from Calcutta stating that two of the banks there had commenced drawing and buying bills at six months' sight.

At the meeting of the Chartered Bank of India, Australia and China, held on the 16th inst., the chairman, T. A. Mitchell, Esq., stated that in the half-year ended 30th June last no new bad debts had been incurred, that the capital of the bank remained perfectly unimpaired, and that the directors retained entire confidence in the branch managers. He regretted to say that several banks—among others the Chartered Mercantile of India—had decided upon returning to the six months' rate of usance for bills, and this bank would have no alternative but to follow the example. A resolution declaring an interim dividend at the rate of 5 per cent. per annum free of income-tax, and payable on the 23rd inst., was then carried. A suggestion was made by a shareholder that in future the dividend should be announced as soon as decided on by the directors, which was agreed to.

At the meeting of the Oriental Bank, on the 24th, the chairman, Mr. Gordon, announced that, in common with other banks, the directors had decided to revert to the six months' usance for bills. An interim dividend of £1 10s. per share (equivalent to six per cent. for the half-year) was declared. A report of the meeting will be found in another column.

The Hong Kong and Shanghai Banking Corporation have published, in the form of an advertisement, an interesting *resume* of the history of the bank, showing the conditions under which it was originally constituted and the circumstances connected with its subsequent incorporation by special Act of Parliament, as well as a statement of the present position and resources of the undertaking. This step on the part of the directors is a very timely one, the bank having of late attracted much attention owing to the undeniably good management which has carried it not only intact, but prosperous, through a most disastrous era in the China trade. The directors also notify that the Ordinance of Incorporation having received the Royal assent, a London Register of Shares has been established, and shareholders desirous of having their shares transferred from the Hong Kong Register can now do so. Certificates for shares so transferred will be granted, the conversion being effected from dollars into sterling at the rate of 4s. 6d. per dollar, and forms of transfer (according to the Ordinance of Incorporation and Deed of Settlement) can be obtained on application at the office. Full particulars will be found in our advertising columns.

The report of the Singapore Gas Company, to be presented to the meeting of shareholders on the 29th inst., announces that satisfactory progress continues to be made in extending the company's works. Out of the available balance of £898 3s. 7d. a dividend of 7½ per cent. on the preference, and 3 per on the original capital, is recommended.

The bar silver brought by the West India steamer has been disposed of at 60½d., and a limited amount of Mexican dollars by this and by one or two other vessels has been sold at 59½d., in both instances showing an advance of ¼d.

The biddings for £100,000 in bills on India were held on the 16th at the Bank of England, and the whole was allotted on Calcutta. The *minimum* price was fixed, as before, at 1s. 11¼d. on Calcutta and Madras, and tenders at 1s. 11⅜d. on Calcutta will receive about 80 per cent., while those above that price will be allotted in full. No tenders for bills on Bombay were invited. The terms thus obtained show a further slight decline in the demand for means of remittance to the East.

The amount of bullion by the P. and O. Company's steamer *Syria*, from Southampton on the 20th inst., was—In gold, to Aden, £50,000; to Madras, £164; to Calcutta, £20,000; in silver, to Hong Kong, £27,078: total in gold, £70,164; in silver, £27,078.

Manchester advices mention that Mr. James Atherton has retired from the post of chairman of the Union Bank of Manchester, which he has efficiently filled for many years, and that Mr. William Gibb has been appointed his successor.

From Manchester another stoppage is announced, that of Messrs. Braybrooke and Slater, manufacturers, of Blackburn, for about £26,000.

An extraordinary general meeting has been held of the shareholders of the English and American Bank, and a resolution was passed to wind up the estate. This course has been adopted in consequence of the insufficient capital of the association, the shareholders being disinclined to pay any further amount on their shares. The directors, with Mr. Samuel Gray, the manager, were appointed liquidators.

BANK AND MISCELLANEOUS SHARES.

Shares.	Joint-Stock Banks.	Paid.	Prices Oct. 24.
£10	Agra Bank, A shares	6	¼ to 1 pm.
10	Do. B do.	—	7 to 9

EXPORTS TO THE FAR EAST.

The following summary of the export of Cotton Goods from London, Liverpool, Southampton, and the Clyde, to the Far East during the month and ten months ended 16th October, compared with the two previous years, is from Mr. Sam Mendel's monthly tables :—

To Hong Kong and Whampoa.—For the month ended 16th Oct., 1867: Plain Cottons, 7,667,466; Coloured Cottons, 156,430; Printed Cottons, 187,914 yards; Cotton Yarn, 684,140 lbs.; total value of Cotton Goods, £202,018. For the ten months ended 16th Oct., 1867: Plain Cottons, 37,582,546; Coloured Cottons, 1,845,196; Printed Cottons, 655,561 yards; Cotton Yarn, 5,296,794 lbs.; total value of Cotton Goods, £1,285,600. Increase in value for 1867 against 1866, £53,513. For the ten months ended 16th Oct., 1866: Plain Cottons, 31,889,664; Coloured Cottons, 3,541,749; Printed Cottons, 779,840 yards; Cotton Yarn, 3,871,588 lbs.; total value of Cotton Goods, £1,232,087. For the ten months ended 16th Oct., 1865: Plain Cottons, 24,013,364; Coloured Cottons, 2,447,035; Printed Cottons, 352,836 yards; Cotton Yarn, 1,133,600 lbs.; total value of Cotton Goods, £693,917.

To Shanghai.—For the month ended 16th Oct., 1867: Plain Cottons, 22,276,081; Coloured Cottons, 401,336; Printed Cottons, 634,352 yards; Cotton Yarn, 60,000 lbs.; total value of Cotton Goods, £404,510. For the ten months ended 16th Oct., 1867: Plain Cottons, 96,476,604; Coloured Cottons, 8,100,728; Printed Cottons, 4,256,336 yards; Cotton Yarn, 429,232 lbs.; total value of Cotton Goods, £2,150,253. Decrease in value for 1867 against 1866, £369,507. For the ten months ended 16th Oct., 1866: Plain Cottons, 91,644,627; Coloured Cottons, 9,887,019; Printed Cottons, 5,238,178 yards; Cotton Yarn, 68,800 lbs.; total value of Cotton Goods, £2,519,760. For the ten months ended 16th Oct., 1865: Plain Cottons, 62,078,871; Coloured Cottons, 4,317,748; Printed Cottons, 1,725,151 yards; Cotton Yarn, 74,000 lbs.; total value of Cotton Goods, £1,488,833.

To Japan.—For the month ended 16th October, 1867: Plain Cottons, 3,568,970; Coloured Cottons, 384,710; Printed Cottons, 49,600 yards; Cotton Yarn, 425,550 lbs.; total value of Cotton Goods, £102,002. For the ten months ended 16th October, 1867*: Plain Cottons, 16,785,490; Coloured Cottons, 3,093,331; Printed Cottons, 685,902 yards; Cotton Yarn, 2,464,079 lbs.; total value of Cotton Goods, £614,880. Decrease in value for 1867 against 1866, £153,063. For the ten months ended 16th October, 1866: Plain Cottons, 21,049,103; Coloured Cottons, 2,419,874; Printed Cottons, 2,219,431 yards; Cotton Yarn, 1,332,910 lbs.; total value of Cotton Goods, £767,943. For the ten months ended 16th October, 1865: Plain Cottons, 11,684,516; Coloured Cottons, 982,241; Printed Cottons, 990,468 yards; Cotton Yarn, 251,100 lbs.; total value of Cotton Goods, £332,916.

To Singapore and Penang.—For the month ended 16th Oct., 1867: Plain Cottons, 6,475,331; Coloured Cottons, 566,895; Printed Cottons, 185,258 yards; Cotton Yarn, 413,440 lbs.; total value of Cotton Goods, £147,819. For the ten months ended 16th Oct., 1867: Plain Cottons, 51,731,357; Coloured Cottons, 7,638,526; Printed Cottons, 3,698,299 yards; Cotton Yarn, 2,272,293 lbs.; total value of Cotton Goods, £1,434,616. Increase in value for 1867 against 1866, £83,475. For the ten months ended 16th Oct., 1866: Plain Cottons, 41,495,703; Coloured Cottons, 6,413,360; Printed Cottons, 3,843,778 yards; Cotton Yarn, 1,443,477 lbs.; total value of Cotton Goods, £1,351,141. For the ten months ended 16th Oct., 1865; Plain Cottons, 28,409,664; Coloured Cottons, 4,590,467; Printed Cottons, 1,612,876 yards; Cotton Yarn, 1,055,885 lbs.; total value of Cotton Goods, £810,745.

To Batavia.—For the month ended 16th October, 1867: Plain Cottons, 859,960; Coloured Cottons, 264,780; Printed Cottons, 583,156 yards; Cotton Yarn, 29,200 lbs.; total value of Cotton Goods, £37,750. For the ten months ended 16th October, 1867: Plain Cottons, 15,067,679; Coloured Cottons, 11,316,284; Printed Cottons 11,971,160 yards; Cotton Yarn, 497,565 lbs.; total value of Cotton Goods, £916,071. Decrease in value for 1867 against 1866, £200,632. For the ten months ended 16th October, 1866: Plain Cottons, 27,072,804; Coloured Cottons, 9,406,797; Printed Cottons, 7,964,761 yards; Cotton Yarn, 539,986 lbs.; total value of Cotton Goods, £1,116,703. For the ten months ended 16th October, 1865: Plain Cottons, 12,470,958; Coloured Cottons, 4,219,200; Printed Cottons, 6,054,824 yards; Cotton Yarn, 446,600 lbs.: total value of Cotton Goods, £546,237.

To Manila.—For the month ended 16th October, 1867: Plain Cottons, 3,315,724; Coloured Cottons, 1,067,328; Printed Cottons, 22,230 yards; Cotton Yarn, 28,800 lbs.; total value of Cotton Goods, £88,676. For the ten months ended 16th October, 1867: Plain Cottons, 15,472,648; Coloured Cottons, 13,604,813; Printed Cottons, 768,424 yards; Cotton Yarn, 163,426 lbs.; total value of Cotton Goods £719,278. Increase in value for 1867 against 1866, £190,758. For the ten months ended 16th October, 1866: Plain Cottons, 8,096,930; Coloured Cottons, 11,202,146; Printed Cottons, 512,165 yards; Cotton Yarn, 48,548 lbs.; total value of Cotton Goods, £528,520. For the ten months ended 16th October, 1865: Plain Cottons, 10,759,287; Coloured Cottons, 11,077,730; Printed Cottons, 951,752 yards; Cotton Yarn, 91,852 lbs.; total value of Cotton Goods, £546,195.

To Ceylon.—For the month ended 16th October, 1867: Plain Cottons, 1,627,887; Coloured Cottons, 15,648; Printed Cottons, 29,332 yards; Cotton Yarn, 30,000 lbs.; total value of Cotton Goods, £31,266. For the ten months ended 16th October, 1867: Plain Cottons, 14,047,859; Coloured Cottons, 1,084,708; Printed Cottons, 1,988,122 yards; Cotton Yarn, 215,235 lbs.; total value of Cotton Goods, £393,572. Decrease in value for 1867 against 1866, £216,855. For the ten months ended 16th October, 1866: Plain Cottons, 15,182,591; Coloured Cottons, 1,406,001; Printed Cottons, 3,915,972 yards; Cotton Yarn, 762,022 lbs.; total value of Cotton Goods, £610,427. For the ten months ended 16th October, 1865: Plain Cottons, 8,138,450; Coloured Cottons, 1,073,710; Printed Cottons, 1,040,032 yards; Cotton Yarn, 218,690 lbs.; total value of Cotton Goods, £277,249.

* These totals do not include the Cotton Goods shipped by the steamer Hiogo, which are lost in the wreck of that vessel.

ARTICLES OF IMPORT.

Tea.—From the late arrivals considerable sales have been made, the exporters taking several of the finest chops of Moning and Wopak, ex Eliza Shaw, Gossamer, Challenger, and Ada, at 2s. 4d. to 2s. 8d., whilst the trade have continued to select the qualities most suitable for home use, both of the Kaisow and Moning kinds. In old season's teas business has been very limited. Congous: Siftings show no alteration either in the demand or price. Broken-leaf kinds continue in request up to 11d. per lb. Fair to good common have met with rather more inquiry at from 11½d. to 11⅝d. per lb. Fair to good flavory kinds, of old import, show no improvement prices ruling very low. In new season's common to fair Kaisows have sold at public auction, without reserve, at from 1s. 1d. to 1s. 5d., showing a decline of 1d. to 2d. per lb., good from 1s. 6d. to 1s. 8d. are also rather lower, but above this price there is a fair demand, and prices have been fully maintained, though the extra fine chops have not been quite so readily taken. There has been less demand for Pak Lins, and prices show some reaction. Common to fair black-leafs of old import show no material change; good qualities have been slightly firmer. Of new the arrivals have been considerable, and sales made to some extent at from 1s. 7d to 1s. 10d. per lb. for fair to good, 1s. 11d. to 2s. 4d. for fine, and 2s. 5d. to 2s. 8d. for finest chops, the latter being very full prices. In new-make Canton kinds business has been moderate, and prices are slightly easier. Oolongs latterly have become less saleable for all but the finest kinds, and prices for good to fine show a reduction of 1d. to 2d. per lb. Souchongs show no material alteration there have as yet been no arrivals of fine of this season. Scented Caper have been sold to a fair extent, but prices have given way fully 1d. per lb. In old season's Scented Orange Pekoes of Canton make there is no improvement. New have sold with some difficulty, the finest kinds excepted, for which there has been a demand. Foochow kinds have sold from 2s. to 2s. 9d. for good to finest quality, being full rates. Sales of Uncoloured Japan have been made at from 1s. 3d. to 1s. 7d. for common to good kinds. Green Teas have met with a steady demand, and the great bulk of the recent arrivals have found ready purchasers at full prices, especially for all the finer qualities, the commoner kinds not being so readily taken. This also applies to the Japan kinds.

Silk.—The market has been very quiet during the past week, and although there is no alteration in quotations, when sales are effected lower offers are accepted, as neither speculators nor manufacturers seem at all inclined to accumulate stocks at present prices. The new season's Japan will now begin to arrive, and will leave a heavy loss. The deliveries have been as follows from the 1st to 16th Oct.:—China, 1,523 bales; Japan, 310 bales.

Cotton.—A slight improvement has been manifested in this market, and prices are a trifle higher. There have been no sales of China or Japan.

Coffee.—The market for Plantation Ceylon has been very firm, and the public sales of this description have gone off with spirit at an occasional advance of 1s. per cwt. Native being in somewhat better request, also shows a slight improvement, and by private contract about 1,000 bags have been sold. The limited quantities of other East India brought forward have not found a ready sale. At the auctions, 1,050 casks, 320 barrels and bags Plantation realised, ordinary to fine fine ordinary 64s. 6d. to 72s. 6d., low middling to middling 73s. 6d. to 79s., good middling 80s. to 87s. 6d. 313 casks, 1,240 bags Native, low good ordinary to real good ordinary 53s. to 56s. 6d., good bold 60s. to 62s. 6d. The stock of Coffee in the United Kingdom on the 1st instant was 22,350 tons, against 17,000 tons last year, and 17,900 tons at the same period of 1865. The amount on hand in the five leading ports of the Continent was 57,600 tons, against 52,520 tons in 1866, and 54,540 tons in the preceding year.

Coir Goods.—Only small supplies have been placed on offer since our last report, but the parcels sold realised firm prices. At auction 9 tons Ceylon Yarn sold at £23 15s. to £25 10s. for very common to common, and £27 10s. to £28 10s. for good common; 15 cwt. Ceylon Fibre at £34 10s. and 79 coils Ceylon Rope were withdrawn.

Cutch.—There is a fair business doing privately, and at auction 1,398 boxes fine red Pegu were bought in.

Cocoa-nut Oil.—With a steady market the quotations for Ceylon are £52 to £52 10s.

Gambier.—At the public sales 551 bales common soft quality were bought in at 17s. 6d. to 17s. 9d.

Horns.—Of Ceylon deer 8,000 horns (4¼ tons) realised 80s. 6d. to 81s. per cwt.

India-rubber.—Four baskets Singapore of low quality sold at 1s. 3⅞d. per lb.

Pepper.—The market is extremely firm, and 2,600 bags Black Singapore in auction went freely at 3⅞d. to 3⅛d., being rather dearer. The private business amounts to 1,000 bags Penang at 3d. to 3⅛d. For arrival 1,000 bags Singapore have been sold at 3⅜d., and 2,000 bags Penang (Acheen) at 3⅛d. 1,192 bags Singapore White also found ready buyers at a slight advance—fair 5d. to 5⅛d., a few fine 6d. to 6⅛d., and 1,000 bags have been taken privately at 5d.

Rice.—A strong demand continues, and in the sales effected further improved rates have been established. The transactions comprise—3,000 bags Rangoon at 12s. 6d. to 13s., and 100 tons to arrive at the latter price; 20,000 bags Bassein at 12s. 4½d. to 12s. 6d., and 1,500 tons at 11s. 4½d. to 11s. 6d. ex ship; 1,800 tons Necransie at 11s. 4½d. to 11s. 9d. ex ship; 2,300 tons yellow Bengal at 11s. 3d. to 11s. 9d., 1,000 bags good (arrived) at 12s. 3d., 200 tons Dacca at 12s. 6d. to 12s. 9d., and 600 bags white at 15s. 6d. ex ship; 250 tons Madras at 13s., and 5,000 tons soft grain of next year's shipment on the basis of 11s. 6d. for Rangoon. At public sale 6,000 bags Madras were bought in above the value, as also 1,398 bags white Bengal, and 503 pockets Zanzibar.

Sugar.—The trade in this article has been more animated than for some time past, and an increasing demand has resulted in extensive sales at stiffening rates to an advance of 3d. to 6d. per cwt. At the auctions 8,000 bags Muscovado Manila have been offered, one-fourth of which sold at 27s.; and privately 25,000 bags clayed Manila realised, duty 8s., 29s.

Digitized by Google

6d. to 30s., duty 9s. 7d., 30s. 9d.; also 22,000 bags Muscovado Manila good quality 26s. to 26s. 6d., superior 26s. 9d. to 27s. 3d. per cwt. The Imports of Raw Sugar into the four chief ports of the United Kingdom, to the 5th October were 431,020 tons, against 430,440 tons in 1866. The clearances for home consumption 406,400 tons, against 374,120 tons, and the stock at that date was 192,570 tons, against 233,120.

Sapanwood.—At the auctions, of 46 tons Siam offered, 30 tons sold at £12 for sound and £11 for damaged; 21 tons Ceylon realised £10 5s. to £11 5s., and 42 tons Manila were bought in at £10 per ton.

Tin.—The market since our last report has improved, and there is now a fair inquiry at firm prices, viz., for Straits, £89 10s. to £90 cash on the spot and £91 cash for arrival, while Banca is still quoted £94 per ton.

Tortoiseshell.—Of Manila 2 cases (274 lbs.) have realised 19s., and of 3 cases (734 lbs.) Singapore offered 2 cases sold at 8s. 6d.

MANCHESTER MARKETS.

Mr. Sam Mendel's Circular of the 22nd inst. says:—"For several days past values have inclined in an upward direction, and large contracts have been placed for forward delivery. The announcement of the failure of the Royal Bank of Liverpool has produced an uneasy feeling, which has somewhat unfavourably affected prices." Quotations are:—Grey Shirtings, 7lbs., 7s. 10½d. to 8s. 3d.; 8½ lbs., 10s. 3d.; Cotton Yarn, Nos. 16-24, 1s. 0d. to 1s. 1d.; Nos. 28-32, 1s. 1½d. to 1s. 2d.; Maddapollams, 3s. 6d.; Long Cloths, 9s.; T-Cloths, 6s. 0d.; White Spot Shirtings, 10s. 6d.

FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports remain firm, and tonnage is rather scarce. Coal freights from the Northern outports are somewhat easier.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £47. For Singapore: £32. For Shanghai: £56. For Saigon: £50. For Yokohama: £50. For Batavia: £27. For Colombo, £29. For Galle, £35. For Chefoo, £57 From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 3s. For Singapore: £1 9s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 8s. For Chefoo, £2 15s. For Trincomalee, £1 17s. For Galle, £1 13s. For Colombo, £1 9s. For Manila, £1 5s. For Batavia, £1 10s.

The Admiralty have invited tenders for the conveyance of 1 ton meast. small arm ammunition, 7 tons naval masts, 15 tons weight and 5 tons meast. naval common stores, 5 tons medical stores, &c., 110 tons provisions, and 2 tons, meast., table top and machine, from the Thames to Hong Kong.

CASUALTIES.

The Majestic (barque), Robertson, of and from Glasgow, for Batavia, which put in at St. Helena August 4, very leaky, had been again surveyed; the surveyors had recommended the discharge of remainder of the cargo, and, having declared their opinion that the vessel was in such a state that the repairs required would far exceed her value, had recommended that she should be sold.

The Bolivar, Christian, from New York to Japan, which put in at Rio de Janeiro Sept. 6, leaky, was discharged there.

The Gossamer, Thomson, from Shangai, which arrived at London Oct. 22, had lost foretopmast, fore and main top gallant masts, and sprung maintop mast, July 25, in 6 S., 127 E.

Advices from Port Elizabeth, dated 23 Sept., state the "Krimpenerwaard," Kluit, from Batavia to Rotterdam, which vessel was towed in there July 22, leaky, and subsequently drifted ashore, had broken up, and her cargo, sugar, coffee, and tin, was strewed about; over 600 blocks of tin, out of 727, had been recovered.

MISCELLANEOUS.

At Ascension.—Sept. 23, Mirella, from Singapore, and sailed, 24, for London; 29, Advance, from Singapore, and sailed for Liverpool.

Off Ascension.—Sept. 16, Min, Thorbecke, from Batavia, for Middelburg; 21, Peru, from Macao, for Hamburg; President v. Ryckevorsel, from Batavia, for Rotterdam; 24, Zingra, from Penang; 26, Ocean Belle, from Ceylon; 30, Roseau, from Canton, for London.

At St. Helena.—Sept. 5, Chusan, Wagener, from Saigon, and sailed for Bordeaux; 12, Corsock, Warden, from Batavia, and sailed for Rotterdam; 14, Bremen, Bullerdick, from Padang, and sailed for Rotterdam; 15, Batavia, Dolden, from Batavia, for slight repairs, and sailed for Am-

Digitized by Google

sterdam; Herald of the Morning, Henderson, from Batavia, and sailed 17 for Rotterdam; Raleigh, Dobson, from Ceylon, and sailed 17 for London; 17, Kosmopoliet, Routen, from Batavia, and sailed 18 for Amsterdam; 19, Haamstede, Termansen, from Batavia, and sailed 20 for Rotterdam; 23, Spirit of the Age, Aitchison, from Colombo, and sailed 24 for London; 25, Benefactress, Eldred, from Yokohama, and sailed for New York; 26, Everest, Clarke, from Foochow, and sailed for Liverpool; 28, Copernicus, Algra, from Batavia.

At Table Bay.—Sept. 3, Himalaya (s.), Atkinson, from Southampton, and left 7 for Galle; 7, Osaka (s.), Maddison, from London, and left 10 for Japan; Aug. 31, Neville, Jackson, sailed for Japan.

Off Payta.—Sept. 14, Esmeralda, Drewes, from Hong Kong, and sailed for Callao.

Launch for the China Trade.—The Forward Ho composite ship, of 1,050 tons, 17 A 1 at Lloyd's, was launched on Wednesday afternoon by Messrs. Alexander Stephen and Sons, from one of their shipbuilding sheds at Kelvinhaugh. The Forward Ho is the property of Messrs. Robert Catto and Son, Aberdeen, is to be commanded by Captain Hassock, and is to be employed in the China trade, for which she has been specially constructed with all the modern improvements, and on lines combining superior sailing and carrying qualities.

HONG KONG & SHANGHAI BANKING CORPORATION.

London Offices—32, NICHOLAS-LANE, LOMBARD-STREET.

Subscribed Capital, Five Millions of Dollars in 40,000 Shares of 125 Dollars each.

Paid-up Capital, Three Millions of Dollars. Reserve Fund, 250,000 Dollars.

This company was originally established and carried on business as "The Hong Kong and Shanghai Banking Company," with a subscribed capital of five millions of dollars, in 20,000 shares of 250 dols. each, upon which 125 dollars per share was paid up, making a paid-up capital of two millions and a half of dollars; and the company was, pending application to Her Majesty's Government for incorporation, registered for a short time under the "Limited Liability Ordinance" in Hong Kong. Upon the Legislature effecting an alteration in this ordinance, excluding banks from its privileges, the shares of the company were, in order to meet the requirements of Her Majesty's Government for the incorporation of the company, divided in 40,000 shares of 125 dollars each, the original shares, upon each of which the said sum of 125 dollars had been paid up, being numbered from 1 to 20,000 inclusive, and for convenience sake known or designated as "old" or paid-up shares. The remaining 20,000 shares were numbered from 20,001 to 40,000 inclusive, and are commonly designated "new" shares. A call of 25 dols. per share was made upon these latter 20,000 shares, and the paid-up capital was thus raised to three millions of dollars, leaving a sum of two millions of dollars, or 100 dollars per share, not yet called up on these 20,000 shares. The company was incorporated under and by virtue of "The Hong Kong and Shanghai Bank Ordinance" (No. 5, of 1866), which incorporation, after having been amended or altered to meet the requirements of the commissioners for executing the office of Lord High Treasurer in England, received the Royal Assent in the present year.

The remaining 100 dollars per share upon the 20,000 "new" shares will have, under the provisions of the Ordinance of Incorporation, to be paid up before the 15th day of December, A.D. 1869, and it is probable that this sum will be called up in three equal payments—the first of which will fall due in June, A.D. 1868. (Ample notice will be given of the calls.)

The first report of the Court of Directors to the Company was published in the month of February, 1866, when for the period of eight months from the commencement of business a dividend at the rate of 8 per centum per annum was declared, and £33,300 dollars carried to reserve fund.

The second report, covering the period of six months up to the 30th of June, 1866, declared a dividend at the rate of 8 per centum per annum, and the reserve fund was increased to 100,000 dollars.

The third report for the following six months declared a dividend at the rate of 12 per centum per annum, and increased the reserve fund to 175,000 dollars.

The last (fourth) report, covering the six months up to the 30th of June last, declared again a dividend of 6 per centum for the half-year (or 12 per centum per annum), and, by carrying 75,000 dollars to the reserve fund, this was increased to 250,000 dollars.

These reports can be inspected at the London offices.

The centre of the operations of the Corporation being in China, its business is conducted under the direction and constant supervision of the chairman, deputy-chairman, and the court of directors at Hong Kong, in addition to which there is a thorough and searching audit for each half-yearly meeting, conducted by two gentlemen selected by the shareholders themselves for their known efficiency, and entirely independent of all control by the Directors.

The equivalent in sterling of a "Paid-up" share of the company's capital at the fixed par of 4s. 6d. per dollar is £28 2s. 6d., and the equivalent of the paid up amount on the "new" shares is £5 12s. 6d.

Until further notice there will not be more than 5,000 "paid-up," and 5,000 "new" shares allowed to be placed on the London Register, and shares once placed on the London Register will not be transferable to the Hong Kong Register.

It being the repeatedly expressed wish of a very large and influential body of shareholders, resident not only in China and the East, but also in the United Kingdom and Europe generally, that a London Register of shares should be established, in order that sales and transfers of shares can be effected and perfected in London in as inviolable a manner in all respects as heretofore in Hong Kong, the Directors have complied with the wishes so expressed, and a London Register has now been opened, and shares transferred. The Directors, upon such an important step being taken, have deemed it expedient to lay before the public in Europe this short summary of the constitution and position of the Corporation, in order that matters hitherto known only to shareholders may be made generally public, and the manager at the London Offices will afford the fullest and most detailed information upon all matters connected with the Bank.

Under the provisions of the Deed of Settlement the Directors have about 2,000 "new" shares of 125 dollars each, on which 25 dollars have been paid up.

These shares will be offered at par, or £5 12s. 6d. per share, and the allottees of them will be entitled to participate in the dividend for the current half-year (July 1st to December 31st, 1867) at the next half-yearly meeting in February, 1868.

Applications for these shares will be received at the London Offices until the 2nd day of November next.

Forms of application can be obtained at the London Offices, where applicants must pay a deposit of £1 12s. 6d. per share to the Corporation upon application, and the balance of £4 per share upon allotment.

By order of the Court of Directors,

W. H. VACHER, Manager in London.

THE

SILICATED CARBON WATER FILTERS,

FOR

DOMESTIC, MANUFACTURING, AND GENERAL PURPOSES.

The most perfect Apparatus yet devised for Purifying Water for Drinking or Culinary Purposes, and the best possible safeguard against the diseases resulting from impure and unwholesome water.

*** These are the only Filters used in the General Post-office, and by the Metropolitan Free Drinking Fountains' Association, being adopted after the failure of all others tried. Also, by order, the Drinking Fountains of the International Exhibition of 1862 were fitted exclusively with the Company's Patent Filters.

Manufactured in great variety, and at prices varying from 2s. 6d. to £18. 18s.,

BY THE

SILICATED CARBON FILTER COMPANY,

BATTERSEA, LONDON.

Works—CHURCH ROAD, BATTERSEA, LONDON, S.W.

PORT OF AMOY, CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c.

MINUTES of an EXTRAORDINARY GENERAL MEETING of the Shareholders, held at the London Tavern, on Wednesday, the 16th day of October, 1867,

THOMAS A. MITCHELL, Esq., M.P., in the Chair.

The advertisement convening the meeting having been read, the following resolution, after some introductory observations, was moved by the Chairman, and being seconded by William Macnaughtan, Esq., was carried unanimously:—

"That an interim dividend at the rate of 5 per cent. per annum (free of income-tax) be now declared for the half-year ended 30th June last, payable on and after the 25rd inst."

With a vote of thanks to the Chairman and Directors, moved by Thomas Huggins, Esq., seconded by Richard Chace, Esq., and carried unanimously, the proceedings terminated.

T. A. MITCHELL, Chairman.

Warrants for the dividend above declared, payable at the City Bank, Threadneedle-street, London, on and after the 23rd instant, will be issued forthwith to all the Shareholders.

BUENOS AYRES GOVERNMENT CERTIFICATE.

TRANSLATION.

WE, the undersigned, at the request of Messrs. James C. Thompson and Co., certify that the IRON SAFES of Messrs. CHUBB and SON, London, of which these gentlemen are Agents, were exposed for several hours to the Fire that took place in the Offices of the National Government on the evening of the 26th inst.; that in our presence they were easily opened with their respective keys; that the moneys and important documents they contained were found in perfect order, and that these Safes are now in use in the National Treasury Office.

Buenos Ayres, 31st July, 1867.

(Signed) J. M. DRAGO,
Treasurer of the National Government.
JOSE TOMAS ROJO.
JUAN. M. ALVAREZ.

A true Copy.—A. M. BELL.

A large assortment of these SAFES may be inspected at CHUBB and SONS, Makers to the Queen and the Bank of England, 57, St. Paul's-churchyard, London.

HOLLOWAY'S OINTMENT and PILLS.—FEAR NOT.—Though surrounded by circumstances disadvantageous to health, these remedies, if properly applied, will cut short fevers, influenza, inflammation, diphtheria, and a host of other complaints, always lurking about to seize on the weak, forlorn, and unwary. The superiority of Holloway's medicines has been so fully and widely proved for subduing disease, that it is only necessary to ask the afflicted to give them a trial, and, if the instructions folded round them be followed, no disappointment will ever ensue, or dangerous consequences result. In hoarseness and ulcerated sore throat the Ointment should frequently be rubbed on the neck and top of the chest; it will arrest the increasing inflammation, allay disquietude, and gradually cure.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE, is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

AGENT: Hong Kong, Mr. A. S. WATSON.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

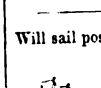
Will sail positively on the 5th November. Last shipping day 2nd November.



FOR SINGAPORE and PENANG, the very fine clipper-built ship ALPHINGTON, A 1 12 years, 326 tons register; J. CAINES, commander. West India Docks. This fine ship, built under special survey, is strongly recommended to shippers requiring despatch.

For Freight or Passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; or to STUART and SIMPSON, 9, Clement's-lane; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

For list of R. and Co.'s line of ships now loading see "The Times" (daily) and other papers.

With quick despatch.

FOR MANILA, DIRECT, the splendid Spanish clipper-ship ANGELA, 3-3rds=A1 9 years in veritas, 486 tons register; J. Y. DE ONATE, Commander. West India Docks. This vessel, built at Bilboa, in Spain, expressly for the Manila trade, and being of the highest class, is strongly recommended to shippers requiring despatch.

For Freight or Passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

For list of R. and Co.'s line of ships now loading see the "Times" (daily) and other papers.

With Despatch.

FOR HONG KONG, Direct, the splendid clipper ship CHUSAN, A 1 14 years, 817 tons register; JOHN W. ROY, Commander, West India Docks. This fine ship, built in 1865, under special survey for the China trade, is strongly recommended to shippers desirous of despatch.

For freight or passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

For list of R. and Co.'s line of ships now loading see the "Times" (daily) and other papers.

With quick Despatch.

FOR SHANGHAI Direct, the well-known Clyde clipper-built ship GOSSAMER, A1 15 years, 735 tons register; J. THOMSON, Commander; West India Docks. This magnificent high-classed ship, built under special survey, is strongly recommended for the shipment of fine goods.

For freight or passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

For list of R. and Co.'s line of ships now loading see the *Times* (daily) and other papers.

SHANGHAI direct, the magnificent, river-built, clipper ship DILKHOOSH (owned by Messrs. Smith, Fleming, and Co.), 816 tons register; loading in the East India Docks. This splendid vessel, built in 1864, is strongly recommended to shippers of fine goods, and has good passenger accommodation.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., Pool Fold Chambers, Cross-street, Manchester; or 27, Leadenhall-street, E.C.

REGULAR LINE of PACKET SHIP (to follow the Belted Will).—For Hong Hong and Whampoa, the well-known clipper BLACK PRINCE, A 1 13 years, 750 tons register; WILLIAM INGLIS, Commander: lying in the East India Docks. Has superior accomodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

To follow the "Ariel."

FOR SHANGHAI, the favourite clipper WHITEADDER, A1 10 years, 915 tons register; F. W. MOORE, Commander; lying in the East India Docks. This ship has a full Poop, with superior accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

List of Passengers.

PASSENGERS INWARD.

By last mail, to Southampton, per P. and O. steamer Nyanza, arrived Oct. 30.—From Hong Kong: Mr. J. Clifford and one second-class passenger. From Singapore: Mrs. Newlands and child, Mrs. Hodgkinson. From Shanghai: Three second-class passengers.

By last mail to Suez, per P. and O. steamer Candia, arrived Oct. 15.—From Shanghai: Mr. Bronsted. From Hong Kong: Two second-class passengers. From Singapore: Mr. A. Jacob, Mr. Wolkmest.

Per French mail steamer Moeris, arrived at Marseilles, Nov. 3.—From Yokohama: Messrs. Civetta, Lenerue, Loremti, and ten Japanese. From Saigon: Messrs. Moreur, Cabaille, Crecher, Geoffrey, Captain Varrances and servant. From Batavia: Messrs. Geerlings, Porst, van Noorden, Hogenen, Vrameurs, Heyligers, Booramo, Mr. van der Heil and family (four), M. and Madame van Warnekoo and child. From Hong Kong: Messrs. Mery, Montoro, and Coste. From Singapore: Messrs. Pellisier and Heliger.

PASSENGERS OUTWARD.

Per P. and O. steamer Ceylon, from Southampton, Nov. 4.—To Ceylon: Mr. and Mrs. J. M. Vanderspar and four children, Mr. Malcolm, Miss Malcolm, Surgeon-Major Baron. To Singapore: Mr. and Mrs. J. McLachlan, Mrs. Dunman and two daughters, Mr. and Mrs. J. G. Slade, Miss Laurie.

From Marseilles, Nov. 12.—To Ceylon: Mr. J. F. Dickson, Mr. and Mrs. Donnan, Mr. W. C. Miller, Mr. Alfred Willisford. To Singapore: Miss Powell. To Shanghai: Mr. F. C. Dean. To Yokohama: Mr. Yokoyand, Mr. Yebina.

Per P. and O. steamer, from Marseilles, November 20.—To Shanghai, via Bombay: Mr. R. C. Antrobus.

Per P. and O. steamer Pera, from Southampton, November 20.—To Yokohama: Mr. and Mrs. McDonald and two children. To Hong Kong: Mr. W. H. Hooper. To Singapore: Mr. F. A. Sheppard. To Ceylon: Mr. Armitage.

From Gibraltar.—To Singapore: Mr. Wright.

From Marseilles, Nov. 28.—To Singapore: Mr. Jose, Mrs., and Miss d'Almeida, Mrs. Velge. To Hong Kong: Mr. Tait, Mr. Pedder, Miss Marsh. Mr. and Mrs. G. N. Minto. To Ceylon: Mr. and Mrs. Gunter. To Shanghai: Mr. Rodocanachi.

Per P. and O. steamer, from Southampton, Dec. 4.—To Ceylon: Mr. and Mrs. W. Thompson, Mr. Hoyes. To Singapore: Miss Mary Thompson, Rev. W. and Mrs. Lisle, Mrs. Willans and two children, Miss Willans. To Hong Kong: Mr. N. J. Hannen.

From Marseilles, Dec. 12.—To Yokohoma: Mr. R. F. Price, Mr. King, Mr. Vernede. To Shanghai: Rev. F. King, Mr. F. King. To Hong Kong: Mr. H. Smith.

Per P. and O. steamer from Southampton, Dec. 20.—To Ceylon: Mr. R. E. Crickett. From Marseilles, Dec. 28.—To Ceylon: Mr. W. T. Sendall.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Advices from this port are to the 11th September. The French mail of 17th July had arrived out. The only interesting topics in this quarter are the wreck of the steamer *Singapore*, and the return of Admiral Keppel from Osaka. On the latter subject the *Japan Times* says: We mentioned in our last that Admiral Keppel and Sir Harry Parkes had left Nagasaki for Osaka, to demand compensation for the murder of two seamen of H. M. S. *Icarus*, at the Southern port. The *Salamis* came in on Sept. 3rd with the Admiral. He had left Osaka on the 1st and the Minister had proceeded to the prince of Tosa's territory. It was believed that the murders had been committed by two men belonging to one of this Daimio's ships, and this impression seemed to be shared by Sir Harry Parkes. The Shiogoon expressed his grief at the unhappy occurrence, but pointed out that Tosa was the proper person to apply to for redress, and, some confidential retainers of his being daily expected at Osaka, advised Sir Harry to open negotiations with them.

Tosa's men, however, had got intelligence of Sir Harry's pressing wish to see them, and immediately on their arrival took ship and went home. Sir Harry then followed them in the *Basilisk*, and after five interviews, has returned, we believe with very little satisfaction. Tosa had heard nothing of the murder, and denies that his people committed it, but professes his readiness to do justice if sufficient proof can be adduced to prove to him that such is the fact, and if he can catch the men, professions which have about as much value as the phrases which terminate an official letter. Mr. Satow has gone down to Nagasaki in one of the Prince's steamers with some of his people to investigate the matter farther. It is difficult to see how any redress can be obtained. We dare not, in the face of the public opinion of the world, compel the Shiogoon either to pay a sum of money to the families of these two murdered men, or to hand over to us for execution a couple of felons from one of his own gaols as their murderers. We exacted a large sum of money, £100,000, from the late Shiogoon for the murder of Mr. Richardson by the retainers of Shimadz' Saburo. At that time our diplomatists, and all who had hitherto written on Japanese politics, really thought the Yedo chief was the Sovereign of the country, and no voice was raised against this exaction, no heed given to the unfortunate prince's protestations that he could not help it, that he could not punish Satsuma, that he could not have prevented the occurrence. We are now better informed. We know that the Shiogoon had just suffered the utmost humiliation at the hands of Shimadz' Saburo; that the latter was far more powerful in Japan than he; that for him to utter a threat against the successful chief was not only ridiculous, but eminently dangerous. Stotsbashi's position is much the same. Tosa is one of the four Daimios who brought about the favourable peace for Chosiu, is intimately connected with Shimadz' Saburo, and one of the most important princes of the empire. Stotsbashi can no more control him than he can control the ebb and flow of the Inland Sea; and to make him responsible, to make his treasury pay an indemnity for these crimes would be to disgrace our name, quite sufficiently stained already by similar injustice.

Digitized by Google

The following items are also from the *Japan Times* :—

We have learnt with much pleasure that Stotsbashi has, for the present at all events, abandoned his intention of resigning the Shiogoonate. That such intention existed is evidenced by the fact of a communication having been made to the China papers from Nagasaki, under date of August 10th, to the same effect as that made to us from an entirely different source, but on which we could not place implicit credence. He had certainly expressed his wish to abdicate, but the Daimios prefer, apparently, even the danger from his ability than the probable anarchy certain to characterise another long minority. They are doubtless right.

The representative of Prussia, M. Von Brandt, having returned from Hakodadi, the subject of the late attack on the Messrs. Schnell is under strict investigation. The Japanese authorities promise to punish the Samourai who drew upon them, according to their own law; but as they very probably think he has been punished to some extent already by the wound he received from Mr. Schnell's shot, and as he does not happen to be a retainer of the Shiogoon, and his punishment by that prince might lead to difficulty with his own chief, it is doubtful that he will be punished at all if M. Von Brandt yields to the request of the Yedo authorities. One good has sprung from this unpleasant affair. A notification has been issued to the Samourai by the Shiogoon's Government, that should any one of them attack a foreigner and chance to get shot, as in this instance, the case will not be taken up on behalf of the killed man's friends, and no prosecution will be instituted against foreigners. We have not much hope that such an edict will have the effect of stopping attempts at assassination; and as for revenging the death of a two-sworded man who might fall in such an attack, his relatives or friends would take care of that without troubling any Government whatever. Still, as a proof of good faith on the part of our ally, the Shiogoon, the proclamation has its value.

The Dutch Minister has gone on a trip to Fusiyama. The representatives of other foreign powers are either here or in Yedo.

The new official residence for the Governor of Kanagawa has just been completed, and his Excellency took possession a few days ago, celebrating the occasion by entertainments to the Legation and Consular staffs. He has just issued a Notification which gives us some guarantee against the recurrence of such a calamity as that of last November. It intimates to all holders of property in the native town, calling on them to come forward with their seals and pens and sign a circular lately sent round to them warning them against fire. He states that the fire last year occurred entirely through carelessness, and that much property was lost; that the Government has had to go to great expense in building, and that in future the occurrence of a fire will result in severe punishment of the careless person causing it.

The present mail brings full particulars of the loss of the P. and O. steamer *Singapore*, which, although a heavy misfortune to the company, will cause the public to place more implicit faith than ever in the safety of their vessels, owing to the admirable management of their boats. It appears that the accident occurred some ten days before the rough weather that was at first supposed to have been the cause of it. The ship was progressing steadily, and as all thought safely, towards Hakodadi, when, a little after noon of the 20th August she ran fiercely on to a sunken rock not laid down in the charts, but about a day's boat travel from Hakodadi. It is a square pinnacle about eight feet broad each way, and the Japanese know it by the name of Ki-ko-ra Iwa (rotten shell rock). The *Singapore* ran upon this at full speed, taking it just on the starboard bilge. Mr. Warden, of the P. and O. Company, and another passenger were looking over the side at the moment, and the former was just saying, "That looks like shoal wa—" when the ship struck. No great shock was felt; indeed, the sensation was as if she had run on the edge of a sand bank. She heeled over to port of course, was instantly off the rock with her side torn open, heeled back to starboard, righted, and began to fill and settle down. The engines were instantly stopped, and the engineer on watch ran up on deck to report the water above the cylinders, the water following him as he ascended, and even wetting his boots. How the firemen, who happened to be at the time in the coal-bunkers, managed to escape is a mystery; perhaps they were floated up by the rising water. The fires were at once extinguished, and a dense column of steam and ashes thrown up from below. Seeing the water up to the platform in the engine-room, level in fact with the water-line outside, Captain Wilkinson ordered the boats to be lowered and the passengers placed in them, a service which, as we have said, was performed in less than six minutes. The gig was first in the water, and into her went Messrs. Keswick, Merry, Bovenschen, Grosser, Schmidt, De L'Arbre, Dr. Mourier, and Messrs. Warden and Davison (P. and O. Superintendents). With her crew, the boat carried seventeen persons. Captain Wilkinson, not observing that the ship was off the rock, ordered the gig to make for Low Island, land the passengers, and then return to assist in saving treasure and cargo. Meanwhile, the remaining passengers and most of the crew having been got into the boats, Captain Wilkinson and his officers, with some of the men, remained on board as long as possible collecting the passengers' baggage, provisions, his chronometers, and other requisite instruments. All this time the vessel was slowly settling down. At last, about an hour after she had struck, he ordered the few remaining with him into the jolly boat, and pushed off, the stern ports being then about ten inches from the water; himself the last to leave the wreck. The other boats he had previously sent off together to make the nearest land. When he had got clear about two or three hundred yards he saw the last of his ship. The after compartments being filled with water, they over balanced the fore part: she turned as if upon a pivot, the stern disappeared, her fore-foot rose thirty feet out of the water, and she sank at once. A few seconds after she had disappeared the pent-up air in the fore compartment burst it with a crash; a great heap of broken water was thrown up into the air, and for two hundred yards around planks and beams and other fragments of the wreck shot up from below—some close to the jolly boat.

Captain Wilkinson picked up some of the other boats, put into each of them one of the officers he had with him, and then the little fleet of six boats made for the shore. The passengers on board of this detachment were Messrs. Taylor and Le Mare, MM. Valmale and Del'Oro, Blanc and Parravicino, White, Captain C. A. Fletcher, Chisholm (P. and O. Service), Orlet, and Dr. Campbell, three male Chinese and one female. They could not fetch up to the place where the gig had arrived, and had to run into a large village called Shimofra. They were well received on landing, and the party passed the night less uncomfortably than might have been expected. Strange insects annoyed them however, one particularly venomous little black creature being remarked, from the effect of whose bite some have not even yet recovered. At daybreak Captain Wilkinson started to look after the gig and her crew, and after a fatiguing ride reached them on the 21st. He then sent back for the lifeboat, and with Mr. Davison, Captain Fletcher, and Mr. Atkinson (2nd officer), started in her for Hakodate. They crossed the strait, but could not get round Hakodate Head, so had to land on the beach about 5 miles from the town, which they finally reached after a fatiguing walk through heavy sand early on the morning of the 22nd. Mr. Eusden, H.B.M. Acting Consul, received them and went at once with them on board the Prussian corvette *Vineta*, the only man-of-war in harbour. Captain Kuhn listened to their story, and in an hour she was under way and proceeded, with Captain Wilkinson, to pick up the people on the coast. Nothing could exceed the kindness shown by the *Vineta's* people to the passengers of the *Singapore*. When they came on board they were received with a cordiality which could not have been exceeded; but of the unlimited and generous kindness of Captain Kuhn and his officers the best proof is a letter which was addressed to him by those they had saved. The conduct of the native Government next claims our admiration. In the harbour was a Japanese steamer—the *Taipan-gyo*, chartered by the native authorities to an association of merchants to proceed to Nee-e-gata, and to take a cargo of rice thence to Yedo. This vessel after considerable negotiation with the Toya, or head of the guild, the Governor placed at the disposal of the British Consul gratis, to convey the shipwrecked people to Yokohama, sending on board also as much as he could in the way of provisions. We shall probably never be able to ascertain what the Government of the Shiogoon had to pay in compensation to the merchants for breaking their agreement with them; but when the attempt was made by the English Consul to charter her from the guild itself, forty-eight thousand bous was the sum at first demanded. The ship being at last at the disposal of the unlucky visitors, they left Hakodate in her on the 30th August, and arrived safely at Yokohama on the 4th September. On the way down Europeans and Japanese had

Digitized by Google

become well acquainted, and the treatment experienced by her passengers at the hands of the native crew is described as exceedingly good.

In the meanwhile, H.M.S. *Persens* had left Yokohama in search of the missing vessel, and by her no doubt the rock will be carefully surveyed. The ship carried a cargo of sugar and other various merchandise, with $47,000 in treasure, chiefly in Japanese coin. A considerable part of the insurance was, as usual, taken by the company under their Red Bills of Lading, and for the rest we believe the North China Insurance Company is chiefly responsible. The total loss is small. At a naval Court, ordered by the Admiral at Yokohama on the 9th, Capt. Wilkinson and his officers were declared clear of all blame, and complimented on their good conduct in trying circumstances.

CHINA.

SHANGHAI.

Dates from this port are down to 19th September. The outward mail of 26th July arrived on 8th September.

The following items are from the *North China Herald*:—

A meeting of land renters has been held for the purpose of receiving the new assessments on land and houses that had been drawn up by the respective committees appointed for that purpose. As will be seen from the report of proceedings, a rather animated discussion took place. The new house assessment was adopted, but the rates fixed by the land assessment committee were rejected as excessive, and a revision decided on—4,000 taels being laid down as the highest value per mow to be fixed for the best bund lot, and 30 taels as the lowest on the most out-of-the-way. Two committees were suggested to carry out this revision, one including the finance committee of the Municipal Council, one not doing so. But the finance committee declined to act as assessors, and the other gentlemen proposed declined to act without their assistance. The motion finally adopted therefore became inoperative, and the meeting was obliged to vote supplies on the basis of the old assessment until a compromise can be effected and the reassessment proceeded with.

A meeting of shareholders in the China Fire Insurance Company has also been held, to receive the report of the directors on the working for the past half-year. The results were satisfactory; but it was strongly urged that the insurance of buildings in Japan should be altogether abandoned, as too risky.

The harbour authorities have made arrangements to have the wreck of the barque *Tientsin* blown up. She is sunk, it will be remembered, near the entrance to Woosung, and the removal will be a great boon to vessels entering this port. We should be glad to hear that it was intended also to blow up the wrecks of the *Hellespont* and of the Chinese junk, which have so long obstructed the fairway a little lower down. The latter lost, during the late typhoon, the only mast which had hitherto served to mark her position.

The ship *Dartmouth* picked up the deserted barque *Siam*, laden with beancake, outside the lightship. There is, we believe, likely to be some enquiry into the circumstances of her abandonment.

The works at the Church have been suspended, but a subscription list is being circulated in the endeavour to raise funds to enable their resumption. If a sum sufficient to warrant the contractors in proceeding be subscribed, operations will be renewed; if not, they will remain in abeyance until definite arrangements be made.

At a meeting held at the Club Concordia, for the purpose of revising the rules for the newly formed Dramatic Association and Liedertafel in connection with the club, Mr. Noetzli, who has from the beginning been most indefatigable in arranging the matter, was elected director by unanimous vote of the members, and Mr. Hogqvist conductor of the Liedertafel.

At Ningpo a new police force has been formed, under the auspices of the Taotai, for the protection of the foreign settlement. The force is to be controlled by a Wei-yuen, who is to be appointed by that official, and his Excellency has selected Colonel Cooke, commandant of the local Anglo-Chinese contingent, for that post.

Chefoo advices state that, after allowing the Imperialists to complete their entrenchment, the rebels carefully neutralised its effects by getting into some junks on the north coast, and landing in its rear. All Li's work therefore is thrown away, and the entrenchment across the Shantung promontory converted into a ridiculous movement of failure. The Futai of Shantung was in command at the trenches. On him, therefore, will possibly be thrown the responsibility of their escape, to avoid the difficulty and possible danger of attempting to degrade Li. The rebels are not, however, yet quite clear, they have still to evade the main army under Li, which is encamped farther westward, before they can get into Honan. The task however is much easier than that which they have just accomplished, and no doubt they will succeed. After landing in the rear of the entrenchment, they divided into two bodies and marched southward. Since then, nothing further has been heard of them. It is reported that a large body of Imperialists have deserted to them. Tientsin advices speak of great disappointment in the North, in consequence of the escape of the Nieufei from the Shantung promontory.

The following items are from the *Friend of China*:—We hear from Hankow that there is every probability of Mr. Gordon, of the bankrupt firm of McKellar and Co., being sent to our consular gaol for the period of a year, which the law prescribes for people who play with other men's property in the way this gentleman has played. Indeed, had Mr. Myburgh elected to do so he could have prosecuted him on behalf of his Chinese clients as a criminal, and so, perhaps, have lodged him at the Hong Kong treadmill for a spell.

We have much pleasure in calling the attention of our readers, and more especially of those at the outports, to the establishment at Shanghai of a news agency for China and Japan. This enterprise, which we consider well worth patronising, has been started by Mr. G. W. Anthony, who has already in San Francisco had considerable experience in this line of business. His object is to enable all, both residents of Shanghai and the coast ports, to get home news immediately upon the arrival of every U. S. mail from New York and San Francisco. In addition to the news department he has now on the way here a large collection of standard English and American works, which he will keep replenished as occasion may demand; and if he would make a still further endeavour to favour Shanghai, we would recommend to him the establishment of a free circulating library.

The premises recently owned by Messrs. Johnson and Co., including the house formerly occupied by Messrs. Preston, Bruell and Co., have been purchased by the authorities as quarters for some of the Custom-house employés who now live in Yuen-ming-yuen-road.

We observe that the action arising out of the recent collision between the P. and O. steamer *Malacca* and the barque *Tientsin* has been set down for hearing in the Court of Vice-Admiralty for the 26th inst., the damages being laid at $17,500.

The Chinese Government has resolved on having constructed in Europe eight chain gunboats, armed with powerful artillery, to be employed in putting down piracy. The Japanese Government, on its part, has already ordered several gunboats in France for the same purpose.

Mr. Drummond, who lately absconded from Hong Kong, has turned up at Shanghai, and started the firm of Woodward and Co., with the view of doing the Chinese. The worthy who established this firm had dressed himself up in the outward semblance and garb of a house of business, and had succeeded in inducing some Chinamen to trust him with 180 bales of silk, which "purchase" had the immediate effect of raising the market as much as 20 taels. Suspicion, however, by degrees began to be excited. The "house" had contracted to pay for the goods on the 17th, and were going to sell bills—so they told the brokers—but had not settled upon whom they would draw. This and other little inconsistencies, roused the tardy fears of the natives, who took the precaution of watching the godown in which the silk was stored. This precaution it turned out was not unnecessary. Attempts were made in every direction to obtain an advance upon the goods, but these proved in vain; and the result was that the particular scheme laid out has fortunately been frustrated. A gentleman with whom the silkmen were acquainted in business was begged to offer his assistance, and he took occasion to call upon Messrs. E. and A. Woodward and Co. and demand a few explanations. He ultimately succeeded in regaining possession of the silk, and next day Mr. Woodward, alias Drummond, an escaped convict from Hong Kong, disappeared from the scene of his labours.

Discussing the subject of extravagant expenditure, the *Friend*, after reviewing the conduct of the clerks, says:—

Turn we now to the senior mess. This comprises the partners and *per pros.* It rests with them to represent and keep up the dignity and hospitality of the house—its select dinner parties, balls, and *soirees.*

Here we have the European butler, the French cook, the carriage and

Digitized by Google

pair with tiger behind, the private billiard table, the country seat—and so we go on until in an unlucky hour we buy tea and send it home. It realises a loss. The banks are not paid. The bills are returned, and we simply burst up. Well, it is but a mercantile failure; no one would dream of asking why did you keep up such an expensive establishment, why did you have six clerks at six to nine hundred pounds per annum each when you could have done with three at two to five hundred each as well? or why did you live with the extravagance of a millionaire? No, we take our dividend of sixpence to half-a-crown in the pound, and thankfully remark, who would have thought of Brown and Co. smashing! And so we take it as all correct, and allow the partners 200 taels per month, equal to £800 per annum, to live on while they are settling up. Brown and Co. are out of the game, and the deal passes on to the next one. Landowners and householders, let your properties on terms that you are well assured your tenants can pay.

Tenants, don't allow your landlords to take advantage of your dire necessities in charging you such preposterous rents.

Junior clerks, be careful of your employer's pockets and don't ride too heavily the willing horse.

Partners and managers, don't ship produce that you can't stand a loss on if it does not turn up trumps. Make retrenchment the order of the day, and don't allow the youngsters too often to write the magic words *Comprador pay*.

Bank managers, if you expect to get back your principal don't lend your money to people who are willing to pay you extravagant rates of interest, as you may get neither one nor 'tother.

Let our merchants combine in unison one with the other to combat their one common enemy, the Chinese guilds, and bring down their markets to such a scope that their operations may be at all times profitable. Let us take for our battle cry, "small profits and sure returns, domestic economy, and combined action," so shall we, having cast from us our former egregious follies, rise from our present slough of despond, and shine forth more firmly prosperous than we did while the first flash of early success was upon us, and, having passed through the vicissitudes of the past crisis, we shall, as veterans, not be so easily lured from the paths of discretion. Then, and not till then, shall we see this model settlement become once more the great emporium of the East, the pride of the merchants, the envy of the world!

HONG KONG.

Dates from this port are to the 24th September. The outward mail of August 10th, conveying also London telegrams to the 28th, was delivered on the 18th September.

Mr. William Keswick is gazetted a member of the Legislative Council, in the room of the Hon. James Whittall, resigned. The Hon. F. Forth has been appointed to the magistracy, in the room of Mr. F. W. Mitchell, who has been appointed Collector of Stamps.

An extraordinary general meeting of the shareholders of the Union Dock Company was held on the 19th September. The report of the directors showed that the results of the year could not be looked upon as satisfactory, the profits having been reduced to the extent of $2,000 by the loss of the company's chop at Whampoa. The meeting adopted the report and elected the following gentlemen directors for the ensuing year: Mr. G. F. Heard, Mr. W. Nissen, Mr. L. Beyer, Baron de Cercal, Dr. Murray, Mr. Arthur Sassoon, and Mr. Margesson. The meeting was adjourned to the 7th October, after a vote of thanks to the chairman had been passed.

The owners of the ship *Veritas* have claimed in the Supreme Court salvage for saving the Portuguese vessel *Yeddo*, with her cargo and the lives of the crew. The owners of the *Yeddo* had tendered $3,363, or £700, but refused to satisfy any claim for a larger sum. The Chief Justice, after hearing the facts of the case, fixed the award at $6,500, of which sum $4,000 was to be divided among the crew of the *Veritas*, and the balance to be paid to the owners of that vessel.

(FROM OUR OWN CORRESPONDENT.)

Sept. 23, 1867.

The only public topic of interest in Hong Kong continues to be the financial policy inaugurated by Sir Richard MacDonnell, in despite of the opposition expressed by the community and of the Legislative Council. The Ordinance embodying the privilege of deriving a revenue from licensed gambling was passed on the afternoon before the last mail's departure, notwithstanding an earnest protest by the Hon. Francis Parry, one of the newly-appointed members of Council, who forcibly exposed the hypocrisy of the attempt to pass off the measure as a contrivance for the suppression of crime, and twelve Government gambling houses are now in full blast in various quarters of the town. Nothing but the Havana coolie trade is now wanting to raise Hong Kong to the same prosperous and dignified level as that on which Macao so proudly stands. No element of a disagreeable character has been lacking in the progress of this piece of legislation, the triumph of which was openly advocated by the mouthpiece of the Governor's policy—the *Daily Press*—as the only possible escape from the horrors of the Stamp Act; an argument which told very powerfully upon the mercantile community in general, but simultaneously with the opening of the gambling-houses the announcement was made that the Stamp Act is at once to be enforced, and such is actually the fact. The Postmaster-General is nominated Commissioner of Stamps, and the next *Gazette* will probably contain the proclamation of the Ordinance. It appears, therefore, that the Colonial-office has paid little if any attention to the memorial forwarded from hence last year, protesting against the introduction of this measure; but it remains to be seen whether the anti-gambling memorial, which is now in course of preparation, will be similarly neglected in the face of the objection so strongly entertained in England to financial measures so ingeniously based on the prevalence of vice and crime. An exceedingly well-written letter on this subject by the Rev. F. S. Turner, of the London Mission, appears in one of the local papers, bringing thorough knowledge of the Chinese people, their character and ways, to bear upon the Governor's project, which he naturally strongly condemns. For plain speaking the concluding sentence in Mr. Turner's letter is almost unparalleled. "It is impossible," the rev. gentleman says, "to save both Sir Richard's integrity and his intelligence; and I for my part would be glad to believe in the former at the expense of the latter." This is certainly a very neat way of drawing the distinction between knave and fool!

Apropos of the London Mission, a Chinese of singular erudition, who has been employed for several years by the Rev. Dr. Legge as his assistant in the preparation of his *magnum opus*, the translation of the Chinese classics, is about to undertake the dreaded journey to England for the purpose of rejoining Dr. Legge at the latter's request. Wang Taou, as this Chinese scholar is named, is a man infinitely superior in position and education to the wretched Government clerk who was introduced in England last year by Mr. Hart as "his Excellency Pin Ta-jin," and so preposterously fêted by the Government and the aristocracy; but, as Wang Taou will not have the benefit of Mr. Hart's diplomacy, and can confer no factitious lustre on the foreign Customs administration, he will probably make but a very modest impression on the British public.

The seemingly inevitable tendency on the part of all individuals placed in the position of Inspector General of the Chinese Maritime Customs to arrogate despotic power over not only a portion of the Chinese administration, but also as far as possible over all foreigners in China is becoming very noticeable in Mr. Robert Hart, now that this very talented gentleman considers himself firmly established in the position from which he ousted Mr. Lay. His great ambition is known to be the concentration in the hands of his subordinate commissioners of those judicial functions with respect to foreigners which the Chinese Government has been compelled to recognise as beyond its scope of action, and which are necessarily confided to the Consular representatives of the various Powers. In every Customs' regulation promulgated by the Inspector-General a stealthy step in this direction may be discerned, and the latest autocratic device of this kind, his Pilotage Regulations, in which Consular authority is ignored, and his subordinates are invested with uncontrolled power to fine and otherwise punish foreign pilots, besides hampering foreign shipping with heavy and unnecessary expenses, has called forth an earnest protest, addressed to H.M.'s Minister, from the Shanghai Chamber of Commerce. Another step in the same direction has quite recently been manifested in a set of regulations published at Shanghai, devised for the purpose of enabling Chinese subjects to become the owners of foreign-built vessels—a heavy blow at the coasting trade, which is now chiefly in the hands of British shipowners. These regulations are published, it would seem, tentatively, for the purpose of eliciting an expression of public opinion, as they are neither signed nor dated. Should they receive the approval of the British, French, and United States Governments, Chinese-owned steamers and sailing vessels will speedily monopolise the coasting trade, as their chief management would enable them to reduce freights far below the level that would be remunerative for foreign vessels.

The political news from the North continues to be conflicting, but there seems good reason for believing that the Nien Fei in Shantung have successfully eluded the beleaguering force of the Imperialists.

Commercially, there is nothing new to report. Quotations are unchanged. Exchange Bank, 4 mos. sight 4s. 4¼d. to 4s. 4½d. Credit, 4s. 5d. The latest clearance for London from Canton with Teas is the *Hyacinth*, which left on the 18th inst. with 135,000 lbs. Black and 165,000 lbs. Green Teas.

COCHIN CHINA.

SAIGON.

A letter from this port, dated 29th September, says, "The British Gunboat *Leven*, Lieut. Cameron, arrived here on the 16th. She reported having captured and destroyed 13 piratical junks between Hong Kong and this.—She left on the 21st for Labuan. H. M. Steamer *Argus* arrived on the 27th from Hong Kong; after receiving provisions and coal, she will proceed on to Singapore.

"On the 14th instant the merchants entertained H. E. the Governor at a ball and supper. There were 20 ladies and about 200 gentlemen (including Army and Navy) present. Dancing was kept up till 3 A. M., and the entertainment was well appreciated.

"Several vessels are loading rice for Europe and Bourbon, and though it is now late in the season, business is fairly brisk. The correct exports of rice, to all quarters, from 1st January to date—are, 2,549,875 piculs, or over 150,000 tons!"

STRAITS SETTLEMENTS.

SINGAPORE.

Dates from this port are to the 2nd October. The outward mail of 17th August was delivered on the 20th September, and that of August 26th on the 1st October.

His Excellency the Governor arrived on the morning of the 2nd October in the colonial steamer *Peiho* from Malacca and Penang.

The following items are from the *Straits Times*:—

Whilst three European seamen belonging to the Dutch ship *Jeddo*, lying at New Harbour, were going on board a vessel moored alongside the Borneo Company's wharf, the plank from the vessel to the wharf gave way, and the men fell into the water. One of them was rescued with a few bruises, but the other two were drowned, and their bodies have not up to the present time been recovered.

As the mail steamer *Orissa* was proceeding out of the harbour on her voyage to China, she was signalled to heave to by H.M.S. steamer *Zebra*, which she did; when after a detention of upwards of half an hour, some mails were put on board from the *Zebra*, and she proceeded on her voyage. We are sorry to find an officer so much respected as Captain Pollard deservedly is exact from an overdue mail steamer an arbitrary and, we are certain, useless delay of this sort. What could have been the importance of Captain Pollard's half-a-dozen letters compared with that of the entire English mail to China?

Two Bills have been introduced, the first being a "Bill to Amend the Law relating to the mode of reviewing Summary Decisions of Magistrates of Police," and of a "Bill to Extend the Merchant Seamen's Act to Ships of the Colony." According to a memorandum accompanying it, "this Bill was moved into committee and the sections approved of, but an honourable member suggested that it should not be passed before having the opinion of his Honour the Chief Justice. The Bill was then forwarded to his Honour, who returned it without objection. Since then the Ordinance of the Hong Kong Government for the same purpose has been brought to notice, containing different provisions as to the payment of costs by magistrates, and the Bill is now amended, so as to agree with the Hong Kong Ordinance in this respect."

The second Bill, which is to extend the Merchant Seamen's Act to Government vessels of the colony, has the following memorandum attached to it:—"The Master Attendant has reported that he has found difficulty in managing the crews of the colonial steamers, owing to the want of any means for binding them by agreements to serve under the Merchant Seamen's Act of 1859. That Act provides that the Act shall not extend to ships belonging to or in the service of Her Majesty, and it has been doubted whether this exclusion extends to the vessels of the colony. The colonial vessels are not under the Naval Discipline Rules, and as some arrangement ought to be made for engagement and discipline of their crews, the present Bill is is introduced for the purpose."

The steamer *Telegraph* is advertised to run regularly between Singapore and Penang, calling at Malacca, from the the 20th of October.

The colonial steamer *Pluto* was advertised for sale by public auction on the 8th of October, with all her appurtenances.

The arrival at Singapore is announced of Rajah Brooke's steamer *Royalist*, Captain Thompson, from Greenock, with down to the 5th of May, having called at Queenstown and Simon's Bay. On the 1st of August, in lat. 37.8 S., lon. 27.5 W., Captain Halkesworth, commander of the *Royalist*, died of acute disease of the throat. The steamer was brought into this port under charge of Mr. Thompson, the chief officer. She was detained twenty-three days at the Cape, in order to allow the late captain to undergo medical treatment.

The British steamer *Adeline*, Captain Finlay, from Falmouth, with dates to the 11th June, arrived at Tanjong Paggar 26th September. This vessel when launched was named the *Victor*. She was afterwards purchased by the Confederate States Government, who fitted her out as a cruiser under the name of the *Rappahannock*.

THE FAILURE OF MACKELLAR AND CO.

(*North China Herald.*)

We have hitherto refrained from commenting on Messrs. Mackellar and Co.'s bankruptcy, expecting each week to see the Hankow local paper take up the subject. Two months, however, have elapsed since this event (one of the utmost importance to all connected with the port that paper represents) took place, and though Hankow editors generally can have had no plethora of other news to complain of, they appear as yet to have found no room in their columns for a review of this case. We think then we shall only be fulfilling a debt to our Shanghai readers, many of whom must have been personally interested, if we publish a few remarks on the evidence that has yet transpired.

Mr. W. G. Gordon, in his examination at the Hankow Consulate on the 6th July, begins by stating that the capital of the firm at the time of the formation of the partnership on the 1st July, 1862, was 30,000 taels, yet he goes on to admit that already in 1861 they were involved in land speculation to the extent of 200,000 taels, the capital to purchase which had been largely raised by loans. As the greater portion of such land—bought on speculation—must have been unproductive, we can only imagine, in the absence of a contrary statement, that this capital of 30,000 taels, a capital on which a new business was to be worked, had no actual cash existence.

Thus far as to capital; with regard to the business transacted on its base Mr. Gordon, in his examination, goes on to say. "In March to May 1867 we had no goods in our godowns or hands of constituents that were not under lien. We had no balance either in our own hands or in that of our bankers to any extent." Now in 1866 Messrs. Mackellar and Co. appear to have struck a balance showing a credit in favour of the business of tls. 32,000, against which, however, stood a doubtful Chinese debt of tls. 85,000, leaving Mackellar and Co. really some fifty thousand taels to the bad at the commencement of 1867, to which must be added another fifty thousand due on land over and above its actual value. Mr. Gordon then states that during 1867 "we were pressed by all our constituents to whom we are indebted—Blain, Tate and Co., Thorne and Co., Reid and Co., and Mr. Holdsworth—Harvey, Brand and Co., requested remittances, &c." We shall therefore be not far wrong, if, in the absence of any published accounts, we estimate that Messrs. Mackellar and Co. commenced this season with a known debt of Tls. 150,000 hanging over them, in addition to the expectation of having to meet heavy losses on home shipments then unaccounted for.

Under these circumstances, then, and just one month before their failure, they "went in" for tea, of which they bought in this short interval, in the face of most discouraging advices from Shanghai, no less than forty thousand chests. Having no money to pay for these large purchases, they appear to have obtained advances from the Chartered and other banks in Hankow, a portion of which they applied to the satisfying of the legitimate claims of the tea sellers; the balance, no less than one hundred and forty thousand taels, was paid away on various other accounts. These payments were thus actually made out of funds obtained by mortgaging goods for the cost of which Messrs. Mackellar and Co. were still indebted to the original owners. The extent of the wrong thus perpetrated on the sellers of tea is more clearly shown when we consider that after their very first purchases Messrs. Mackellar and Co. must have known from their Shanghai friends that instead of a margin of profit an actual loss was to be expected; yet with the knowledge of this and of their heavy previous liabilities, they continued to purchase and to mortgage more teas as the season went on, teas which too confiding teamen had entrusted to them. It is not our intention to scrutinize farther the payments of tls. 140,000 made in one month out of the money thus obtained; but many of the items demand a careful investigation. Of the teas thus shipped it appears that Messrs. Blain, Tate, and Co. were favoured with a margin of 40 per cent. on some teas consigned to them—said teas being actually wholly or entirely unpaid for. Others had margins put in their hands of only 20 per cent. Under these circumstances what does Mr. Gordon mean by saying "I anticipated no difficulty with the Chinese. I expected the margins back from Shanghai any day to pay up the taels 140,000." Did Mr. Gordon as a man of business positively expect that Messrs. Blain, Tate, and Co. and other old creditors to whom he shipped would actually return him these margins in preference to reimbursing themselves with the property thus placed in their hands? If not, what deduction is one compelled to draw from such facts? We fear that indeed the foreign name has been seriously disgraced in Hankow, and we can well account for the indignant proclamation of the Taotai there. Though written with a most unfair disregard of the countless instances of honest and liberal trading on the part of foreigners generally, it exhibits the state of feeling current among the Chinese at the port, a feeling which we fear will do more ultimate harm to the foreign trade of Hankow than all the other disasters of which the river trade has of late years been the unfortunate victim.

There are many other facts connected with this lamentable case which want of space compels us to pass over, though we think the subject deserves a further notice at our hands. We can only say now that it remains for the unfortunate creditors to insist on a clear statement of accounts, by which it is to be hoped that some of the obscure facts elicited from Mr. Gordon in his examination will be cleared up. If, as appears from the statement yet published, the debts of old creditors have been

Digitized by Google

alleviated at the expense of new ones, it rests with these new creditors to bestir themselves, and, even at a loss to the estate, to let our Chinese friends see that such dealings cannot go unchallenged even through the whitewash of a British Bankruptcy Court.

THE HONG KONG PENSION LIST.

(Daily Press.)

When we see the pension list growing at the rate of four names in a year, it is impossible to avoid reflections which need not be held to imply the least dissatisfaction at the fact that certain rewards are assigned to particular men, but which, at the same time, raise grave doubts as to the justice of the pension system which is established in this colony. A pension, to begin with, is in the nature of a gift, and whether a gift be great or small, it is hardly sound doctrine to make it at other people's expense. If the Hong Kong pensions were in any way conferred by Hong Kong, there would be less to say against them, because the total amount, so far as the system has been carried as yet, is not oppressive or out of proportion to the colonial revenue; but if the money is to be given out of our pocket, it seems hard that the Colonial-office at home should have the giving of it. This is a Crown colony, and the public servants are appointed, without any intervention on the part of the colonists. If all the people in the place were agreed in wishing to give any particular man a particular appointment, they would be utterly powerless in the matter, and must be content to see a stranger appointed by the Secretary of State at home. To say that the civil officers of the Government serve the colony, indeed, is a mistake. They serve John Bull, and administer an estate which he has bought in the China Sea, collect his rents from the tenants, and keep them in order for him. There is no reason at all why they should wear out the best years of their lives on the estate and not receive the same sort of rewards which are given to other men in his service at home. On the other hand, there would be no reason why the officials of Hong Kong should draw money from the Imperial exchequer if Hong Kong were in the position of other colonies, a little scrap of British territory where the residents enjoyed the same rights and privileges which they would exercise at home. It is just as unfair, however, to make Hong Kong, as it is, pay the pensions of people who are not in its service, though they reside here, as it would be if Hong Kong were such a colony as South Australia to saddle the civil service pensions on the Colonial-office. It would be bad enough if Hong Kong were merely expected to pension people in whose appointment it had no voice, and if the actual gift of the pension were decided by a vote of the Legislative Council; but as it is the applicant for a pension makes his bow in London to the Secretary of State, that gentleman takes his case into consideration, and if he takes a favourable view of it, graciously puts his hand into our pocket, "without so much as, 'by your leave'," and confers the pension. You cannot be generous with other people's money. It is worse than robbing Peter to pay Paul, because in that transaction it is assumed that you are in Paul's debt, and if you leave him unpaid you cheat him. It is robbing Peter to make Paul a present, which is a wholly indefensible proceeding. It is true that the Hong Kong pension system is only one of many anomalies observable in the Government of this singular colony, but as far as it goes it is an aggravating little anomally, which might be remedied by leaving the gift of pensions to the non-official members of the Legislative Council. Assuredly it is not the money which the Hong Kong taxpayers grudge, but the gratitude which the Home Government so meanly appropriates at their expense at present.

LIST OF PENSIONS.

Col. Caine, 5,040 dols.; E. R. Michell, 451 dols.; W. Chapman, 704 dols.; W. H. Mitchell, 758 dols.; Foo Shun, 140 dols.; Bishop Smith, 1,440 dols.; C. St. G. Cleverly, 2,000 dols.; J. C. Power, 960 dols.; Rev. J. J. Irwin, 1,280 dols.; W. T. Mercer, 8,248 dols.; Man Schoa, 277 dols.; total, 16,285 dols.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

ELLIOTT—On the 10th Sept., at Mrs. Boyle's, Hongque, Shanghai, Mrs. Elliott, of the Hotel, Woosung, of a son.

EMMERSON—On the 26th Sept., at 7, Beach-road, Singapore, the wife of Mr. C. Emmerson, of a daughter.

FARR—On the 14th Oct., at 333, City-road, the wife of F. Farr, Esq., late of Shanghai, of a daughter.

GRANT—On the 27th Aug., at Kiachta, Oriental Siberia, the wife of C. Mitchell Grant, Esq., of a daughter.

JAMIESON—On the 11th Sept., at Ningpo, the wife of W. B. Jamieson, Esq., of a son.

KUSTERMANN—On the 20th Sept., at Singapore, Mrs. F. Kustermann, of a son.

MARRIAGE.

HENDRIKS—MINJOOT.—On the 24th Sept., at St. Andrew's Church, by the Rev. Charles J. Waterhouse, M.A., Charles Edward Hendriks to Helena Gelenchy, youngest daughter of Mr. John Minjoot.

DEATHS.

COOK—On the 26th Sept., at Singapore, Capt. James Cook, late pilot of Bangkok.

CRUTCHETT—On the 5th Sept., at Shanghai, of cholera morbus, Mr. James H. Crutchett, aged 28, a partner in the firm of H. Fogg and Co.

DE THUY—On the 27th Sept., at Singapore, Madame Camille Arman de Melaine, the beloved wife of Mons. Paul Brasier de Thuy.

EARLE—On the 7th Sept., on board the s.s. Express, at Shanghai, suddenly, of heart disease, aged 33, Mr. William Earle, for three years chief officer in Messrs. Sassoon, Sons, and Co.'s employ.

COMMERCIAL REPORT.

CHINA AND JAPAN IMPORTS.

YOKOHAMA.—The inactivity in the Silk and Tea markets and consequent scarcity of money among the natives has reacted upon the import trade, which has been generally dull. Yarn has continued, however, in fair request, and stocks being light, holders are pretty firm. Grey Shirtings have been quiet, with a slight downward tendency, but not of sufficient importance to lower rates. White Shirtings are quite out of demand, but in Dyed something has been done. The inquiry for Black Velvets has continued, and these goods have again advanced in price. Some slight clearance of the enormous stock of Taffachelass has taken place. In Woollens and Woollen mixtures only SS Camlets have shown any activity, most other goods being dull at prices which are quite nominal. We may call importers' attention, however, to an addition to the list—that of Mousselines de laine, for which some demand is being evinced. Red and Imperial violet are the favourite colours. Metals are dull. In cotton there is nothing doing. The weather continuing unfavourable to native-grown Sugar and Rice, foreign importations have improved in demand and price. Cotton Yarn: All counts continue in fair inquiry, 28 to 32 being most in demand. Stocks are light. Grey Shirtings: Sales of 8 lbs. 4 to 6 oz. are reported at 0.05 lower. The staple has been generally in less demand, but Stocks are moderate and holders mostly firm. White Shirtings: In T-Cloths some small sales have been made at rates unchanged from those of last mail. Dyed Shirtings: Assortments with half gentian in them are worth $4.30; and we know of a sale of 1,000 pieces all blue at $4.60; but ordinary parcels are with difficulty placed at $4.00. Black Velvets are in good demand at an improvement in price; $11 is easily procurable for good colour.

TIENTSIN.—The import trade in British and American goods has undergone little change, the demand continuing of the most limited description, and rates for manufactures continuing to gradually go lower. 8¼ lbs. Grey Shirtings are quoted at taels 2.40 to taels 2.45, and 8½ lbs. White Shirtings at taels 2.55. The three or four traders who lately arrived from Shanse have not done any business in imports, and silver is extremely tight, so that it is almost impracticable to do business for cash, but only in barter.

SHANGHAI.—Simultaneously with the departure of the last mail a demand sprang up for Grey Shirtings, and a good business resulted at slightly higher rates. Since then the inquiry has almost entirely ceased, and prices have returned to their former level. T-Cloths, no change. Fancy Goods: Fair sales of D. Brocades at tls. 3 per piece. Long Ells: Some transactions in C.P.H. Scarlet at tls. 7.10; other woollens very dull. Metals—Iron, Nail Rod: There has been some excitement in this market, and dealers have appeared anxious to secure desirable assortments, for which tls. 2.70 has been freely paid. The small quantity known to be on the way encourages a hope of a firm market for some months. Coals: Prices have been well maintained for all descriptions; of house coal there has been an absolute dearth, and unless arrivals shortly take place this article will form a considerable item in domestic expenditure this winter.

There has been a little more business doing in the market for imported goods, but the movement is yet very far from anything like satisfactory. The arrival of three cargoes from London has no doubt affected the disposition of purchasers, more especially as by these arrivals some goods come to hand that were purchased during the excitement of two months ago "to arrive," and at a rate far above the present market value of them. T-Cloths are a shade lower, no more than $3 being offered for best chops 7lbs. There has been a little inquiry for Raw Cotton. Transactions include 1,000 pieces 8¼ Grey Shirtings at $3.40, 100 pieces common White Shirtings at $2.45, 500 pieces 6lbs. T-Cloths at $2.35, 50 bales Nos. 16-24 Cotton Yarn at $178, and 30 bales Nos. 28-32 at $185.

CHINA AND JAPAN EXPORTS.

TEA.

YOKOHAMA.—Business has been somewhat more restricted, unfavourable advices from America and Europe continuing, while the pretensions of the teamen remain unabated. Large arrivals have, however, taken place, and, money being very scarce in the native town, we might shortly have to record some improvement, if one or two purchasers now buying at rates which leave a distinct loss on last home quotations could be induced to suspend their operations. Settlements for the fortnight are 2,500 piculs, leaving a stock of 8,400 principally of medium and common kinds, the stock of fine tea not being much more than the odd 400 piculs. The only departure we have to report is the Yokohama for New York, with 381,251 lbs. The Pauline and Caractacus are on the berth for New York; the Conrad for London.

SHANGHAI.—Black Tea: Since the departure of the mail the market has been very quiet, only 7,000 chests having been placed at from Tls. 16 to 18½ for common to good Oonam, and Tls. 17½ to 22 for common to good Ningchow and Oopacks. Some of the later settlements are again cheaper, and lay down the Teas at last London prices, but the continued unsatisfactory advices from home quite discourage buyers. Arrivals from the river ports maintain the stock at 35,000 chests. Green Teas: There have been no purchases as yet for America, indeed, the demands of teamen are so far above the ideas of buyers, no offers have been made for that quarter. One large chop of fine Teenkai at Tls. 40, and seven small parcels of Fychow and Moyune at Tls. 32 to 37, have been settled for England, and they would probably go forward per steamer Achilles on the 25th of September. After her departure, and the probable increased supplies likely to come in, lower prices will no doubt be established. The present stock is about 45,000 packages.
